

# You are invited to our Public Information Centre Proposed Transformer Station in the Township of Chapple

Hydro One Networks Inc. (Hydro One) invites you to a Public Information Centre to learn more about the proposed transformer station (TS) in the Township of Chapple.

Hydro One has identified and evaluated a number of alternative sites for the new station, which will improve local electricity supply and provide more capacity in the area. Currently, the communities between Fort Frances and Rainy River receive their electricity supply from Fort Frances TS, located approximately 45 kilometres to the east of Chapple. Fort Frances TS is reaching its end-of-life and a new station is required in the area to serve local homes and businesses.

A preferred site has been identified and is located north of Highway 11 and west of Westover Road in the community of Barwick. The station will be connected to the existing 115 kV transmission line, as shown on the map below. The station would occupy an approximately 150 metre by 150 metre site.

This project is subject to provincial *Environmental Assessment Act* approval in accordance with the *Class Environmental Assessment for Minor Transmission Facilities*.

## Public Consultation

The Class EA process provides First Nations and Métis, the general public, government agencies and stakeholders an opportunity to comment on Hydro One's proposed project. We invite you to attend our Public Information Centre to learn more about the project and provide your feedback. You will have the opportunity to review the preferred location, site selection process and meet with our project team.

## Public Information Centre

Tuesday, August 25, 2009

4:00 p.m. – 8:00 p.m.

Chapple Recreation Centre

140 Main Street, Barwick
