

# You are invited to our second Public Information Centre Rodney Transformer Station

Hydro One Networks Inc. (Hydro One) invites you to our second Public Information Centre for the proposed Rodney Transformer Station (TS) as part of the Class Environmental Assessment (EA) process.

Hydro One has selected a preferred location for the new TS which will relieve supply problems at St. Thomas and Kent TS, the stations that currently serve the area. St. Thomas TS is reaching its end of life, and Kent TS is currently operating at capacity. This new station will improve the capacity of the electricity transmission system and ensure reliable supply for existing and future electrical needs in the Chatham-Kent and West Elgin areas.

The preferred site for the proposed station is located west of Duart Road, just north of Highway 401 in the Municipality of Chatham-Kent, as shown on the map below.

The proposed station will be connected to the existing 230 kV transmission line which parallels the north side of Highway 401. The required in-service date of the station is December 2010.

This project is subject to the provincial *Environmental Assessment Act* in accordance with the *Class EA for Minor Transmission Facilities*.

## Public Information Centre

This Public Information Centre (PIC) will give you an opportunity to learn more about the preferred location for Rodney TS, provide your input, and learn about the next steps in the EA process. A draft Environmental Study Report will be available after the PIC for a 30-day public comment and review period.

## Date and Location

Tuesday April 7, 2009

4pm to 8pm

Highgate Community Hall

291 King Street South

Highgate, ON
