

PROJECT UPDATE

Rodney Area Transformer Station (TS)

Hydro One Networks Inc. (Hydro One) is conducting a Class Environmental Assessment to build a new transformer station in the Chatham-Kent/West Elgin area. At our public information centre on June 14, 2007 at the Rodney Community Centre, we presented the study area for locating the new transformer station. A second public information centre was planned for fall of 2007 to present our preferred site for the new station.

This notice is to inform you that Hydro One is continuing to assess alternative locations within the study area. We expect to select a preferred station site in early 2008. At this time a second public information centre will be held. We will notify you of the date, time and location of the meeting once these details become available.

We appreciate your patience during the planning stage of the project. For more information please visit our project website at www.HydroOneNetworks.com/newprojects, or contact Marylena Stea toll free at 1-877-345-6799 or by email at Community.Relations@HydroOne.com
