

COMMUNITY OPEN HOUSE

September 2019

Class Environmental Assessment for Lakeshore Transmission Stations Project

Hydro One is progressing through the Class Environmental Assessment (Class EA) in support of the Lakeshore Transmission Stations Project, in the Town of Lakeshore. The project is needed to meet the growing electricity needs of southwestern Ontario and increase the capacity of the existing 230kV transmission system in Essex County.

The project is subject to the “Class Environmental Assessment for Minor Transmission Facilities” (Hydro One, 2016), in accordance with the Ontario *Environmental Assessment Act*. On June 26, 2019, Hydro One held a Community Information Centre (CIC) to provide the public with information on the project, including the Class EA process, study area, and the various alternatives for the new transformer stations. Based on research and consultation conducted to date, the preferred alternative for the project has been selected, which consists of a high-voltage switching station (SS) and a separate transformer station (TS). The map below shows the preferred alternative for the project.

Please join us for our upcoming second CIC to learn more about the Project and to speak with members of our project team.

Please join us on:

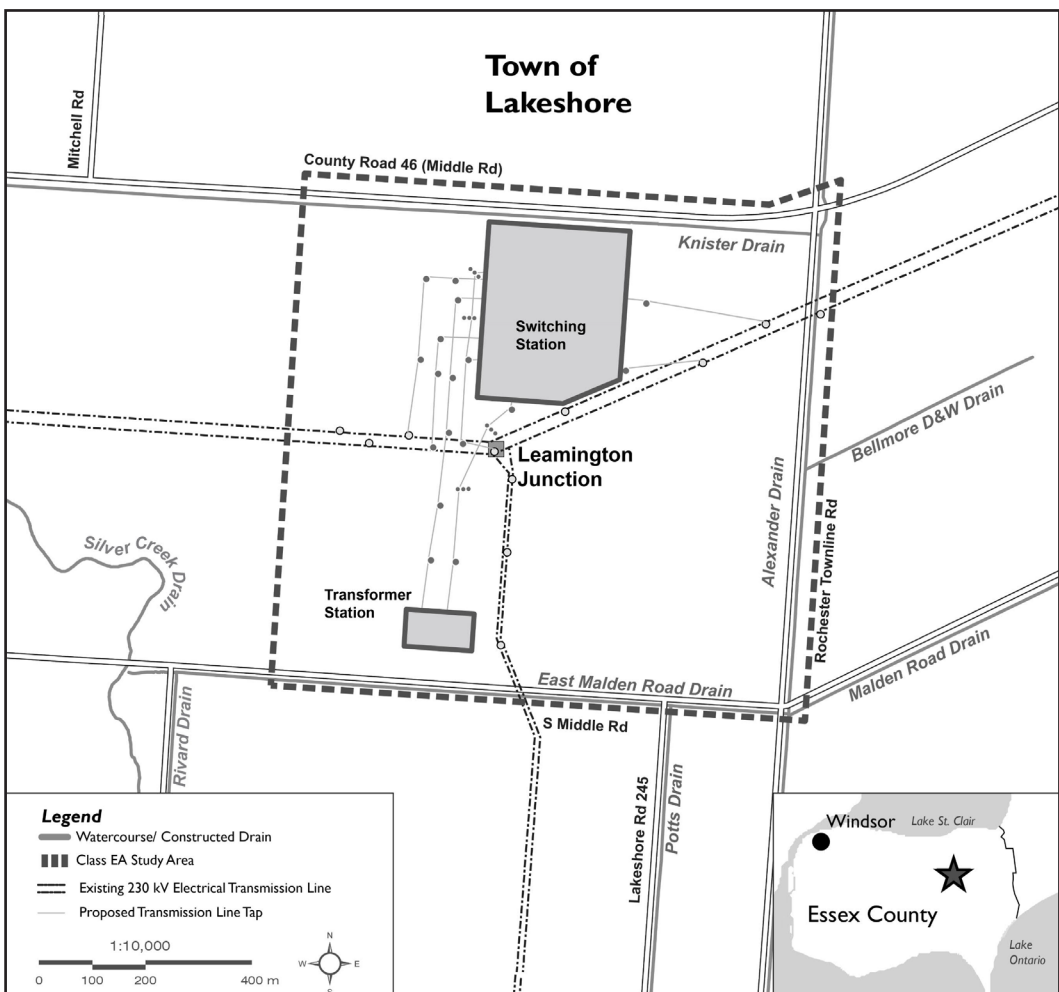

Tuesday, October 1, 2019
5:00 p.m. – 8:00 p.m.
Comber & District Community Centre
6211 McAllaster Street, Comber

We welcome your comments and feedback. Contingent on the outcome of the Class EA process, construction could begin as early as mid-2020 and is expected to be completed by the end of 2023.

For more information

If you have questions or would like any additional information about the project, please contact:
