Etobicoke Greenway Project Open House

Project details

Electricity demand from homes, businesses, and public transit initiatives is growing in the City of Toronto. To help meet this growth Hydro One is preparing to begin construction in February 2024 to rebuild and energize an existing non-operational transmission line into a new 230kV transmission line. Please see map of corridor area on reverse. We invite you to join our next community house to speak with our project team and learn more about planned construction activities, timelines and what you can expect.

Map Legend

- ① 115 kV Transmission Lines (being upgraded to 230 kV)
- ② 230 kV Transmission Lines
- ★ Transformer Station

- Roads
- Railway
- Watercourse
- Waterbody
- Municipal Boundaries
