

Connect New Darlington Project

Notice of Commencement and Invitation to Community Open House

February 2023

Project Description

To support Ontario Power Generation's (OPG) Darlington New Nuclear Project, Hydro One is initiating a Class Environmental Assessment (Class EA) to build a new 22 km transmission line that can carry up to 500 kilovolts (kV) in the Municipality of Clarington. This project will connect the Darlington New Nuclear Project to the electricity system and support energy needs in Durham Region and beyond.

The proposed transmission line will be located in an existing corridor between OPG's Darlington's facility and Hydro One's Clarington Transformer Station, as shown on the map. Once constructed, the new transmission line will look similar to the existing infrastructure in the corridor.

The Class EA Process

The Class EA will follow the "Class Environmental Assessment for Minor Transmission Facilities" (Class EA, 2022), in accordance with the *Ontario Environmental Assessment Act*. This process applies to transmission infrastructure projects that are carried out routinely and have predictable environmental effects that can be readily managed to ensure that potential natural, economic, social, and cultural effects are thoroughly considered before a project begins.

Following approval from the *Ontario Energy Board* under Section 92 (Leave to Construct) of the Ontario Energy Board Act, and the successful completion of the Class EA process, construction would commence in 2024 and be completed by 2027.

We Want to Hear From You

Early, meaningful and open engagement is a top priority for Hydro One. Receiving feedback from Indigenous communities, members of the public, businesses, government agencies, and other interested parties will be instrumental to inform all aspects of the Class EA and project. We invite you to join our upcoming Community Open House to learn more about the project, ask our team questions and provide feedback.

Freedom of Information and Protection of Privacy Act

All personal information included in your request – such as name, address, telephone number and property location – is collected, under the authority of Section 30 of the *Environmental Assessment Act* and is collected and maintained for the purpose of creating a record that is available to the general public. As the information is collected for the purpose of a public record, the protection of personal information provided in the Freedom of Information and Protection of Privacy Act (FIPPA) does not apply (s.37). Personal information you submit will become part of the available public record unless you request that your personal information remain confidential.
