

Notice of Commencement and Invitation to Public Information Centre #1

Tremaine Transformer Station Class Environmental Assessment

Hydro One Networks Inc. (Hydro One) invites you to a Public Information Centre to learn more about its plans to reinforce electricity supply in southern Halton Region.

Hydro One's Palermo Transformer Station (TS) that supplies power to the local distribution companies that serve customers in Milton, Burlington and Oakville has reached its capacity. Therefore, Hydro One is initiating a Class Environmental Assessment (EA) for a new transformer station within the study area, as shown on the map below. A new transformer station will ensure an adequate and reliable supply of power to meet growing electricity demand in the region.

The proposed station, being referred to as Tremaine TS for the purposes of this Class EA, would initially consist of two 230/28 kilovolt (kV) transformers, connected to the existing double-circuit 230 kV transmission lines.

This project falls under the *Class Environmental Assessment for Minor Transmission Facilities* process, in accordance with the provincial *Environmental Assessment Act*.

Public Information Centre (PIC)

At our Public Information Centre, you will have an opportunity to learn more about the project and provide your input to members of our project team.

Please join us on:

Thursday, April 30, 2009
5:00 p.m. – 9:00 p.m.
Oakville Soccer Club
1520 Pine Glen Road, Oakville

A second PIC will be held later this year to present alternative sites for the station and seek public input on Hydro One's preferred site.
