Powering 32 NORTH STREET

Point of Delivery: 50150150 Residential - Medium Density

Electricity $59.50

This is the cost of generating the electricity you used this period. Usage is measured in kilowatt-hours (kWh) and depends on the wattage of devices you use and how long you use them. The Ontario Energy Board (OEB) sets the cost per kWh and the **money collected goes directly to the electricity generators**.

Delivery..... $55.45

This is the cost of ensuring you have reliable power when you need it. **Hydro One collects this money** to build, maintain, and operate the electricity infrastructure, which includes power lines, steel towers and wood poles covering 960,000 sq. km. A portion of this cost is fixed and a portion varies depending on the amount of electricity used.

Regulatory Charges..... $3.19

The Independent Electricity System Operator (IESO) uses this money to manage electricity supply and demand in the province, which is necessary to ensure that there is enough electricity to meet Ontario's needs at all times.
