Wabigoon Lake RV Park	2020-10-16	Email	Outgoing	Frank & Elaine Wetelainen	Community Relations Inbax	Hydro One emailed Wabigoon Lake RV Park to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wabigoon Lake RV Park	2020-12-01	Email	Outgoing	Frank & Elaine Wetelainen	Community Relations Inbax	Hydro One emailed Wabigoon Lake RV Park to provide a postcard with an update on the Project.
Wasaya Airways LP						
Wasaya Airways LP	2020-10-16	Email	Outgoing	Sharon Smith-Baxter	Community Relations Inbax	Hydro One emailed Wasaya Airways LP to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wasaya Airways LP	2020-12-01	Email	Outgoing	Sharon Smith-Baxter	Community Relations Inbax	Hydro One emailed Wasaya Airways LP to provide a postcard with an update on the Project.
Wataynikaneyap (Watay) Power						
Wataynikaneyap (Watay) Power	2020-10-16	Email	Outgoing	Margaret Kenequanash Stephen Cookson	Community Relations Inbax	Hydro One emailed Wataynikaneyap (Watay) Power to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wataynikaneyap (Watay) Power	2020-12-01	Email	Outgoing	Margaret Kenequanash Stephen Cookson	Community Relations Inbax	Hydro One emailed Wataynikaneyap (Watay) Power to provide a postcard with an update on the Project.
Wilderness Canoe Association						
Wilderness Canoe Association	2020-10-16	Email	Outgoing	Gary Ataman	Community Relations Inbax	Hydro One emailed Wilderness Canoe Association to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wilderness Canoe Association	2020-12-01	Email	Outgoing	Gary Ataman	Community Relations Inbax	Hydro One emailed Wilderness Canoe Association to provide a postcard with an update on the Project.
Wildlands League						
Wildlands League	2020-10-16	Email	Outgoing	Janet Sumner	Community Relations Inbax	Hydro One emailed Wildlands League to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wildlands League	2020-12-01	Email	Outgoing	Janet Sumner	Community Relations Inbax	Hydro One emailed Wildlands League to provide a postcard with an update on the Project.
Wildlife Conservation Society						
Wildlife Conservation Society	2020-10-16	Email	Outgoing	Justina Ray	Community Relations Inbax	Hydro One emailed Wildlife Conservation Society to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wildlife Conservation Society	2020-12-01	Email	Outgoing	Justina Ray	Community Relations Inbax	Hydro One emailed Wildlife Conservation Society to provide a postcard with an update on the Project.
Wildlife Habitat Canada						
Wildlife Habitat Canada	2020-10-16	Email	Outgoing	Cameron Mack	Community Relations Inbax	Hydro One emailed Wildlife Habitat Canada to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wildlife Habitat Canada	2020-12-01	Email	Outgoing	Cameron Mack	Community Relations Inbax	Hydro One emailed Wildlife Habitat Canada to provide a postcard with an update on the Project.
Wisk Air						
Wisk Air	2020-10-16	Email	Outgoing	Mark Wiskemann	Community Relations Inbax	Hydro One emailed Wisk Air to advise that the ToR had been submitted to the MECP. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECP.
Wisk Air	2020-12-01	Email	Outgoing	Mark Wiskemann	Community Relations Inbax	Hydro One emailed Wisk Air to provide a postcard with an update on the Project.

WAASIGAN TRANSMISSION LINE
 AMENDED TERMS OF REFERENCE • RECORD OF CONSULTATION
 Appendix D: Other Stakeholders Record of Consultation

Other Stakeholders - Record of Consultation

Organization	Date	Type of Communication	Origin	Stakeholders ¹	Staff Members	Summary
	2020-10-13	Email	Incoming		Emily Spitzer	Two Thunder Bay District residents emailed Hydro One to inquire if the transmission line for the Project will run through the northside or southside of their property.
	2020-10-14	Phone	Outgoing		Emily Spitzer	Hydro One called a property owner to inquire if he would like a hard copy of the ToR or an executive summary and supporting maps. It was confirmed that Hydro One would send the materials to the property owner.
	2020-10-15	Email	Outgoing		Emily Spitzer	Hydro One responded to an email from the two Thunder Bay District residents who had inquired about the route of the transmission line. Hydro One advised them that the final route will not be determined until the EA phase in 2021. Hydro One then provided an overview of the EA phase to the property owner.
	2020-10-16	Email	Outgoing		Community Relations Inbox	Hydro One emailed members of the public to advise that the ToR had been submitted to the MECF. A copy of the Notice of the ToR Submission was provided as an email attachment. Hydro One encouraged review of the ToR, and provided information on how to submit comments to the MECF.
	2020-10-20	Phone	Incoming		Community Relations Inbox	A property owner left a voicemail for Hydro One to request to speak with someone about the Project.
	2020-10-21	Email	Incoming		Community Relations Inbox	Two residents of Gorham emailed Hydro One to express concerns regarding the proposed transmission line through Lappe. The residents noted alternative route 1 was within close proximity to their residence. The residents noted the selected route should be closer to highways, to minimize impacts to wildlife and less developed areas and provided input towards alternative routes 1 and 1B.
	2020-10-21	Email	Incoming		Community Relations Inbox	A property owner in Dryden City emailed Hydro One to inquire if Hydro One was proposing to use the existing transmission line for the Project route.
	2020-10-22	Other	Outgoing		Dayna Groom	Following safety measures, Hydro One dropped off maps and the executive summary directly to the home of the member of the public who had previously expressed interest in the Project, but does not have a computer, to accommodate his needs, as per request.
	2020-10-22	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to inquire where they could find a more detailed map of the proposed transmission line for the Project.
	2020-10-22	Email	Incoming		Community Relations Inbox	A resident of the Lappe area emailed Hydro One to express concern about routing due to proximity to their residence and noted their preference that the Project be routed along corridors already in use for transmission lines.
Ministry of the Environment, Conservation and Parks (MECP)	2020-10-22	Email	Outgoing		Community Relations Inbox Sarah Cohanim	Hydro One emailed the Lappe area resident, copying MECF to the email, to thank them for providing comments regarding paralleling transmission corridors for the new line. Hydro One noted the resident's input had been documented and would be taken into consideration when evaluating the alternative routes during the EA.
Ministry of the Environment, Conservation and Parks (MECP)	2020-10-22	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had requested where to find a detailed map of the proposed transmission line for the Project, copying MECF to the email. Hydro One provided information regarding the proposed ToR document and noted where the alternative routes identified in the ToR could be found.
	2020-10-23	Phone	Outgoing		Emily Spitzer	Hydro One called the property owner who had previously left a voicemail for Hydro One to request to speak with someone about the Project. The property owner advised he found the community notice map in the Notice of the ToR Submission to be illegible. Hydro One advised they would send a hardcopy of the map to the property owner's address. The property owner expressed concerns regarding the proposed line following alternative route 1C and Hydro One's practices. Hydro One advised that no preferred route had been selected and noted the Project was in a public review period. Hydro One provided the contact information at the MECF to submit comments to.
Ministry of the Environment, Conservation and Parks (MECP)	2020-10-23	Email	Outgoing		Community Relations Inbox	Hydro One emailed the two residents of Gorham who had expressed concerns of the transmission line through Lappe, copying MECF to the email. Hydro One thanked the residents for their interest in the proposed Project and for providing comments regarding alternative route 1 and 1B. Hydro One noted their input had been documented and would be taken into consideration when evaluating the alternative routes during the EA. Hydro One additionally provided information about the proposed ToR.
	2020-10-23	Email	Incoming		Community Relations Inbox	A resident emailed Hydro One to request that Hydro One send them a map of the planned transmission line(s) between Kakabeka Falls and the Highway 11/Highway 17 divide at Shabaqua.
Ministry of the Environment, Conservation and Parks (MECP)	2020-10-26	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner in Dryden who had inquired about one of the proposed routes for the Project, copying MECF to the email. Hydro One provided information on the proposed ToR. Hydro One noted that for the alternative route in discussion, they were unable to consider the existing right-of-way for the new transmission line due to safety and technical requirements, and advised that they would need to widen the existing right-of-way to accommodate the new infrastructure.
Ministry of the Environment, Conservation and Parks (MECP)	2020-10-26	Email	Outgoing		Community Relations Inbox	Hydro One emailed the resident who had requested that Hydro One send them a map of the planned transmission line(s) between Kakabeka Falls and the Highway 11/Highway 17 divide at Shabaqua, copying MECF to the email. Hydro One provided a brief overview of the route assessment process and attached a map for the relevant section.
	2020-10-30	Phone	Outgoing		Stephanie Hodsoll	Hydro One called the resident of Thunder Bay who had previously left a voicemail to discuss the ToR. The resident noted general support for the Project and declined a request to be added to the Project contact list, wishing Hydro One well in its endeavor.
	2020-10-30	Phone	Outgoing		Community Relations Inbox	A resident of Thunder Bay called Hydro One and left a voicemail asking Hydro One to call them back to discuss the ToR.
	2020-11-03	Other	Outgoing		Dayna Groom	Hydro One sent the resident who had requested hardcopies of Project documents: a hardcopy of the Project maps and a copy of the executive summary of the ToR submission.
	2020-11-05	Phone	Outgoing		Emily Spitzer	Hydro One called a resident to follow-up on a call the resident had with the MECF regarding concerns with the interactive mapping and questions regarding whether the Project would impact them. The resident noted appreciation for the call, but requested Hydro One call back on another day, and provided their availability.
Ministry of the Environment, Conservation and Parks (MECP)	2020-11-05	Email	Outgoing		Community Relations Inbox	Hydro One emailed a member of the public, copying MECF to the email, to note their input had been documented and would be taken into consideration when evaluating the alternative routes during the EA. Hydro One provided a brief overview of the ToR and confirmed the member of the public would be added to the Project contact list.
	2020-11-09	Phone	Outgoing		Emily Spitzer	Hydro One called a resident to follow-up on a call the resident had with the MECF regarding concerns with the interactive mapping and questions regarding whether the Project would impact them. The resident requested to be added to the Project contact list and suggested that Hydro One consider running project updates in The Kam Lander, a local bulletin/community newspaper. Hydro One subsequently provided a Project update, and noted they would consider using The Kam Lander. Hydro One encouraged other residents interested in Project to contact them to be added to the Project contact list.
	2020-11-09	Email	Incoming		Community Relations Inbox	A property owner emailed Hydro One to note their objection to route 1A, due to close proximity to their property.
	2020-11-11	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had expressed concern of route 1A due to close proximity to their property to note their concerns had been documented and would be taken into consideration when evaluating the alternative routes during the EA. Hydro One advised that the final route had not yet been selected and noted routes would be further investigated and assessed during the EA. Hydro One noted that effects to built areas would be considered when completing the alternative route evaluation.
	2020-11-13	Email	Outgoing		Community Relations Inbox	Hydro One emailed the resident who had suggested Hydro One should consider running project updates in The Kam Lander to confirm the resident had been added to the Project contact list. Hydro One requested if the resident could provide the contact information for the local newspaper, or advise how they could get in touch with someone who manages the paper.
	2020-11-29	Email	Incoming		Community Relations Inbox	A property owner emailed Hydro One to inquire when the preferred route would be decided so that they could find out if their property lies along the proposed transmission line route.
Ministry of the Environment, Conservation and Parks (MECP)	2020-12-01	Email	Incoming		Sarah Cohanim	MECP emailed the member of the public who had inquired about harnessing hydro energy from the local Dryden pulp mill, copying Hydro One to the email. MECF provided a response to the inquiry from the Independent Electricity System Operator to address supply capacity in the area.
	2020-12-01	Email	Outgoing		Community Relations Inbox	Hydro One emailed members of the public to provide a postcard with an update on the Project.
	2020-12-01	Email	Incoming		Community Relations Inbox	Two Thunder Bay District residents emailed Hydro One to thank them for providing the postcard with a Project update.
	2020-12-02	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had inquired about the preferred route selection timeline to advise that the final route had not yet been selected and noted routes would be further investigated and assessed during the EA. Hydro One noted effects to built areas would be considered when completing the alternative route evaluation. Hydro One advised that if the resident provided their property address, they would consider and assess the resident's property proximity to the alternative routes.
	2020-12-05	Email	Incoming		Community Relations Inbox	The property owner who had inquired about the preferred route selection timeline emailed Hydro One to provide their address. The resident noted timelines within the ToR, and requested that Hydro One provide clarification as to when they could expect the preferred route to be selected.

 AMENDED TERMS OF REFERENCE • RECORD OF CONSULTATION
 Appendix D: Other Stakeholders Record of Consultation

Organization	Date	Type of Communication	Origin	Stakeholders ¹	Staff Members	Summary
	2020-12-09	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request to be added to the Project contact list.
	2020-12-10	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had inquired about the preferred route selection timeline to provide further information regarding route selection timelines and the EA process.
	2020-12-11	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had requested to be added to the Project contact list to confirm they had been added and would receive future Project updates via email.
Friends of Quetico Park	2020-12-11	Email	Incoming		Community Relations Inbox	A resident emailed Hydro One to express their concerns regarding the proposed route's close proximity to Quetico Provincial Park.
	2020-12-11	Email	Incoming		Community Relations Inbox	The property owner who had inquired about the preferred route selection timeline emailed Hydro One to thank them for providing more detailed information. The resident inquired if they would be informed of the preferred route in the Spring of 2021.
	2020-12-12	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request to be added to the Project contact list. The member of the public noted they had comments to add about the alternative routes, and requested that Hydro One advise where to send the comments.
	2020-12-14	Other			Bruce Hopper Emily Spitzer	Hydro One ran a social media ad on Facebook, targeted to people living in northwestern Ontario. The intent of the ad was to raise awareness of the project in northwestern Ontario, while adding a human element to virtual engagement (i.e., introducing the project team). The ad ran for 10 days from December 14 to December 24, 2020.
	2020-12-14	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had inquired about the preferred route selection timeline to advise that they would be notified when a preferred route is selected. Hydro One provided an overview of the consultation opportunities that will be available prior to the selection of the preferred route, and thanked the property owner for their input and engagement.
	2020-12-14	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had noted they had comments to add about the alternative routes to confirm they had been added to the Project contact list. Hydro One provided additional information about the Project, and requested the member of the public direct their comments to the current Hydro One email address they were corresponding with. Hydro One noted the comments provided would be documented and considered in the EA.
	2020-12-15	Email	Incoming		Community Relations Inbox	The member of the public who had noted they had comments to add about the alternative routes emailed Hydro One to inquire if the goal for the main route was to follow existing corridors and highways as much as possible.
	2020-12-15	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had noted they had comments to add about the alternative routes to note there were currently several alternative routes being considered. Hydro One noted that through consultation to date, following existing infrastructure was deemed important to various groups.
	2020-12-15	Email	Incoming		Community Relations Inbox	The member of the public who had noted they had comments to add about the alternative routes emailed Hydro One to thank them for their response.
	2020-12-15	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to suggest Hydro One create more detailed maps of the alternative routes. The member of the public expressed their concerns regarding impacts to the Turtle Lake area, including aesthetics, cottage subdivisions, electromagnetic radiation, and future herbicide application.
	2020-12-15	Email	Incoming		Community Relations Inbox	The member of the public who had emailed Hydro One to suggest Hydro One create more detailed maps emailed Hydro One to follow-up on their previous note. The member of the public noted they had not clicked on all of the provided attachments, and requested Hydro One disregard the suggestion to provide more detailed maps. The member of the public advised their concerns regarding the Turtle Lake area were still standing.
	2020-12-17	Email	Outgoing		Community Relations Inbox	Hydro One emailed the resident who had expressed concerns regarding the proposed route's close proximity to Quetico Provincial Park to provide additional information on the preferred route selection process. Hydro One noted Quetico Provincial Park would be considered during the EA.
	2020-12-17	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had provided information regarding the Turtle Lake area to note their feedback would be considered through the EA. Hydro One provided additional information on the preferred route selection process. Hydro One noted effects to built areas would be considered during the EA.
	2020-12-17	Email	Incoming		Community Relations Inbox	A resident in the Lappe area emailed Hydro One to inquire if the preferred route had been selected.
	2020-12-18	Phone	Incoming		Community Relations Inbox	A City of Dryden resident left a voicemail for Hydro One to request to be added to the Project contact list.
	2020-12-18	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to inquire where to send their resume for employment.
	2020-12-21	Phone	Outgoing		Stephanie Hodsoll	Hydro One called the City of Dryden resident to follow-up on the voicemail the resident had left regarding the Project contact list. The resident noted they had not received any Project updates and requested that hardcopies of the Project documents be sent to them, as they do not have email. Hydro One provided an overview of the Project and advised that hardcopies of the Project documents would be mailed to the residents address in January 2021.
	2020-12-21	Email	Outgoing		Community Relations Inbox	Hydro One emailed the resident in the Lappe area who had inquired if the preferred route had been selected to advise that the preferred route had not been selected yet. Hydro One provided an overview of the preferred route selection process, and noted they had received other feedback from residents in the Lappe area, which would be considered in the evaluation of the alternative routes. Hydro One noted there would be future consultation opportunities for the Project.
	2020-12-21	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had inquired where to send their resume for employment to advise them the Project was not at the point of hiring for construction yet. Hydro One directed the member of the public to their job board, and noted they would add them to the Project contact list to receive future updates.
	2020-12-21	Email	Incoming		Community Relations Inbox	The resident in the Lappe area who had inquired if the preferred route had been selected emailed Hydro One to thank them for responding to their inquiry.
	2020-12-21	Email	Incoming		Community Relations Inbox	The member of the public who had inquired where to send their resume for employment emailed Hydro One to thank them for responding to their inquiry.
	2021-01-05	Email	Incoming		Emily Spitzer	Two Thunder Bay District residents emailed Hydro One to advise that they had heard that a corridor had been cut on the east side of Thunder Bay. The residents asked Hydro One where the corridor would be cut on the west side of Thunder Bay. The residents also asked Hydro One to specify whether it would be on the north or south side of the existing transmission line.
Sunset Trail Riders	2021-01-06	Phone	Outgoing		Emily Spitzer	Hydro One called a member of the Sunset Trail Riders snowmobile club to seek clarification regarding an inquiry/request received from MNO Region 1 about adding the Sunset Trail Rider member to the Project contact list. The Sunset Trail Rider member clarified that they are a general member of the public, not a MNO member. The Sunset Trail Rider member noted that the snowmobile club would like to be engaged by Hydro One on the Project, as the club will have interest in creating better trails, that are easier to maintain, in the area. The member added that the Sunset Trail Riders currently maintain many trails between the Manitoba border to Thunder Bay, many of which are already using transmission corridors. Hydro One noted he would be added to the contact list and he would be advised when the EA begins, which will provide engagement opportunities with the club.
Sunset Trail Riders	2021-01-06	Email	Outgoing		Community Relations Inbox	Hydro One emailed a member of the Sunset Trail Riders snowmobile club to follow-up on a phone call had earlier that day. Hydro One confirmed that the member was added to the Project contact list and therefore would receive Project updates moving forward. Hydro One requested that if there are other Sunset Trail Rider members who should be kept informed of the Project, and would like to be added to the Project contact list, that they contact Hydro One. Contact information for Hydro One's Community Relations department was provided.
	2021-01-07	Email	Outgoing		Emily Spitzer	Hydro One emailed the two Thunder Bay District residents in response to their email received on January 5, 2021. Hydro One noted that the residents may be referring to NextBridge's East-West-Tie project which is east of Thunder Bay and asked the residents to confirm. Hydro One provided a summary of the current status of the Project, noting that the ToR was submitted to the MECP and is currently pending approval. Hydro One noted that once the Minister approves the ToR, Hydro One will commence the EA and continue assessing and evaluating the alternative routes. Hydro One summarized how a preferred route is determined, including studies to be done, and consultation opportunities provided. Hydro One reiterated understanding the residents' preference that if the transmission line follows alternative route 1A, that the transmission line follow along the south side of the residents' property. Hydro One noted that the residents' input is important and that the comments provided will be considered in the route evaluation process. Hydro One offered to have a call with the residents, if desired, to discuss further.
	2021-01-07	Email	Incoming		Emily Spitzer	Two Thunder Bay District residents emailed Hydro One to thank them for the helpful information in response to their initial inquiry (i.e., email sent to Hydro One on January 5, 2021).
	2021-01-10	Email	Incoming		Community Relations Inbox	A Thunder Bay resident emailed Hydro One to inquire about alternative route 1B, noting that the route intersects their property. The resident inquired if property owners have a say in the Project. The resident noted that they are against route 1B, and asked Hydro One if more information could be provided regarding the route options. The resident provided their contact information, including property address.
	2021-01-12	Email	Outgoing		Community Relations Inbox	Hydro One emailed a Thunder Bay resident in response to their inquiry regarding alternative route 1B (i.e., email received Jan. 10, 2021). Hydro One provided a brief overview of the Project, including the current stage of the Project (i.e., ToR submission to the MECP, pending ToR approval, and next steps for the EA). Hydro One noted appreciation for the resident's feedback regarding alternative route 1B. Hydro One explained how alternative routes were determined, and provided an online link to where the resident could view interactive route mapping for more information. Hydro One noted that feedback from property owners is valued and that the resident's comments have been documented. Hydro One advised that more engagement opportunities will be available

 Appendix D: Other Stakeholders Record of Consultation

Organization	Date	Type of Communication	Origin	Stakeholders ¹	Staff Members	Summary
						as the Project progresses. Hydro One noted that the resident was added to the Project contact list so they can stay informed of upcoming Project milestones and engagement opportunities.
	2021-01-22	Email	Incoming		Community Relations Inbox	A Thunder Bay District resident emailed Hydro One to inquire if there had been any progress on the transmission line route selection and requested any information available be provided.
	2021-01-27	Email	Outgoing		Community Relations Inbox	Hydro One emailed the Thunder Bay District resident in response to their inquiry regarding an update on the transmission line route selection (i.e., email received Jan. 22, 2021). Hydro One provided a brief introduction/overview of the Project, including the current stage of the Project (i.e., ToR submission to the MECP, pending ToR approval, and next steps for the EA). Hydro One noted that more engagement opportunities would be available before a preferred route is selected, and Hydro One will contact the resident with details about these opportunities in the coming months, pending ToR approval.
Sunset Trail Riders	2021-02-12	Email	Outgoing		Community Relations Inbox	Hydro One emailed a member of Sunset Trail Riders to follow-up on Hydro One's request to advise them of any additional Sunset Trail Rider members who would like to be added to the Project contact list. Hydro One requested that the member of Sunset Trail Riders advise of any interested members to email or contact Hydro One.
	2021-02-24	Email	Incoming		Community Relations Inbox	A property owner emailed Hydro One to inquire on the status of the ToR approval for the Project.
	2021-03-02	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had requested an update on the ToR decision to follow-up on their inquiry. Hydro One noted they had not yet received a decision on the ToR from MECP. Hydro One advised that once the ToR was approved, they would be able to commence the EA phase of the Project to determine the preferred route. Hydro One advised they would notify the property owner once they receive further information from MECP and are able to proceed with the EA.
	2021-03-08	Email	Incoming		Community Relations Inbox	A property owner emailed Hydro One to inquire why they had not been contacted about the Project, as they own property near the study area north of Thunder Bay. The property owner noted their opposition to alternative route 1A due to the proximity to their property and the possibility of the Project contributing to a wide range of negative environmental impacts, including impacts to forests, wildlife, fish and fish habitat, and birds, as alternative route 1A is near the Wishart Conservation Area and along Ferguson Creek.
	2021-03-08	Email	Incoming		Community Relations Inbox	A member of the public called Hydro One and left a voicemail, inquiring about access considerations for mineral exploration for the Project.
	2021-03-09	Email	Incoming		Community Relations Inbox	The property owner who had requested an update on the ToR decision emailed Hydro One to thank them for their response. The resident noted they were anxious for Project information, due to concerns of their home in close proximity to the Project. The property owner advised they had seen the local news, which advised that Hydro One had selected two contractors who would likely build the transmission line.
	2021-03-09	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request to be added to the Project contact list.
	2021-03-09	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had requested to be added to the Project contact list. Hydro One advised they had been added to the Project contact list and would be receiving Project updates via email moving forward.
	2021-03-15	Other	Outgoing		Community Relations Inbox	Following safety measures, Hydro One hand delivered maps, postcards, information on the ToR and EA directly to the home of the City of Dryden resident who had previously advised they had not received any Project updates, did not have an email, and requested the hardcopy materials.
	2021-03-15	Phone	Outgoing		Emily Spitzer	Hydro One called the member of the public who had previously left a voicemail regarding mineral exploration and the Project. The member of the public noted they had contacted Hydro One because ENDM had asked if Hydro One had contacted them yet, as the Project may go through areas in which the member of the public has a couple of mining claims. Hydro One thanked the member of the public for contacting them, and advised they would follow-up via email so Hydro One could receive written information to consider in the EA.
	2021-03-15	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had inquired about mineral exploration and the Project to follow-up with their phone call from that day. Hydro One noted they were undergoing the development work for the transmission line and had not yet identified a preferred route. Hydro One advised that further route evaluation of the alternative routes is required, and noted their appreciation for any information the member of the public could provide about their mining claims, so it could be considered in the EA process.
	2021-03-15	Email	Incoming		Community Relations Inbox	The member of the public who had inquired about mineral exploration and the Project emailed Hydro One to provide an email attachment of a screen capture of their mining claims from the ENDM MLAS website. The member of the public also provided a question they had been asked by ENDM and inquired if Hydro One could address the question.
	2021-03-17	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who owns property just north of Thunder Bay to follow-up on their inquiry regarding Project updates and their opposition of alternative route 1A. Hydro One noted that consultation and engagement is a top priority at Hydro One, and provided an overview of the consultation efforts as well as an overview of ToR process. Hydro One advised they would add the property owner to the Project contact list to ensure the property owner is informed of upcoming Project milestones and engagement opportunities via email moving forward, and advised that the property owner's concerns had been documented. Hydro One noted that once a preferred route is identified, they would work with directly impacted property owners who would have a proposed structure or section of corridor on their property.
	2021-03-17	Email	Outgoing		Community Relations Inbox	Hydro One emailed the property owner who had requested an update on the ToR decision and advised they had seen the local news regarding selection of the contractors who would likely build the transmission line. Hydro One noted they were glad to hear that the property owner had heard the news that Hydro One had selected Forbes Bros Ltd. and Valard Construction LP as the successful engineering, procurement and construction (EPC) contractors for the Project. Hydro One provided an overview of the EPC contractor selection process, and advised that Hydro One would select one partner for the Project construction following the completion of the contractors participation in the development process. Hydro One advised that once a preferred route is identified through the EA process, Hydro One would work with directly impacted property owners who would have a proposed structure or section of corridor on their property.
	2021-03-29	Email	Incoming		Community Relations Inbox	The property owner who owns property just north of Thunder Bay emailed Hydro One to thank them for their response. The property owner inquired if Hydro One could provide a detailed map illustrating alternative route 1A and maps of the other alternative routes. The property owner advised of their concerns regarding the proximity of the Project to their property, and noted that the new transmission corridor should only follow along major existing highways such as Highway 102 and TransCanada. The property owner advised that there should be no additional impacts to waterways, lands, and people's property from creating major new transmission corridors.
	2021-03-30	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had inquired about mineral exploration and the Project to advise that the area that Hydro One had withdrawn from mining claims represented an area larger than would be required for the new transmission line. Hydro One noted that once the ToR is approved and the EA process begins, that Hydro One would be happy to meet with the member of the public to discuss their concerns.
	2021-04-12	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request to be added to the Project mailing list.
	2021-04-13	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request to be added to the Project mailing list.
	2021-05-12	Phone	Incoming		Community Relations Inbox Emily Spitzer	A member of the public called Hydro One and left a voicemail requesting information on the ToR.
	2021-05-14	Phone	Outgoing		Emily Spitzer	Hydro One called back the member of the public who had left a voicemail to request further information on the ToR. Hydro One left a voicemail with their contact information for the member of the public to call back directly to.
	2021-05-20	Email	Incoming		Community Relations Inbox	A member of the public emailed Hydro One to request an update on the route selection progress.
	2021-05-21	Email	Outgoing		Community Relations Inbox	Hydro One emailed the member of the public who had inquired about the route selection process. Hydro One advised that they are awaiting a decision from MECP on the ToR before they can proceed with the next phase of the EA, which includes evaluating the alternative routes and selecting a preferred route. Hydro One noted that they would keep the member of the public informed when the next phase begins, which would include engagement opportunities to continue providing feedback into the EA.

Subject: Hydro One Waasigan Transmission Line Update: ToR Submission and Review Period
Date: October 15, 2020 11:45:41 AM

Hello [REDACTED],

Hydro One has submitted a Terms of Reference (ToR) to the Ministry of the Environment, Conservation and Parks (MECP) for the Waasigan Transmission Line project environmental assessment. Please see the attached notice for more information.

Starting today, Friday October 16, the Terms of Reference is accessible on the project website: www.HydroOne.com/Waasigan. You are encouraged to provide your comments on the ToR to the MECP, as outlined on the attached notice, between October 16, 2020 and November 16, 2020.

If you have any questions or concerns, please contact us.

Thank you,

Hydro One Community Relations
1-877-345-6799
Community.Relations@HydroOne.com

NOTICE OF SUBMISSION OF TERMS OF REFERENCE

WAASIGAN TRANSMISSION LINE ENVIRONMENTAL ASSESSMENT - HYDRO ONE NETWORKS INC.

October 16, 2020

Hydro One Networks Inc. (Hydro One) has submitted a Terms of Reference (ToR) to the Ministry of the Environment, Conservation and Parks for the Waasigan Transmission Line (Project) environmental assessment (EA) for review, as required under Ontario's *Environmental Assessment Act*. The Project is a proposed new transmission line between Thunder Bay, Atikokan and Dryden. We encourage you to review the ToR and submit comments, as outlined below.

EA PLANNING PROCESS

The ToR is the first step in the EA process. The ToR incorporates feedback received during the review and comment period for the draft ToR. If approved by the Minister of the Environment, Conservation and Parks, the ToR will provide the framework for the second step of the process – the preparation of the EA. The EA will evaluate alternative routes to determine a preferred route, as shown on the reverse map, and assess the potential effects of the Project. Consultation and engagement opportunities will be organized throughout the EA and communicated through newspaper advertisements, mailings and on the Project website www.HydroOne.com/Waasigan.

PROJECT DESCRIPTION AND PURPOSE

The Waasigan Transmission Line will consist of a new double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) in the Municipality of Shuniah and Mackenzie TS in the Town of Atikokan, and a new single-circuit 230 kilovolt transmission line between Mackenzie TS and Dryden TS in the City of Dryden (please see reverse map). There is anticipated electricity growth in northwestern Ontario and Hydro One is undertaking development work for the Waasigan Transmission Line now to ensure power is available when it is needed.

HOW TO PROVIDE YOUR FEEDBACK TO THE MINISTRY

Indigenous communities and organizations, agencies, elected officials, members of the public and other interested persons are encouraged to provide comments on the ToR between October 16, 2020 and November 16, 2020. Comments must be submitted **by 5:00 p.m. EST on Monday, November 16, 2020 to:**

Carolyn Lee, Special Project Officer

Ministry of the Environment Conservation and Parks –
Environmental Assessment Branch
135 St. Clair Avenue West, 1st Floor, Toronto, ON M4V 1P5
Tel: 416-276-0360
Fax: 416-314-8452
E-mail: Carolyn.Lee@Ontario.ca

To access the ToR, visit
www.HydroOne.com/Waasigan.
USB flash drives loaded with the
ToR are available at:

Atikokan Public Library
214 Burns Street, Atikokan
807-597-4406

Dryden Public Library
36 Van Horne Avenue, Dryden
807-223-1475

**Oliver Paipoonge Public Library –
Murillo Branch**
4569 Oliver Road, Murillo
807-935-2729

**Oliver Paipoonge Public Library –
Rosslyn Branch**
3405 Rosslyn Road, Rosslyn
807-939-2312

Shuniah Municipal Office
420 Leslie Avenue, Thunder Bay
807-683-4545

Please contact the location closest
to you for hours and to arrange for
curbside pickup, as needed.

Should the following locations
re-open during the review period,
USB flash drives will also be
available at:

Ignace Public Library
36 Main Street, Ignace
807-934-2280

**Thunder Bay Public Library –
Waverley Branch**
285 Red River Road, Thunder Bay

WAASIGAN TRANSMISSION LINE

November 2020

With more than 70 years of history and experience building and improving the electrical backbone of northwestern Ontario, Hydro One understands what it means to be a community partner. Electricity demand in the region is expected to grow in the near future and we want to be ready to support continued growth – this is why we are investing in the development work for the Waasigan Transmission Line now.

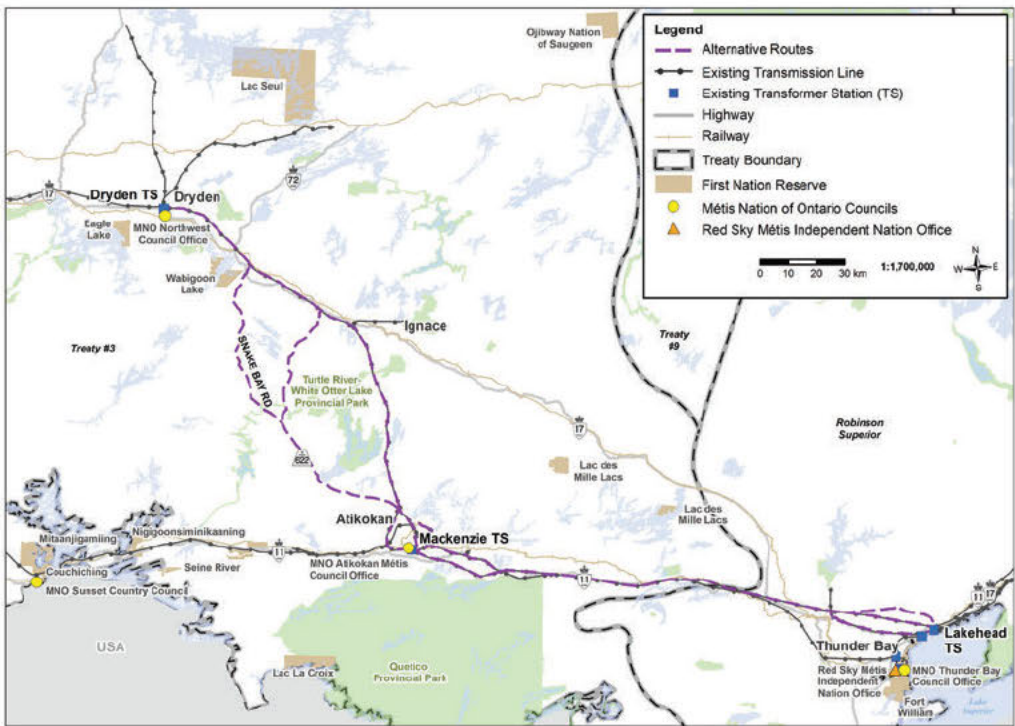

Waasigan, an Ojibwe word for “bringing power”, is a proposed new transmission line between Thunder Bay, Atikokan and Dryden. Building the new line will create opportunities for long-term social and economic benefits to communities across the northwest.

PROJECT UPDATE

- Hydro One submitted the Terms of Reference to the Ministry of the Environment, Conservation and Parks in October 2020. Pending its approval, Hydro One will initiate the environmental assessment (EA) as outlined in the Terms of Reference.
- Engagement opportunities will be ongoing throughout the EA, starting with opportunities for input into the methods for evaluating the alternative routes (see map below) to select a preferred route, and into the plan for field studies, which are anticipated to begin in spring 2021.
- We are committed to providing opportunities for feedback to ensure your interests are incorporated into project planning. Please contact us to join the project contact list.
- Hydro One is committed to powering economies and connecting northwestern communities. Waasigan is a critical link in unlocking economic potential in the region.

Hi Sarah:

I had a couple of questions regarding the power line study that you are doing, specifically in regards to land tenure and future alienations and such. In your previous correspondence you noted that the ROW would be approximately 45m. In recent data that we were able to pull up this distance is shown to be on the 500m range on either side of the existing power line. I would assume this is the study area and not necessarily the ROW, but would like to confirm this as it has considerable implications on our planning process for the mine study. I have attached a general overview of the area and for reference, general UTM coordinates are approximately 528771, 5512520.

It would also be helpful to have you explain the process and timelines for when these decisions will be made and how they would effect in place or planned infrastructure.

If you could please give me a call, that would be great.

Regards,
Mark

Mark Wheeler, P.Eng, MBA

RE: Feedback for the Waasigan Transmission Line Terms of Reference

Dear Ms. Carolyn Lee,

Treasury Metals is writing the Ministry of the Environment, Conservation and Parks (Ministry) to provide feedback for the Waasigan Transmission Line Terms of Reference. Treasury Metals owns the Goliath Gold Project which is located in the Kenora Mining Division in northwestern Ontario, approximately 4 kilometres (km) northwest of the Village of Wabigoon, 20 km east of Dryden and 2 km north of the Trans-Canada Highway 17. The Goliath Gold Project completed its federal Environmental Assessment (EA) with the federal government approval on August 19, 2019 under the Canadian Environmental Assessment Act (CEAA) of 2012. Currently, Treasury Metals is commencing the provincial approvals process for the Goliath Gold Project including the regulatory closure plan and construction phase permits and approvals. The Goliath Gold Project is located within the Local Study Area for the proposed Waasigan Transmission Line.

Over the last 10 years, Treasury Metals has been working diligently towards the achievement of several key project milestones based on a Project Study Area (Figure provided as Attachment 1) that may be overprinted by the Waasigan Transmission Line Project Footprint. These milestones include (but are not limited to) federal EA Approval, engineering design studies, agreements with Indigenous communities and completion of environmental studies and predictions. Additionally, Treasury Metals has committed to the CEAA Agency, the provincial regulators and several Indigenous communities and their consultants, that the project features within the Goliath Gold Project Study Area will be designed with a compact footprint. As shown on Attachment 1, to achieve a compact footprint, a number of project features including the mine water pond, tailings storage facility, processing plant, and haul/access roads are located adjacent to the existing transmission line, and therefore have the potential to be overprinted by the proposed project. Furthermore, Treasury Metals has finalized purchases of private property, acquired surface rights, and made several submissions to the Ministry of Energy, Northern Development and Mines to bring mineral claims and crown parcels to lease. These tenure acquisitions will be to support mining operations of our open pit and underground mine. The lands, owned or leased by Treasury Metals, have been included in key economic studies and projections for the Goliath Gold Project.

Based on the above rationale, the construction of the Waasigan Transmission Line may have meaningful effects on the engineering design, construction, operations and economics of the Goliath Gold Project. Treasury Metals has reviewed the Waasigan Transmission Line Terms of Reference (ToR) and has the following questions and comments with respect to the proposed Project:

1. Would Hydro One please confirm the width of the right of way (ROW), its orientation relative to the current transmission line and distance from the current transmission line at the Goliath Gold Project?

It is Treasury Metals understanding that the proposed ROW for the Waasigan Transmission Line is anticipated to be approximately 40-45 m wide, with some sections requiring additional width. However, the following are unclear regarding the proposed transmission line specifically where it intersects with the Goliath Gold Project:

- i. Width of the proposed ROW;
- ii. Orientation of the proposed ROW relative to the current transmission line (i.e. north or south); and
- iii. Offset/width of the proposed ROW relative the current transmission line.

Given that some project features within the Project Study Area for the Goliath Gold Project are located adjacent to both sides of the current transmission line, understanding the Waasigan Transmission Line's width, orientation and offset at the Goliath Gold Project site is of utmost importance to Treasury Metals. While it has been previously communicated to Treasury Metals by Hydro One that these details will be determined during the EA process for the Project, given that Treasury Metals has already received EA approval for the Goliath Gold Project and is now working towards finalizing engineering design and proceeding with construction phase permitting and approvals, Treasury Metals requests that Hydro One work with Treasury Metals to confirm these details in advance of the provincial EA approval. While Treasury Metals has the intention to work with Hydro One to arrange a layout that is suitable to both parties it must be noted that the width, orientation, and offset of the new transmission line is expected to have direct, and potentially significant implications on the engineering design, construction approvals, and future mineral value of our Project.

2. Treasury Metals requests that Hydro One provide shapefiles to Treasury Metals of the realistic ROW at the Goliath Gold Project such that the Waasigan Transmission Line can be appropriately incorporated into engineering designs and regulatory approvals currently underway for the Goliath Gold Project.
3. What is Hydro One's proposed timeline to construction?

Given that the Project Footprint for the Waasigan Transmission Line overprints the Goliath Gold Project's approved Project Study Area, the timeline to construction for both projects will be integral to their developments.

4. With respect to land tenure, what is Hydro One's expectation for compensation to private land owners that will be overprinted by the proposed Waasigan Transmission Line Project?

There are lands owned and/or leased by Treasury Metals specifically for the intention of open pit or underground mining that may be impacted by the overprinting of the proposed transmission line, and therefore unavailable for mining operations. If this occurs, it would have a meaningful effect on the economics of the Goliath Gold Project.

Should any of the information or requests contained within this letter be more suitably discussed by way of a meeting, Treasury Metals kindly requests that the Ministry propose a time that is convenient for them in the near future.

Kind Regards,

Mackenzie Denyes, PhD, P. Geo, QP_{RA}
Manager of Regulatory Affairs

Meeting Notes

Waasigan Early Contractor Involvement/Treasury Metals Meeting

Waasigan Transmission Line Project

Meeting Date: April 20, 2021 **Time:** 1:00 pm to 2:00 pm

Location: WebEx Conference Call

Purpose: Discuss Treasury Metals' Goliath Gold Project with the Waasigan Early Contractor Involvement (ECI) contactors.

Attendees: **Hydro One:** Bruce Hopper, Sarah Cohanim, Dayna Groom, Emily Spitzer
Treasury Metals: Mackenzie Denyes, Mark Wheeler, Mac Potter
SNC Lavalin: Alain Delisle, Angel Humberto Pinto Unda, Craig Wallace
Forbes: Kenton Cahil, Michael Desjarlais, Tom Bradka, Erica Werhun, Kyle Junkin, Scott Shipper
Valard: Scott Merrifield, Nathan Jones, Ananth Rao, Nelson Lee, Cornelius Henderson
Golder: Callum Squires

Regrets: n/a

Issued By: Callum Squires, Golder

Distribution: All attendees and invitees

Note: Please advise if additional items are required to complete the discussion within five business days of issuance.

Item	Description
1.	Safety Moment
2.	Introductions
3.	Treasury Metals Overview of the Goliath Gold Project <ul style="list-style-type: none"> Treasury Metals provided a presentation on the Goliath Gold Complex (Attachment 1) including an overview of the Goliath Gold Complex design, status

Item	Description
	<p>of the federal Environmental Assessment and key comments from Treasury Metals on the Waasigan Terms of Reference.</p> <ul style="list-style-type: none"> Treasury Metals indicated there is flexibility with their design to accommodate the Waasigan Transmission Line, such as ability to move the ore storage area; however, they are looking to freeze their design in order to receive provincial permits.
4.	<p>Question and Answers</p> <ul style="list-style-type: none"> Hydro One provided an overview of the Early Contractor Involvement (ECI) model for the Project noting that Forbes and Valard are both preparing separate designs over the next year. A contractor is expected to be selected next year and they will carry forward into detailed design and construction. Valard asked whether the water pipe lines and access road in the current Goliath Gold Mine design can be shifted. Treasury Metals confirmed that there is flexibility but they want to lock this design in as well as keep their development area as compact as possible. Treasury Metals noted that past construction, there is the potential for trucks needed to cross under the existing lines. They are basing their plans around the limits of the existing lines. Valard asked whether Treasury Metals looked into the proximity of the bulk explosion site to the transmission line. <ul style="list-style-type: none"> Action: Treasury Metals will review the distance requirements for transmission lines. Valard noted there is a security gate located on the access road and asked if this road could be considered as an access route for the Waasigan project. <ul style="list-style-type: none"> Treasury Metals noted that the security gate is for safety and security purposes, but they do not expect an issue for other industrial uses such as the Waasigan project. Treasury Metals asked for additional detail on the design of the Waasigan project so they can take this into account as they are finalizing their design. <ul style="list-style-type: none"> Right-of-way (ROW) width – Valard noted that the ROW will not be greater than 60 m and is currently sited along the south side of the existing Hydro One M2D transmission line. Forbes will need further time to review the material provided but noted that they have also selected the south side as part of their preliminary design. <i>Since this meeting, Forbes has also confirmed that the ROW will not be greater than 60m.</i> <ul style="list-style-type: none"> Hydro One noted that while the ROW is not expected to be greater than 60 m, Hydro One cannot provide final confirmation on the ROW width or the rest of the design until after EA Approval, which is expected in December 2024.

Item	Description
	<ul style="list-style-type: none"> <ul style="list-style-type: none"> <ul style="list-style-type: none"> ▪ However, Hydro One noted that they expect their confidence in the design to be higher in this area considering Treasury Metals is the main stakeholder. ○ Construction timing – Hydro One cannot provide firm timing for construction, but construction could start shortly after the December 2024 EA approval. Treasury Metals noted that they expect to start construction in Q4 of 2023. ○ Offset from existing transmission line – Valard noted that the 60 m ROW is expected to be enough room to include the ROW and any offset. <i>Since this meeting, Forbes has confirmed that 60 m is sufficient to include the ROW as well as offset.</i> • Treasury Metals asked for an approximate timeline on the ECI design solutions as they are looking to award the feasibility contracts in the next 2-3 months and are looking to lock down detail in this area in a similar timeframe. <ul style="list-style-type: none"> ○ Treasury Metals noted that the 60 m conservative ROW area is helpful, but more detail on access, construction timing, types of equipment, laydown areas would be helpful. ○ Hydro One confirmed that this section of the Project does not have alternative routes so the design can proceed now instead of waiting for the selection of a preferred route that will happen later in 2021. ○ Hydro One and SNC noted that the preference would be to maintain the flexibility to site the transmission line on both the north and south side of the transmission line at this point in the EA process. Treasury Metals noted that this should be feasible for them and that they will likely be overly conservative and plan for the transmission line to be on either side. ○ Hydro One and SNC confirmed that both ECIs can develop a preliminary design and provide it to Treasury Metals. A subsequent meeting can be devoted to discussing the two designs and answering any further questions from Treasury Metals. ○ Action: Hydro One and SNC will discuss the timing of the preliminary design with both ECIs and then provide a timeline to Treasury Metals. • Hydro One asked if there are any updates on the transmission connection for the facility. <ul style="list-style-type: none"> ○ Treasury Metals noted that they expect to get into these details later this year. The connection is likely to come from the south on M2D as most of the infrastructure is located there.

The meeting adjourned at 2:00 pm.

Next meeting on: To be determined.

METALS Inc.

April 20th, 2021

Goliath Gold Complex – Project Update
Hydro One

AGENDA

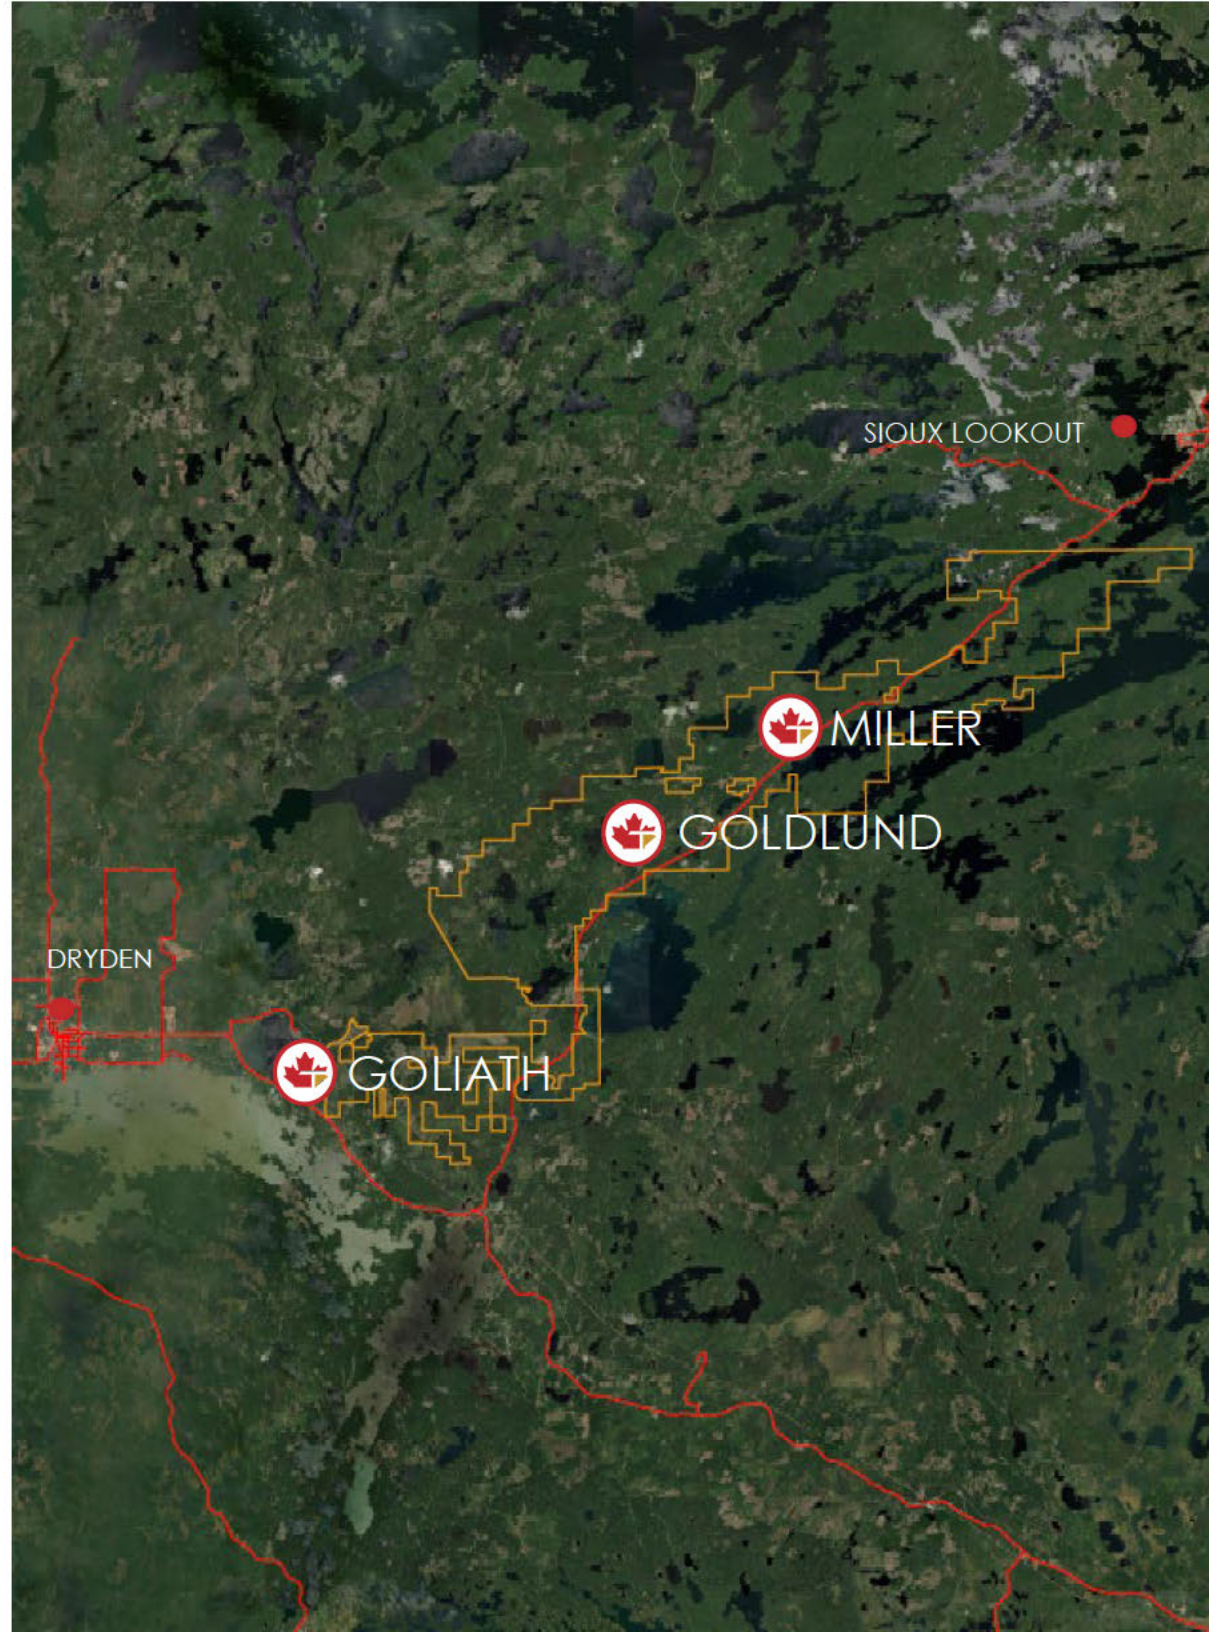

1. Introductions

2. Intro to the Goliath Gold Complex

3. Goliath- Approved Federal EA

4. Key Comments on ToR
(Relative to Site Plan)

5. Goliath Highlights & Timelines

Introduction to Goliath Gold Complex

Goliath Gold Complex:

A term used by Treasury Metals to refer to all three gold assets in the Dryden/ Sioux Lookout area of Northwestern Ontario

• Three distinct Projects within Wabigoon Greenstone Belt

1. Goldlund Project

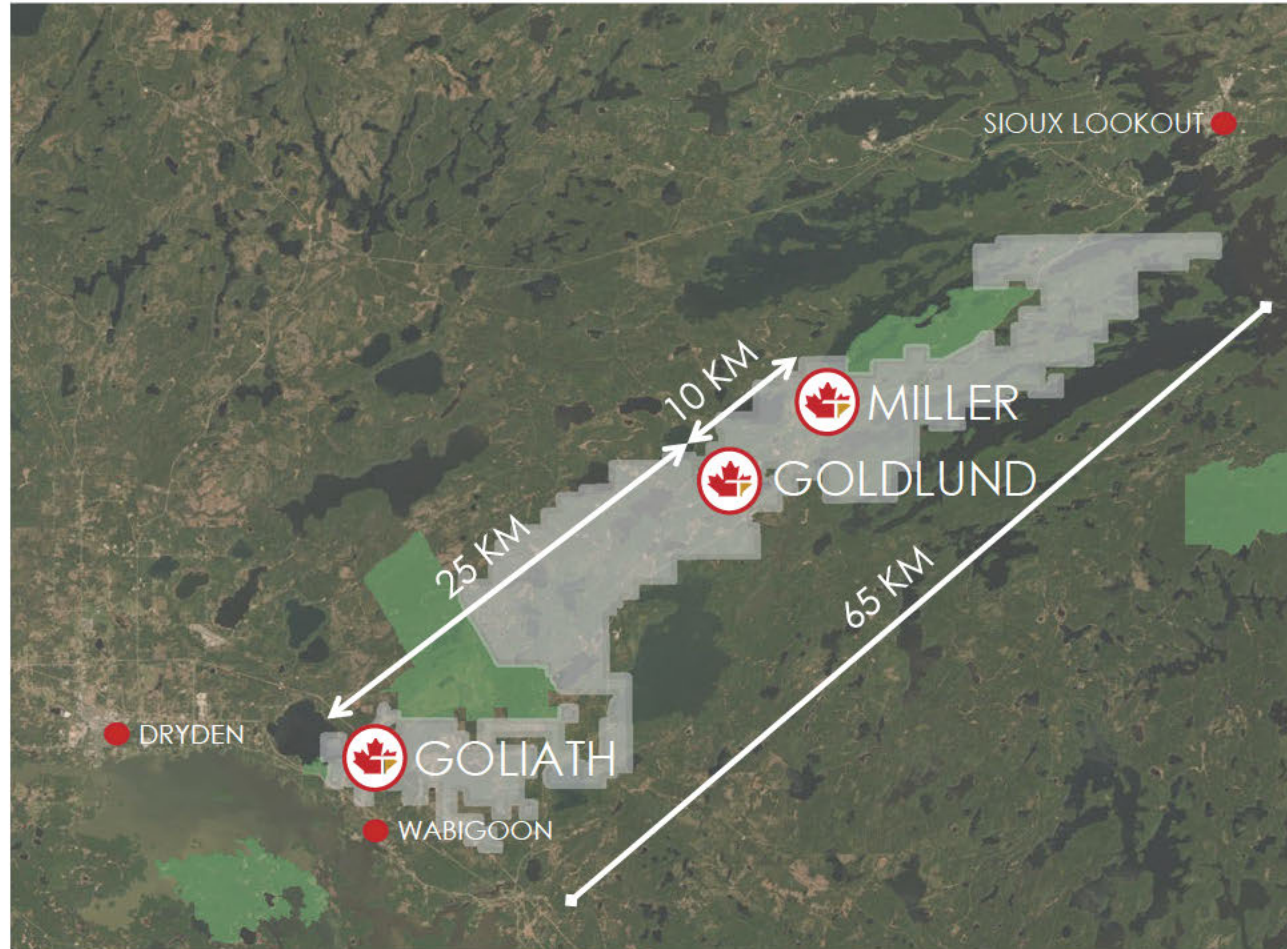

- Open pit, no processing or tailings infrastructure

2. Miller Project

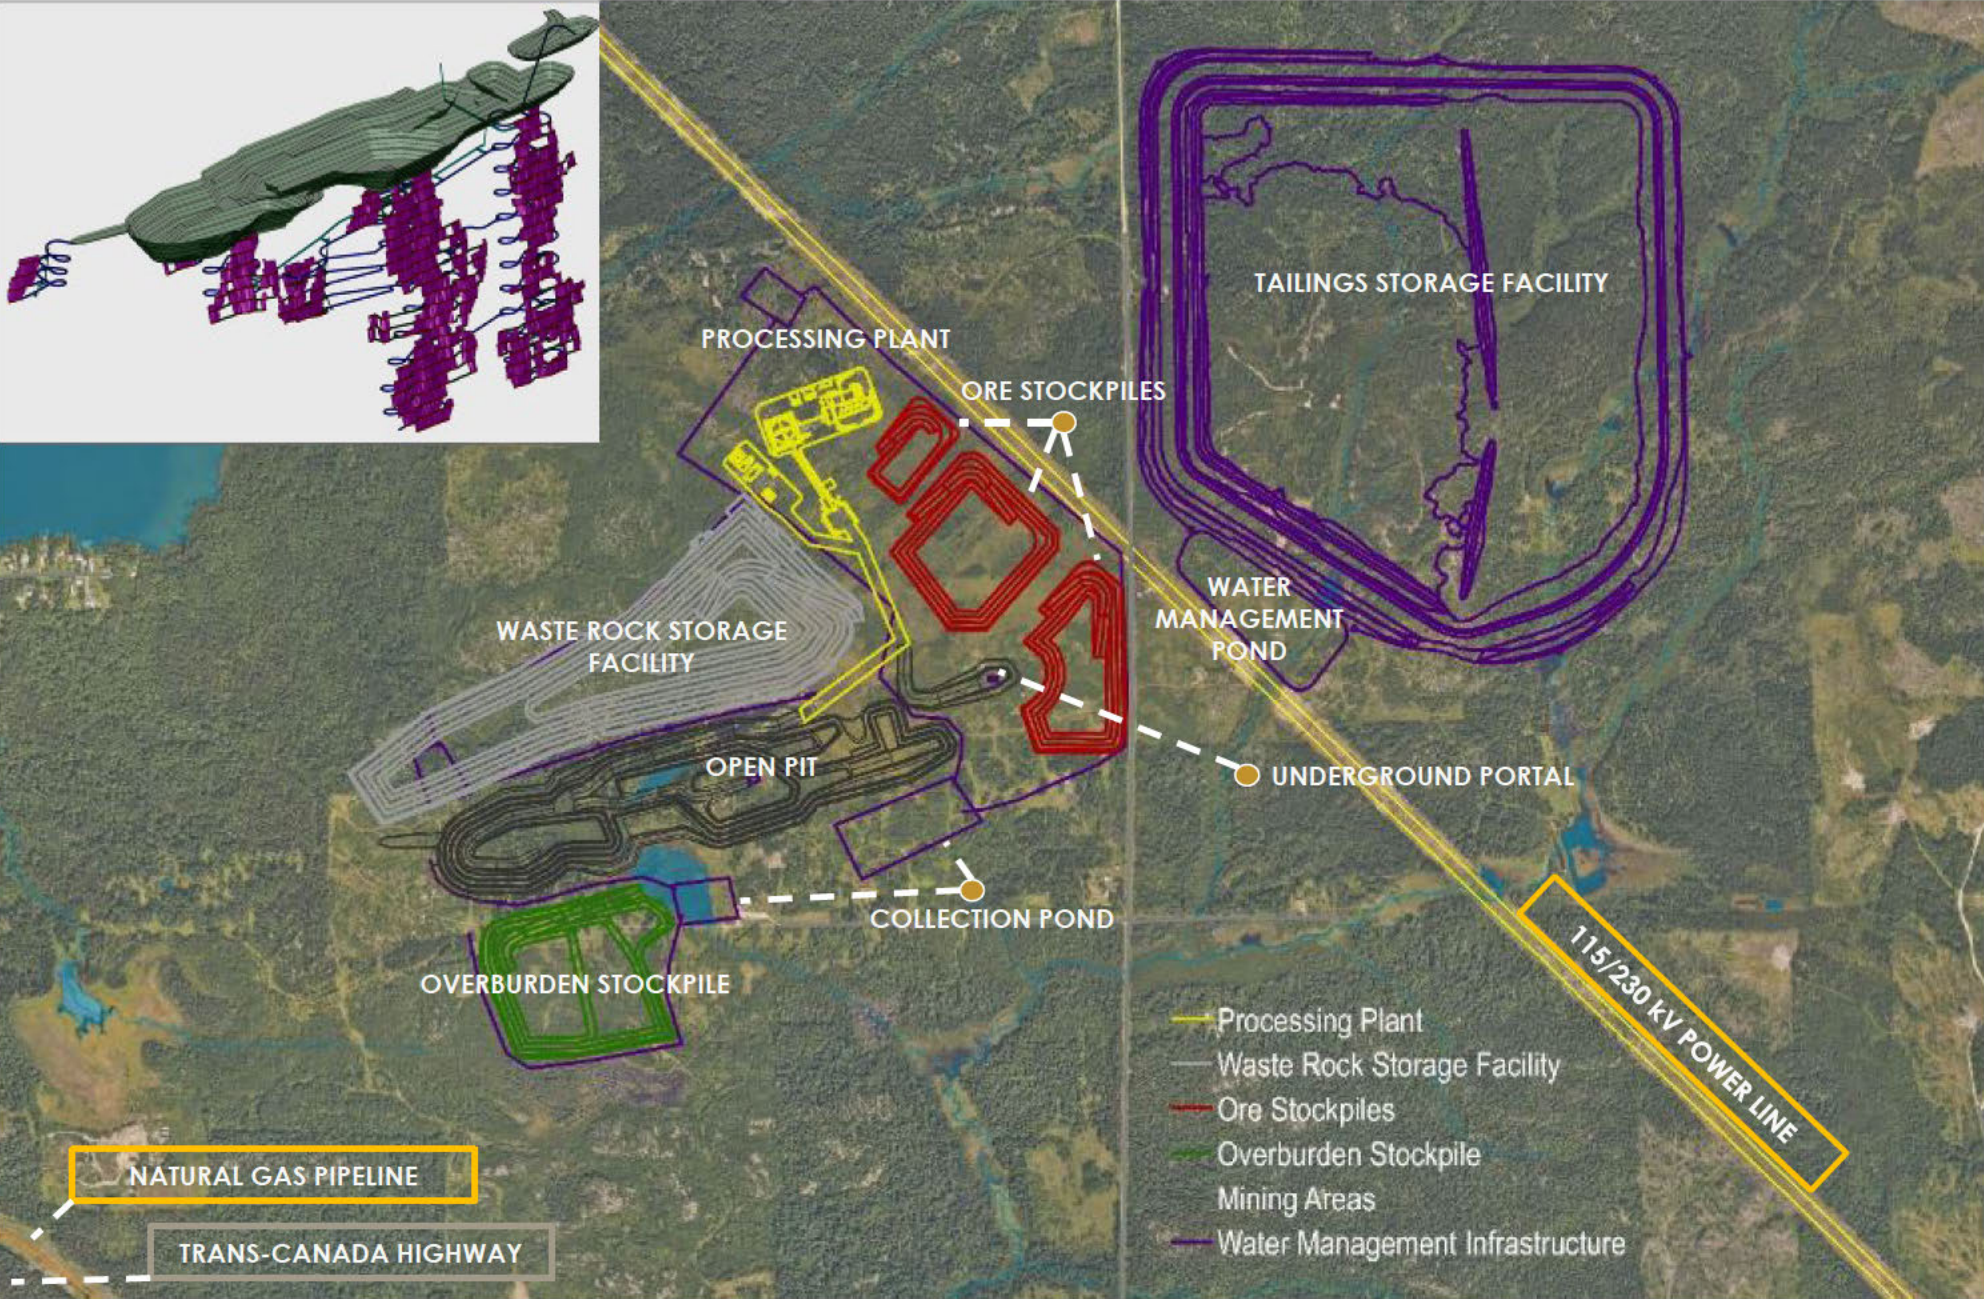

- Open pit, no processing or tailings infrastructure

3. Goliath Gold Project

- Underground & open pit mine with associated processing infrastructure and a tailings storage facility
- Current Hydro One transmission line and proposed Waasigan dissects the Project site

Goliath Gold Project

Goliath Gold Project, Approved Federal Environmental Assessment

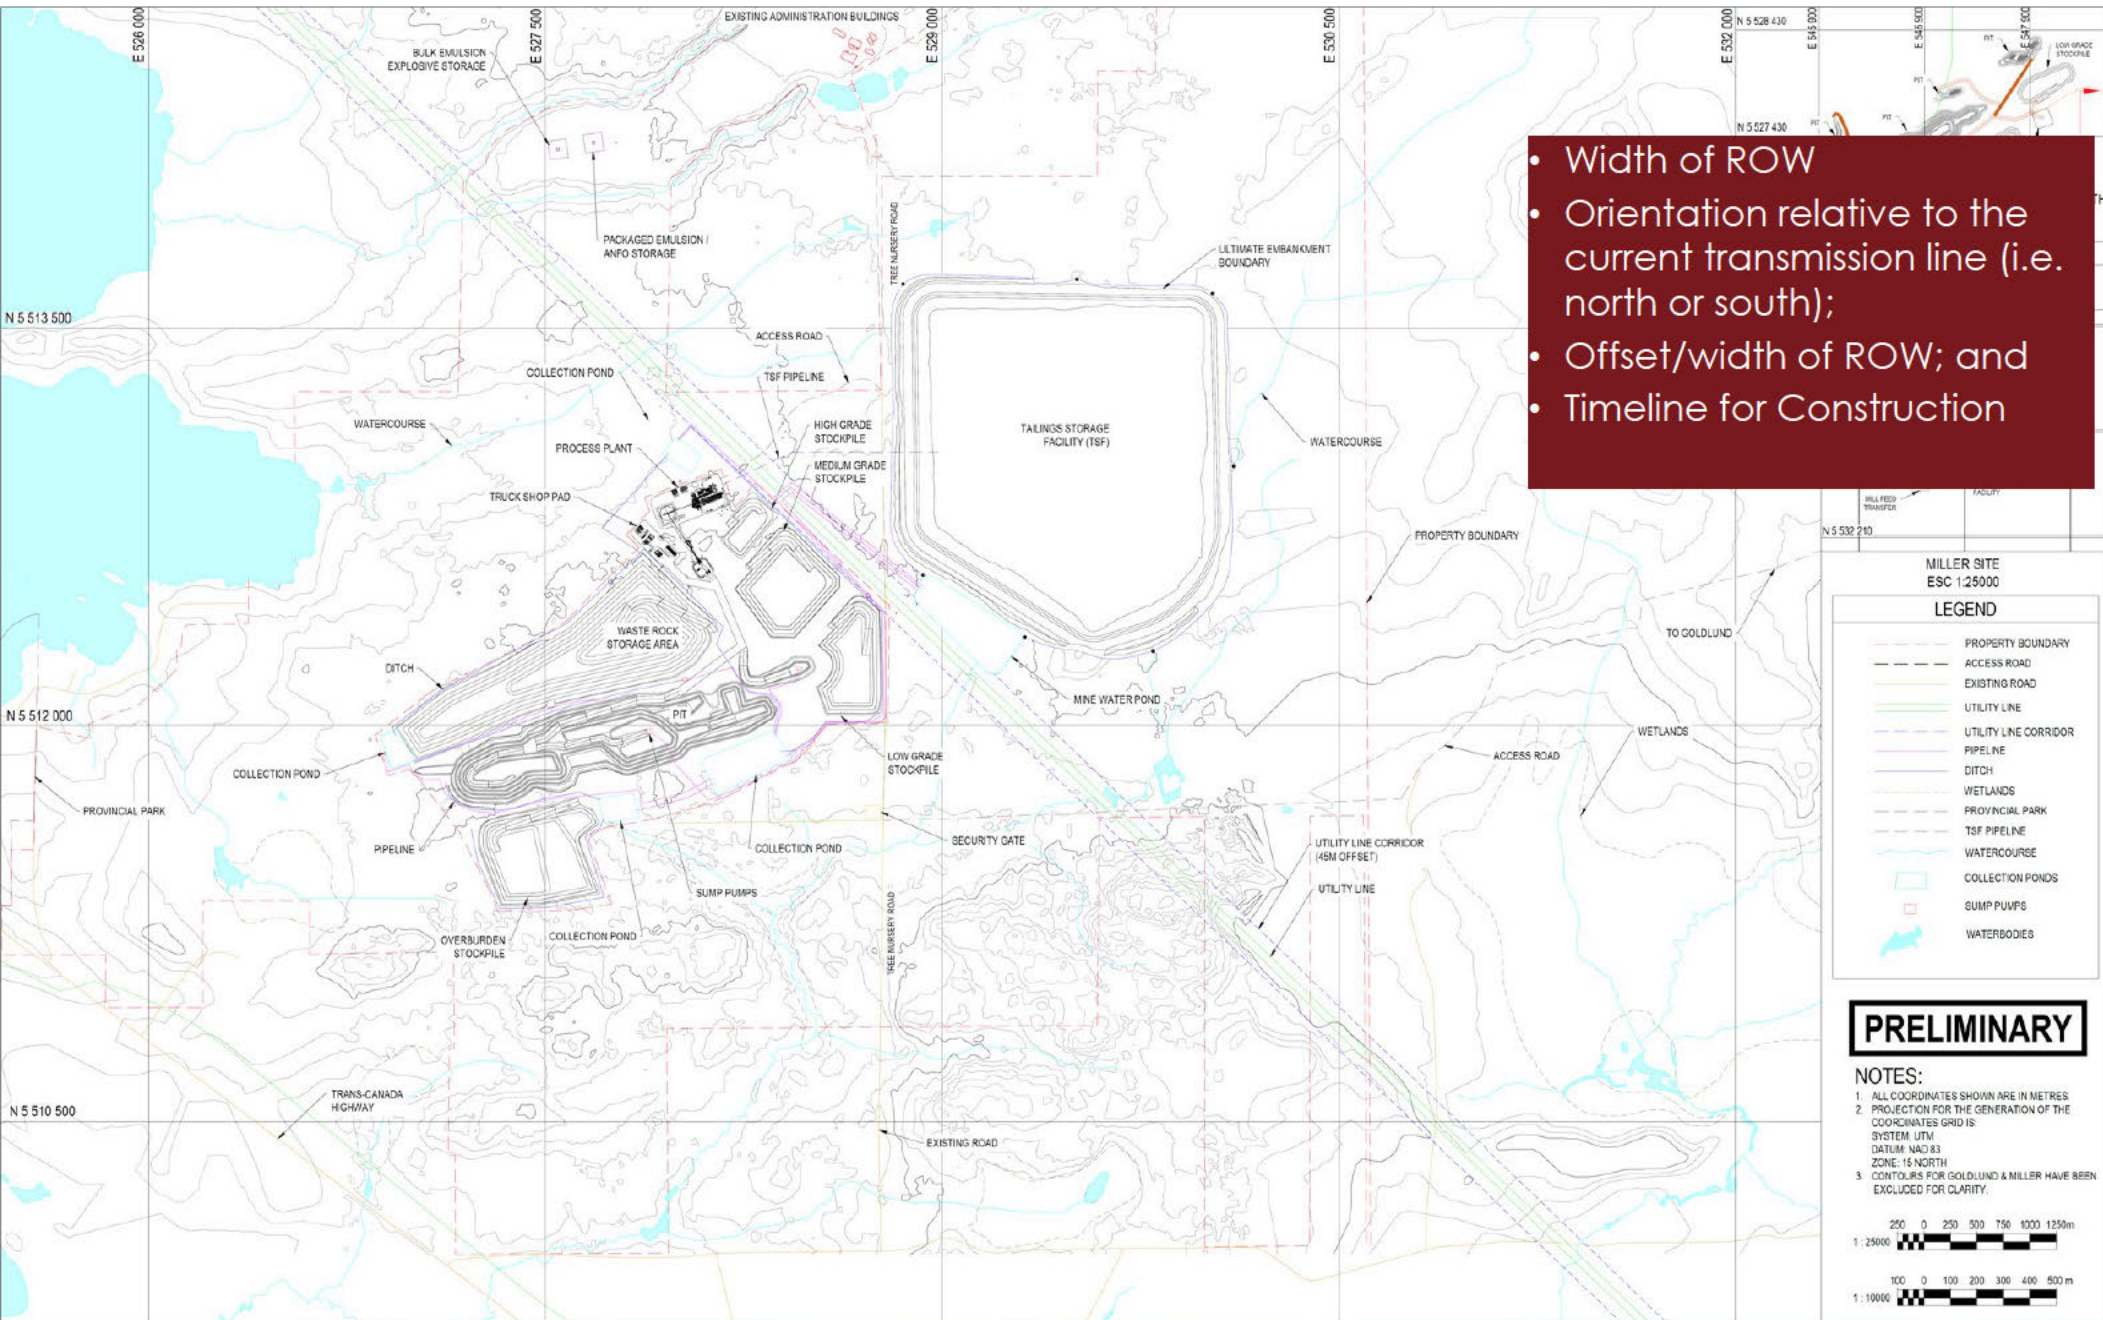

- Treasury Metals prepared the Environmental Impact Statement (EIS) in accordance with *Canadian Environmental Assessment Act, 2012*
- Project Description Submitted in 2012
- Revised EIS was submitted in April 2018
- Round 2 Information Requests were accepted for completeness in March 2019

Canada

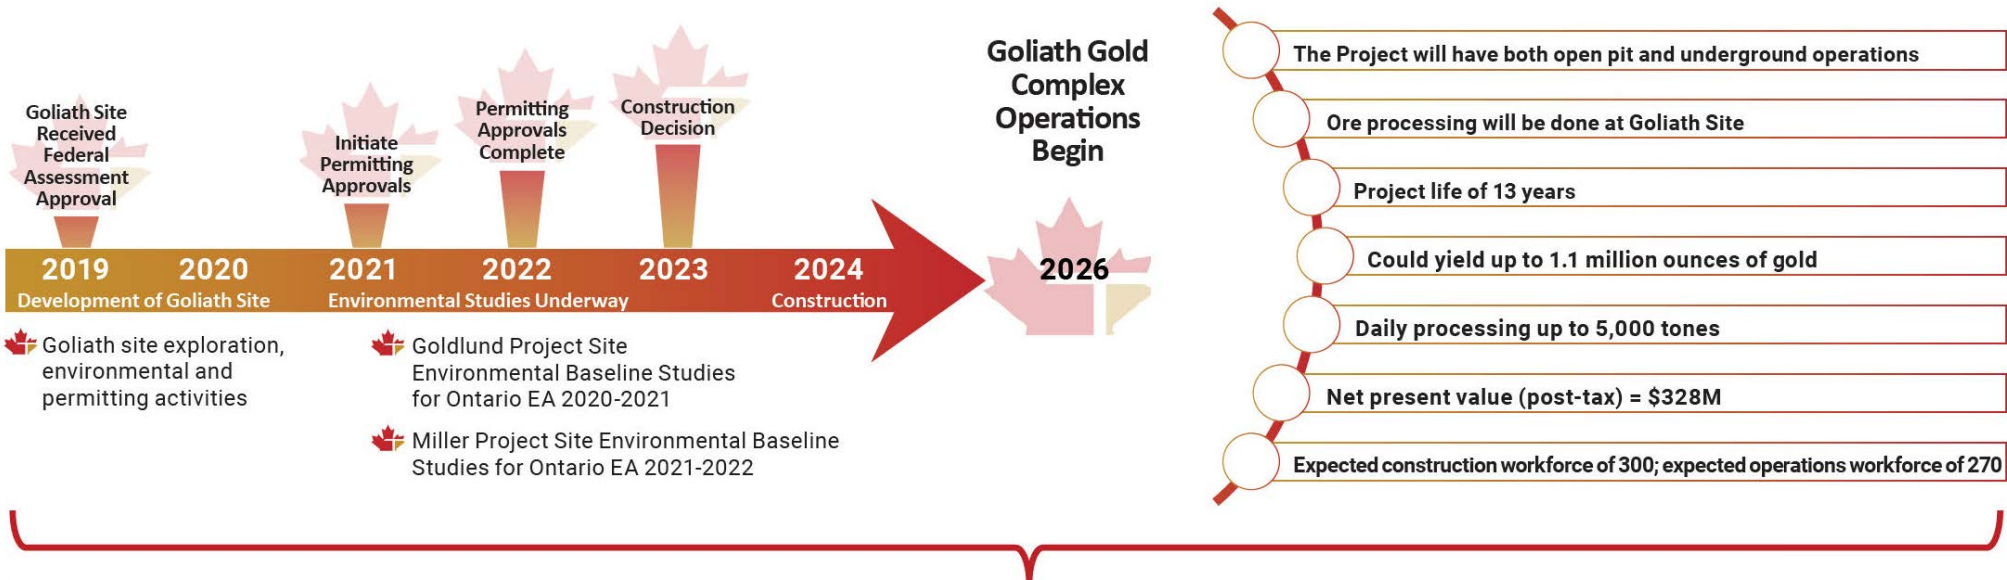

- **Decision Statement/ Federal Approval and Conditions were received in August 2019.**
 - Minister concluded that with mitigation measures, the Goliath Gold Project would not result in significant adverse environmental effects

Key Comments on ToR for Waasigan Project

- Width of ROW
- Orientation relative to the current transmission line (i.e. north or south);
- Offset/width of ROW; and
- Timeline for Construction

Goliath Gold Project: Project Highlight and Approvals Timelines

Community Engagement, Information Sharing, Collaboration

Permitting and Approval-2021

- Recently initiated the Provincial Permitting and Approvals process with the submission of the Notice of Project Status to ENDM
- Project Change/Project Optimization Report (Q3/Q4 2021)
- Fish Compensation and Offset Plan for Schedule 2 Amendment and Section 35 (Q3 2021)
- Expected to have a Draft Ready Regulatory Closure Plan for you to review (Q4 2021)
- Environmental Compliance Approval for Construction Phase Effluent Discharge (Q4 2021-Q2 2022)

Item	Description	Action
1.	<p>Welcome and safety moment</p> <p>A welcome and land acknowledgement were conducted.</p> <p>A safety moment was reviewed with attendees.</p>	n/a
2.	<p>Member Introductions</p> <p>Roundtable introductions were made by members of the Roundtable and Hydro One representatives.</p>	n/a
3.	<p>Housekeeping</p> <p>Key elements of the Guiding Principles were reviewed and discussed.</p>	Members to provide a signed copy of the Membership Agreement (final page of Guiding Principles) by December 9, 2020
4.	<p>Project overview presentation</p> <p>Hydro One provided a project overview presentation and held a discussion. No questions or points of discussion were raised.</p>	n/a
5.	<p>Election of Waasigan Community Roundtable Vice-Chair</p> <p>Rob Ferguson was elected as the Waasigan Community Roundtable Vice-Chair.</p>	n/a

Item	Description	Action
7.	<p>Open discussion</p> <p>Once energized, Waasigan will provide an additional 350 megawatts to the area west of Thunder Bay, which will offer more capacity upstream and opportunities for connections. This increase in capacity will support reliability for example to the Red Lake area and Wataynikaneyap Power Project.</p> <p>Major infrastructure planning like Waasigan should coincide with economic development, such as mines, so power is ready when it is needed. The Waasigan Community Roundtable should advocate for this to the Independent Electricity System Operator (IESO) and respective government bodies, to encourage the lining up of the business and regulatory environments.</p> <p>Members are encouraged to participate in regional studies the IESO is undertaking over the next several months.</p>	<p>Further discussion on holistic picture of electricity needs and planning in the northwest</p>
8.	<p>Next steps and concluding remarks</p> <p>Hydro One reviewed next steps, which included encouraging members to complete a feedback survey following the meeting and letting Hydro One know what types of items or presentations members would like to learn more about and discuss.</p> <p>The next meeting will be held in Q1 2021. A minimum six weeks' notice will be provided.</p> <p>Hydro One thanked members for participating in the inaugural meeting.</p>	<p>Provide feedback to Community Relations or via feedback survey regarding items/presentations you would like to see in future</p>

The meeting adjourned at 12:00pm.

Next meeting will take place Q1 2021.

Subject: Waasigan Community Roundtable -- meeting minutes & materials

Good afternoon,

Thank you for attending our second Waasigan Community Roundtable meeting on March 10. Please see attached the draft meeting minutes for your review by Friday, March 26. Embedded in the minutes are the presentation materials from the meeting, as well as the list of Roundtable participants/organizations as requested.

We know the pandemic has everyone working from various locations and ask that members please provide us the best mailing address to reach you.

We want to ensure these meetings are delivering value to our members. Please fill out our survey [here](#) to provide your feedback.

Thank you!

Yours truly,
Hydro One Community Relations

Regrets: John Mason, City of Thunder Bay / Thunder Bay Community Economic
 Development Corporation
 Charla Robinson, Thunder Bay Chamber of Commerce

Distribution: All attendees and invitees

Note: Please advise if additional items are required to complete the discussion within five business days of issuance.

Item	Description	Action
1.	<p>Welcome and safety moment</p> <p>A welcome and land acknowledgement were conducted.</p> <p>A safety moment was reviewed with attendees.</p>	n/a
2.	<p>Member introductions</p> <p>Introductions were made by members who could not join the last meeting, and by delegate representatives.</p>	n/a
3.	<p>Housekeeping</p> <p>Meeting minutes from the last meeting (November 18 2020) were approved by membership.</p>	n/a
4.	<p>Project update and questions</p> <p>Hydro One provided a project overview presentation.</p> <p>Members offered Hydro One suggestions to continue raising awareness of the project need via local radio stations, related publications/newsletters, LinkedIn and billboards near Dryden. There was also interest in Hydro One providing project updates more regularly at a community level (e.g. Council presentation that is open to members of the public).</p> <p>Members raised the importance of local employment and training, both Indigenous and non-Indigenous. A question was asked about why Hydro One brings on contractors during construction – this is to ensure</p>	<p>Hydro One and CEDC to follow up on including Waasigan in an upcoming CEDC Northwestern Ontario mining sector email communication.</p> <p>Hydro One commits to offering</p>

Item	Description	Action
	<p>that the company can complete its robust capital and sustainment programs. A comment was made that this project should ensure benefits to municipalities within the study area as well.</p>  <p>Waasigan update presentation_Steve</p>	<p>municipal update presentations within the study area beginning in Q2 2021.</p>
5.	<p>Overview of IESO planning in northwestern Ontario and questions</p> <p>IESO representatives joined the meeting at 1:45 p.m. to provide an overview of the planning process. Following their presentation, the IESO representatives answered questions pertaining to engagement opportunities within the planning process and the load requirement for the potential nuclear waste facility site in Ignace.</p> <p>Members were also interested to learn more about Indigenous participation in the IESO's process, the Waasigan project and the Roundtable. Hydro One provided a brief update pertaining to the importance of Indigenous consultation and partnerships. Hydro One representatives reiterated that Indigenous community representatives within the study area had been invited to participate in the Roundtable, and they expressed preference to engage with the company separately, however if interest is expressed at a later date, Indigenous representatives will be welcome.</p> <p>A comment was made regarding contracting partners and the experience in hiring local and Indigenous employees they may be able to bring to the Waasigan project. Hydro One agreed – this is one of the reasons the EPC contractors were brought on during the development phase. A member suggested that opportunities with Friendship Centres and Northwest Employment Works should also be explored.</p> <p>The IESO representatives promptly left the meeting following this discussion, at 2:15 p.m.</p>  <p>Waasigan Meeting_IESO Presti</p>	n/a
6.	<p>Hydro One's approach to planning and discussion</p> <p>Bruno Jesus, Vice President, Planning, Hydro One provided information about Hydro One's approach to planning and upcoming investments in the region, including Hydro One's efforts to support</p>	n/a

Item	Description	Action
	<p>bringing access to broadband services across rural Ontario via joint use of assets.</p> <p>Discussion ensued around the need for increased broadband support in the region, specifically along highways 502 and 622 to support safety while travelling. There is currently no reliable cell or internet service in these areas, which are within the area of the proposed nuclear waster site and experience high traffic from tourists who are likely not as familiar with the area, respectively. Members note it would be ideal for Waasigan to include fibre optic cable.</p> <p>There was a discussion about what local Economic Development staff could provide to Hydro One as far as opportunities for power and helping to build a case for further electricity infrastructure development. Members are encouraged to link back with the company via the Community Relations team.</p> <p>Members expressed interest in the Waasigan Transmission Line following highway 622.</p> <p>Members noted that the IESO indicated building the line is not yet guaranteed and expressed interest in exploring ways to ensure its construction.</p> <div style="text-align: center;">  Final_Bruno presentation_WCRT </div>	
7.	<p>Closing remarks</p> <p>Vice Chair Rob Ferguson thanked everyone for participating and provided closing remarks. Next meeting will likely be in fall 2021.</p>	<p>Hydro One will circulate the participant list.</p> <div style="text-align: center;">  WCRT membership_March </div>
8.	<p>Other items not discussed</p> <p>A feedback survey will be distributed to all attendees.</p>	<p>Members to provide their feedback via this survey.</p> <p>Members to provide their</p>
