Re: Letter of delegation for the Bowmanville Switching Station Expansion

Dear Karola Tóth,

I am writing regarding Hydro One Networks Inc.'s (Hydro One) proposed expansion of the existing 500-kilovolt (kV) Bowmanville Switching Station (the Project) to enable the connection of Ontario Power Generation's Darlington New Nuclear Project (DNNP) to Hydro One's transmission network.

The Ministry of Energy and Mines (MEM) understands that to support the connection of new Small Modular Reactors (SMRs) at the DNNP, the Project will require an expansion of the existing switching station by approximately 14 hectares, on lands owned by Ontario Power Generation and leased by Hydro One. New infrastructure within the expanded footprint will include a Gas Insulated Switchgear (GIS) building, new entrance structures and up to four transformers supplying two 230 kV area circuits.

MEM understands that Hydro One has commenced a Class Environmental Assessment for Transmission Facilities (TF Class EA) for the Project, with a Notice of Commencement issued in August 2025. Construction of the Project is expected to begin in early 2027, with completion targeted by 2032 to ensure the station is ready ahead of the SMRs coming online. The Project will also require Ontario Energy Board (OEB) Leave to Construct under Section 92 of the Ontario Energy Board Act.

Duty to Consult Delegation

The Government of Ontario (the Crown) has a constitutional duty to consult and, where appropriate, accommodate Indigenous communities when it has knowledge of established or credibly asserted Aboriginal or treaty rights protected under section 35 of Canada's *Constitution Act 1982* (s. 35 rights) and contemplates conduct that might adversely affect those rights (duty to consult).

Consultation conducted under the TF Class EA is a means by which the Crown can determine if any concerns from Indigenous communities about potential adverse impacts to their s. 35 rights have been considered and, where appropriate, accommodated.

Although the legal duty to consult remains with the Crown, the Crown may delegate the procedural aspects of consultation to project proponents. The procedural aspects of the duty to consult are those portions of consultation related to the process of consultation, such as sharing information, holding meetings and/or receiving comments. Project proponents are typically best positioned to speak to the specific planning, technical and environmental aspects of projects and, where appropriate, to consider possible ways to address or mitigate any concerns raised by Indigenous communities about potential impacts of the project. The Crown remains responsible for the substantive aspects of consultation such as providing oversight of the consultation process and ensuring the adequacy of consultation with communities to whom the duty to consult is owed.

MEM is the primary contact for the Crown's preliminary assessment of the duty to consult, while the Ministry of the Environment, Conservation and Parks (MECP) retains overall responsibility for the Class EA process and the administration of the *Environmental Assessment Act* and its regulations. MECP is also the primary contact for questions regarding the consultation requirements of the TF Class EA. Accordingly, MEM may be involved early in the project planning process for facilities subject to the TF Class EA to determine whether there may be a duty to consult, and if so, to identify the communities to consult and to delegate to proponents the procedural aspects of consultation.

Based on MEM's review of the information provided by Hydro One with respect to the Project, including the nature and location of the Project and anticipated environmental effects, and the Crown's current understanding of asserted or established s. 35 rights in the Project area, MEM has determined that the Crown owes a duty to consult to Indigenous communities in respect of the Project. On behalf of the Crown, MEM is delegating, through this letter, the procedural aspects of any consultation owed in respect of the Project to Hydro One.

Please see the appendix for detailed information on the respective roles and responsibilities of the Crown and Hydro One regarding the TF Class EA. You should seek guidance from MEM if you are unclear about your roles and responsibilities under this process.

Preliminary Assessment

Based on the Crown's preliminary assessment of established and credibly asserted s. 35 rights and understanding of potential Project impacts at this time, Hydro One should consult with the following Indigenous communities:

Consultation at the low end of the consultation spectrum requires Hydro One to, at minimum, notify the communities about the Project; share information about the Project and provide an opportunity for the community to comment. Any issues raised by the community should be discussed and considered in light of the potential to impact rights, with mitigation or other forms of accommodation identified where appropriate. The information provided to communities and the time for its review, should be sufficient for communities to determine if the Project may impact their rights. Hydro One's notice of the Project to the community could include a request to confirm whether the communities believe the Project will impact their rights and accordingly whether they are interested in being consulted. Hydro One should be able to demonstrate how any concerns were considered and responded to, and, as appropriate, what impact they had on the Project decisions moving forward.

Should no response be received from the communities noted above, Hydro One should continue to provide high-level notifications in accordance with Project stage milestones which include changes to the scope of the Project, if any. Should information become available throughout the consultation process to suggest that Project impacts may warrant a deeper level of consultation, Hydro One must inform MEM so that updated guidance may be provided.

This consultation list is subject to change based on new information becoming available or changes to the scope of the Project. Indigenous communities may make new rights assertions at any time, and further Project-related developments can occur that may require additional communities to be notified and/or consulted. A community may also

indicate they are not interested in being consulted in respect of the Project. If any of the above should occur, Hydro One must notify MEM immediately so that updates to the consultation list can be assessed. Additionally, we recommend that you contact MEM if you are unsure about how to respond to a concern raised by an Indigenous community, particularly if the concern relates to a potential adverse impact on established or asserted s.35 rights.

Acknowledgement

Through receipt of this letter, Hydro One acknowledges this Crown delegation and the procedural consultation responsibilities in this letter and detailed in the appendix. If you have any questions, you may contact me or Allison Palmer, Senior Policy Advisor, Indigenous Energy Policy by email at Allison.Palmer@ontario.ca or by phone at (416) 312-4761.

Should the Project be exempt from Ontario's *Environmental Assessment Act*, the delegation described in this letter is no longer in effect.

I trust that this information provides clarity and direction regarding the respective roles of the Crown and Hydro One. If you have any questions about this letter or require any additional information, please contact me directly.

Sincerely,

Shannon McCabe

APPENDIX: ROLES AND RESPONSIBILITIES OF THE PROPONENT AND THE CROWN RELATED TO CONSULTATION WITH INDIGENOUS COMMUNITIES

Roles and Responsibilities Delegated to the Proponent (Hydro One)

Please refer to the letter above for specific guidance on the Project. On behalf of the Crown, please be advised that your responsibilities as Proponent for this Project also include:

- providing notice and information about the Project to the Indigenous community/communities (“communities”), with sufficient detail and at a stage in the process that allows the communities to prepare their views on the Project and, if appropriate, for changes to be made to the Project. This can include:
 - accurate, complete and plain language information including a detailed description of the nature and scope of the Project and translations into Aboriginal languages where appropriate, such as:
 - maps of the Project location and any other affected area(s);
 - information about the potential negative effects of the Project on the environment, including their severity, geographic scope and likely duration. This can include, but is not limited to, effects on ecologically sensitive areas, water bodies, wetlands, forests, species at risk and/or the habitat of species at risk;
 - a description of other provincial or federal approvals that may be required in relation to the Project;
 - whether the Project is on privately owned or Crown controlled land;
 - any information the Proponent may have on the potential effects of the Project, including particularly any likely adverse impacts on their s. 35 rights;
 - a written request asking the Indigenous communities to provide in writing or through a face-to-face meeting:
 - any information available to the communities that should be considered by the Proponent when preparing the Project documentation;
 - any information the communities may have about any potential adverse impacts on their Aboriginal or treaty rights;
 - any suggested measures for avoiding, minimizing or mitigating potential adverse impacts on their s. 35 rights;
 - information about how information provided by the Indigenous communities as part of the consultation process will be collected, stored, used, and shared for their approval;
 - identification of any mechanisms that will be applied to avoid, minimize or mitigate potential adverse impacts on their s. 35 rights;
 - identification of a requested timeline for response from the communities and the anticipated timeline for meeting Project milestones following each notification;

- an indication of the Proponent's availability to discuss the process and provide further information about the Project;
- the Proponent's contact information; and
- any additional information that might be helpful to the communities;
- following up, as necessary, with Indigenous communities to ensure they received Project notices and information and are aware of the opportunity to comment, raise questions or concerns and identify potential adverse impacts on their established or asserted s. 35 rights;
- gathering information about how the Project may adversely affect s.35 rights including land use and traditional knowledge;
- bearing the reasonable costs associated with the procedural aspects of consultation (paying for meeting costs, making technical support available, etc.) and considering reasonable requests by communities for capacity funding to support a community's participation in the consultation process;
- considering and responding to comments and concerns raised by Indigenous communities and answering questions about the Project and its potential impacts on s. 35 rights;
- as appropriate, discussing and implementing changes to the Project in response to concerns raised by Indigenous communities. This could include modifying the Project to avoid or minimize an impact on a s. 35 right (e.g., altering the season when construction will occur to avoid interference with mating or migratory patterns of wildlife); and
- informing Indigenous communities about how their concerns were taken into consideration and whether the Project proposal was altered in response. It is considered a best practice to directly provide the Indigenous community with a copy of the Consultation record as part of this step for verification.

If you are unclear about the nature of a concern raised by an Indigenous community, you should seek clarification and further details from the community, provide opportunities to listen to community concerns and discuss options, and clarify any issues that fall outside the scope of the consultation process. These steps should be taken to ensure that the consultation process is meaningful and that concerns are heard and, where appropriate, addressed.

You can also seek guidance from the Crown at any time. It is recommended that you contact the Crown if you are unsure about how to deal with a concern raised by an Indigenous community, particularly if the concern relates to a potential adverse impact on established or asserted s.35 rights.

Should information become available throughout the consultation process to suggest that Project impacts will be significant enough to warrant a deeper level of consultation, you must inform the Crown so that updated guidance can be provided.

Should information be provided that may impact the list of communities identified for consultation by the Crown, you must notify ENERGY immediately.

The consultation process must maintain sufficient flexibility to respond to new information, and we request that you make all reasonable efforts to build positive relationships with all Indigenous communities potentially affected by the Project. If a community is unresponsive to efforts to notify and consult, you should nonetheless make attempts to update the community on the progress of the Project, the environmental assessment (if applicable) and other regulatory approvals.

If sub-contractors are retained by the Proponent to support the procedural aspects of consultation undertaken by the Proponent, Indigenous communities should be made aware of the sub-contractor's role and the Proponent should inform the Crown if any issues concerning established or asserted s. 35 rights arise.

If you reach a business arrangement with an Indigenous community that may affect or relate to the Crown's duty to consult, we ask that that Crown be advised of those aspects of such an arrangement that may relate to or affect the Crown's consultation obligations, and that the community itself be apprised of the Proponent's intent to so-appraise the Crown. Whether or not any such business arrangements may be reached with any community, the Crown expects the Proponent shall fulfill all of its delegated procedural consultation responsibilities to the satisfaction of the Crown.

If the Crown considers that there are outstanding issues related to consultation, the Crown may directly undertake additional consultation with Indigenous communities, which could result in delays to the Project. The Crown reserves the right to provide further instructions or add communities throughout the consultation process.

Roles and responsibilities assumed directly by the Crown

The role of the Crown in fulfilling any duty to consult in relation to this Project includes:

- identifying for the Proponent, and updating as appropriate, the Indigenous communities to consult for the purposes of fulfillment of the Crown's duty to consult;
- carrying out, from time to time, any necessary assessment of the extent of consultation or, where appropriate, accommodation, required for the Project to proceed;
- supervising the aspects of the consultation process delegated to the Proponent;
- determining in the course of Project approvals whether the consultation of Indigenous communities was sufficient;
- determining in the course of Project approvals whether accommodation of Indigenous communities, if required, is appropriate and sufficient.

Consultation Record

It is important to ensure that all consultation activities undertaken with Indigenous communities are fully documented and the Proponent shall prepare a consultation record. This includes all attempts of the Proponent (or any sub-contractors or consultants retained by the Proponent to support the procedural aspects of consultation undertaken by the Proponent) to notify or consult the community, all interactions with and feedback from the community, and all efforts to respond to community concerns. The Crown and Crown regulators require a complete consultation record in order to assess whether Aboriginal consultation has been adequately discharged. The consultation record should include, but not be limited to, the following:

- a list of the identified Indigenous communities that were contacted;
- records that reflect that notices and Project information were distributed by the proponent to, and received by, the Indigenous communities and were received (via courier slips, follow up phone calls, etc.). Where a community has been non-responsive to multiple efforts to contact the community, a record of such multiple attempts and the responses or lack thereof;
- a written summary of consultations with Indigenous communities and appended documentation such as copies of notices, any meeting summaries or notes including dates, where and when the meeting took place and who attended, and any other correspondence (e.g., letters and electronic communications sent and received, dates and records of all phone calls);
- Sub-contractors, if any, that are retained by the Proponent to support the procedural aspects of consultation undertaken by the Proponent, information about their role and how Indigenous communities were made aware of the sub-contractor's role as well as any issues that may have arisen concerning established or asserted s. 35 rights.
- responses and information provided by Indigenous communities during the Consultation process. This includes information on Aboriginal or treaty rights, traditional lands, claims, or cultural heritage features and information on potential adverse impacts by the Project on such Aboriginal or treaty rights and measures for avoiding, minimizing or mitigating potential adverse impacts to those rights; and
- a summary of the rights/concerns, and potential adverse impacts of the Project on Aboriginal or treaty rights or to sites of cultural significance (e.g., burial grounds, archaeological sites), identified by Indigenous communities; how comments or concerns were considered or addressed by the proponent; and any changes to the Project as a result of consultation, such as:
 - changing the Project scope or design;
 - changing the timing of proposed activities;
 - minimizing or altering the site footprint or location of the proposed activity;
 - avoiding impacts to the Aboriginal interest;

- environmental monitoring; and
- other mitigation strategies.

As part of its oversight role, the Crown may, at any time during the consultation and approvals stage of the Project, request records from the Proponent relating to consultations with Indigenous communities. Any records provided to the Crown will be subject to the *Freedom of Information and Protection of Privacy Act*, however, may be exempted from disclosure under section 15.1 (Relations with Aboriginal communities) of the Act. Additionally, please note that the information provided to the Crown may also be subject to disclosure where required under any other applicable laws.

It is considered a best practice to share the consultation record with the Indigenous community prior to finalizing it to ensure it is a robust and accurate record of the consultation process.

Hydro One noted an agenda item on confidential file sharing and storage and asked attendees to confirm they were comfortable with the shortened meeting. Hydro One also advised that access to data sharing folders would be provided and asked each Nation to confirm whether all attendees should receive access and to identify any additional individuals who require it.
2025-10-06	Email	Incoming	Ceara Das Julie Kapyrka	Alderville First Nation emailed Hydro One noting that during the site visit for the Project during the week of September 29, 2025, deer tracks were identified along the fencing of the site and that the camera trap's location was facing away from the tracks, towards the forest. Alderville First Nation requested that the cameras be turned in the direction of the fenced-in facilities in order to provide a better picture of what animals were travelling within close proximity to the facilities.
2025-10-07	Email	Outgoing	Ceara Das Julie Kapyrka	Hydro One emailed Alderville First Nation noting appreciation for feedback regarding deer tracks identified during the site visit for the Project during the week of September 29, 2025. Hydro One noted that it was engaging other Hydro One staff to further discuss the issue.
2025-10-10	Email	Outgoing	Ceara Das Julie Kapyrka	Hydro One emailed Alderville First Nation to report that its environment team had reviewed the deer tracks identified at the Project site. Staff had also observed deer in the area and noted that other species—such as rabbits, raccoons, foxes, and coyotes—would be expected to use the cleared area based on habitat conditions. Hydro One explained that these species were already accounted for in the planned mitigation measures to be included in the ESR scheduled for February 2026, and therefore no additional studies were planned. The environment team invited Alderville First Nation to share any recommended mitigation measures for inclusion in the ESR.
2025-10-14	Email	Incoming	Julie Kapyrka	Alderville First Nation emailed AECOM noting appreciation for providing the required administrative documentation for participation in the Project's fieldwork and noted that they would complete the required forms. Alderville First Nation also inquired about invoice submissions.
2025-10-15	Email	Outgoing	Julie Kapyrka	Hydro One emailed Alderville First Nation confirming that participation time for the October 1, 2025 fieldwork could be included under the current agreement and provided answers to Alderville' questions regarding financial details and logistic, including invoice submissions. Hydro One proposed a follow-up call on October 16, 2025, to confirm details and ensure alignment.

AECOM requested that all comments be submitted by March 18, 2025. AECOM inquired if Curve Lake First Nation would be interested in participating in the field work programs, which were anticipated to be begin in mid-April to mid-May 2025 with confirmatory aquatic habitat assessments, Ecological Land Classification, and three-season botanical inventory.
2025-02-28	Email	Outgoing	Francis Chua Kayla Wright Paige Williams	AECOM, on behalf of Hydro One, emailed Curve Lake First Nation inquiring if it had interest in participating in the field program identified in the Ecology Field Work Plan for the Project and provided a brochure regarding Hydro One's Indigenous participation requirements on Hydro One project sites.
2025-03-04	Email	Incoming	Francis Chua Kayla Wright Paige Williams Support Email	Curve Lake First Nation submitted comments on the Project's field work plan and noted that Beacon Environmental deployed 56 monitors in its study area and identified eight bat species: Big Brown Bat, Silver-haired Bat, Hoary Bat, Eastern Red Bat, Little Brown Myotis, Northern Myotis, Eastern Small-footed Myotis, and Tri-colored Bat. Curve Lake First Nation emphasized that all identified species except the Big Brown Bat are listed as endangered under Ontario's ESA. Given the presence of critical habitat, Curve Lake First Nation recommended comparing results from the new acoustic survey—both species presence and community structure—to previous findings to assess potential impacts from other developments, and to include this comparison in the cumulative effects assessment. CLFN asked why no fish surveys were planned for watercourses, noting potential Species at Risk. CLFN expressed interest in participating in field work if scheduling allowed.
2025-03-10	Meeting		Francis Chua Julie Kapyrka Kayla Wright Mandy Mcgonigle Paige Williams Rob Lukacs	Hydro One and their consultant TMHC met with Alderville First Nation, Curve Lake First Nation, Hiawatha First Nation, and Minogi Corp. to discuss archaeology on Hydro One projects. Discussion included the plan to redo archaeology on Holt SS and Bowmanville SS; including an enhanced survey methodology brought up by AFN. Additionally, there were discussions on both document control and artifact repatriation protocols.

2025-03-13	Email	Outgoing	Francis Chua Kayla Wright Paige Williams Support Email	AECOM, on behalf of Hydro One, acknowledged receipt of Curve Lake First Nation's comments on the Field Work Plan. AECOM noted that bat acoustic monitoring results could be compared to Beacon Environmental's findings for the same ELC polygons in terms of species presence. They explained that species abundance cannot be compared using acoustic data, though call file counts can be used to infer activity levels. AECOM added that a previous report summarizing call files by detector location could support comparisons for the cumulative effects assessment and that the Field Work Plan could be updated accordingly. AECOM explained that during initial background review, study area limits were not yet confirmed, so a precautionary approach was taken by expanding fieldwork boundaries. They noted that if fieldwork identifies potential habitat, adequate water depth, or connectivity to Lake Ontario that could support aquatic SAR within the drain along the railway corridor, they would consult MECP and DFO as needed. AECOM also acknowledged Curve Lake First Nation's interest in participating in fieldwork.
2025-03-14	Email	Outgoing	Francis Chua Kayla Wright Paige Williams	AECOM, on behalf of Hydro One, emailed Curve Lake First Nation noting that Hydro One had confirmed that Curve Lake First Nation was working with an environmental consultant for planned environmental field monitoring for the Project. AECOM requested administrative information for participation in the fieldwork.

2025-04-02	Email	Outgoing	Francis Chua Kayla Wright Paige Williams Support Email	AECOM, on behalf of Hydro One, emailed Curve Lake First Nation providing the finalized administrative documentation for signature and discussed financial details within. AECOM also noted that they were anticipating the commencement of field surveys on or around April 15, 2025. AECOM provided details on the field studies expected to be conducted during the initial fieldwork. AECOM provided a detailed schedule outlining the anticipated dates for reference. AECOM requested that Curve Lake First Nation confirm availability to participate in field surveys scheduled to take place on, or around April 15, 2025. AECOM noted that additional details regarding start times, meeting locations, and logistics would be provided closer to the fieldwork dates.
2025-04-02	Email	Incoming	Francis Chua Kayla Wright Paige Williams Support Email	Curve Lake First Nation emailed AECOM with updated mailing information for Formal Notices. Curve Lake First Nation asked whether up to two monitors could be sent at a time within the existing budget, or whether doing so would reasonably increase costs, and requested that the monitors be added if feasible. Curve Lake First Nation noted it would need to manage scheduling, redundancy, knowledge transfer, and post monitoring task assignments. Curve Lake First Nation also requested Hydro One's mailing address.

2025-07-07	Email	Outgoing	Francis Chua Kayla Wright Paige Williams Paola Cueva	AECOM, on behalf of Hydro One, apologized to Curve Lake First Nation for the short notice regarding field work on July 8, 2025. AECOM explained that some July 2–3 surveys were not completed due to weather and safety concerns involving poison ivy covering a bat acoustic monitor and trail camera. Outstanding tasks included breeding bird surveys, retrieving one bat acoustic monitor, and checking one trail camera. Given the breeding bird survey window (May 24–July 10), AECOM aimed to complete the remaining work on July 8. AECOM provided logistical details for July 8, including a meeting location link, planned survey activities, attending staff and their contact information, and required PPE. Due to the poison ivy risk, staff would bring additional protective gear. AECOM asked to be informed if any staff planned to attend.

Curve Lake First Nation recommended using a staggered, two step tree clearing process to better protect bats that may use trees for winter torpor, noting this would enhance protection for SAR bats beyond current protocols. Curve Lake First Nation also requested that installing bat nesting boxes be required rather than only “considered,” and advised incorporating best practices such as monitoring temperature and humidity, installing more boxes with varied designs and solar exposures, completing installations before summer and prior to exclusion work, and maintaining habitat connectivity with native vegetation planting. Curve Lake First Nation requested that meadow creation or restoration using Milkweed for Monarch habitat, as well as invasive species removal and control, be implemented rather than merely considered. They also recommended targeted turtle protection measures—including exclusion fencing and avoiding sensitive timing windows—highlighting the species’ cultural significance to the Michi Saagig. Curve Lake First Nation further asked whether Hydro One would consider integrating green infrastructure features into the Project’s design to help manage stormwater runoff.

2025-02-11	Meeting		Kawartha Nishnawbe First Nation, Nodin Webb	Hydro One met with Kawartha Nishnawbe First Nation to provide an introductory meeting to three major projects in the Hydro One South East Portfolio: Durham Kawartha Power Line, Holt Switching Station and Bowmanville Switching Station Expansion. Hydro One provided a brief overview of each project scope, timelines and current status as well as opportunities for Indigenous involvement such as archaeology studies and field monitoring opportunities. Capacity funding to support Kawartha Nishnawbe First Nation was also discussed.
2025-02-18	Email	Outgoing	Jack (Giiwednang) Hoggarth, Nodin Webb	AECOM, on behalf of Hydro One, emailed Kawartha Nishnawbe First Nation providing the Ecology Field Work Plan for the Project for review and comment. AECOM requested that all comments be submitted by March 18, 2025. AECOM inquired if Kawartha Nishnawbe First Nation would be interested in participating in the field work programs, which were anticipated to be begin in mid-April to mid-May 2025 with confirmatory aquatic habitat assessments, Ecological Land Classification, and three-season botanical inventory. AECOM noted that if Kawartha Nishnawbe First Nation did not have its own monitoring agreements that one could be provided during the week of February 24, 2025.
2025-02-18	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation emailed AECOM noting its interest in consulting with them on field work programs for the Project. Kawartha Nishnawbe First Nation noted its availability for virtual consultation bookings during the week of March 3, 2025. Kawartha Nishnawbe First Nation noted that it was a non-funded First Nation, and its council works voluntarily. Kawartha Nishnawbe First Nation noted it must schedule ahead and plan to take time off from full-time jobs for consultations and require the funding to adequately engage. Kawartha Nishnawbe First Nation noted that it would provide an invoice for funding for a virtual meeting. Kawartha Nishnawbe First Nation requested that AECOM provided its availability for the scheduling of a meeting.
2025-02-20	Email	Outgoing	Nodin Webb	AECOM, on behalf of Hydro One, emailed Kawartha Nishnawbe First Nation noting appreciation for its acknowledgement of its interest in participating in field work programs for the Project. AECOM noted that while it was a consultant providing information on behalf of Hydro One, it understood that Kawartha Nishnawbe First Nation held a meeting with Hydro One during the week of February 10, 2025, and should therefore reach out to Hydro One should it have any other questions.
2025-02-28	Email	Outgoing	Jack (Giiwednang) Hoggarth, Nodin Webb	AECOM, on behalf of Hydro One, emailed Kawartha Nishnawbe First Nation inquiring if it had interest in participating in the field program identified in the Ecology Field Work Plan for the Project. AECOM noted that the Ecology Field Work Plan was originally provided to Kawartha Nishnawbe First Nation on February 18, 2025, and provided a copy of the Ecology Field Work Plan for convenience. AECOM noted that if Kawartha Nishnawbe First Nation had interest in participating in the field program that liability insurance, WSIB and a monitoring agreement would be required. AECOM provided a brochure regarding Hydro One's Indigenous participation requirements on Hydro One project sites. AECOM noted that if Kawartha Nishnawbe First Nation did not have its own agreement, AECOM would share its agreement for consideration. AECOM requested that if Kawartha Nishnawbe First Nation was interested in participating but not able to meet the requirements, that it inform the Hydro One team for a discussion on how the Project could support participation. AECOM noted that it would aim to provide a reminder for the field program two weeks prior to commencement, but only those with completed agreements would have the field logistics provided, including meeting time and location.

2025-02-28	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation emailed AECOM confirming their interest in discussing how to make it possible for their members to participate in field studies for the Project. Kawartha Nishnawbe First Nation noted it would require a consultation to discuss the matter. Kawartha Nishnawbe First Nation noted its appreciation for being contacted about the Project and that they were interested to consult on the matter. Kawartha Nishnawbe First Nation provided its availability for virtual consultation bookings during the week of March 10, 2025, between 1:00 p.m. and 4:00 p.m. Kawartha Nishnawbe First Nation noted that they were a non-funded First Nation and their council worked voluntarily. Kawartha Nishnawbe First Nation noted it must schedule meetings ahead of time and plan to take time from full-time jobs for consultations and required funding to adequately engage. Kawartha Nishnawbe First Nation noted that it would provide an invoice for funding for a virtual meeting. Kawartha Nishnawbe First Nation requested that AECOM provided dates of availability for a meeting.
2025-02-28	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation noting that to its understanding a meeting had been held between Kawartha Nishnawbe First Nation and Hydro One staff regarding Hydro One's southeast projects portfolio which included the Project. Hydro One noted that AECOM is one of Hydro One's consultants supporting the projects previously discussed and if there were any questions or comments about participation on any of the projects Hydro One would be the best point of contact rather than the consultants. Hydro One noted that identified staff would be returning from absence during the week of March 3, 2025.
2025-02-28	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation (KNFN) emailed Hydro One noting that Hydro One should not continue outreach if it is going to pass the engagement on to Hydro One's Indigenous Relations team each time. KNFN noted that replying to multiple emails of such nature is time consuming for KNFN.
2025-08-26	Email	Outgoing	Jack (Giiwednang) Hoggarth, Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation providing the Notice of Commencement for the Bowmanville Switching Station Project. Hydro One noted that the Project was commencing in order to expand the 500-kilovolt Bowmanville Switching Station to connect Ontario Power Generation's Darlington New Nuclear Project to Hydro One's transmission network. Hydro One noted that a phone call could be scheduled to provide an update and overview of the Project and other projects in the area. Hydro One requested that Kawartha Nishnawbe First Nation confirm if there was interest in a phone call so that Hydro One could suggest meeting times. Hydro One noted that it could also provide an update email with details on the status of all the projects. Hydro One noted that it was once again providing an offer for a site visit at Kawartha Nishnawbe First Nation's availability.

Date	Type of communication	Origin	Stakeholders	Summary
2025-08-26	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation noting that Hydro One would cover the costs for a site visit. Hydro One noted that to its understanding, Kawartha Nishnawbe First Nation's team did not have the time/capacity to get a formal agreement set up and preferred to provide Hydro One with an invoice for expenses which it would be reimbursed for by cheque. Hydro One noted that it could set up a formal agreement if Kawartha Nishnawbe First Nation wanted but that they were also able to continue with the invoice and reimbursement method.
2025-10-10	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation providing a Capacity Funding Agreement (CFA) for the Durham Kawartha Power Line project and requested that Kawartha Nishnawbe First Nation sign and return the CFA. Hydro One noted that once the CFA was signed, Hydro One would reach out regarding payment information. Hydro One noted that the funding could be used for the time spent reviewing the Environmental Study Report. Hydro One noted that it would be resuming archaeology work on October 21, 2025, and requested that if Kawartha Nishnawbe First Nation wished to send monitors that they could be put in contact with the staff coordinating the work. Hydro One noted that the monitor's expenses could also be covered by the CFA payment.
2025-10-10	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation emailed Hydro One providing a signed Capacity Funding Agreement. Kawartha Nishnawbe First Nation noted that it would send a monitor for the archaeological work scheduled for October 21, 2025, if Hydro One could provide contact information for the purpose of developing the agreement specific to archaeological work.
2025-10-10	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation acknowledging receipt of the signed Capacity Funding Agreement (CFA). Hydro One requested that Kawartha Nishnawbe First Nation provide an address for the submission of a cheque. Hydro One noted that it would request that its contractor contact Kawartha Nishnawbe First Nation regarding monitoring information and the CFA.
2025-10-10	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation emailed Hydro One providing capacity funding payment address information.

2026-03-10	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation providing updates on projects including the Durham Kawartha Power Line, Holt Switching Station, Bowmanville Switching Station, and introduced the Bowmanville to East GTA project. Hydro One provided presentation slides outlining the status of projects and noted it was preparing for the field season and monitoring opportunities. Hydro One noted that the Holt Switching Station and Bowmanville Switching Station projects were located within Ontario Power Generation (OPG) property but monitoring opportunities may be available to Kawartha Nishnawbe First Nation. Hydro One noted that there would be project reports for review. Hydro One invited Kawartha Nishnawbe First Nation to advise if a call would be useful to discuss the information further and offered to connect Kawartha Nishnawbe First Nation with the individuals in charge of the field crews for monitoring, if interested.
2026-03-11	Email	Incoming	Nodin Webb	Kawartha Nishnawbe First Nation (KNFN) emailed Hydro One noting interest in sending liaisons to any monitoring opportunities and requested to be connected with appropriate crews. KNFN noted they could provide a copy of their insurance if it was not already on file. KNFN inquired if a virtual consultation to review slides, reports, and the invoice process going forward, was possible, noting that their schedule was flexible.
2026-03-31	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation to confirm they would send a link for a video meeting so they could share their screen.
2026-04-01	Invitation	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation providing an invitation for a meeting on April 1, 2026, to discuss project updates.
2026-04-16	Email	Outgoing	Nodin Webb	Hydro One emailed Kawartha Nishnawbe First Nation, noting that the Project had released its draft Environmental Study Report (ESR) for a 30-day review by First Nation partners before being posted to the public for the 30-day comment period. Hydro One noted that due to its size, the draft ESR had been uploaded directly to the Blackberry Workspace that Hydro One staff could provide access to for review. Hydro One noted that to cover review time, Hydro One staff were working on a multi-project agreement that should cover Kawartha Nishnawbe First Nation's review time for the Project as well as the others. Hydro One noted that rather than needing to provide an invoice for each review, a monthly/quarterly invoice for all the work conducted could be submitted at one time. Hydro One noted that it was hoping to provide the multi-project agreement during the week of April 20, 2026, for review.

2025-06-04	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, emailed Mississaugas of Scugog Island First Nation providing a tentative schedule for surveys planned for the Project. AECOM noted it planned to be on site conducting further surveys on June 17 and 18, 2025, and July 2 and 3, 2025. AECOM requested that Mississaugas of Scugog Island First Nation confirm their availability to attend on any of the provided dates.
2025-06-04	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, emailed Mississaugas of Scugog Island First Nation to inform them that the field work scheduled for June 5, 2025, had been rescheduled to June 6, 2025, due to weather forecasts. AECOM requested confirmation of Mississaugas of Scugog Island First Nation's availability to attend the field work on the new date. AECOM noted that identified staff would be unavailable until June 10, 2025, and requested that any replies regarding availability be provided to all staff members on the email chain so that they could provide further logistics regarding meeting times and locations.
2025-06-06	Email	Outgoing	Don Richardson Kelly LaRocca Nicole Mastrangelo Rob Lukacs Sam Shrubsole	Hydro One emailed Mississaugas of Scugog Island First Nation following the Ministry of Energy's announcement of the Project. Hydro One noted that while it was working to confirm some of the details of the Project, based on internal review, the Project would qualify for Hydro One's 50/50 equity partnership model.
2025-06-09	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, apologized to Mississaugas of Scugog Island First Nation for the short notice and explained that not all surveys scheduled for June 6, 2025, were completed. Because bat acoustic monitoring requires at least 10 nights of data, the remaining monitors needed to be deployed on June 10, 2025, and other surveys previously planned for June 17–18 were shifted to June 18–19, 2025. AECOM provided the updated schedule. AECOM requested confirmation of attendance for the rescheduled surveys and noted that one administrative item was still required.

2025-07-03	Email	Outgoing	Don Richardson Emily Ferguson Kayla Ponce De Leon Rob Lukacs Sam Shrubsole	Hydro One emailed Mississaugas of Scugog Island First Nation to request a meeting to discuss the Project and any concerns or feedback they may have had. Hydro One proposed dates during the week of July 7, 2025.
2025-07-04	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, emailed Mississaugas of Scugog Island First Nation providing a field work summary for July 2, 2025, and July 3, 2025. AECOM noted that field work conducted on July 2, 2025, was under sunny conditions and that activities performed included retrieving ARUs, taking down bat acoustic monitors, and conducting ELC. AECOM noted that field work conducted on July 3, 2025, was under partly cloudy conditions and activities performed included retrieving bat acoustic monitors, conducting breeding bird surveys, and ELC. AECOM noted that there were no additional findings on either date.
2025-07-07	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, apologized to Mississaugas of Scugog Island First Nation for the short notice regarding field work on July 8, 2025. AECOM explained that some July 2–3 surveys were not completed due to weather and safety concerns involving poison ivy covering a bat monitor and trail camera. Remaining tasks included breeding bird surveys, retrieving one bat acoustic monitor, and inspecting one trail camera. With the breeding bird survey window closing on July 10, AECOM aimed to complete the work on July 8. AECOM provided logistical details for July 8, including a meeting location link, planned surveys, attending staff contacts, and required PPE. Due to poison ivy risks, staff would bring additional protective gear. AECOM asked to be informed if any MSIFN staff planned to attend.
2025-07-09	Email	Outgoing	Alison Fraser Consultation Email Don Richardson Nicole Mastrangelo Rob Lukacs	AECOM, on behalf of Hydro One, emailed Mississaugas of Scugog Island First Nation providing a field work summary for July 8, 2025. AECOM noted that field work was conducted under partly cloudy conditions and included breeding bird surveys, acoustic monitor collection, and trail camera maintenance. AECOM noted that no Species at Risk (SAR) were observed during the survey. AECOM noted that the only Species of Conservation Concern (SOCC) recorded was a barn swallow observed flying over the parking lot near an identified station. AECOM noted that poison ivy was abundant near a trail camera and another location.
