

Notice of completion of the final Environmental Report

Northeast Power Line

July 2026

Hydro One has completed the final Environmental Report (ER) for the Northeast Power Line project. The proposed project involves building a single-circuit, 500-kilovolt (kV) transmission line between Hanmer Transformer Station (TS) in Greater Sudbury and Mississagi TS, located near Wharncliffe. The line will be constructed parallel to an existing transmission line between the two stations within a combined corridor. This project includes a reconfiguration and expansion of both stations to accommodate the new line.

In October 2025, the Ministry of the Environment, Conservation and Parks (MECP) published a new regulation specific to the project. Requirements include the completion of several technical studies and engagement with Indigenous communities, government agencies, interest groups and community members. As a part of the regulation, the draft ER was available for public review and comment from Monday, February 2 to Thursday, March 19, 2026. We thank everyone who took the time to review and provide comments.

For more information on the project and the environmental process, visit HydroOne.com/NortheastPowerLine. For a map of the project route, please see the next page.

The final ER and associated materials are now available on our website.

The report summarizes the environmental process that was completed for this project.
