

APPENDIX G

Businesses, Interest Groups and Community Organizations Record of Consultation Supporting Documents

1. Record of Consultation with Businesses, Interest Groups and Community Organizations
2. Comments from the Public on the Draft EA (compiled) from May 17 to September 1, 2023. * See Final Environmental Assessment Appendix 4.0A

Neighbours' on the Line

1. Minutes for February 22, 2023 meeting with Neighbours' on the Line (NOTL) re: NOTL's proposed alternative route
2. Minutes for March 14, 2023 technical meeting with NOTL
3. Minutes for March 21, 2023 technical meeting with NOTL
4. Presentation by Hydro One to NOTL April 19, 2023 sharing findings of their analysis of the NOTL route
5. Letter from Neighbours on the Line (NOTL); grievances with preliminary preferred route
6. Letters from Neighbours on the Line (NOTL); Draft EA.
7. Comments from NOTL on the Draft EA emailed to Hydro One on June 30, 2023
8. Comments from NOTL on the Draft EA emailed to Hydro One on July 3, 2023

Shebandowan Lake Campers' Association

1. Concern shared regarding the Waasigan Transmission Line preliminary preferred route to Hydro One and to MECP; March 15, 2023 letter from MECP in response
2. Letter from Shebandowan Lake Campers' Association

The Canadian Union of Skilled Workers

1. CUSW Letter of Support May 12, 2022

Businesses, Interest Groups and Community Members - Record of Consultation

Organization	Date	Type of Communication	Origin	Summary
1181592 Ontario Inc.				
1181592 Ontario Inc.	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project via Canada Post regular mail. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
1383735 Ontario Ltd.				
1383735 Ontario Ltd.	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project via Canada Post regular mail. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
Ambassadors Northwest				
Ambassadors Northwest	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Ambassadors Northwest	2023-01-03	Email	Outgoing	Hydro One emailed Ambassadors Northwest to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Ambassadors Northwest	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Ambassadors Northwest	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Ambassadors Northwest	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Ambassadors Northwest	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Atikokan Hydro				
Atikokan Hydro	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Atikokan Hydro	2023-01-03	Email	Outgoing	Hydro One emailed Atikokan Hydro to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Atikokan Hydro	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Atikokan Hydro	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Atikokan Hydro	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Atikokan Hydro	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Atikokan Resource Management Advisory Committee (RMAC)				

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Atikokan Resource Management Advisory Committee (RMAC)	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
Atikokan Resource Management Advisory Committee (RMAC)	2022-03-09	Email	Outgoing	Hydro One emailed the Atikokan Resource Management Advisory Committee to provide notification that Hydro One would be proceeding with an Environmental Assessment for the Waasigan Transmission Line Project in accordance with the Environmental Assessment Act as the Ministry of the Environment, Conservation and Parks had approved the Amended Terms of Reference in February. Hydro One noted that the Environmental Assessment would evaluate alternative routes to identify a preferred route and Project design, predict and assess potential effect of the Project on the environment while incorporating Indigenous Knowledge and identify measures to minimize and/or eliminate potential negative environmental effects. Hydro One noted that they would work in collaboration with Indigenous communities, engage with government officials and agencies, interested person and organizations throughout the Environmental Assessment and would share additional details about upcoming engagement opportunities in the coming weeks.
Atikokan Resource Management Advisory Committee (RMAC)	2022-04-21	Email	Outgoing	Hydro One emailed the Atikokan Resource Management Advisory Committee to notify them of an upcoming community open house event and noted that an in-person event would be held on May 3 to May 5, 2022, from 5:30 to 7:30 local time. Hydro One also noted that a virtual open house event would also be held on May 18, 2022, between 7:00 pm and 8:00 pm EDT. Hydro One provided an attached notice with additional information and noted that individuals could reach out with any questions or concerns.
Atikokan Resource Management Advisory Committee (RMAC)	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Atikokan Resource Management Advisory Committee (RMAC)	2023-01-03	Email	Outgoing	Hydro One emailed the Atikokan Resource Management Advisory Committee (RMAC) to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Atikokan Resource Management Advisory Committee (RMAC)	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Atikokan Resource Management Advisory Committee (RMAC)	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
2758145 Ontario Ltd. Agnico Eagle Mines Ltd. Ambershaw Metallics Inc. Atikokan Resource Management Advisory Committee (RMAC) Benton Resources Inc. Bounty Gold Corp. Canada Critical Resources Corp. CJP Exploration Inc. Delta Resources Ltd. Dynasty Gold Corp. Fern Elizabeth Gold Exploration Ltd. Gold Cache Inc. Golden Share Resources Gravel Ridge Resources Ltd.	2023-05-18	Flyer/ Unaddressed Notice	Outgoing	WSP coordinated the mailout of the draft EA Report notice to 65 mining claim holders.

Organization	Date	Type of Communication	Origin	Summary
International Lithium Corp. Moss Lake Project Inc. North American Nickel Inc. Orebot Inc. Prospect Ore Corp. Red Pine Exploration Inc. Rio Tinto Exploration Canada Inc. Solstice Gold Corp. South Shore Partnership Inc. Stares Contracting Corp. Trans Canada Gold Corp. Transition Metals Corp. Treasury Metals Inc. Trojan Gold Inc. White Metal Resources Corp.				
Atikokan Resource Management Advisory Committee (RMAC)	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Atikokan Resource Management Advisory Committee (RMAC)	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Atikokan Resource Management Advisory Committee (RMAC)	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Ausenco Engineering				
Ausenco Engineering Treasury Metals Inc.	2022-03-10	Email	Outgoing	Hydro One emailed Treasury Metals Inc. offering to set up a call at the end of April/early May and attached a preliminary ROW to aid in their engineering.
Ausenco Engineering Treasury Metals Inc.	2022-11-09	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to provide an updated proposed Project footprint through the Goliath Gold area. Hydro One indicated they wanted to have a meeting with their contractor and Treasury Metals Inc. to discuss the proposed design and construction activities. Hydro One requested Treasury Metals Inc. share any updated design information for the Goliath Gold project in advance of the meeting. Hydro One provided a draft agenda and inquired if Treasury Metals Inc. had availability for a meeting on November 18 or 21, 2022.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to follow up about setting up a meeting to discuss updates on the Project and their impact on Treasury Metals Inc.'s Goliath Gold project. Hydro One inquired if they had availability the week of November 28, 2022 for a meeting.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to inquire who the main point of contact was as they had received a bounce-back email from the address they had previously been using.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Incoming	Treasury Metals Inc. emailed Hydro One to confirm who the main contact was following the departure of the previous main contact from the company. Treasury Metals Inc. noted they would determine their availability for a meeting on the dates Hydro One previously provided.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to request their availability for a meeting on November 28, 29 and December 1, 2022 but noted a later date could be arranged.
Ausenco Engineering Treasury Metals Inc.	2023-02-02	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to follow-up on a request to meeting regarding the preliminary preferred route for the Project. Hydro One also inquired if they comments on the attached proposed preliminary preferred route footprint.
Ausenco Engineering Treasury Metals Inc.	2023-02-02	Email	Incoming	Treasury Metals Inc. emailed Hydro One to request a pdf version of the preliminary preferred route footprint.
Ausenco Engineering Treasury Metals Inc.	2023-02-23	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to provide PDF maps of the preliminary preferred route and access roads through the Goliath Gold area.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Ausenco Engineering Treasury Metals Inc.	2023-07-05	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to inquire if they had reviewed the Project design information provided in February 2023 and if they required any additional information for their review. Hydro One also inquired about their availability for a meeting.
Ausenco Engineering Treasury Metals Inc.	2023-08-09	Meeting		Hydro One met with Treasury Metals Inc. to discuss the Project.
Ausenco Engineering Treasury Metals Inc.	2023-08-10	Email	Incoming	Treasury Metals Inc. emailed Hydro One to introduce the Project Manager from Ausenco on the Goliath plant and provide details about the site plans. Treasury Metals Inc. noted they anticipated having geotech reports for area flanking the transmission corridor.
Ausenco Engineering Treasury Metals Inc.	2023-08-17	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to connect them with a Hydro One Account Executive who could provide support with questions related to the mine connection.
Bell Canada				
Bell Canada	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Bell Canada	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Bell Canada	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Bell Canada	2023-01-03	Email	Outgoing	Hydro One emailed Bell Canada to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Bell Canada	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Bell Canada	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bell Canada	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bell Canada	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Bell Canada	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Berglund's Outposts				
Berglund's Outposts	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
BJ Kapush Contracting Ltd.				
BJ Kapush Contracting Ltd.	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
BluMetric Environmental Inc.				
BluMetric Environmental Inc.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
BluMetric Environmental Inc.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
BluMetric Environmental Inc.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
BluMetric Environmental Inc.	2023-01-03	Email	Outgoing	Hydro One emailed BluMetric Environmental Inc. to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
BluMetric Environmental Inc.	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
BluMetric Environmental Inc.	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
BluMetric Environmental Inc.	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
BluMetric Environmental Inc.	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
BluMetric Environmental Inc.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Bombardier				
Bombardier	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Bombardier	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Bombardier	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Bombardier	2023-01-03	Email	Outgoing	Hydro One emailed Bombardier Transportation to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Bombardier	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Bombardier	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bombardier	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bombardier	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Bombardier	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Boundary Waters Forest Management Corp.				
Boundary Waters Forest Management Corp.	2022-05-17	Email	Outgoing	Golder emailed Boundary Waters Forest Management Corp. to thank them for identifying active haul routes in the Project study area. Golder noted they would begin surveys from May 2022 to September 2022 with amphibian call count and turtle basking from May 18 to May 21. Golder provided a kmz file and a download link for the potential survey locations for the week of May 16.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Boundary Waters Forest Management Corp.	2022-05-17	Email	Incoming	Boundary Waters Forest Management Corp. emailed Golder to confirm the survey's location will have no effect on their operations or washouts. Boundary Waters Forest Management Corp. noted access from ID ACC-068 is within Domtar's limits.
Boundary Waters Forest Management Corp.	2022-06-01	Email	Outgoing	Golder emailed Boundary Waters Forest Management Corp. to follow up about the intersection of any active haul roads/operations with the Regional study for the Project. Golder provided a map for Boundary Waters Forest Management Corp. to review and asked them to provide any information that needs to be passed along to the field crew to ensure appropriate health & safety precautions were taken.
Boundary Waters Forest Management Corp.	2022-06-01	Email	Incoming	Boundary Waters Forest Management Corp. emailed Golder to note that the majority of Golder's survey was along highway corridors but in the case the field crews ventured onto a road located in the Boundary Waters Forest, the roads were marked with a radio channel sign.
Boundary Waters Forest Management Corp.	2022-06-07	Email	Outgoing	Golder emailed Boundary Waters Forest Management Corp. a pdf and kmz file of the regional study area for the Project in order for them to identify any active haul routes that may intersect with the Project.
Boundary Waters Forest Management Corp. Rainy Lake Tribal Resource Management	2023-04-04	Email	Incoming	Boundary Waters Forest Management emailed Hydro One to provide a background of their corporate structure and noted they had not received any correspondence from Hydro One relate to the Project. Boundary Waters Forest Management forwarded an email chain that Hydro One sent to Resolute Forest Management Unit to clarify they were separate organizations.
Boundary Waters Forest Management Corp. Rainy Lake Tribal Resource Management	2023-04-06	Email	Outgoing	Hydro One emailed Boundary Waters Forest Management to thank them for reaching out a clarifying their corporate structure. Hydro One noted Boundary Waters Forest Management had been added to the Project contact list and provided Hydro One's availability for a meeting on April 13 and 14, 2023. Hydro One provided as attachments a Project overview map and shapefiles of the preliminary preferred route footprint.
Boundary Waters Forest Management Corp. Rainy Lake Tribal Resource Management	2023-04-06	Email	Outgoing	Hydro One emailed Boundary Waters Forest Management Corp. to confirm April 13, 2023 as the date of a meeting to the discuss the Project's impact on their business.
Boundary Waters Forest Management Corp. Rainy Lake Tribal Resource Management	2023-04-13	Meeting		Hydro One and WSP met with Boundary Waters Forest Management, Rainy Lake Tribal Resource Management and Valard to discuss the Project and potential efficiencies to reduce the overall impacts on the environment, such as shared use of existing or planned access roads and water crossings.
Boundary Waters Forest Management Corp.	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Boundary Waters Forest Management Corp.	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Boundary Waters Forest Management Corp.	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Boundary Waters Forest Management Corp.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Bunnell Park Campground				
Bunnell Park Campground	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Bunnell Park Campground	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Bunnell Park Campground	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Bunnell Park Campground	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Bunnell Park Campground	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Bunnell Park Campground	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Bunnell Park Campground	2023-01-03	Email	Outgoing	Hydro One emailed Bunnell Park Campground to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Bunnell Park Campground	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Bunnell Park Campground	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bunnell Park Campground	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Bunnell Park Campground	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Bunnell Park Campground	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Canadian Manufacturers and Exporters				
Canadian Manufacturers and Exporters	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Canadian Manufacturers and Exporters	2023-01-03	Email	Outgoing	Hydro One emailed Canadian Manufacturers and Exporters to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Canadian Manufacturers and Exporters	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Canadian Manufacturers and Exporters	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Canadian Manufacturers and Exporters	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Canadian Manufacturers and Exporters	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Canadian Pacific Railway				
Canadian Pacific Railway	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Canadian Pacific Railway	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project to government officials and agencies, and interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, 2022 and how to join the virtual open house on May 18, 2022.
Canadian Pacific Railway	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Canadian Pacific Railway	2023-01-03	Email	Outgoing	Hydro One emailed the Canadian Pacific Railway to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Canadian Pacific Railway	2023-01-03	Email	Outgoing	Hydro One emailed all stakeholders to announce the selection of a preliminary preferred route and invited them to attend community open houses on January 16 to 18, 2023. Hydro One provided an interactive map of the Project and noted a virtual meeting room and presentation materials would be made available on the project website beginning January 16, 2023.

CRC Communication	2023-01-03	Email	Outgoing	Hydro One emailed CRC Communication to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
CRC Communication	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
CRC Communication	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
CRC Communication	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
CRC Communication	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
CRC Communication	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Critical Elements Lithium Corporation				
Critical Elements Lithium Corporation	2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
Crystal Beach Resort				
Crystal Beach Resort	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Crystal Beach Resort	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.

Organization	Date	Type of Communication	Origin	Summary
Crystal Beach Resort	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Crystal Beach Resort	2023-01-03	Email	Outgoing	Hydro One emailed Crystal Beach Resort to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Crystal Beach Resort	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Crystal Beach Resort	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Crystal Beach Resort	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Crystal Beach Resort	2023-06-02	Phone	Incoming	Crystal Beach Resort called and left a message for Hydro One to note their concerns about the Project passing through the resort and requested more information.
Crystal Beach Resort	2023-06-05	Phone	Outgoing	Hydro One called Crystal Beach Resort and left a voicemail noting they could call to discuss the Project. Hydro One noted they would email Crystal Beach Resort details of the open houses should they wish to attend.
Crystal Beach Resort	2023-06-05	Email	Outgoing	Hydro One emailed Crystal Beach Resort to note they had left them a voicemail that day and provided a callback number. Hydro One provided details about the Community Open Houses, a screen shot of the interactive Project map showing the preferred route's proximity to Crystal Beach Resort.
Crystal Beach Resort	2023-06-07	Phone	Outgoing	Hydro One called Crystal Beach Resort to discuss questions they had related to construction staging, access roads, and how in general construction may effect them. Hydro One noted more details would be provided in the coming months and Valard would be in attendance at the Community Open Houses the week of June 12, 2023. Hydro One and Crystal Beach Resort reviewed the interactive map in relation to the property and confirmed the corridor did not cross their resort.
Davis' Bonny Bay Camp				
Davis' Bonny Bay Camp	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Davis' Bonny Bay Camp	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Davis' Bonny Bay Camp	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Davis' Bonny Bay Camp	2023-01-03	Email	Outgoing	Hydro One emailed Davis' Bonny Bay Camp to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Davis' Bonny Bay Camp	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Davis' Bonny Bay Camp	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Davis' Bonny Bay Camp	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Davis' Bonny Bay Camp	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Davis' Bonny Bay Camp	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Davy Lake Campground & Resort

It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Davy Lake Campground & Resort	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Davy Lake Campground & Resort	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Domtar				
Domtar	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Domtar	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Domtar	2022-05-04	Email	Incoming	Domtar requested to be added to the Project mailing list.
Domtar	2022-05-04	Email	Outgoing	Hydro One emailed Domtar to confirm addition to the Project mailing list.
Domtar	2022-05-04	Email	Incoming	Domtar emailed Hydro One thanking them for addition to the Project mailing list.
Domtar	2022-05-17	Email	Outgoing	Golder emailed Domtar to explain the services Golder is offering Hydro One for the Project. Golder noted they would begin surveys from May 2022 to September 2022 with amphibian call count and turtle basking from May 18 to May 21. Golder asked to connect with Domtar regarding active haul routes that may be located in the Project study area and health and safety considerations for field crew. Golder provided a .kml file for the potential survey locations for the week of May 16.
Domtar	2022-05-17	Email	Incoming	Domtar emailed Golder contact details for a individual that will respond to requests about active haul routes that may be located in the Project study area and health and safety considerations for field crew.
Domtar	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Domtar	2022-06-01	Email	Outgoing	Golder emailed Domtar to follow up about the intersection of any active haul roads/operations with the Regional study for the Project. Golder provided a map for Domtar to review and asked them to provide any information that needs to be passed along to the field crew to ensure appropriate health & safety precautions were taken.
Domtar	2022-06-01	Email	Outgoing	Golder emailed Domtar to thank them for providing information about their annual operations through the Wabigoon Forest.
Domtar	2022-06-07	Email	Outgoing	Golder emailed Domtar a pdf and kml file of the regional study area for the Project in order for them to identify any active haul routes that may intersect with the Project.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Domtar	2023-01-03	Email	Outgoing	Hydro One emailed Domtar to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Domtar	2023-01-06	Email	Outgoing	Hydro One emailed Domtar to indicate a preliminary preferred route (PPR) had been identified for the Project. Hydro One provided a Project overview map and shapefiles of the PPR, and requested to meet with Domtar to discuss the Project Access Plan.
Domtar	2023-01-12	Email	Incoming	Domtar emailed Hydro One to provide their availability on January 18, 2023 to meet to discuss the Project Access Plan.
Domtar	2023-01-16	Email	Outgoing	Hydro One emailed Domtar to note they had a conflict on January 18, 2023 and inquired if Domtar had availability the week of January 23, 2023 to meet to discuss the Project Access Plan. Hydro One also attached an open house notice.
Domtar	2023-01-16	Email	Incoming	Domtar emailed Hydro One to provide their availability to meet the week of January 23, 2023 to discuss the Project Access Plan.
Domtar	2023-01-20	Email	Incoming	Hydro One emailed Domtar to propose meeting dates the week of January 30, 2023.
Domtar	2023-01-27	Meeting		Hydro One met with Domtar and Valard to discuss the Project and potential efficiencies to reduce the overall impacts on the environment, such as shared use of existing or planned access roads and water crossings.
Domtar	2023-01-27	Email	Outgoing	Hydro One emailed Domtar to provide Project shapefiles and noted Domtar could reach out to Valard directly once they reviewed the files.
Domtar	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Domtar	2023-03-29	Email	Incoming	Domtar emailed Hydro One to note they wanted to meet to discuss the impacts of the Project on their operations. Domtar noted they would be looking to enter into a roads use agreement for the planned access routes that overlaps roads they managed. Domtar also noted they needed clarification about aggregate sites that overlapped pits that they manage to confirm if they have existing need for the aggregate first and wished to discuss the utilization of merchantable timber.
Domtar	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Domtar	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Domtar	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Domtar	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
dps360 Energy				
dps360 Energy	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
dps360 Energy	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
dps360 Energy	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
dps360 Energy	2023-01-03	Email	Outgoing	Hydro One emailed dps360 Energy to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
dps360 Energy	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
dps360 Energy	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.

It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
dps360 Energy	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
dps360 Energy	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Dryden Forest Management Company Ltd.				
Dryden Forest Management Company Ltd.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Dryden Forest Management Company Ltd.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Dryden Forest Management Company Ltd.	2022-05-17	Email	Outgoing	Golder emailed Dryden Forest Management Company Ltd. to reiterate they would begin surveys from May 2022 to September 2022 with amphibian call count and turtle basking from May 18 to May 21. Golder listed the active haul operations Dryden Forest Management Company Ltd. had identified that may intersect with the Project study area. Golder indicated that the surveys planned for the week of May 16 are located within some of the haul operation areas and asked for confirmation of their understanding. Golder asked Dryden Forest Management Company Ltd. to pass relevant along health and safety information for the field crews. Golder noted that field crews will be instructed to read road signs and monitor radio channel 5 for communication.
Dryden Forest Management Company Ltd.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Dryden Forest Management Company Ltd.	2022-05-18	Email	Incoming	Dryden Forest Management Company Ltd. emailed Golder to confirm that all survey locations for the week of May 16 are away from major haul activity in the Dryden forest.
Dryden Forest Management Company Ltd.	2022-06-01	Email	Outgoing	Golder emailed Dryden Forest Management Company Ltd. to follow up about the intersection of any active haul roads/operations with the Regional study for the Project. Golder provided a map for Dryden Forest Management Company Ltd. to review and asked them to provide any information that needs to be passed along to the field crew to ensure appropriate health & safety precautions were taken.
Dryden Forest Management Company Ltd.	2022-06-01	Email	Outgoing	Golder emailed Dryden Forest Management Company Ltd. to thank them for providing details about haul routes, radio channels and acceptable parking location. Golder noted a shapefile/kmz of the full study area would be provided to Dryden Forest Management Company Ltd. once obtained by Golder.
Dryden Forest Management Company Ltd.	2022-06-07	Email	Outgoing	Golder emailed Dryden Forest Management Company Ltd. a pdf and kmz file of the regional study area for the Project in order for them to identify any active haul routes that may intersect with the Project.
Dryden Forest Management Company Ltd.	2022-08-25	Email	Outgoing	Golder emailed Dryden Forest Management Company Ltd. to thank them for following up about their work areas.
Dryden Forest Management Company Ltd.	2023-01-03	Email	Outgoing	Hydro One emailed Dryden Forest Management Company Ltd. to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Dryden Forest Management Company Ltd.	2023-01-06	Email	Outgoing	Hydro One emailed Dryden Forest Management Company Ltd. to indicate a preliminary preferred route (PPR) had been identified for the Project. Hydro One provided a Project overview map and shapefiles of the PPR, and requested to meet with Dryden Forest Management Company Ltd. to discuss the Project Access Plan.
Dryden Forest Management Company Ltd.	2023-01-24	Email	Incoming	Dryden Forest Management Company Ltd. emailed Hydro One to note they would get to them about their availability for a meeting to discuss the Project Access Plan.
Dryden Forest Management Company Ltd.	2023-01-27	Email	Outgoing	Hydro One emailed Dryden Forest Management Company Ltd. to thank them for the update about when they would receive details about their availability for a meeting to discuss the Project Access Plan.
Dryden Forest Management Company Ltd.	2023-02-01	Email	Outgoing	Hydro One emailed Dryden Forest Management Company Ltd. their availability on February 6, 7 and 8, 2023 to meet to discuss the Project Access Plan.

Greenmantle Forest Inc.				
Greenmantle Forest Inc.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided
Greenmantle Forest Inc.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Greenmantle Forest Inc.	2022-05-17	Email	Incoming	Greenmantle Forest Inc. emailed Golder a map illustrating their planned operations on Crown Land for the 2020-2030 forest management plan along the project routes. Greenmantle Forest Inc. provided a snapshot of the only location that field survey crews may encounter Greenmantle operations on Crown land.
Greenmantle Forest Inc.	2022-05-17	Email	Outgoing	Golder emailed Greenmantle Forest Inc. to thank them for their support in identifying active haul routes with the Project study area. Golder noted they would undertake surveys between May 2022 and September 2022 . Golder indicated that they may have survey planned in an area identified by Greenmantle Forest Inc. where they had operations on Crown land. Golder requested that Greenmantle Forest Inc. provide any health and safety considerations (i.e., notification requirements, contact information, radio channels, etc.) that should be passed along to the field team.
Greenmantle Forest Inc.	2022-05-17	Email	Incoming	Greenmantle Forest Inc. emailed Golder to note that if the field crews were working in any of the green areas on the map they provided and encountered harvest or trucking operations, they should speak with someone on site to let them know who they are and where to park to be out of the way. Greenmantle Forest Inc. indicated that standard PPE would be required if there are trucking operations around. Greenmantle Forest Inc. provide a phone number and email for the field crews to contact to provide advance notice of entering Greenmantle Forest Inc. operational areas.
Greenmantle Forest Inc.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Greenmantle Forest Inc.	2022-06-01	Email	Outgoing	Golder emailed Greenmantle Forest Inc. to follow up on the intersection of any potential/active haul roads or operations with Project study area. Golder noted they planned to conduct botanical, ecological land classification, amphibian, bird, and bat surveys from June 1 to June 21, 2022 and provided a figure of the study areas for Greenmantle Forest Inc.'s review and input. Golder asked Greenmantle Forest Inc. to provide a kmz or marked-up copy of the provided figure to illustrate any areas of interest with regards to active operations.
Greenmantle Forest Inc.	2022-06-01	Email	Outgoing	Golder emailed Greenmantle Forest Inc. to note they would try to get a shapefile/kmz sent to them. Golder inquired if Greenmantle Forest Inc.'s operation area had changed from the one indicated in their May 17, 2022 email.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Greenmantle Forest Inc.	2022-06-01	Email	Outgoing	Golder emailed Greenmantle Forest Inc. to note they would reach with more information once they had a shapefile/kmz for the study area.
Greenmantle Forest Inc.	2022-06-07	Email	Outgoing	Golder emailed Greenmantle Forest Inc. a .pdf map and a .kmz file of the regional study area for the Project and asked them to send back a mark-up of any of their operations that may intersect with the Project. Golder also asked Greenmantle Forest Inc. to confirm the contact details for fields crews to use if they know they will encounter sites where operations may be taking place.
Greenmantle Forest Inc.	2023-01-03	Email	Outgoing	Hydro One emailed Greenmantle Forest Inc. to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Greenmantle Forest Inc.	2023-01-06	Email	Outgoing	Hydro One emailed Greenmantle Forest Inc. to indicate a preliminary preferred route (PPR) had been identified for the Project. Hydro One provided a Project overview map and shapefiles of the PPR, and requested to meet with Greenmantle Forest Inc. to discuss the Project Access Plan.
Greenmantle Forest Inc.	2023-01-24	Meeting		Hydro One met with Greenmantle Forest Inc. and Valard to discuss the Project and potential efficiencies to reduce impacts on the environment, such as shared use of access roads.
Greenmantle Forest Inc.	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Hike Ontario				
Hike Ontario	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided
Hike Ontario	2023-01-03	Email	Outgoing	Hydro One emailed Hike Ontario to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Neighbours on the Line				
Neighbours on the Line	2023-01-17	Phone	Incoming	Neighbours on the Line called Hydro One to voice concerns on the preliminary preferred route relative to their family property. Hydro One highlighted the importance of sharing their feedback in writing so it could be carefully considered by the Project team.
Neighbours on the Line	2023-01-17	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to provide a summary of their grievances and noted a hard copy submission would be submitted.
Neighbours on the Line	2023-01-18	Email and Letter	Incoming	A member of Neighbours on the Line emailed Hydro One to provide a letter on the preliminary preferred route study area. Neighbours on the Line requested a meeting on January 20 or 23, 2023.
Neighbours on the Line	2023-01-20	Email	Outgoing	Hydro One emailed a member of Neighbours on the Line to thank them for their feedback on the Project. Hydro One noted their concerns had been shared with the Project team for review and consideration as part of the environmental assessment process. Hydro One requested Neighbours on the Line provide their availability the last week of February 2023 for a meeting to discuss their concerns. Hydro One also explained the Environmental Assessment Report would be available in spring 2023 for public review.
Neighbours on the Line	2023-01-20	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to note they would be proceeding with a meeting on January 25, 2023 and indicated a Hydro One representative could attend.
Neighbours on the Line	2023-01-23	Phone	Outgoing	Hydro One called a member of Neighbours on the Line to listen to their concerns. The member indicated they are planning to discuss an alternative route at their January 25, 2023 meeting and invited Hydro One to attend. Hydro One confirmed a representative was unable to attend the meeting on January 25, 2023 and reiterated our commitment to finding a meeting time February 2023.
Neighbours on the Line	2023-01-23	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to note they would be holding their first meeting on January 25, 2023 at the Kaministiquia Community Centre.
Neighbours on the Line	2023-01-23	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to acknowledge they appreciated the call from a Hydro One representative and reiterated that they would be like to host a representative to attend their meeting on January 25, 2023. Neighbours on the Line requested Hydro One provide the Environmental Assessment for a specific parcel of land so they could review it prior to the meeting with Hydro One at the end of February 2023.
Neighbours on the Line	2023-01-25	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to provide a virtual meeting link for their meeting on January 25, 2023.
Neighbours on the Line	2023-01-25	Email	Outgoing	A member of Hydro One emailed Neighbours on the Line to note as previously discussed Hydro One's interest to coordinate a meeting with Neighbours on the Line in February 2023.
Neighbours on the Line	2023-01-25	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to note they were disappointed that they would not be attending the January 25, 2023 meeting.
Neighbours on the Line	2023-01-30	Email	Outgoing	Hydro One emailed a member of Neighbours on the Line to thank them for providing feedback about the Project. Hydro One noted that their comments would be considered as part of the EA and they would be in touch with a response once the Project team had reviewed the feedback.
Neighbours on the Line	2023-02-01	Email	Outgoing	Hydro One emailed a member of Neighbours on the Line to confirm Hydro One's availability for a meeting on March 1, 2023 in Kaministiquia.

1. Some content redacted for protection of privacy

Organization	Date	Type of Communication	Origin	Summary
Neighbours on the Line	2023-02-01	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to confirm Hydro One's March 1, 2023 meeting date would be considered by the Neighbours on the Line Committee. Neighbours on the Line also noted they were holding a second meeting that night.
Neighbours on the Line	2023-02-08	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to identify which Hydro One representative(s) could attend the March 1, 2023 meeting, provide details of discussion topics, and confirm that a question and answer period would follow Hydro One's presentation.
Neighbours on the Line	2023-02-08	Email	Outgoing	Hydro One emailed a member of Neighbours on the Line to clarify that Hydro One was planning to host a community open house on March 2, 2023. Hydro One indicated that they planned to share project information at the meeting, have multiple Hydro One representatives attend and have one on one conversations with community members about their respective feedback.
Neighbours on the Line	2023-02-09	Email	Incoming	A member of Neighbours on the Line emailed Hydro One to note their disappointment that Hydro One could not participate in the Neighbours on the Line meeting on March 1, 2023 and would be reaching out to their MPP.
Neighbours on the Line	2023-02-17	Email	Outgoing	Hydro One emailed Neighbours on the Line inviting them to a community open house on March 2, 2023, as well as a separate meeting with a small group of community representatives Hydro One to discuss the Project on February 22.
Neighbours on the Line	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Neighbours on the Line	2023-02-18	Email	Incoming	Neighbours on the Line emailed Hydro One to confirm their participation at a meeting on February 22, 2023 with Hydro One to discuss the Project.
Neighbours on the Line	2023-02-20	Email	Outgoing	Hydro one emailed Neighbours on the Line to confirm the meeting would take place on February 22, 2023.
Neighbours on the Line	2023-02-21	Email	Outgoing	Hydro One emailed Neighbours on the Line to confirm an updated meeting time on February 22, 2023.
Neighbours on the Line	2023-02-21	Email	Incoming	Neighbours on the Line emailed Hydro One to acknowledge the change to the meeting start time on February 22, 2023.
Neighbours on the Line	2023-02-21	Email	Incoming	Neighbours on the Line emailed Hydro One to inquire if they could have access to the meeting location kitchen prior to the meeting.
Neighbours on the Line	2023-02-21	Email	Outgoing	Hydro One emailed Neighbours on the Line to clarify that they could arrive earlier than the meeting start time.
Neighbours on the Line	2023-02-21	Email	Incoming	Neighbours on the Line emailed Hydro One to confirm what time they would arrive at the meeting location on February 22, 2023.
Neighbours on the Line	2023-02-22	Meeting		Hydro One met with Neighbours on the Line to discuss the alternative route they proposed and establish a working committee. Neighbours on the Line noted they would circulate their own meeting minutes in addition to Hydro One's minutes.
Neighbours on the Line	2023-02-22	Meeting		Hydro One attended a meeting hosted by Neighbours on the Line to listen to feedback.
Neighbours on the Line	2023-02-22	Email	Outgoing	Hydro One emailed Neighbours on the Line to note a representative from the office of the MPP of the District of Thunder Bay - Superior North may attend the Neighbours on the Line meeting on February 22, 2023.
Neighbours on the Line	2023-02-22	Email	Incoming	Neighbours on the Line emailed Hydro One to acknowledge the attendance of a representative from the office of the MPP of the District of Thunder Bay - Superior North at their meeting on February 22, 2023.
Neighbours on the Line	2023-02-22	Email	Incoming	Neighbours on the Line emailed Hydro One to provide a shapefile of the alternative route for the Project proposed by the Neighbours on the Line Committee.
Neighbours on the Line	2023-02-24	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for participating in the meeting on February 22, 2023 and noted the Project team was working on addressing the feedback and questions received. Hydro One requested contact information for additional representatives of Neighbours on the Line, as well as their availability for a future working group meeting between representatives of Neighbours on the Line and Hydro One.
Neighbours on the Line	2023-02-27	Email	Incoming	Neighbours on the Line emailed Hydro One to confirm their availability for a working group meeting on March 6, 2023. Neighbours on the Line also provided Hydro One the contact information they requested for additional Neighbours on the Line representatives.
Neighbours on the Line	2023-02-27	Email	Outgoing	Hydro One emailed a member of Neighbours on the Line to note they were open to having additional community members participate as part of the working group and this could be discussed further during the initial meeting. Hydro One indicated they would like to move the meeting from March 6, 2023 to an in-person meeting on March 10, 2023. Hydro One noted they would have a response to the request to put a pause on real estate activities in the community of Kaministiquia by the meeting on March 10, 2023.
Neighbours on the Line	2023-02-27	Email	Outgoing	Hydro One emailed Neighbours on the Line to propose an in-person meeting on March 3, 2023.
Neighbours on the Line	2023-02-27	Email	Incoming	Neighbours on the Line emailed Hydro One to indicate Hydro One's previous email regarding arranging an in-person meeting March 3, 2023 should be directed to Neighbours on the Line's secretary to manage communications.
Neighbours on the Line	2023-02-27	Email	Outgoing	Hydro One forwarded a message requesting an in-person meeting on March 3, 2023 to Neighbours of the Line's secretary and communications representative.

Organization	Date	Type of Communication	Origin	Summary
Neighbours on the Line	2023-03-01	Email	Outgoing	Hydro One emailed Neighbours on the Line to inquire about the refreshments vendor they had used the previous week.
Neighbours on the Line	2023-03-01	Meeting		Hydro One attended a meeting hosted by Neighbours on the Line to listen to feedback.
Neighbours on the Line	2023-03-02	Community Open House		Hydro One hosted a community open house to discuss ways to mitigate or minimize the impacts of the proposed Project.
Neighbours on the Line	2023-03-02	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for the additional information they provided after Hydro One's attendance at two meetings the week of February 27, 2023. Hydro One provided a reminder about the community open house at the Kaministiquia Community Centre and attached minutes from a previous discussion with Neighbours on the Line.
Neighbours on the Line	2023-03-02	Email	Incoming	Neighbours on the Line emailed Hydro One to provide details about where they had gotten their refreshments from for a previous meeting.
Neighbours on the Line	2023-03-08	Email	Incoming	Neighbours on the Line emailed Hydro One in follow-up to a conversation of the March 2, 2023 open house to inquire about anticipated timelines associated with Hydro One's review of the proposed community route.
Neighbours on the Line	2023-03-08	Email	Outgoing	Hydro One emailed the Neighbours on the Line to note the Project team was interested in meeting with Neighbours on the Line to learn more about the proposed alternative route Hydro One inquired about Neighbours on the Line's availability to meet the week of March 13, 2023.
Neighbours on the Line	2023-03-09	Email	Incoming	Neighbours on the Line emailed Hydro One to provide their availability on March 14, 2023 for a meeting to discuss their proposed alternative route.
Neighbours on the Line	2023-03-09	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for confirming their availability on March 14, 2023 and noted an invite would be sent out shortly.
Neighbours on the Line	2023-03-14	Meeting		Hydro One and WSP met with Neighbours on the Line to learn more about their proposed alternative route, including the type of criteria considered.
Neighbours on the Line	2023-03-15	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for discussing their proposed alternative route with Hydro One. Hydro One noted they looked forward to receiving the updated shapefiles of the route deviations that were agreed upon during the meeting. Hydro One concluded the email by proposing a set of meeting dates and times for a follow-up discussion.
Neighbours on the Line	2023-03-16	Email	Outgoing	Hydro One emailed Neighbours on the Line to inquire if they could share the shapefiles for the two deviations that were identified during their recent meeting in order to progress with the proposed alternative route analysis.
Neighbours on the Line	2023-03-16	Email	Incoming	Neighbours on the Line emailed Hydro One to provide the shapefiles for the agreed upon route deviations to the proposed alternative route. Neighbours on the Line noted they would send information about their original proposed alternative route, and make efforts to figure out how to send the rest of the requested shapefiles. Neighbours on the Line expressed that they would prefer to meet on March 21, 2023 for a discussion about their proposed alternative route.
Neighbours on the Line	2023-03-16	Email	Outgoing	Hydro One emailed Neighbours on the Line to note that they would send an invite for the March 21, 2023 meeting soon.
Neighbours on the Line	2023-03-16	Email	Incoming	Neighbours on the Line emailed Hydro One to provide an attached summary of notes regarding their proposed route.
Neighbours on the Line	2023-03-16	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for providing a summary of notes regarding their proposed route. Hydro One noted the summary would be incorporated into the minutes for the March 14, 2023 meeting and sent back to Neighbours on the Line for review.
Neighbours on the Line	2023-03-20	Email	Incoming	Neighbours on the Line emailed Hydro One confirm their availability to meet on March 21, 2023 and requested an agenda.
Neighbours on the Line	2023-03-20	Email	Outgoing	Hydro One emailed Neighbours on the Line to provide a proposed agenda for their March 21, 2023 meeting. Hydro One attached the meeting minutes from their call on March 14, 2023 and requested Neighbours on the Line provide feedback.
Neighbours on the Line	2023-03-24	Email	Outgoing	Hydro One emailed Neighbours on the Line to share minutes from February 22 and March 3, 2023 meetings for their review and comment. Hydro One noted they wanted to set up another in-person meeting in Kaministiquia on March 29, 2023 to discuss Hydro One's analysis of the community's proposed alternative route.
Neighbours on the Line	2023-03-26	Email	Incoming	Neighbours on the Line emailed Hydro One to confirm their availability to meet on March 29, 2023. Neighbours on the Line requested information about the meeting, including Hydro One representative, agenda and communication. Neighbours on the Line also invited Hydro One to attend a meeting they were hosting later in the day.
Neighbours on the Line	2023-03-28	Email	Outgoing	Hydro One emailed Neighbours on the Line to confirm requested information, including an agenda, Hydro One representation and communication about the meeting.
Neighbours on the Line	2023-03-28	Email	Outgoing	Hydro One emailed Neighbours on the Line to confirm the meeting location for the March 29, 2023 meeting and to confirm the agenda and a list of representatives from Hydro One that would be in attendance.

Neighbours on the Line	2023-04-15	Email	Incoming	Neighbours on the Line emailed Hydro One to offer feedback on the scheduling of meetings on April 18 and 19, 2023 regarding the analysis of the proposed alternative route.
Neighbours on the Line	2023-04-18	Meeting		Hydro One met with Neighbours on the Line to share the evaluation results of Neighbours on the Line's proposed route.
Neighbours on the Line	2023-04-18	Community Drop-In Session		Hydro One hosted an in-person community drop-in sessions in Kaministiquia to share the evaluation results of Neighbours on the Line's proposed route and engage with the community.
Neighbours on the Line	2023-04-19	Community Drop-In Session		Hydro One hosted an in-person community drop-in sessions in Kaministiquia to share the evaluation results of Neighbours on the Line's proposed route and engage with the community.
Neighbours on the Line	2023-04-20	Email	Incoming	Neighbours on the Line emailed Hydro One to provide a shapefile of their proposed alternative route through the Kaministiquia and Lappe area as discussed at the previous day's meeting.
Neighbours on the Line	2023-05-11	Phone	Incoming	Neighbours on the Line called and left a voicemail for Hydro One about the second alternative route they provided.
Neighbours on the Line	2023-05-11	Email	Outgoing	Hydro One emailed Neighbours on the Line to confirm receipt of the second alternative route proposed by Neighbours on the Line and provide comments on it. Hydro One noted they would be releasing the draft EA Report for public review and encouraged them to provide comments and feedback.
Neighbours on the Line	2023-05-11	Phone	Outgoing	Hydro One called Neighbours on the Line to walk them through an email they sent earlier that day regarding their comments on Neighbours on the Line's second alternative route and the release of the draft EA Report.
Neighbours on the Line	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Neighbours on the Line	2023-05-25	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for sharing their concerns about the Project. Hydro One noted they would discuss the concerns with the Project team.
Neighbours on the Line	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Neighbours on the Line	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Neighbours on the Line	2023-06-22	Email	Outgoing	Hydro One emailed Neighbours on the Line to follow-up on items discussed at the Open House on June 20, 2023. Hydro One noted the requested updates to the links on the Project website for the draft EA Report had been made and provided a link to the Terms of Reference and appendices.
Neighbours on the Line	2023-06-30	Email	Incoming	Neighbours on the Line emailed Hydro One to provide their comments on the draft EA Report. Neighbours on the Line noted they had concerns about the documentation of impacts of the Project on communities, institutions and businesses located in unincorporated areas.
Neighbours on the Line	2023-07-03	Email	Incoming	Neighbours on the Line emailed Hydro One to provide their comments on the draft EA Report.

Organization	Date	Type of Communication	Origin	Summary
Neighbours on the Line	2023-07-04	Email	Outgoing	Hydro One emailed Neighbours on the Line to thank them for providing their comments on the draft EA Report.
Neighbours on the Line	2023-07-05	Letters	Incoming	Hydro One received a package of letters from members of Neighbours on the Line providing their feedback on the draft EA Report
Neighbours on the Line	2023-07-07	Email	Outgoing	Hydro One emailed Neighbours on the Line to confirm they received a package of hard copy letters from them with their comments on the draft EA Report.
Neighbours on the Line	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Neighbours on the Line	2023-08-02	Email	Incoming	Neighbours on the Line emailed Hydro One to inquire if they had received a package from them that outlined their concerns.
Neighbours on the Line	2023-08-29	Email	Incoming	The MECP emailed Neighbours on the Line (and copied Hydro One) a letter responding to their June 26, 2023 letter detailing their concerns with the Project. The letter noted Hydro One was in the best position to respond to their concerns about the Project and that the final EA would undergo two formal review periods by the public.
Niobe Lake Fire Dept.				
Niobe Lake Fire Dept.	2022-03-09	Email	Incoming	Niobe Lake Fire Department emailed Hydro One requesting to be added to the mailing list for the project.
Niobe Lake Fire Dept.	2022-03-09	Email	Outgoing	Hydro One emailed Niobe Lake Fire Department to confirm addition to the mailing list. Hydro One also shared information about the amended Terms of Reference approval and Notice of Commencement of EA.
Niobe Lake Fire Dept.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Niobe Lake Fire Dept.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Niobe Lake Fire Dept.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Niobe Lake Fire Dept.	2022-08-18	Email	Outgoing	Hydro One emailed the project Government Review Team (GRT) to provide an update on the EA. Recipients were requested to confirm their interest in remaining on the GRT for the project and whether they would like to participate in a workshop on September 7, 2022 to receive additional updates and to provide feedback on the alternative route evaluation process. A draft agenda for the workshop was provided and a commitment made to provide materials for review in advance of the workshop.
Niobe Lake Fire Dept.	2022-08-23	Email	Incoming	Niobe Lake Fire Department emailed Hydro One to confirm they would participate in the Government Review Team Workshop on September 7, 2022.
Niobe Lake Fire Dept.	2022-08-24	Email	Outgoing	Hydro One emailed Niobe Lake Fire Department to thank them for confirming they will attend the Government Review Team Workshop on September 7, 2022 and noted a calendar invite would be sent.
Niobe Lake Fire Dept.	2022-10-11	Email	Outgoing	Hydro One emailed the Government Review Team to thank those who had participated in the September 7, 2022 Project Update and Alternative Route Evaluation Workshop. Hydro One attached the presentation from the workshop, minutes from the discussion and the list of criteria and indicators that will be used in the alternative route evaluation process.
Canadian National Railway (CN Rail) City of Dryden City of Kenora City of Thunder Bay Confederation College Environment and Climate Change Canada (ECCC) Fisheries and Oceans Canada (DFO) Infrastructure Ontario (IO) Lakehead Region Conservation Authority (LRCA) Lakehead University	2022-11-22	Meeting	Outgoing	Hydro One had an agency workshop with federal, provincial and municipal stakeholders to provide updates on field work results, consultation and engagement, alternative route evaluation, scheduling and the draft EA Report review process.

Transition Metals Corp.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Treasury Metals Inc.				
Treasury Metals Inc.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
Ausenco Engineering Treasury Metals Inc.	2022-03-10	Email	Outgoing	Hydro One emailed Treasury Metals Inc. offering to set up a call at the end of April/early May and attached a preliminary ROW to aid in their engineering.
Treasury Metals Inc.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
Treasury Metals Inc.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
Ausenco Engineering Treasury Metals Inc.	2022-11-09	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to provide an updated proposed Project footprint through the Goliath Gold area. Hydro One indicated they wanted to have a meeting with their contractor and Treasury Metals Inc. to discuss the proposed design and construction activities. Hydro One requested Treasury Metals Inc. share any updated design information for the Goliath Gold project in advance of the meeting. Hydro One provided a draft agenda and inquired if Treasury Metals Inc. had availability for a meeting on November 18 or 21, 2022.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to follow up about setting up a meeting to discuss updates on the Project and their impact on Treasury Metals Inc.'s Goliath Gold project. Hydro One inquired if they had availability the week of November 28, 2022 for a meeting.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to inquire who the main point of contact was as they had received a bounce-back email from the address they had previously been using.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Incoming	Treasury Metals Inc. emailed Hydro One to confirm who the main contact was following the departure of the previous main contact from the company. Treasury Metals Inc. noted they would determine their availability for a meeting on the dates Hydro One previously provided.
Ausenco Engineering Treasury Metals Inc.	2022-11-21	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to request their availability for a meeting on November 28, 29 and December 1, 2022 but noted a later date could be arranged.
Treasury Metals Inc.	2023-01-03	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
Ausenco Engineering Treasury Metals Inc.	2023-02-02	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to follow-up on a request to meeting regarding the preliminary preferred route for the Project. Hydro One also inquired if they had any feedback on the attached proposed preliminary preferred route footprint.
Ausenco Engineering Treasury Metals Inc.	2023-02-02	Email	Incoming	Treasury Metals Inc. emailed Hydro One to request a pdf version of the preliminary preferred route footprint.
Treasury Metals Inc.	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.

1. Some content redacted for protection of privacy

Stakeholder	Date	Type of Communication	Origin	Summary
Ausenco Engineering Treasury Metals Inc.	2023-02-23	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to provide PDF maps of the preliminary preferred route and access roads through the Goliath Gold area.
Treasury Metals Inc.	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Treasury Metals Inc.	2023-05-18	Flyer/ Unaddressed Notice	Outgoing	WSP coordinated the mailout of the draft EA Report notice to 65 mining claim holders.
Treasury Metals Inc.	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaminstiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Treasury Metals Inc.	2023-06-12	Email	Incoming	Treasury Metals Inc. emailed Hydro One to note Project correspondence should be sent to their new address.
Treasury Metals Inc.	2023-06-12	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to confirm their mailing address had been updated on the Project contact list.
Treasury Metals Inc.	2023-06-12	Email	Incoming	Treasury Metals Inc. emailed Hydro One to thank them for updating their mailing address in the Project contact list.
Treasury Metals Inc.	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Ausenco Engineering Treasury Metals Inc.	2023-07-05	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to inquire if they had reviewed the Project design information provided in February 2023 and if they required any additional information for their review. Hydro One also inquired about their availability for a meeting.
Treasury Metals Inc.	2023-07-05	Email	Outgoing	Hydro One emailed Treasury Metals Inc. as they had received a bounce back email to their email sent on July 4, 2023. Hydro One noted attached the Project design information and requested to schedule a meeting to discuss the construction plan.
Treasury Metals Inc.	2023-07-07	Email	Incoming	Treasury Metals Inc. emailed Hydro One to request a meeting be held the week of July 24, 2023 when their new environmental director would be starting.
Treasury Metals Inc.	2023-07-10	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to note a meeting would be set up for July 31, 2023 to discuss the Project.
Treasury Metals Inc.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
Treasury Metals Inc.	2023-08-02	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to inquire about their availability to meet on August 8, 9 or 11, 2023.
Treasury Metals Inc. Valard Construction LP	2023-08-02	Email	Incoming	Treasury Metals Inc. emailed Hydro One to request a meeting scheduled on August 2, 2023 be rescheduled.
Treasury Metals Inc. Valard Construction LP	2023-08-02	Email	Outgoing	Hydro One emailed Treasury Metals Inc. to confirm the meeting scheduled for August 2, 2023 could be rescheduled for later that week or early the week of August 7, 2023.
Treasury Metals Inc. Valard Construction LP	2023-08-09	Meeting		Hydro One met with Treasury Metals to discuss the status of the Goliath Gold Mine and Waasigan projects. The attendees confirmed the two projects' designs are compatible and will continue working together as both projects progress through their respective design and approvals processes.
Trojan Gold Inc.				
Trojan Gold Inc.	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
Trojan Gold Inc.	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.

Stakeholder	Date	Type of Communication	Origin	Summary
Trojan Gold Inc.	2023-05-18	Flyer/ Unaddressed Notice	Outgoing	WSP coordinated the mailout of the draft EA Report notice to 65 mining claim holders.
Trojan Gold Inc.	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
Trojan Gold Inc.	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
Trojan Gold Inc.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
White Metal Resources Corp.				
White Metal Resources Corp.	2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.
White Metal Resources Corp.	2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
White Metal Resources Corp.	2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
White Metal Resources Corp.	2023-01-03	Email	Outgoing	Hydro One emailed White Metal Resources Corp. to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and interactive map.
White Metal Resources Corp.	2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 - 8p.m. The purpose of the community open house as described in the invitation is for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
White Metal Resources Corp.	2023-05-17	Email	Outgoing	Hydro One sent an email to stakeholders notifying them that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
White Metal Resources Corp.	2023-05-18	Flyer/ Unaddressed Notice	Outgoing	WSP coordinated the mailout of the draft EA Report notice to 65 mining claim holders.
White Metal Resources Corp.	2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
White Metal Resources Corp.	2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
White Metal Resources Corp.	2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.

Other Mining Claim Holders - Record of Consultation

Date/time	Type of communication	Origin	Summary
2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project via Canada Post regular mail. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
2022-03-09	Email	Outgoing	Hydro One emailed to advise that approval from the MECP for the amended ToR for the Project was received in February 2022. Hydro One noted that the EA is moving forward in accordance with the approved amended ToR. A Notice of Commencement of the EA was provided.

Date/time	Type of communication	Origin	Summary
2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
2022-05-07	Email	Incoming	A mining claim holder emailed Hydro One expressing their preference against the selection of alternative 1B.
2022-05-12	Email	Outgoing	Hydro One emailed a mining claim holder to provide information about the Project, including project timelines and the typical width of 230 kilovolt transmission line corridors.
2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
2023-01-03	Email	Outgoing	Hydro One emailed members of the project contact list to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and map.
2023-01-24	Phone	Incoming	A mining claim holder called and left a voicemail for Hydro One requested the contact information of the project manager that they met at the open house.
2023-01-26	Phone	Outgoing	Hydro One called a mining claim holder to discuss their concerns with the Project. The mining claim holder noted they had engaged with a community organizer to start a petition of the preliminary preferred route. Hydro One provided general details about the EA and construction timelines and encouraged the resident to have others contact them with their feedback.
2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 – 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
2023-02-20	Email	Outgoing	Hydro One emailed several residents including a mining claim holder to follow-up on a request for a meeting on February 22, 2023 in Thunder Bay to discuss the Project.
2023-02-21	Email	Incoming	A resident and mining claim holder emailed Hydro One to note they would attend the meeting on February 22, 2023 in Thunder Bay.
2023-02-21	Email	Outgoing	Hydro One emailed several residents including a mining claim holder to thank them for confirming they would attend a meeting on February 22, 2023 in Thunder Bay. Hydro One provided the meeting location and start time.
2023-02-22	Meeting		Hydro One met with residents including a mining claim holder from the Shebandowan area in Thunder Bay to listen and seek to better understand their feedback about the preliminary preferred route.
2023-02-24	Phone	Incoming	A resident and mining claim holder called Hydro One and left a voicemail requesting to have a discussion regarding a meeting they had with Hydro One on February 22, 2023.
2023-03-01	Email	Outgoing	Hydro One emailed several residents including a mining claim holder to thank them for meeting with Hydro one the week of February 20, 2023. Hydro One noted they would be in touch to schedule a meeting in the near future to continue discussing their feedback about the preliminary preferred route and potential mitigation measures.
2023-03-07	Phone	Incoming	A resident and mining claim holder called Hydro One to note they were upset about meeting with Hydro One leadership instead of working-level-oriented Hydro One staff who could discuss details about environmental impacts and refinement options. Hydro One confirmed they were continuing to investigate Project options and would schedule another meeting to continue discussing their feedback in the Amp Lake area.
2023-03-24	Email	Outgoing	Hydro One emails several residents including a mining claim holder to note they had been working with Valard to refine the Project route in the Shebandowan area. Hydro One noted they wanted to meet with the residents and the mining claim holder to discuss the refinements to the line on March 30, 2023 in-person.
2023-03-24	Email	Incoming	A resident and mining claim holder emailed Hydro One (and cc'd several other residents) to note they did have availability on March 30, 2023 to meet in person to discuss refinements in to the Project route in the Shebandowan area.
2023-03-24	Email	Outgoing	Hydro One emailed several residents including a mining claim holder to thank them for confirming their availability for an in-person meeting regarding refinements to the Project route in the Shebandowan area on March 30, 2023. Hydro One provided a list of Hydro One representatives that would attend the meeting.
2023-03-30	Meeting		Hydro One met with several residents including a mining claim holder from the Shebandowan area to discuss a refinement that could be made to the preliminary preferred route, based on feedback provided by the residents and the mining claim holder and further technical analysis.
2023-04-04	Email	Incoming	A resident and mining claim holder emailed Hydro One to note they owned mining surface rights between Thunder Bay and Atikokan that may be effected by the Project. The mining claim holder inquired about measures that would be taken to mitigate effects of the project to mining rights holders and requested additional information about studies completed as part of the environmental assessment.
2023-04-06	Email	Outgoing	Hydro One emailed a resident and mining claim holder to thank them for an email about concern for potential Project effects to their mining rights. Hydro One noted they would be releasing the draft EA Report which would include details on potential effects to mining resources. Hydro One also indicated their real estate team would reach out to Crown land use permits/rights holders to discuss potential effects and address them according to the MNRF framework.

General Public - Record of Consultation

Date/time	Type of communication	Origin	Summary
2022-03-09	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Thunder Bay Chronicle (Chronicle-Journal) newspaper.
2022-03-09	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Atikokan Progress newspaper.
2022-03-09	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Fort Frances Times newspaper.
2022-03-09	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Sioux Lookout Bulletin.
2022-03-09	Letter	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project via Canada Post regular mail. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process.
2022-03-09	Email	Outgoing	Hydro One emailed to announce that the amended ToR for the Project was approved by the Ministry of the Environment, Conservation and Parks in February 2022. Subsequently, Hydro One provided a brief overview on the environmental assessment process, stated that they would share more details about spring 2022 engagement opportunities in the following weeks, and offered to answer any questions or concerns that may be raised.
2022-03-09	Email	Outgoing	Hydro One emailed a resident to provide notification that Hydro One would be proceeding with an Environmental Assessment for the Waasigan Transmission Line Project in accordance with the Environmental Assessment Act as the Ministry of the Environment, Conservation and Parks had approved the Amended Terms of Reference in February.
2022-03-09	Email	Incoming	A resident Hydro One requesting detailed maps of the proposed routes, expressing concern for the Wishart Conservation are and Ferguson Creek.
2022-03-10	Email	Outgoing	Hydro One emailed a resident links to view an interactive map and other project information.
2022-03-10	Flyer/ Unaddressed Notice	Outgoing	Hydro One mailed a notice to advise of the Notice of Commencement of EA for the Project. The notice advised that approval from the MECP for the amended ToR for the Project was received in February 2022 and that the EA is moving forward in accordance with the amended ToR. The notice noted that engagement opportunities will be offered in spring 2022 to discuss the EA and alternative routes evaluation process. The notice was sent via Canada Post Neighbourhood Mail to approximately 56,000 local property owners, residents and businesses in the Project area that may be potentially affected and/or interested in the Project.
2022-03-10	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Thunder Bay Source newspaper.
2022-03-10	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Kenora News and Miner newspaper.
2022-03-10	Email	Outgoing	Hydro One emailed a resident to thank them for their inquiry and that a preferred route hasn't been selected yet at that the environmental assessment process has started which will result in a preferred route selection in fall 2022.
2022-03-10	Email	Incoming	A resident emailed Hydro One about alternative route boundaries.
2022-03-11	Email	Incoming	A resident emailed Hydro One to request to be added to the Project contact list.
2022-03-13	Email	Incoming	A resident emailed Hydro One about an alternative route potentially crossing their property and would like to discuss the land acquisition process.
2022-03-14	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-03-14	Email	Outgoing	Hydro One emailed a resident to request for their property address, as well as provide information about the environmental assessment process.
2022-03-14	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their property address and confirmed the alternative routes do not cross their property.
2022-03-14	Email	Incoming	A resident emailed Hydro One to note their preference for the preferred route to follow existing transmission line infrastructure.
2022-03-15	Email	Outgoing	Hydro One emailed a resident with an update on the Terms of Reference and attached a Notice of Commencement.
2022-03-16	Newspaper	Outgoing	Hydro One published the Notice of Commencement of EA for the Project in the Dryden Bulletin.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-03-17	Email	Outgoing	Hydro One emailed a resident regarding the criteria that will be considered as part of the route evaluation process. Hydro One directed Lakehead University to the Project website for details of how the preferred route will be selected, as well as considerations that will be made during the environmental assessment as presented in the Terms of Reference.
2022-03-18	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about co-locating the Project along existing transmission line infrastructure.
2022-03-21	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-03-21	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-03-22	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-03-22	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-03-24	Email	Outgoing	Hydro One emailed a resident that the ToR for the Project received approval in February 2022 and that the EA is moving forward. Hydro One provided information about the purpose of an EA and its components. Hydro One shared that the preferred route would be selected following the evaluation of alternative routes.
2022-03-25	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-03-28	Phone	Incoming	A resident left a voicemail for Hydro One requesting to be added to the Project contact list.
2022-03-28	Phone	Incoming	A resident left a voicemail for Hydro One seeking clarification on the Project location.
2022-03-28	Phone	Incoming	A resident left a voicemail for Hydro One to confirm receipt of the Notice of Commencement of EA and to request to be added to the Project contact list.
2022-03-29	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-03-30	Phone	Outgoing	Hydro One called a resident to provide information about the Project, including the locations of the alternative routes.
2022-03-30	Phone	Outgoing	Hydro One called a resident to confirm they have been added to the Project contact list, and also inform them they can find more detailed interactive mapping on the project website.
2022-03-30	Email	Outgoing	Hydro One emailed a resident following an earlier phone call to share a link for the interactive project map to view the alternative routes being considered for the Project.
2022-03-30	Email	Incoming	A resident emailed Hydro One pleased with the mapping resources provided.
2022-03-30	Email	Outgoing	Hydro One emailed a resident to thank them for the positive feedback on the mapping resources available online.
2022-03-31	Phone	Incoming	A resident left a voicemail for Hydro One requesting a callback to discuss the Project.
2022-03-31	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-03-31	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-04-04	Phone	Outgoing	Hydro One left a voicemail message for a resident to confirm eagles nests are considered as a part of the EA planning process.
2022-04-04	Email	Incoming	A resident emailed Hydro One regarding difficulties accessing the interactive map.
2022-04-04	Email	Outgoing	Hydro One emailed a resident to apologize for the error on the interactive online map and noted a solution to fix the error is being investigated.
2022-04-06	Email	Outgoing	Hydro One emailed a resident to confirm the interactive map is no longer displaying an error message.
2022-04-06	Email	Incoming	A resident emailed Hydro One to thank them for the update regarding the interactive map and would like to know how to share technical feedback.
2022-04-06	Email	Outgoing	Hydro One emailed a resident with information about how to provide Project feedback.
2022-04-09	Email	Incoming	A resident emailed Hydro One requesting to be added to the Project contact list.
2022-04-11	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-04-15	Email	Incoming	A resident emailed Hydro One inquiring about the location of the alternative routes for the Project.
2022-04-18	Email	Incoming	Australian Department of Environment, Land, Water, and Planning emailed Hydro One for an opportunity to discuss the Project.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-04-20	Phone	Incoming	A resident left a voicemail for Hydro One inquiring about employment opportunities related to the Project and to sign up for the Project contact list.
2022-04-20	Email	Incoming	A resident emailed Hydro One inquiring about registering for the virtual open house.
2022-04-21	Email	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022.
2022-04-22	Phone	Incoming	A resident left a voicemail for Hydro One regarding an open house in May.
2022-04-22	Phone	Outgoing	Hydro One called a resident to provide information about the Project, including discussion about Project timelines, construction activities and employment.
2022-04-22	Phone	Incoming	A resident left a voicemail for Hydro One inquiring about the Project.
2022-04-22	Phone	Outgoing	Hydro One left a voicemail for resident following their voicemail left on April 22, 2022.
2022-04-22	Email	Outgoing	Hydro One emailed a resident confirming how to participate in the virtual open house.
2022-04-22	Email	Incoming	A resident emailed Hydro One to confirm successful registration for the virtual open house.
2022-04-22	Email	Incoming	A resident emailed Hydro One with concerns of pipeline corrosion along alternative route 1A. They also inquired about land permission within TC Energy easements.
2022-04-22	Email	Incoming	A resident emailed Hydro One with a suggestion for a new proposed alternative, away from the pipeline corridor.
2022-04-22	Email	Outgoing	Hydro One emailed a resident following their phone call on April 22, 2022 with details on the Thunder Bay open house on May 5, 2022.
2022-04-25	Letter	Outgoing	Hydro One sent a notice of open houses for the Project interested persons and organizations. The notice provided information about the Project, as well as details of the in-person community open houses in Thunder Bay, Atikokan and Dryden from May 3-5, and how to join the virtual open house on May 18, 2022
2022-04-25	Email	Outgoing	Hydro One emailed a resident following their voicemail left on April 20, 2022. Hydro One confirmed they have been added to the Project contact list and provided an update on the Project and employment opportunities.
2022-04-25	Email	Incoming	A resident emailed Hydro One to inquire about more detailed maps of the alternative routes and where to submit feedback.
2022-04-26	Email	Outgoing	Hydro One emailed a resident a link to project mapping information.
2022-04-26	Email	Outgoing	Hydro One emailed Australian Department of Environment, Land, Water, and Planning to schedule a meeting to discuss the Project.
2022-04-26	Email	Outgoing	Hydro One emailed a resident to confirm their property in relation to the alternative routes and explained the preferred route selection process.
2022-04-27	Phone	Incoming	A resident left a voicemail for Hydro One stating they have an existing transmission line on their property and would like to stay informed of the Project.
2022-04-27	Email	Incoming	A resident inquired about the process of submitting feedback on the route proposed routes. The resident noted they were opposed to alternative route 1A.
2022-04-28	Email	Outgoing	Hydro One emailed a resident to provide an overview of the route selection process and how to provide feedback.
2022-04-29	Email	Outgoing	Hydro One emailed a resident regarding their feedback on alternative route 1A by providing an overview of the environmental assessment process and the communication effort to TC Energy. Hydro One explained that the TC Energy easement agreements allow for transmission lines.
2022-04-29	Phone	Outgoing	Hydro One left a voicemail for a resident, returning their call, and left a direct phone line to call back.
2022-05-02	Email	Incoming	A resident emailed Hydro One regarding a meeting Hydro One is having with their neighbour. They will be attending the meeting in Dryden.
2022-05-03	Email	Incoming	A resident thanked Hydro One for their response to their inquiry.
2022-05-03	Email	Outgoing	Hydro One described the role of environmental field studies in the environmental assessment for the purposes of identifying a preferred route in reply to a Resident's inquiry.
2022-05-03	Email	Outgoing	Hydro One suggested to Resident to meet Real Estate Representative at the Open House on May 3, 2022.
2022-05-03	Email	Incoming	A resident emailed Hydro One to thank them for the suggestion of speaking to Hydro One Real Estate representative at the upcoming Open House on May 3, 2022.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-05-04	Email	Outgoing	Golder, on behalf of Hydro One, emailed a participant of the OYEP program a short term job description.
2022-05-04	Email	Outgoing	Golder, on behalf of Hydro One, emailed a participant of the OYEP program a short term job description.
2022-05-04	Email	Outgoing	Golder, on behalf of Hydro One, emailed a participant of the OYEP program a short term job description.
2022-05-04	Email	Outgoing	Golder, on behalf of Hydro One, emailed a participant of the OYEP program a short term job description.
2022-05-04	Email	Incoming	Australian government Senior Policy Officer emailed Hydro One a suggested meeting time to accommodate time zone differences.
2022-05-05	Email	Incoming	A resident inquired about viewing detailed maps.
2022-05-05	Email	Outgoing	Hydro One provided a link to view the Project interactive map to a resident.
2022-05-05	Email	Incoming	A resident emailed Hydro One inquiring about the land acquisition process.
2022-05-05	Email	Outgoing	Hydro One responded to a resident with information on the land acquisition process.
2022-05-07	Email	Incoming	A resident emailed Hydro One to inquire if their property is impacted by an alternative route.
2022-05-10	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-05-13	Email	Incoming	A resident requested to be added to the Project contact list.
2022-05-17	Email	Outgoing	Hydro One emailed a resident to confirm they have been added to the Project contact list.
2022-05-18	Email	Outgoing	Hydro One emailed members of the project contact list a reminder invitation about the virtual open house held on May 18, 2022.
2022-05-18	Email	Incoming	A resident emailed Hydro One with an inquiry regarding merchantable wood.
2022-05-19	Phone	Incoming	A resident left a voicemail noting that they had received a message regarding Waasigan and requested a call back.
2022-05-24	Phone	Incoming	A resident left a voicemail within the community relations inbox.
2022-05-26	Phone	Outgoing	A resident received a call back regarding a voicemail they left. Hydro One provided additional information on the Waasigan Project including the planning process and preferred route selection process. The resident asked to be added to the Project contact list and expressed concerns regarding impacts on water crossings, wildlife, and wildlife habitat. Hydro One thanked the resident for their feedback and noted it would be considered as part of the environmental assessment.
2022-05-27	Email	Outgoing	Hydro One emailed a resident back regarding a question about merchantable wood. Hydro One noted their commitment to support the local economy. Hydro One noted that timber harvesting was being considered as an option and a Timber Clearing/Harvest and Renewal Plan will be prepared prior to construction and in consultation with Indigenous communities. Hydro One noted that the information would be available for review in the draft environmental assessment.
2022-05-27	Email	Outgoing	Hydro One emailed a resident regarding a previous phone call and noted that they had added the resident to the Project contact list. Hydro One provided a link to the Project website for additional information.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public regarding their feedback in opposition to alternative route 1A, citing concern for EMF. Hydro One thanked the resident for their feedback and noted the alternative routes would be evaluated through the environmental assessment process and that input from Indigenous communities, agencies and the public is crucial, along with environmental, technical, and other considerations, in determining the preferred route for the new line. Hydro One noted that the Project design would follow all regulatory requirements to account for public health/safety and consider information from health experts such as Health Canada.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to address a question the resident had regarding Project costs. Hydro One noted that an estimate will be developed following the selection of a preferred route and submitted to the Ontario Energy Board.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public regarding the resident's identification and concern of a moose breeding area located near their property. Hydro One noted that effects on vegetation, waterbodies, wildlife, and their habitats will be assessed during the environmental assessment, and measures to avoid or mitigate effects, including restoration, will be identified. Hydro One also noted that once a preferred route is selected, further local refinements would be completed based on additional feedback

			received to avoid sensitive natural and/or socio-economic features, and for technical reasons. Hydro One provided link to the Project website containing additional information on the Project.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public regarding the proposed Project route as the resident owns property in the area. Hydro One provided the resident with maps showing the routes being considered for the Waasigan Project and information about the land acquisition process.
2022-05-27	Email	Incoming	A member of the public emailed Hydro One regarding a temporary access rights pertaining to the Waasigan Project.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public regarding a question the resident had during the virtual community open house held on May 18, 2022, pertaining to utility costs. Hydro One noted that an estimate will be developed once a preferred route has been selected and will be part of an approval sought from the Ontario Energy Board. A link to the Project site was provided to the resident containing additional information.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to thank them for participating in the community open house on May 18, 2022 and provide additional details about the purpose and environmental assessment process.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to thank them for participating in the community open house on May 18, 2022 and provide additional details about purpose and environmental assessment process, and information about the land acquisition process.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to thank them for participating in the community open house on May 18, 2022 and provide additional details about purpose and environmental assessment process, and information about the land acquisition process.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to thank them for participating in the community open house on May 18, 2022 and provide additional details about purpose and environmental assessment process, and information about the land acquisition process.
2022-05-27	Email	Outgoing	Hydro One emailed a member of the public to thank them for participating in the community open house on May 18, 2022 and provide additional details about the purpose and environmental assessment process, including information about engagement opportunities in response to their question
2022-05-30	Phone	Outgoing	Hydro One phoned a member of the public to provide a project update as the individual had been added to the contact list but were being returned as undeliverable. The individual's email was updated so that they received updates moving forward.
2022-05-30	Email	Outgoing	Golder emailed a member of the public to follow up about their interest in joining a field program team for the Project.
2022-05-30	Email	Outgoing	Golder emailed a member of the public to follow up about their interest in joining a field program team for the Project.
2022-05-30	Email	Outgoing	Golder emailed a member of the public to follow up about their interest in joining a field program team for the Project.
2022-05-30	Email	Outgoing	Golder emailed a member of the public to follow up about their interest in joining a field program team for the Project.
2022-05-30	Email	Outgoing	Hydro One emailed a member of the public to provide a map of the Project to show alternative route 3A in relation to their property. Hydro One provided information about the route evaluation process.
2022-05-31	Email	Outgoing	Hydro One emailed a member of the public to thank them for reaching out about the project and notify them that Canacre will be in touch to arrange a land access agreement.
2022-06-07	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for participating in the May 18 virtual community open house and provide additional information about alternative routes and the EA process.
2022-06-07	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for participating in the virtual community open house on May 18. Hydro One provided information about environmental field studies and access right agreements.
2022-06-07	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for participating in the virtual community open house on May 18. Hydro One provided information about electricity arcs and public safety.
2022-06-07	Phone	Outgoing	Hydro One left a voicemail for a resident, with a callback number, to discuss their question posed at the May 18 virtual community open house.
2022-06-07	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for participating in the virtual community open house on May 18. Hydro One provided information about environmental field studies and access right agreements.
2022-06-07	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for participating in the virtual community open house on May 18. Hydro One provided information about cell phones and internet service being unimpacted by the Project.
2022-06-07	Email	Outgoing	Hydro One emailed a resident to thank them for participating in the May 18, 2022 virtual community open house. Hydro One provided a link to the Project website and provide a brief overview of the Project. Hydro One indicated additional community open houses would take place after a preferred route was selected and the draft Environmental Assessment Report is complete.
2022-06-07	Email	Incoming	A resident emailed Hydro One to provide feedback about the interactive map and alternative route 1A near Wishart Conservation area.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-06-09	Email	Outgoing	Hydro One emailed a resident to thank them for their additional comments about alternative route 1A for the Project. Hydro One noted they would work with the appropriate agencies during the environmental process to minimize effects to protected areas.
2022-06-13	Email	Incoming	A Member of the Public emailed Hydro One to thank them for the phone call and email. The Member of the Public noted the various routes on the map were confusing when they tried to assess the impact to their property. The Member of the Public noted further hydro line development will have a negative impact on ecosystems.
2022-06-14	Email	Incoming	A resident emailed Hydro One to confirm they would like to be included in the Project email contact list and noted their lack of confidence in the comprehensiveness of the provincial EA process. The resident provided a list of items that should be considered during the EA process and noted if a transmission line is to be built it should follow adjacent to existing lines.
2022-06-15	Phone	Incoming	Hydro One received a voicemail from a property owner requesting a callback.
2022-06-15	Phone	Outgoing	Hydro One called a member of the public to discuss receiving engagement opportunity notices, their feedback about alternative routes, the Project study area and the selection of a preferred route. Hydro One committed to add the member of the public to the project contact list.
2022-06-21	Email	Incoming	A Member of the Public emailed Hydro One to inquire when the completion date for the Project would be.
2022-06-22	Email	Outgoing	Hydro One emailed a Member of the Public to provide project timeline information.
2022-06-29	Email	Outgoing	Hydro One emailed a Member of the Public to thank them for their feedback about alternative routes and inquire about their property address.
2022-06-29	Email	Incoming	A member of the public emailed Hydro One to provide feedback on an alternative route.
2022-06-30	Email	Outgoing	Hydro One emailed a resident to confirm they had been added to the contact list and thank them for their additional feedback. Hydro One provided responses to each of the items the resident outlined for consideration.
2022-07-04	Email	Incoming	A member of the public emailed Hydro One requesting to be added to the Project contact list.
2022-07-12	Email	Outgoing	Hydro One emailed a member of the public to confirm they had been added to the Project contact list.
2022-07-12	Email	Incoming	A member of the public emailed Hydro One to request further information about the Project in relation to their property.
2022-07-13	Email	Outgoing	Hydro One emailed a member of the public to provide background information on the route selection process and the Terms of Reference for the Project. Hydro One subsequently encouraged the member of the public to participate in the Waasigan routing survey and affirmed that their feedback would be considered as part of the environmental assessment process.
2022-07-13	Email	Outgoing	Hydro One emailed a member of the public in response to that individual's July 12, 2022 email. Hydro One stated that a preferred route for the Project has not yet been selected but noted that Hydro One is still accepting feedback from the community.
2022-07-26	Email	Incoming	A member of the public emailed Hydro One to request route maps in a non-PDF format and inquired if they would be able to provide their opinion on the route selection through their property area.
2022-07-29	Email	Outgoing	Hydro One emailed a member of the public to confirm that route 1B follows through the north side of the member of the public's property. Hydro One stated that the preferred route would be identified by the end of this year following a route evaluation process. Hydro One provided information about the land acquisition process.
2022-08-02	Email	Incoming	A resident emailed Hydro One to request to be added to the Project contact list.
2022-08-02	Email	Outgoing	Hydro One emailed a resident to confirm and that they had been added to the project contact list.
2022-08-03	Email	Incoming	A resident emailed Hydro One to thank them for adding them to the Project contact list.
2022-08-26	Email	Incoming	A resident emailed Hydro One to offer their comments on a route for the Project and asked if they could be of service regarding printing.
2022-08-26	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback about the Project route and noted a preferred route would be selected following an alternative route evaluation process. Hydro One indicated they would be happy to work with the resident's company regarding printing services and keep them in mind for future needs.
2022-09-06	Email	Incoming	An individual emailed Hydro One to inquire if they could be added to the Project contact list.
2022-09-07	Phone	Outgoing	A member of the public left a voicemail for Hydro One indicating they had questions about the Project.
2022-09-07	Phone	Outgoing	A resident and Hydro One had a phone call to discuss their feedback related to the Project in relation to their property off Highway 102. Hydro One provided information about the route evaluation process and future engagement opportunities. Hydro One thanked the individual and noted their feedback would be considered as part of the environmental assessment process.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-09-19	Email	Incoming	A resident emailed Hydro One to inquire if there was any updated information regarding if the proposed Project would be constructed through their Kaministiquia property. The resident inquired if Hydro One could contact them back.
2022-09-21	Email	Outgoing	Hydro One emailed a resident regarding their follow up email, to provide project timeline information.
2022-09-21	Email	Incoming	A resident emailed Hydro One to follow up on their previous inquiry regarding the timeline for the preferred route selection. The resident noted continued concerns related to property impacts.
2022-10-05	Email	Incoming	A resident emailed Hydro One to inquire about being advised of continuing discussion on the Project being considered outside their home in Gorham Township and shared mailing and contact information.
2022-10-06	Email	Outgoing	Hydro One emailed the resident who inquired about Hydro One work outside their home in Gorham Township and noted they had been added to the Project contact list and would receive updates about the Project going forward.
2022-10-09	Email	Incoming	A resident emailed Hydro One to inquire about being added to the Project contact list as one of the routes has the potential to impact his property. The resident provided contact information.
2022-10-10	Email	Incoming	A resident emailed Hydro One to inquire about being to the Project contact list as the Project has the potential to impact their property.
2022-10-13	Email	Outgoing	Hydro One emailed a resident who had contacted them and wished to be added to the Project list and was concerned about the Project impacting their property. Hydro One provided an overview of the route evaluation process and noted that continued input and information from the public would be considered as part of the environmental assessment.
2022-10-13	Email	Outgoing	Hydro One emailed a resident who had contacted them and wished to be added to the Project list and was concerned about the Project impacting their property. Hydro One provided an overview of the preferred route selection process and noted that continued input and information from the public would be considered as part of the environmental assessment
2022-10-31	Email	Incoming	A resident requested to be added to the Project contact list.
2022-10-31	Email	Outgoing	Hydro One emailed a member of the public to confirm they had been added to the project contact list.
2022-11-06	Email	Incoming	A member of the public emailed Hydro One to inquire if the Project route would go through their property. The member of public noted they attended a meeting in Dryden the summer of 2022 regarding the Project and were hopeful to have an update by now.
2022-11-09	Email	Outgoing	Hydro One emailed a member of the public to note the preliminary preferred route was not yet determined. Hydro One indicated they would reach out as soon as the preliminary preferred route was finalized.
2022-11-15	Email	Incoming	A member of the public emailed Hydro One to request an update on the Project.
2022-11-15	Email	Outgoing	Hydro One emailed a member of the public to note the preliminary preferred route was being finalized and they would provide an update about the results of the route evaluation and selection of the preliminary preferred route in the future.
2022-11-28	Email	Incoming	A member of the public emailed Hydro One to inquire when they would hear about the preliminary preferred route as they previously were told at a community information meeting that they would receive an update before the end of the year.
2022-12-02	Email	Incoming	A member of the public emailed Hydro One to thank them for the update about the preliminary preferred route and to provide their mailing address for the notice Hydro One noted would be sent out when the preliminary preferred route was to be selected.
2022-12-04	Email	Incoming	A member of the public emailed Hydro One to request clarification about when surveys for easements will start in 2023. The member of the public noted the agreed to temporary work for environmental assessment.
2022-12-05	Email	Incoming	A member of the public emailed Hydro One their property address.
2022-12-05	Email	Outgoing	Hydro One emailed a member of the public to confirm that their address had been added to the mailing list for Project.
2022-12-05	Email	Outgoing	Hydro One emailed a member of the public to thank them for sharing their comments about the project and requested they provide the property address so Hydro One could investigate if the Project would cross their property.
2022-12-07	Email	Outgoing	Hydro One emailed a member of the public to thank them for providing their property address and confirmed that there would be no environmental survey or survey work completed on their property in 2023. Hydro One noted a preliminary preferred route would be announced in the New Year and inquired if the member of the general public wanted to be added to a contact list to receive project update. Hydro One clarified that once the preliminary preferred route was announced real estate representatives would reach out directly to impact landowners to set up a meeting to discuss the land acquisition process.
2022-12-07	Email	Incoming	A member of the public emailed Hydro One to indicate they had received information from a third party that a survey crew would be working on their property in January 2023 and requested clarification from Hydro One.
2022-12-07	Email	Outgoing	Hydro One emailed a member of the public to confirm Hydro One would not begin surveys in January 2023 and they had not selected a land surveyor contractor for the next phase of the Project.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2022-12-30	Email	Incoming	A member of the public emailed Hydro One to note they had heard a tentative route for the Project had been decided upon. The member of public noted the route would impact their property and inquired if there would be an in-person meeting regarding the route announcement.
2023-01-03	Email	Outgoing	Hydro One emailed members of the project contact list to announce the selection of the preliminary preferred route and included an invitation to join the upcoming community houses between January 16, 2023 and January 18, 2023. Hydro One included an attached notice and map.
2023-01-03	Email	Incoming	A resident emailed Hydro One to inquire if there was a contact they could speak to regarding questions they had about the land acquisition process.
2023-01-03	Email	Incoming	A resident email Hydro One to thank them for the invite to the community open houses and provided their positive feedback on the preliminary preferred route. The resident inquired if the Project would require the widening of the existing corridor.
2023-01-03	Email	Incoming	A resident emailed Hydro One to note they would attend the community open house in Atikokan on January 17, 2023.
2023-01-03	Email	Outgoing	Hydro One emailed a resident to clarify the Project would involve the widening of the existing corridor and noted more details would be available as part of EA report.
2023-01-03	Email	Outgoing	Hydro One emailed a resident to provide details of the community open houses from January 16 to January 18, 2023 and noted the preliminary preferred route crossed through their property. Hydro One indicated at the end of January 2023 a real estate representative would contact them for an individual meeting to discuss the land acquisition process.
2023-01-03	Email	Outgoing	Hydro One emailed a resident to provide clarifying details about the path of the preliminary preferred route.
2023-01-04	Email	Incoming	A resident emailed Hydro One to inquire if the preliminary preferred rout would occur on the north or south side of the existing power line in the Gorham area.
2023-01-04	Email	Outgoing	Hydro One emailed a resident to clarify that portion of the preliminary referred route near Gorham would follow along the south side the existing transmission line. Hydro One noted there would be large tile maps at the community open houses in Shuniah and Atikokan but if they could not make the meetings a larger map could be mailed to them.
2023-01-04	Email	Incoming	A resident emailed Hydro One to inquire about the details of the Project open houses.
2023-01-04	Email	Outgoing	Hydro One emailed a resident to provide an attached notice with information about the Project open houses.
2023-01-04	Email	Incoming	A resident emailed Hydro One to note they would be attending the open house in Thunder Bay.
2023-01-04	Email	Outgoing	Hydro One emailed a resident to note real estate representatives would be attending the Thunder Bay open house.
2023-01-04	Email	Incoming	A resident emailed Hydro One to request clarification about the detailed location of the preliminary preferred route.
2023-01-05	Email	Outgoing	Hydro One emailed a resident to provide a link to the Project interactive map and provide a response to their inquiries about the detailed location of the preliminary preferred route.
2023-01-05	Email	Incoming	A resident emailed Hydro One to note they would attend an open house. The resident inquired if information about the Manitoba Hydro connection would be available at the open house.
2023-01-05	Email	Outgoing	Hydro One emailed a resident to note their question regarding connection points to Manitoba Hydro and remote First Nations is best suited for the IESO. Hydro One noted IESO representatives would be attending the January 16 to 18, 2023 open houses if the resident wanted to speak with them.
2023-01-06	Phone	Incoming	A resident called Hydro One to note they had received the open house notice and inquired why there was no open house in Ignace. The resident inquired why there was no plan for Ignace as the area had experienced power outages recently.
2023-01-09	Phone	Incoming	A resident called Hydro One and left a voicemail requesting to speak to someone about the route and associated access roads.
2023-01-11	Phone	Outgoing	Hydro One called a resident to discuss access roads related to the Project.
2023-01-12	Phone	Outgoing	Hydro One called and left a resident voicemail that provided a number they could call if they still wished to discuss the project.
2023-01-16	Meeting		Hydro One hosted a Community Open House in Thunder Bay where the preliminary preferred route was discussed.
2023-01-17	Meeting		Hydro One hosted a Community Open House in Atikokan where the preliminary preferred route was discussed.
2023-01-17	Email	Incoming	A resident emailed Hydro One to provide positive feedback regarding their interaction with a Hydro One representative at an open house.
2023-01-18	Meeting		Hydro One hosted a Community Open House in Dryden where the preliminary preferred route was discussed.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-01-20	Phone	Incoming	A resident called Hydro One to inquire about updates on the route selection. The resident indicated they were in opposition to preliminary preferred route that passed through their property.
2023-01-20	Email	Outgoing	Hydro One emailed a resident to thank them for their positive feedback regarding their interaction with a Hydro One representative at an open house.
2023-01-20	Email	Incoming	A resident emailed Hydro One to note their concerns with the Project. The resident indicated they were concerned about the impact of the Project on wildlife and plants in Amp Lake as well as the visual impacts of a transmission line. The resident also mentioned the line would impact recreational uses and the health of residents and inquired why the route was selected instead of expanding the existing corridor.
2023-01-20	Email	Incoming	A resident emailed Hydro One to note the preliminary preferred route would run through their property in Kaministiquia and they had not been contacted directly.
2023-01-22	Email	Incoming	A resident emailed Hydro One to note they received a call from a neighbour concerned about the Project who invited them to a January 25, 2023 meeting regarding the project.
2023-01-23	Phone	Incoming	A resident called Hydro One to confirm a letter they sent was received.
2023-01-23	Email	Incoming	A resident emailed Hydro One to note the preliminary preferred route would impact their property and expressed concerns related to health, property value, the ability to continue their business. The resident noted they attended the Dryden open house in January 2023 and were following up to continue discussions relating to their property.
2023-01-24	Email	Incoming	A resident of Dryden emailed Hydro One to note the preliminary preferred route traversed their property and were seeking to speak with a real estate representative they spoke with at an open house.
2023-01-24	Email	Incoming	A resident emailed Hydro One an attached letter to provide comments on the Project and propose an alternative route.
2023-01-24	Email	Incoming	A resident emailed Hydro One pictures associated with a letter they sent earlier that day regarding the preliminary preferred route in Kaministiquia.
2023-01-25	Email	Outgoing	Hydro One emailed a resident to thank them for reaching out and to recap an understanding that a representative had connected with them the previous day and another discussion about their property was planned in the near future.
2023-01-25	Email	Incoming	A resident emailed Hydro One to note they attended the open house on January 16, 2023 and this was the first time they became aware that the preliminary preferred route would travel through their property. The resident requested a copy of all communication provided to them since the inception of the project. The resident noted they received a package from Hydro One on January 24, 2023 about the land acquisition process. The resident indicated that they believed they should have been contacted earlier and requested going forward Hydro One engage in meaningful dialogue.
2023-01-25	Email	Incoming	A resident emailed Hydro One to note the preliminary preferred route would run through their property and they had not been contacted by Hydro One. The resident requested to speak with someone regarding their concerns.
2023-01-25	Email	Incoming	A resident of Kaministiquia emailed Hydro One to note they were concerned that the preliminary preferred route would be 600 meters from their property. The resident provided their email address and requested to be added to the Project contact list.
2023-01-26	Phone	Outgoing	Hydro One called a resident to confirm they received their letter regarding the preliminary preferred route and the Hydro One team would provide a response.
2023-01-26	Email	Outgoing	Hydro One emailed a resident to acknowledge receipt of their January 20, 2023 email regarding the preliminary preferred route. Hydro One requested the resident provide their address so that they could investigate the potential property impacts of the Project further. Hydro One note a real estate representative would be in touch discuss Hydro One's land acquisition principles. Hydro One confirmed the resident had been added to the Project contact list and provided additional information about the Project.
2023-01-26	Email	Outgoing	Hydro One emailed the resident to thank them for their feedback to confirm that the resident had already been in touch with a real estate representative to continue discussion.
2023-01-26	Email	Incoming	A resident emailed Hydro One to provide their address so that Hydro One could further investigate the potential impacts of the Project to their property.
2023-01-26	Email	Outgoing	Hydro One emailed a resident to thank them for providing their comments regarding the preliminary preferred route and noted the Project team would investigate and consider their feedback.
2023-01-26	Email	Incoming	A resident emailed Hydro One to thank them for providing an update about when they would receive a response to their letter regarding concerns they had about the preliminary preferred route.
2023-01-26	Email	Incoming	A resident emailed Hydro One to confirm they had spoken with a real estate representative the previous day.
2023-01-26	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback on the Project and noted they had been added to the contact list. Hydro One inquired about the resident's availability for a call with a representative to discuss their questions about the Project.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-01-26	Email	Incoming	A resident of Kaministiquia emailed Hydro One to inquire why a new right-of-way was required rather than constructing larger towers with more lines.
2023-01-27	Phone	Incoming	A resident called and left a voicemail for Hydro One to request to speak about the Project.
2023-01-27	Phone	Outgoing	Hydro One called a resident to respond to a voicemail they left requesting to discuss the Project. The resident provided their address and inquired if their property would be impacted by the Project. The resident also requested a better map. The resident provided their email address for Hydro One to provide a link to the interactive map.
2023-01-27	Email	Incoming	A resident emailed Hydro One an attached letter providing feedback on the preliminary preferred route including its potential impacts in wildlife, public safety, adherence to existing policy, Indigenous community values and the socio-economic environment. The letter concluded with a list of questions for which they requested Hydro One response.
2023-01-29	Email	Incoming	A resident emailed Hydro One to resubmit a letter they submitted on January 27, 2023 with their feedback on the Project an to reiterate their concerns about the Project's potential impact on wildlife.
2023-01-30	Email	Incoming	A resident emailed Hydro One to request Hydro One reference a letter resubmitted by another resident on January 29, 2023. The resident provided their feedback about the preliminary preferred route and provided details of impacts they believed were the result of other existing transmission lines in the area. The resident indicated that a full EA should be complete before a final route was selected.
2023-01-30	Email	Incoming	A resident emailed Hydro One to resend a letter submitted by another resident on January 29, 2023 containing feedback about the preliminary preferred route.
2023-01-30	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback about the Project. Hydro One note that the resident's comments would be considered as part of the EA and they would be in touch with a response once the Project team had reviewed the feedback.
2023-01-30	Email	Incoming	A resident emailed Hydro One to provide their address, provided their feedback about the Project and inquired if the route would impact their property.
2023-01-30	Email	Incoming	A member of the public emailed Hydro One to provide letters outlining that a member's family would be impacted by the Project. The resident provided a summary of the meeting they held on January 25, 2023 and requested a response to the letter.
2023-01-30	Email and Letters	Incoming	A member of the public emailed Hydro One to resend their attached January 30, 2023 letters and request a response.
2023-01-30	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback about the Project. Hydro One note that their comments would be considered as part of the EA and they would be in touch with a response once the Project team had reviewed the feedback.
2023-01-31	Email	Incoming	A resident emailed Hydro One an attached letter to note they had received a land acquisition compensation package. The resident indicated they wished to grieve the proposed easement on their property due to potential damage to their well and water table. The letter also contained a sketch plan of the right of way with the resident's notations of where their well was located.
2023-02-01	Phone	Outgoing	Hydro One called and left a message for a resident regarding having a discussion about the Project.
2023-02-01	Phone	Outgoing	Hydro One called a resident to discuss their email regarding their feedback on the Project. The resident mentioned a community meeting was being held that night in Kaministiquia. The resident indicated they wanted existing towers to be removed and replaced with towers that can hold existing and new lines instead of building a new line south of the existing route.
2023-02-01	Phone	Outgoing	Hydro One called a resident to follow-up on an email the resident sent regarding the Project. The resident thanked Hydro One for calling and noted they looked forward to Hydro One's response to their email.
2023-02-01	Phone	Outgoing	Hydro One called a resident to advise that their property would be traversed by the preliminary preferred route.
2023-02-01	Email	Outgoing	Hydro One emailed a resident to note they would be calling them shortly to discuss the Project.
2023-02-01	Phone	Outgoing	Hydro One called a resident who had actively opposed the Project on social media. The resident provided feedback about the lack of engagement to date but noted the need for the Project. The resident requested a LACP and an additional call from a real estate representative. The resident detailed how the proposed route would impact animals on their property. Hydro One provided a project overview, described engagement efforts to date, committed to be a point of contact for them moving forward and discussed the complexity of Phase 2.
2023-02-01	Email	Incoming	A resident emailed Hydro One to note they attended the community open house on January 16, 2023 in Thunder Bay and had concerns about the information available on the Project website. The resident detailed their concerns about the Project.
2023-02-01	Email	Outgoing	Hydro One emailed a resident to thank them for a call earlier that day where they discussed the residents' feedback on the Project. Hydro One provide contact details should the resident wish to speak again and noted the Hydro One project team would further investigate their feedback to refine the preliminary preferred route and provide additional information about the land acquisition process.
2023-02-01	Email	Incoming	A resident emailed Hydro One to thank them for a email detailing next steps following their call that day.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-02-01	Email	Outgoing	Hydro One emailed a resident to provide additional information on electric magnetic fields (EMF), regarding feedback the resident provided. Hydro One noted EMF would be considered as part of the environmental assessment and during the design of the transmission line.
2023-02-02	Email	Incoming	A resident emailed Hydro One to provide their availability to meet on February 6 and 7, 2023 and provided their phone number.
2023-02-02	Email	Incoming	A resident emailed Hydro One to note they attended the January open houses for the project in Thunder Bay and they were a cottage owner on Shebandowan Lake. The resident noted their concerns with the proposed preliminary preferred route deviating from the existing corridor near Portage Bay Road and Amp Lake.
2023-02-02	Email	Incoming	A resident emailed Hydro One to resend a letter sent by another resident on January 29, 2023 that provided feedback about the preliminary preferred route. The resident also noted their concerns about the impact of the project on wildlife and the visual landscape.
2023-02-03	Email	Incoming	A resident of Lappe emailed Hydro One to request studies about the health impacts of living near transmission lines. The resident also noted the potential impact of the project on the natural landscape.
2023-02-03	Phone	Incoming	A resident called Hydro One to discuss the Project's impact to their property and provided a contact number that they could be reached at.
2023-02-03	Phone	Outgoing	Hydro One attempted to call a resident on the contact numbers they provided but were not able to leave a voicemail.
2023-02-03	Phone	Outgoing	Hydro One attempted to call a resident using the contact numbers they provided in a previous call but the resident did not answer and Hydro One was unable to leave a voicemail.
2023-02-03	Phone	Outgoing	Hydro One called a resident who noted they received a flyer from Neighbours on the Line stating their property would be impacted. Hydro One clarified that Neighbours on the Line was separate from Hydro One. Hydro One confirmed their property is located 1.8 km from the preliminary preferred route.
2023-02-03	Phone	Incoming	A resident called Hydro One seeking additional information about the Project.
2023-02-03	Phone	Outgoing	Hydro One called a resident to confirm their property is traversed by the preliminary preferred route. The resident expressed interest in discussing the land acquisition process and Hydro One provided contact information for the Real Estate representative. Hydro One provided the contact details for a real estate. Hydro One noted EMF would be considered as part of the environmental assessment and during the design of the transmission line.
2023-02-06	Phone	Outgoing	Hydro One called a resident to listen further to feedback received by the resident via email. The resident noted they were concerned about how clearing the corridor would impact their well, construction access on Gus Wuori Road and Salmi Road and the Project's impact on their property value. Hydro One inquired what solutions they were considering and the resident noted they wanted the line moved. The resident noted they would wait for Hydro One's response to their concerns and thanked them for calling.
2023-02-07	Email	Outgoing	Hydro One emailed a resident to note the letter they provided with feedback about the Project was being reviewed by Hydro One's Project team for consideration and response. Hydro One noted they planned to host a meeting in March and encouraged the resident to participate.
2023-02-07	Email	Incoming	A resident emailed Hydro One to provide feedback about concerns for potential Project impacts near Portage Bay Road. The resident noted they believed the line should run north of Portage Bay Road and Shebandowan Lake to avoid impacts to wildlife and visual landscapes.
2023-02-07	Email	Incoming	A resident of Shebandowan emailed Hydro One to note they opposed the preliminary preferred route near Amp Lake due to concern for impacts to wildlife and the natural environment.
2023-02-17	Email	Outgoing	Hydro One sent an email to the project contact list inviting them to a community open house on March 2, 2023 between 2 – 8p.m. The purpose of the community open house as described in the invitation is to for Hydro One to listen, share information and look at ways Hydro One may be able to mitigate or minimize the impacts of the proposed project.
2023-02-17	Email	Incoming	A resident emailed Hydro One to confirm they planned to attend an open house hosted by Hydro One on March 2, 2023.
2023-02-18	Email	Incoming	A resident emailed Hydro One to note they would not be able to attend an open house on March 2, 2023 as they would be away.
2023-02-18	Email	Incoming	A resident emailed Hydro One to note they owned a cabin on Nym Lake that the new line would run across. The resident noted concerns the impacts of the Project on their health, the visual landscape, traffic and property value. The resident noted they would be available to meet with a representative from Hydro One in May or the summer of 2023 to discuss their concerns and requested to be added to the Project contact list.
2023-02-18	Email	Outgoing	Hydro One emailed a resident to thank them for confirming they would attend an open house on March 2, 2023.
2023-02-18	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their feedback on the Project and noted it had been provided to the Project team who would be in touch with a response.
2023-02-18	Email	Outgoing	Hydro One emailed a resident to provide further details about the open house on March 2, 2023.
2023-02-18	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their feedback on the Project and noted it had been provided to the Project team who would be in touch with a response.

Date/time	Type of communication	Origin	Summary
2023-02-18	Phone	Incoming	A resident called and left a voicemail for Hydro One to inquire if the Project would run through land near Sunshine River.
2023-02-18	Email	Incoming	A resident emailed Hydro One to provide comments on a response email Hydro One sent to another resident. The resident indicated Hydro One had not completed their duty to consult stakeholders in good faith. The resident provided their concerns about how the Project would disturb wildlife and requested the route be located north of Hwy 11. The resident requested a response to their comments in the email and their January 27, 2023 letter.
2023-02-18	Email	Incoming	A resident emailed Hydro One to provide their concerns about the preliminary preferred route. The resident noted the Project would result in the erosion of a road they pay maintenance for and impacts on wildlife from the spraying of herbicides. The resident noted that they were a portage bay camper and they had not been contacted about the Project. The resident inquired what environment assessment were completed in the area of Portage Bay Road and what residents were contacted during them.
2023-02-18	Email	Incoming	A resident emailed Hydro One to provide their concerns about a section of the preliminary preferred route in the Portage Bay Road/Amp Lake/Shebandowan Lake area. The resident attached a letter from another resident sent to Hydro One on January 27, 2023. The resident noted they were shocked to learn that about the preliminary preferred route as they were previously under the impression it would follow existing corridors. The resident indicated their had been no attempt to complete a environmental assessment on the Portage Bay Road/Amp Lake/Shebandowan Lake portion of the transmission line and noted the habitat of wildlife in the area would be negatively impacted. The resident provided comments about the impact of the preliminary preferred route on recreational activities in the area and traffic. The resident requested the Project be routed north of Highway 11.
2023-02-18	Email	Incoming	A resident emailed Hydro One to thank them for providing additional information about the Project.
2023-02-18	Email	Incoming	A resident emailed Hydro One to note they could not attend the open house on March 2, 2023 but requested clarification about the preliminary preferred route.
2023-02-19	Email	Incoming	A resident emailed Hydro One to inquire about the location and start time of the open house on March 2, 2023.
2023-02-20	Email	Outgoing	Hydro One emailed a resident to apologize for a typo in an email regarding the March 2, 2023 open house.
2023-02-20	Email	Outgoing	Hydro One emailed several residents to follow-up on a request for a meeting on February 22, 2023 in Thunder Bay to discuss the Project.
2023-02-20	Email	Incoming	A resident emailed Hydro One to note they would attend the meeting on February 22, 2023 in Thunder Bay.
2023-02-20	Email	Incoming	A resident emailed Hydro One to note they would attend the meeting on February 22, 2023 in Thunder Bay.
2023-02-20	Email	Outgoing	Hydro One emailed a resident to clarify if another member would be attending the meeting on February 22, 2023.
2023-02-20	Email	Outgoing	Hydro One emailed a resident who confirmed they could attend a meeting on February 22, 2023 and provided the meeting location.
2023-02-20	Email	Incoming	A resident emailed Hydro One to note they were in support of a letter submitted by another resident on January 29, 2023.
2023-02-20	Email	Incoming	A resident emailed Hydro One to note they had no further information on if another resident would attend a meeting on February 22, 2023.
2023-02-21	Phone	Incoming	A resident called Hydro One regarding an article he read in the Thunder Bay newspaper regarding a proposed transmission line in the Gorham area. The resident requested more information of the Project and precise map of the route. Hydro One informed the resident their property was not traversed by the Project.
2023-02-21	Email	Outgoing	Hydro One emailed a resident to thank them for confirming that they would attend a meeting on February 22, 2023.
2023-02-21	Email	Outgoing	Hydro One emailed several residents to thank them for confirming they would attend a meeting on February 22, 2023 in Thunder Bay. Hydro One provided the meeting location and start time.
2023-02-22	Phone	Outgoing	Hydro One called a resident to advise that their property would not be traversed by the Project.
2023-02-22	Email	Outgoing	Hydro One emailed a resident to provide a link to an interactive map of the Project and requested the resident provide their address so more information could be provided about the potential impacts of the preliminary preferred route. Hydro One noted they were hosting an open house on March 2, 2023 at the Kaministiquia Community Centre where additional Project details and maps would be shared.
2023-02-22	Email	Incoming	A resident emailed Hydro One to provide details about their meeting with Hydro One on February 22, 2023. The resident inquired if an existing east-west corridor in Atikokan could be utilized for the Project.
2023-02-22	Meeting		Hydro One met with residents from the Shebandowan area in Thunder Bay to listen and seek to better understand their feedback about the preliminary preferred route.
2023-02-23	Email	Outgoing	Hydro One emailed a resident a link to the interactive Project map to assist then with locating their property relative to the Project. Hydro One noted they would have large printed maps available at the open house on March 2, 2023.

Date/time	Type of communication	Origin	Summary
2023-02-24	Email	Incoming	A resident emailed Hydro One to provide their address and details about their intention to start a farm. The resident requested to have a discussion with Hydro One about the use of their land for the Project's construction.
2023-02-24	Email	Incoming	A resident of Thunder Bay emailed Hydro One to provide their concerns about the impact of the Project on property values and traffic.
2023-02-25	Email	Incoming	A resident emailed Hydro One to inquire how far north or south of the existing line would the proposed route be.
2023-02-27	Email	Incoming	A resident emailed Hydro One to note their opposition to the Project being constructed on their property. The resident noted they were concerned about the Project's impacts on health, the environment, property values, traffic and the exposure of their property to winds and snow drifts.
2023-02-28	Phone	Incoming	A resident called Hydro One to inquire about the status of the Project as they were unable to attend the open house on March 2, 2023. Hydro One provided a project overview and update to the resident.
2023-02-28	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about the Project and noted the Project team was reviewing it and would provide a response. Hydro One noted they were hosting an open house on March 2, 2023.
2023-03-01	Email	Outgoing	Hydro One emailed a several residents to thank them for meeting with Hydro one the week of February 20, 2023. Hydro One noted they would be in touch to schedule a meeting in the near future to continue discussing their feedback about the preliminary preferred route and potential mitigation measures.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One indicated that they had met with a group and residents to further understand concerns regarding the proposed route in the Amp Lake area and reiterated their commitment to re-examining the proposed route.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-01	Email	Incoming	A resident emailed Hydro One to thank them for reconsidering the proposed route and noted that they would not be able to attend the Kaministiquia Community Open House.
2023-03-01	Email	Outgoing	Hydro One emailed a resident to confirm more information about the evaluation of the proposed alternative route from the Neighbours on the Line would be shared following an analysis.

Date/time	Type of communication	Origin	Summary
2023-03-02	Email	Outgoing	Hydro One emailed a resident to express their gratitude for feedback about the preliminary preferred route in the Amp Lake area and noted that all feedback had been shared with their Project team. Hydro One invited the resident to attend a community open house on March 2, 2023 at the Kaministiquia Community Centre.
2023-03-02	Phone	Incoming	A resident called Hydro One to inquire if the preliminary preferred route traversed their property. Hydro One confirmed the preliminary preferred route does not traverse the resident's property.
2023-03-02	Email	Incoming	A resident emailed Hydro One to note they would be unable to attend the community open house that day.
2023-03-04	Email	Incoming	A resident emailed Hydro One to thank them for keeping them well informed about the Project over the last three years and noted the community open houses sessions are well done.
2023-03-05	Email	Incoming	A resident emailed Hydro One to note they attended the community open house on March 2, 2023 and provided positive feedback about their discussions with members of the project team. The resident indicated they were waiting to hear back from Hydro One about their feedback previously submitted and requested Hydro One seriously consider the Neighbours on the Line route.
2023-03-06	Phone	Incoming	Hydro One received a voicemail message from a resident who wished to speak with Hydro One.
2023-03-06	Phone	Outgoing	Hydro One called a resident who had previously left a voicemail. The resident expressed their concerns about the Project and noted the route and existing line be relocated outside of Kaministiquia. Hydro One noted their feedback and questions would be considered.
2023-03-06	Email	Outgoing	Hydro One emailed a resident to provide details about the dimensions of a typical right-of-way for a 230 kV line.
2023-03-06	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about being kept well-informed about the project and about the community open houses.
2023-03-06	Email	Outgoing	Hydro One emailed a resident to thank them for attending the community open house on March 2, 2023 and provided the contact details of Hydro One representatives that the resident had requested.
2023-03-07	Email	Incoming	A resident emailed Hydro One (and cc'd Fort William First Nation, Lac des Mille Lacs First Nation, Lac La Croix First Nation, Lac Seul First Nation, Eagle Lake First Nation, Mitaanjigamiing First Nation, Nigigoonsiminikaaning First Nation, Ojibway Nation of Saugeen and Seine River First Nation) to provide feedback about the Project. The resident noted they were a Treaty 3 Status Indian of Couchiching First Nation and were upset about the role of First Nations in the Project. The resident request Hydro One reconsider the route and provided their phone number so they could discuss their concerns further.
2023-03-08	Letter	Incoming	A resident sent Hydro One a letter to provide feedback about the preliminary preferred route. The resident noted a family member had not cashed a check provided by Canacre for environmental studies conducted on their land. The resident indicated their family member had reached out to Canacre to retract their previous approval for the studies to be conducted, which Canacre agreed to. The resident noted the next contact they had from Hydro One was the land acquisition compensation principles package and a call from Hydro One regarding it. The resident noted they had concerns about the Project's impacts on human health, recreation land use, wildlife and vegetation. The resident request the route be redirected.
2023-03-09	Phone	Incoming	A resident called Hydro One and left a voicemail to inquire about the location of the preliminary preferred route near Portage Bay Road.
2023-03-13	Phone	Incoming	A resident called Hydro One to discuss their interest in project timelines and possible road access improvements. Hydro One and the resident also spoke about how the electricity system in Ontario works.
2023-03-17	Phone	Incoming	A resident emailed Hydro One to discuss information about preliminary access roads, tree cutting, fence installation on their property and compensation for access. Hydro One noted they would follow up with more information.
2023-03-17	Email	Outgoing	Hydro One emailed a resident to provide a link to the Project's interactive map and provided additional clarification about the location of the preliminary preferred route.
2023-03-20	Phone	Outgoing	Hydro One called a resident back and left a voicemail to confirm the preliminary preferred route did follow Portage Bay Road and that Hydro One was currently committed to reviewing an alternative route proposed by the Neighbours on the Line.
2023-03-21	Phone	Incoming	A resident called Hydro One and left a voicemail to note that they wanted to discuss the Project in the Portage Bay area.
2023-03-22	Phone	Outgoing	Hydro One called a resident to discuss the resident's environmental concerns about the Project in the Portage Bay Road area. Hydro One noted the resident's feedback would be considered as part of the EA.
2023-03-22	Phone	Incoming	A resident called Hydro One and left a voicemail to provide additional feedback about the environmental concerns they had about the Project.
2023-03-23	Phone	Outgoing	Hydro One returned a resident's call to thank them for the additional comments they shared about the potential environmental impacts of the Project.
2023-03-23	Email	Incoming	A resident emailed Hydro One to express concern for the preliminary preferred route and interest in more community engagement opportunities.

Date/time	Type of communication	Origin	Summary
2023-03-23	Email	Incoming	A resident emailed Hydro One to note they were unable to attend the community open house on March 2, 2023. The resident inquired if the proposed route would traverse their fur harvesting trapline.
2023-03-24	Email	Outgoing	Hydro One emails several residents to note they had been working with Valard to refine the Project route in the Shebandowan area. Hydro One noted they wanted to meet with the residents to discuss the refinements to the line on March 30, 2023 in-person.
2023-03-24	Email	Outgoing	Hydro One emailed several residents to thank them for confirming their availability for an in-person meeting regarding refinements to the Project route in the Shebandowan area on March 30, 2023. Hydro One provided a list of Hydro One representatives that would attend the meeting.
2023-03-27	Email	Outgoing	Hydro One emailed a resident to provide information on electric and magnetic fields (EMF). Hydro One noted they were completing modeling to ensure the field produced would remain within a safe level, and that the results of the study will be shared once the study is completed.
2023-03-28	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback about the Project and noted it would be considered as part of the environmental assessment. Hydro One requested the resident share coordinates of their fur harvesting trapline camp so Hydro One could further investigate.
2023-03-28	Email	Outgoing	Hydro One emailed a resident to note they had shared the resident's concerns with the Project team and would be in touch with a response.
2023-03-29	Email	Incoming	A resident emailed Hydro One to inquire if their property was traversed by the Project and provided their address.
2023-03-29	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project. Hydro One provided information on electric and magnetic fields (EMF). Hydro One noted they were completing modeling to ensure the field produced would remain within a safe level, and that the results of the study will be shared once the study is completed.
2023-03-29	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about the Project and noted a comprehensive environment assessment was underway. Hydro One noted the existing transmission line structures could not accommodate the additional wires of the proposed Project. Hydro One noted they appreciated any additional feedback about the preliminary preferred route.
2023-03-29	Email	Outgoing	Hydro One emailed a resident to respond to concerns they had shared about electric and magnetic fields.
2023-03-29	Email	Outgoing	Hydro One emailed a resident to provide information on electric and magnetic fields (EMF). Hydro One noted they were completing modeling to ensure the field produced would remain within a safe level, and that the results of the study will be shared once the study is completed.
2023-03-30	Meeting		Hydro One met with several residents from the Shebandowan area to discuss a refinement that could be made to the preliminary preferred route, based on feedback provided by the residents and further technical analysis.
2023-03-30	Email	Outgoing	Hydro One emailed a resident to thank them for providing feedback about Project and noted it had been shared with the Project team.
2023-03-30	Email	Incoming	A resident emailed Hydro One to thank them for their receptiveness to their concerns at the meeting that day. The resident noted the route refinement met their criteria for a new line in the Portage Bay/Amp Lake area. The resident requested a large map of the revised route be sent to them.
2023-03-31	Email	Incoming	A resident emailed Hydro One to note based on their experience with trying to route a public snowmobile trail through the rural communities north of Thunder Bay, the Project route could only follow a route depicted on a map attached to the email.
2023-03-31	Email	Outgoing	Hydro One emailed a resident to note it was good to see them at the meeting on the March 30, 2023 and provided an attach copy of the revised route map.
2023-03-31	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their feedback about the Project and noted it would be shared with the Project team.
2023-03-31	Email	Incoming	A resident emailed Hydro One to express their concerns about impacts to built up areas and financial costs to homeowners. The resident suggested Hydro One create a 4-circuit tower construction through land north of Thunder Bay.
2023-03-31	Email	Incoming	A resident emailed Hydro One to thank them for provided a map of the revised Project via email but requested a physical copy be sent to them.
2023-04-03	Email	Incoming	A resident emailed Hydro One to provide feedback on a meeting on March 29, 2023 and requested future meetings be opened with guidance regarding equal time being provided the participants wanting to voice their concerns. The resident noted they did not believe the socio-economic criteria encompassed the concerns of all residents.
2023-04-04	Email	Incoming	Hydro One emailed a resident to thank them for their comments and feedback about the March 29, 2023 meeting and noted a tighter agenda would be developed for future meetings.
2023-04-05	Email	Outgoing	Hydro One emailed Ware Local Roads Board to thank them for their interest in meeting to discuss the Project and inquired if they had availability on April 18 or 19, 2023 to meet.
2023-04-05	Email	Incoming	A resident of emailed Hydro One to note they owned Voyageur Wilderness, an eco-tourism into Quetico Park and area and had attended the March 29, 2023 meeting. They requested clarification on where to submit concerns about the Project.

Date/time	Type of communication	Origin	Summary
2023-04-06	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about the Project and noted it would be shared with the Project team.
2023-04-06	Email	Incoming	A resident emailed Hydro One to note they lived in the Atikokan/Quetico Park area and provide their concerns about the socio-economic impacts of the Project and suggested the route instead be built between Atikokan and Nydia Lake.
2023-04-06	Email	Outgoing	Hydro One emailed a resident to confirm the preliminary preferred route crossed their property and thank them for providing their comments about habitat and wildlife near the existing and proposed new transmission line. Hydro One provided an overview of the future energy demand in northwestern Ontario, the EA process and addressed concerns the resident had about erosion. Hydro One noted their real estate team would discuss the unique features of the resident's property and explained the purpose of Early Access Agreements.
2023-04-06	Email	Outgoing	Hydro One emailed a resident to respond to their comments with information about the future energy need in northwestern Ontario, an alternative route proposed by the Kaministiquia community, electric and magnetic fields, the real estate process and the draft EA Report.
2023-04-06	Email	Outgoing	Hydro One emailed a resident to respond to their comments with information about the future energy need in northwestern Ontario, the route considerations criteria, the preliminary preferred route, the EA Report and vegetation management.
2023-04-07	Email	Incoming	A resident emailed Hydro One to note they lived in the Atikokan/Quetico Park area to note their concerns about the socio-economic impacts of the Project and suggested the route instead be built between Atikokan and Nydia Lake.
2023-04-07	Email	Incoming	A resident emailed Hydro One to note they lived in the Atikokan/Quetico Park area to note their concerns about the socio-economic impacts of the Project and suggested the route instead be built between Atikokan and Nydia Lake.
2023-04-07	Email	Incoming	A resident emailed Hydro One to note they lived in the Atikokan/Quetico Park area to note their concerns about the socio-economic impacts of the Project and suggested the route instead be built between Atikokan and Nydia Lake.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their concerns location of the Project in relation to their company, Voyageur Wilderness. Hydro One noted the Project team was reviewing their feedback and a response would be provided.
2023-04-13	Email	Incoming	A resident emailed Hydro One to note they lived in the Atikokan/Quetico Park area to note their concerns about the socio-economic impacts of the Project and suggested the route instead be built between Atikokan and Nydia Lake.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-13	Email	Outgoing	Hydro One emailed a resident to provide an invitation to drop-in meetings on April 18 and 19, 2023 regarding the analysis of the alternative route proposed by Neighbours on the Line.
2023-04-18	Community Drop-In Session		Hydro One hosted two in-person community drop-in sessions in Kaministiquia to share the evaluation results of Neighbours on the Line's proposed route and engage with the community.
2023-04-19	Community Drop-In Session		Hydro One hosted two in-person community drop-in sessions in Kaministiquia to share the evaluation results of Neighbours on the Line's proposed route and engage with the community.
2023-04-19	Email	Incoming	A resident emailed Hydro One to provide their concerns about the Project and requested to be contacted to discuss their concerns further.
2023-04-19	Email	Incoming	A resident emailed Hydro One to provide comments on the type of transmission towers that could be used for the Project.
2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report.
2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report.
2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report.

2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report.
2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report.
2023-04-20	Email	Outgoing	Hydro One emailed a resident to thank them for attending a drop-in meeting earlier that week and provided details about the release of the draft EA Report.
2023-04-21	Email	Outgoing	Hydro One emailed a resident to provide an update about the drop-in meetings held earlier that week on April 18 and 19, 2023. Hydro One noted that the evaluation of the Neighbours on the Line route scored better on the socio-economic criteria, however Hydro One's preliminary preferred route scored better on natural environment, Indigenous values and technical considerations criteria.
2023-04-21	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route near Quetico Park and utilizing an abandoned corridor east of Atikokan. Hydro One noted the project team was reviewing their comments and a response would be provided. Hydro One provided details about the release of the draft EA Report
2023-04-21	Email	Outgoing	Hydro One emailed a resident to thank them for their questions about the proximity of the Project to their property. Hydro One noted the Project did traverse their property and provided a link to an interactive Project map and a screenshot of the interactive map showing their property and the Project. Hydro One noted a member of their real estate team would be in contact with the resident to discuss the Land Acquisition Compensation Principles and provided a Project timeline.
2023-05-05	Email	Outgoing	Hydro One emailed a resident to thank them for their email and requested their availability to arrange a phone call with a Hydro One's real estate representative. Hydro One noted their consultation with mining claims holders is guided by the Ministry of Mines and the MNRF. Hydro One also indicated the EA would include assessment of effects to mining resources and identified measures to avoid or minimizes effects. Hydro One noted the draft EA Report would be made available May 17, 2023 and comments would be accepted until July 7, 2023. Hydro One provide the resident a link to where they could access the draft EA Report on May 17, 2023.
2023-05-08	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the preliminary preferred route and noted Hydro One was reviewing the proposed route, which would follow an abandoned corridor east of Atikokan. Hydro One noted the resident's comments would be included in the draft EA Report which would available for public review and comment in the spring of 2023. Hydro One indicated after the public review period, all comments would be considered before the EA would be updated before its submitted to the MECP.
2023-05-10	Email	Outgoing	A resident emailed Hydro One to note they received an invite to the May 15, 2023 information session and inquired about the purpose of the event.
2023-05-10	Email	Outgoing	Hydro One emailed a resident to clarify the invitations to the May 15, 2023 information session were sent specifically to impacted property owners and noted the intent of the meeting was to discuss project information pertinent to them. Hydro One note the resident did not have to attend but encouraged them to do so if the wished to learn more about the real estate process or discuss specific questions about their property.
2023-06-01	Email	Outgoing	Hydro One sent an email to stakeholders notifying them of upcoming community open houses to be held in Dryden, Atikokan, Kaministiquia, and Thunder Bay. It also included a reminder that the draft EA Report was available until July 7, 2023 for review and comment and attached a notice with further details.
2023-06-01	Email	Incoming	A resident emailed Hydro One to inquire if the Project was related to a proposed nuclear waste site near Ignace.
2023-06-01	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their thoughts on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-01	Email	Incoming	A resident emailed Hydro One to note they had used the interactive Project map and noted they were a land owner of property that appeared to be impacted by the Project.
2023-06-02	Email	Outgoing	Hydro One emailed a resident to request they provide their address so they could investigate their inquiry.
2023-06-02	Email	Outgoing	Hydro One emailed a resident to note they could find details about upcoming public meetings on the attached notice.
2023-06-02	Email	Incoming	A resident emailed Hydro One to provide their address in order for Hydro One to investigate their inquiry.
2023-06-05	Email	Incoming	A resident emailed Hydro One to voice their concerns about the public consultation process and inquired if socioeconomic impacts of the Project would be addressed in the EA Report.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-06-06	Email	Incoming	A resident emailed Hydro One to note they were looking for a more detailed map of where the proposed line would be in the Kaministiquia and Shebandowan areas to understand the impact to landowners. The resident also noted the draft EA Report did not address concerns that Kaministiquia residents had about the impacts of the Project.
2023-06-07	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-07	Email	Incoming	A resident emailed Hydro One to indicate the Thunder Bay Open House on June 21, 2023 was also National Indigenous Peoples' Day and inquired if there would be other in-person meeting opportunities in Thunder Bay.
2023-06-09	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback about the preferred route and associated proposed access roads that traversed their property. Hydro One provided a letter detailing an in-service date for Phase 2 of the Project and encouraged the resident to attend upcoming open houses. Hydro One clarified that the Project would bring more power to the region through the transmission network and provided details about connecting solar energy to the distribution system.
2023-06-10	Email	Incoming	A resident emailed Hydro One to voice their opposition to the portion of the Project directly north of their property on Nickleby Lake. The resident requested detailed maps of the proposed route in the noted area.
2023-06-11	Phone	Incoming	A resident called Hydro One and left a voicemail requesting to speak to a Hydro One representative about the USB drive containing the draft EA Report not working and the Project in general.
2023-06-11	Email	Incoming	A resident emailed Hydro One to provide an attached letter providing their comments on the preferred preliminary route. The resident outlined environmental, cultural, and socioeconomic concerns that they had with the Project.
2023-06-13	Email	Outgoing	Hydro One sent an email to stakeholders to share an update that due to scheduling, there has been a date change for the open house planned in Thunder Bay from June 21 to June 22.
2023-06-13	Email	Incoming	A resident emailed Hydro One to note they opposed the portion of the Project directly north of Nickleby Lake and requested details maps of that area.
2023-06-14	Email	Outgoing	Hydro One emailed a resident to clarify that the preferred route was located south of Nickleby Lake and provided a link to the Project interactive map. Hydro One noted there was a Open House in Atikokan that night an invite the resident to attend.
2023-06-14	Email	Incoming	A resident emailed Hydro One to note the area west of Thunder Bay to Quetico Park was comprised of unincorporated townships and noted they served as a trustee on a local roads board. The resident voiced their concerns that the board was not approached regarding the Project's road impacts.
2023-06-15	Phone	Incoming	A resident called Hydro One and left a voicemail to note the Project would go through there property in Kenora just outside of Dryden. The resident noted they lived outside of Ontario and were unable to attend the Open Houses and requested an update on the Project. The resident provided their address.
2023-06-16	Phone	Outgoing	Hydro One called a resident a left a voicemail noting they were reaching out to replace the USB drive containing the draft EA Report that was not work and discuss the Project in general.
2023-06-16	Phone	Incoming	A resident called Hydro One and left a voicemail to note they owned property on Nickleby Lake and had additional questions about the proposed route.
2023-06-16	Email	Outgoing	Hydro One emailed a resident to thank them for their questions about vegetation removal, access roads and the land acquisition process. Hydro One provided a letter detailing an in-service date for Phase 2 of the Project and encouraged the resident to attend upcoming open houses. Hydro One provided details about tree removal. Hydro One provided a link to the draft EA Report and noted public comments would be accepted until July 7, 2023.
2023-06-16	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-16	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-16	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-16	Email	Outgoing	Hydro One emailed a resident to note the Thunder Bay Open House had been moved from June 21 to June 22, 2023.
2023-06-17	Email	Incoming	A resident emailed Hydro One to provide a letter expressing their concerns with the Project route from Atikokan to Shuniah.
2023-06-19	Phone	Incoming	A resident called Hydro One to note they owned a trapline that would be impacted by tree clearing for the Project. The resident inquired if trappers would be compensated and Hydro One noted they would follow up with a response.
2023-06-20	Phone	Outgoing	Hydro One called a resident but was unable to leave a voicemail about discussing the resident's additional questions about the Project.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-06-19	Email	Incoming	A member of the public emailed Hydro One to provide a letter outlining their concerns with the draft EA Report.
2023-06-20	Email	Outgoing	Hydro One emailed a member of the public to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-20	Phone	Incoming	A resident called Hydro One to note they were happy to hear that their property would be given access to a road and inquired if any helicopter pads could be relocated onto their property. Hydro One noted they would discuss with their construction partner, Valard, on the possibility.
2023-06-20	Email	Outgoing	Hydro One emailed a resident to follow up on an inquiry they had about the Project's use of herbicides on their property. Hydro One noted vegetation removal will mainly be completed using mechanical methods and no herbicides would be used on the resident's property. Hydro One noted their practice required personal contact with landowners by a forestry technician to seek permission to use herbicide prior to application.
2023-06-20	Email	Outgoing	Hydro One emailed a resident to note they had called them and were unable to leave voicemail. Hydro One provided a phone number at which a Hydro One representative could be reached.
2023-06-20	Email	Outgoing	Hydro One emailed a resident to thank them for attending the Community Open House in Atikokan to learn more about concerns related to the preferred route and proposed route refinement in the Three Mile Bay area. Hydro One noted a response could be provided following an investigation.
2023-06-20	Email	Incoming	A resident emailed Hydro One an attached letter that contained their concerns about the draft EA Report. The resident noted Hydro One had not included "Inhabitants Living Along the Proposed Route" as an assessment category and noted the Project would be located on their property. The resident indicated they supported the Neighbours on the Line proposed route.
2023-06-21	Email	Incoming	A resident emailed Hydro One to apologize for missing their call and provided details about the land they owned near Nickleby Lake. The resident provided their feedback about the route and alternatives.
2023-06-21	Email	Incoming	A resident emailed Hydro One to inquire about the Project access points to Nym Lake.
2023-06-21	Email	Outgoing	Hydro One emailed a resident to thank them for sharing their comments on the Project and noted their feedback had been shared with the Project team who would provide a response.
2023-06-21	Email	Incoming	A resident emailed Hydro One to note the draft EA Report did not address their concerns regarding their property.
2023-06-22	Email	Incoming	A resident emailed Hydro One to note they would be going public with their concerns if they did not receive a response from Hydro One soon.
2023-06-26	Email	Incoming	A resident emailed Hydro One to provide a summary of a discussion they had with a Project Team member at a Open House on June 22, 2023. The resident noted they were property owners on Kabaigon Bay and the concerns they had about the impact of the Project on the landscape.
2023-06-27	Email	Incoming	A resident emailed Hydro One to note they had received information package outlining they were an affected property owner. The resident provided their availability and requested to have a discussion with Hydro One about their property prior to the comment period deadline for the draft EA Report.
2023-06-28	Email	Incoming	A member of the public emailed Hydro One to note they attended an Open House in June 2023 and had some unanswered questions related to the socioeconomic impacts of the Project. The resident requested feedback on their unanswered questions related to the Project's construction impact on businesses.
2023-06-29	Phone	Incoming	A resident called Hydro One and left a voicemail requesting a callback and noted they would start calling other groups if they did not hear from Hydro One the next day.
2023-06-29	Phone	Incoming	A resident called Hydro One and left a voicemail requesting to speak with the real estate department.
2023-07-01	Email	Incoming	A resident emailed Hydro One to inquire when employment opportunity related to the Project would be available. The resident inquired if Hydro One or another entity would be hiring.
2023-07-04	Email	Outgoing	Hydro One emailed a resident to note they had their technical team looking into possible solutions to address concerns the resident mentioned in the Kabaigon Bay area. Hydro One also noted a meeting would be set up once the route evaluation was complete.
2023-07-04	Email	Outgoing	Hydro One emailed a resident to note they were reviewing technical solutions in the Shebandowan Lake area and the planned to set up a call with the resident in the coming weeks for a follow-up discussion.
2023-07-05	Email	Incoming	A resident emailed Hydro One to note the draft EA Report did not give enough consideration to the impact on residents. The resident provided coordinates for their summer camp and noted the Project would traverse their property. The resident noted the Structure Visibility Map in the draft EA Report did not show the location of structures on their property but the interactive Project map did. The resident noted that the Project would require the clear cutting of mature forest but there is no mention in the report of use of merchantable timber. The resident also noted their concerns with the discussion of logging slash in the report.

Date/time	Type of communication	Origin	Summary
2023-07-05	Email	Incoming	A resident emailed Hydro One to provide their concerns about the use of the term "Indigenous Knowledge" in the draft EA Report.
2023-07-06	Email	Incoming	A resident emailed Hydro One to provide their concerns about the Project's impact on their recreational use of the region. The resident also inquired about the source of the supply of energy that would be transmitted by the Project and requested to be added to the Project mailing list.
2023-07-06	Email	Incoming	A resident emailed Hydro One to provide their reasoning for objecting to the Project.
2023-07-07	Email	Incoming	A resident emailed Hydro One to provide a letter outlining their comments on the draft EA Report. The resident noted that community engagement efforts and the draft EA Report were inadequate. The resident noted there was no plan for addressing the concerns the general public had about the use of herbicides.
2023-07-07	Email	Incoming	A resident emailed Hydro One to provide their concerns about the Project impact on their business. The resident noted they had previously expressed their concerns at public consultation meetings and in writing and had not received a response. The resident's concerns included impacts to homeowners, tourism, views, recreational activities, Indigenous peoples and wildlife.
2023-07-10	Phone	Incoming	A resident called Hydro One and left a voicemail inquiring about the impact of the Project on two parcels of land. The resident noted they would call back to provide the legal descriptions of the parcels but noted they were not the owner.
2023-07-10	Phone	Outgoing	Hydro One left a voicemail for a member of the public to provide information on the survey work and contact information for further questions.
2023-07-10	Email	Incoming	A resident emailed Hydro One to provide their comments on the draft EA Report. The resident noted they were a Register Professional Forester with EA knowledge. The resident noted the inadequacies of the draft EA Report.
2023-07-10	Email	Incoming	A resident emailed Hydro One to thank them for the update.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a resident to thank them for their feedback on the Project and noted it had been shared with Project team, who would provide a response.
2023-07-11	Email	Outgoing	Hydro One emailed a member of the public to note their feedback on the draft EA Report had been shared with the Project team who would provide a response.
2023-07-13	Phone	Outgoing	Hydro One called a resident and provided an overview of an access road near their property. The resident requested the details of the call be emailed and mailed to them which Hydro One committed to completing.
2023-07-13	Email	Outgoing	Hydro One emailed a resident to note their feedback would be included in the Final EA report and provide information about the IESO's energy forecast for Ontario and the environmental assessment process. Hydro One noted the mitigation measures that would be taken to protect vegetation and biodiversity initiatives. Hydro One indicated they were committed to working with property owners who had concerns about the Project.
2023-07-13	Email	Outgoing	Hydro One emailed a resident to provide requested information relating to the socioeconomic impacts of the Project, including the anticipated workforce. Hydro One noted the Project would bring an additional 350 megawatts of power and provide details about the engineering, procurement and construction contractor, Valard. Hydro One noted the Project would create up to 220 direct jobs during construction and it was Hydro One's priority to support the local economy.
2023-07-13	Email	Outgoing	Hydro One emailed a resident to not provide details about Hydro One's role in the Project and the transmission system forecast.

1. Some content redacted for protection of privacy

Date/time	Type of communication	Origin	Summary
2023-07-13	Email	Outgoing	Hydro One emailed a resident to provide details about the selection of the route and the criteria assessed. Hydro One noted they understood residents had socioeconomic concerns and they were committed to working with them to find solutions. Hydro One provide a link to Section 6.3 of the draft EA Report for the resident to review additional information about groundwater.
2023-07-13	Email	Outgoing	Hydro One emailed a resident to provide a link to the Project interactive map. Hydro One noted they had been investigating local route refinements to reduce the socioeconomic effects from the Project. Hydro One noted they had a dedicated team monitoring global EMR studies to ensure their infrastructure was built and maintained following best practices.
2023-07-15	Other	Incoming	A resident sent a text message to Hydro One to inquire if the survey work had started in his area. Hydro One texted the resident back to confirm the survey work had started on the crown land in their are and would not require vegetation removal. Hydro One also noted they were investigating the resident's refinement request and would schedule a meeting once they know more.
2023-07-31	Email	Incoming	A resident emailed Hydro One to inquire why Hydro One was cutting 200 km of forest when their was an abandoned transmission line adjacent that could be used. The resident also noted that surveyors had been on their property on July 29, 2023 without permission. The resident indicated if they did not receive a response from Hydro One that week, they would begin to send correspondence to the media to voice their concerns about the Project.
2023-08-01	Email	Outgoing	Hydro One emailed stakeholders to provide notice that Hydro One filed a Section 92 Application with the Ontario Energy Board (OEB) for approval to construct the project.
2023-08-02	Email	Outgoing	Hydro One emailed a resident to note they were completing a land survey along the preferred route and wooden stakes or flag may be left behind so that surveyors can identify specific locations. Hydro One indicated that their licensed land surveys may require surveyors to enter neighboring properties, however Hydro One makes their best effort to connect with property owners in advance to notify them, and apologized to the resident. Hydro One noted they were reviewing the residents feedback about the Project and they were aiming to organize a follow-up meeting by the end of August 2023. Hydro One notified the resident that a Section 92 application has been submitted to the OEB who were responsible for ensuring that the construction and operation of the proposed Project was in the public interest.
2023-08-04	Email	Incoming	A resident emailed Hydro One to inquire how they could submit the Section 92 application prior to completing the environmental assessment.
2023-08-14	Email	Outgoing	Hydro One emailed a resident to inquire if they had availability to meet to discuss the Project on August 30 or 31, 2023.
2023-08-17	Email	Incoming	A resident emailed Hydro One to confirm they were available for a meeting to discuss the Project on August 31, 2023.
2023-08-24	Email	Outgoing	Hydro One proposed a meeting time on August 31, 2023 to the resident and noted they would send a calendar invite.
2023-08-27	Email	Incoming	A resident confirmed their availability to meet at the proposed meeting time on August 31, 2023.
2023-08-29	Email	Incoming	A resident emailed Hydro One to follow-up on the status of Hydro One's investigation into a refinement in the Kabaigon Bay area.
2023-08-29	Email	Outgoing	Hydro One emailed a resident to schedule a meeting to discuss Hydro One's investigation into a refinement in the Kabaigon Bay area.
2023-08-30	Email	Outgoing	Hydro One confirmed a calendar invite was sent to a resident and to reach out with any questions.
2023-08-30	Email	Incoming	A resident emailed Hydro One to confirm their available to meet the week of September 11, 2023 to discuss Hydro One's investigation into a refinement in the Kabaigon Bay area.
2023-08-31	Meeting		Hydro One met with a community member to discuss the Project, review the results of an investigation into a proposed refinement in the Three Mile Bay area and to identify mitigation opportunities through continued engagement.
2023-09-01	Email	Incoming	A resident emailed Hydro One to express their disappointment towards the results of the investigation into a proposed route refinement in the Three Mile Bay area and requested Hydro One reconsider.

Agenda

Hydro One & The Kaministiquia Community

Meeting Date: February 22, 2023 **Time:** 4 pm

Location: In-Person

Participants:

- Jane Dean
- Michelle Hamer
- Steven Hamer
- Michael Meade
- Bryan Lamarche
- Tom Wall
- Bob Menard.
- Elizabeth McKay
- Brian Parcels (here with Elizabeth McKay)
- Alexandra Moskalyk, Hydro One
- Nancy Clark, Hydro One
- Sanjiv (Sonny) Karunakaran, Hydro One

Item	Description
1.	<p>Key Concerns raised by Community Members:</p> <p><u>EA Process/Consultation</u></p> <ul style="list-style-type: none"> • EA process/preliminary preferred route was not disclosed properly; not appropriate to say “since 2019” as there was not enough consultation. Covid 19 seen as a factor. • Study should be from 250 m from the centre line of the corridor to determine effects • Residents do not feel they were adequately consulted pointing to maps that show only aerial views but nothing as graphical and informative that would have indicated their home was impacted until January’s open house. • The Terms of Reference is insufficient and lacks mention of private property owners. People in the community don’t understand the whole process. • Consultation with property owners and the broader community was not done properly. Covid 19 was a factor. • Hard to tell how broad that study area was—Terms of reference doesn’t say anything about consultation or impact to people. • How is Hydro One going to mitigate risk for all the communities involved?

Item	Description
	<ul style="list-style-type: none"> • People are already ready to blockade. We feel there is an attempt to divide our solidarity. <p><u>Environmental Impacts</u></p> <ul style="list-style-type: none"> • Community has concerns about expected impacts to species, watersheds and protected lands; herbicide use—some neighbours allow herbicide use some don't, no collective approach which ends up impacting others and causing rifts between neighbours. • Gus Wuori Road graveyard—easement identification would encroach on the graveyard • Private water well on property is not a simple move as has been suggested by Hydro One • The Hamer property has a watershed concern if the new Right-of-Way (ROW) is established as shown by the preliminary preferred route. Three farms are impacted by the same watershed. • 1967 ROW transmission line had environmental and other impacts that might not have been appreciated by the planners – it should have never been built. • Communities have been built around since construction of the 1967 hydro transmission line. • Voltage - terms of reference states that it could go up to 500kV <p><u>EMF</u></p> <ul style="list-style-type: none"> • Hydro One should have guidelines on EMF • Health management assessment needs to be done in a residential area • Community believes misrepresented information on an EMF Toronto law existing to NDP MPP Vaugeois • In 1967 EMF was not of public concern, not dissimilar to the use of tobacco. <p><u>Construction Impacts/Future Impacts</u></p> <ul style="list-style-type: none"> • Salmi road will have impacts from construction • 40 km section of directly impacted landowners - those within 250 metres of the new line • 22 properties are identified as being within 250 metres of the new line • Less than 1/2 a kilometre has a visual impact and land values could be affected. Towers will be directly out front of some houses —staring at Hydro towers as far as can be seen. <p><u>Land Use Issues</u></p> <ul style="list-style-type: none"> • Concern with land going to Infrastructure Ontario with potential for trespassing due to ATVs and 4x4's making use of the corridor 24x7 for recreational purposes with little regard for whether it's public or private. • Owners are liable if anything happens on their land and another transmission line will create more access points onto private property. • Easements - no support from Hydro One to protect private land and people assume its public land – suggested fencing/gates with keys.

Item	Description
	<p><u>Property Acquisition</u></p> <ul style="list-style-type: none"> • Want a moratorium on third party representatives going to properties and speaking to landowners. • Agents are using thinly veiled threat, such as ‘deal with us now or later.’ Community members received letters as the first communication to announce the preferred route with a notice that ‘We will expropriate’ if agreements are not signed. Not an appropriate notice. • Land agents are spouting false information. • 90% of people are getting follow up calls to meet with land agents. • Land agents are targeting the more vulnerable purposely to try and divide the community. • Steps are being missed because its being rushed, noted the cheques sent in error. • The evaluation criteria does not compensate for the value of the land. Land value cannot be properly assessed due to insufficient comparable properties on the market. Residents do not want to relocate. <p><u>Alternative Route</u></p> <ul style="list-style-type: none"> • NOTL have an alternate route they showed Hydro One. A commitment was made by Hydro One to assess the route against the TOR approved by the Ontario government and EA criteria. • Nextbridge was able to reroute 60 km around a park and community which cost \$100 million more - why can't Hydro One?
2.	<p>Response from Hydro One Inc</p> <p>Sonny expressed to participants that Hydro One takes this process very seriously and the route is not finalized. Real estate representatives are attempting to secure early access agreements help further engineering, environmental and other studies. All of these studies will help inform the selection of the route. The intention of the early access agreement is not to purchase the property. It does not give us the right to build the line on that land. He noted the cheques sent in error. Cheques are preprinted in name of the recipient. Mailed to the real estate rep and when the outreach occurs and the meeting happens with the landowner, we take the opportunity to run through the package and payments are made for their time.</p> <p>Hydro One reaches out for engagement during all phases of the route selection process and once a preferred route is selected, we let potentially impacted landowners know that their property is located on the preliminary route. .</p> <p>Sonny also noted that when Hydro One comes up with a route, it does not start off with the premise that it will parallel an existing route—the EA process is the tool that is legislated to study the best possible route. He outlined the process for the Notice of Commencement for the Terms of Reference (TOR); consultation with municipalities, communities, public, agencies; contact the people that made comment and then amend the terms of reference; and submit it into the Ministry of Environment, Conservation and Parks to assess whether its sufficient, which is then subject to a Ministerial decision.</p>

Item	Description
	<p>Sonny continued to outline the process, noting the study area—Lakehead TS in Shuniah to Atikokan to Dryden. He continued that Hydro One then works down from a large study area to multiple corridors and considers four categories—the natural environment, Indigenous peoples, socio-economic, technical and cost which are all weighted equally. He noted that residents are in the socio-economic category.</p> <p>Sonny explained the need for the line to connect all three locations (Shuniah to Atikokan to Dryden) – the need for this outcome on the power network. The required power transfer capability is needed between points to increase reliability, renewables, enable mining operations and expansion of the economy. He noted the system is planned and operated as a network by the Integrated Electricity System Operator (IESO). Hydro One doesn't choose where a line needs to be build, the IESO determines the need to build the line. The mandate and requirement comes from them (the reliability criteria), Hydro One then builds the infrastructure.</p> <p>With respect to EMF, Health Canada puts out guidance and we build infrastructure in compliance with these guidelines. What we design results in EMF emissions that are well below the safe levels set out by Health Canada.</p> <p>Sonny noted that Hydro One wants to work with the community and better understand the criteria used by NOTL in determining the alternate route. By understanding this criteria, we can assess it the same way the alternative routes were assessed under the EA process, that yielded the preliminary preferred route. We need to understand why this area was chosen and what was used as the criteria to select changes in direction on the alternative route being proposed by NOTL. Working together results in a greater chance of success. Happy to have planning group discuss it with the community and look at how Hydro One can assess this.</p>

Actions:

- Hydro One to work with broader community to set up a joint working group to evaluate the route put forward by NOTL
- Hydro One will consider the request to pause all real estate activities and respond once we have had a chance to discuss this other team members at Hydro One
- Hydro One will come back with a record of consultation for the TOR and EA
- NOTL took minutes and will circulate theirs in addition to Hydro One's minutes

Meeting Notes

Hydro One & Neighbours on the Line Technical Discussion

Waasigan Transmission Line

Meeting Date: March 14, 2023 **Time:** 2:00 pm

Location: Microsoft Teams Meeting

Participants:

Steve Hamer
 Bryne LaMarche
 Sarah Cohanin, Hydro One
 Dana Gardner, Hydro One
 Marylena Stea, Hydro One
 Callum Squires, WSP

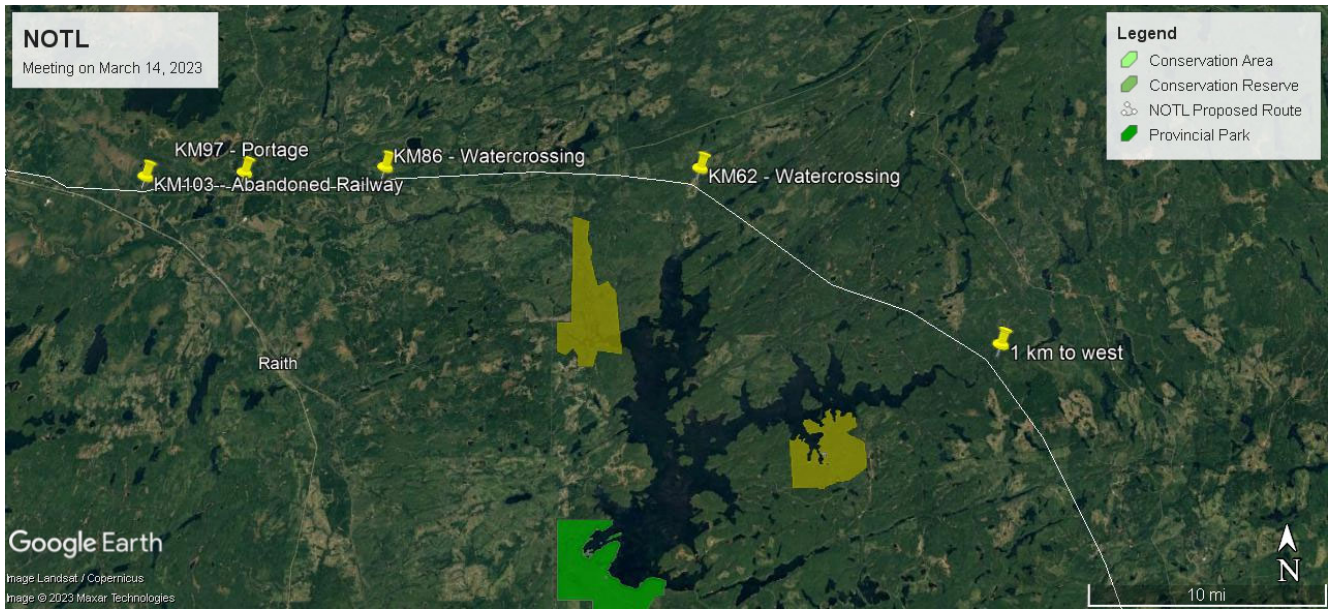

Item	Description
1.	Introductions & Safety Moment
2.	<p>General Discussion on Neighbours on the Line Proposed Route</p> <ul style="list-style-type: none"> - Hydro One was interested to learn more about the Neighbours on the Line proposed route. Hydro One provided questions in advance of meeting to help guide the conversation: <ul style="list-style-type: none"> o What considerations led you to this specific route? o What was important to the community when designing this route? o What are advantages of this route you think important for us to be aware of? o What features in the area of both the preliminary preferred route and community proposed route are important to Neighbours on the Line? - Bryne and Steve outlined the considerations that were taken into account when developing their proposed route: <ul style="list-style-type: none"> o Avoid impacts to residences, staying 500 m away from houses; o Consideration of access and keeping as close to roads as possible; o Maximize use of Crown land as much as possible; o Maximize upland sites and avoid swamps and low-lying areas. o Make the transmission line as straight as possible; o Make water crossings to 200 to 400 m (most are 100 m or less); o Remain 200 to 300 m from pipelines; and o Make efforts to avoid spawning areas, provincial parks, conservation reserves and areas, private property, tourist resorts and cottage areas.

Item	Description
	<ul style="list-style-type: none"> - Hydro One asked whether there were any considerations that were more important than others. <ul style="list-style-type: none"> o Byrne noted that the order of importance was: <ul style="list-style-type: none"> ▪ 1. Avoiding homes ▪ 2. Avoiding private land and maximizing crown land ▪ 3. Maximizing existing access - Hydro One acknowledged from an advantage perspective, that their proposed route appeared to minimize impacts to private property and asked whether there were any other potential advantages they should be aware of. <ul style="list-style-type: none"> o Byrne noted they had only identified four issues with wildlife concerns throughout the route; however, acknowledged that additional work would be needed to confirm impacts to wildlife.
3.	<p>Virtual Flyover of the Neighbours on the Line Proposed Route</p> <ul style="list-style-type: none"> - Using Google Earth, Hydro One displayed the Neighbours on the Line route and Bryne and Steve identified areas of interest. Areas of note were documented by Hydro One (maps attached below) and were provided in writing by Bryne following the meeting (notes attached below). - Hydro One asked why their proposed route went north of Dog Lake. <ul style="list-style-type: none"> o Bryne noted this was to avoid traversing any provincial parks, conservation reserves or conservation areas. - Hydro One asked whether the intent was to go straight across from kilometre 86. <ul style="list-style-type: none"> o Bryne noted they tried to stay away from pipeline and tried to choose upland sites.
4.	<p>Route Deviations</p> <ul style="list-style-type: none"> - Bryne and Steve noted there are two areas on the proposed Neighbours on the Line route where it could be made shorter. The following deviations were discussed: <ul style="list-style-type: none"> o Kilometre 145 to 200 - the route could follow south of the Lac des Mille Lacs First Nation Reserve (would cut off approximately 6 km); and o Kilometre 208 to 233 - the route could follow north of Sapawe (would cut off approximately 6 km); - Hydro One asked whether these refinements should be used in its analysis. <ul style="list-style-type: none"> o Bryne noted these refinements would make the route shorter, and they should be included. o Bryne confirmed he can send a shapefile of the deviations after the call.
5.	<p>Hydro One Route Evaluation Process</p> <ul style="list-style-type: none"> - Hydro One explained that they are completing a comparison of the Neighbours on the Line proposed right-of-way and the preliminary preferred route right-of-way using the criteria within the same four categories used for the selection of the preliminary preferred route: <ul style="list-style-type: none"> o Indigenous Culture, Values and Land use, o Natural Environment, o Socio-economic Environment, and o Technical and Cost. - It was explained that each category was weighted equally (25%) in the route analysis to identify a preferred route that balanced these considerations.

Item	Description
	<ul style="list-style-type: none">- The analysis will be a quantitative comparison using key metrics supported by a narrative describing additional advantages and disadvantages of the Neighbours on the Line route. The analysis will compare the two rights-of-way and use existing data.- Hydro One has their Engineering, Procurement and Construction contractor, Valard, completing an optimization of the Neighbours on the Line route to address constructability issues (i.e., water crossing length) and to account for maximum deflection angles. The optimized route is what will be used in the analysis. <p>Next steps:</p> <ul style="list-style-type: none">- Hydro One would like to meet again on March 21 to provide an update on the analysis and explain more about the route evaluation process;- Would then propose to meet with the Neighbours on the Line committee to share an interim update on the analysis; and- Hold a workshop to discuss the analysis and conclusions.

Actions:

- Bryne to provide shapefiles of the alternate sections from kilometre 208 to 233, and from kilometre 145 to 200 (Complete)
- Hydro One to propose dates and times for another meeting the following week. (Complete)

Email from Bryne – March 16, 2023

Neighbours on the Line Waasigan Alternative Route As discussed March 14, 2023 with Hydro One

Reasons for choosing route

No known homes within 500m of route.

Minimized crossing of patented land. Maximized Crown Land.

Close to existing roads for construction access.

Criteria used in choosing route

Upland sites

Longest straightest runs possible

Watercrossing and swamps kept to 200-400m, most less than 100m

Kept away 200m or more when parallel to pipelines.

Avoided known fish spawning areas.

Avoided Parks and Conservation Reserves.

Avoided patented land where possible.

Avoided Tourist Resorts.

Avoided Cottage Areas.

Discovered Areas of Concern or Interest on the NOTL Waasigan Alternate TL Route

Km 0-4	Crosses patented land from the Lakehead Transformer Station. Owned by logging contractors and used primarily for logging purposes.
Km 10	Crosses corner of patented land, could be mitigated by moving line 100-200m west
Km 36	Crosses east Dog River, #km upstream of spawning bed.
Km 62	Crosses Whitefin Creek
Km 86	Crosses Dog River

Km 70-120	Parallel's Gas Pipeline
Km 97	Parallels Historic portage, Prairie Portage.
Km103	Crosses abandoned rail line, privately owned.
Km 117	Crosses Patented land, could be moved north 200m to avoid.
Km 118	Unknown wildlife value
Km 130	Crosses Hwy 17, CPR tracks and Pipe Line
Km 130-140	Runs south of Upsala Twp, avoiding Patented Land and a Park .
Km 150	Begins paralleling the Sapawe Road
Km 162-170	Runs north of the Lac des Mille lac First Nation Reserve
Km 192	Crosses the Seine River
Km 207	Crosses Melema Lake, Unknown wildlife value.
Km 209	Leaves Sapawe Road.
Km 217	Crosses patented mining claim, 500m, avoids community of Sapawe and homes on Whiskeyjack Lake.
Km 217	Crosses CNR rail line
Km 230-232	Unknown wildlife value, north of Plateau Lake
Km 234	Crosses CNR rail line
Km 236-239	Crosses private mining claim
Km 240	Unknown wildlife value
Km 242	Atikokan Transformer Station

Other Alternate Options

Km 208-233	Line north of Sapawe Lake, following gas pipeline, crosses patented mining claims used primarily for logging purposes. Reduces distance by approx. 6 Km
Km 145-200	Line south of Lac des Mille Lac First Nation Reserve, follows logging roads from east and west. Reduces distance by approx. 6Km.

Meeting Notes

Hydro One & Neighbours on the Line Technical Discussion

Waasigan Transmission Line

Meeting Date: March 21, 2023 **Time:** 1:30 pm

Location: Microsoft Teams Meeting

Participants:

- Steve Hamer
- Bryne LaMarche
- Sarah Cohanaim, Hydro One
- Dana Gardner, Hydro One
- Marylena Stea, Hydro One
- Dayna Groom, Hydro One
- Callum Squires, WSP

Item	Description
1.	Introductions & Safety Moment
2.	<p>General Discussion</p> <ul style="list-style-type: none"> - Steve detailed concerns related to First Nation and non-Indigenous Kaministiquia community members and how the project is affecting relationships between community groups. This includes Steve receiving phone calls from people expressing their concerns. - Steve stressed the importance of not just working with Chief and Council but also community members. - Hydro One thanked Steve for the information and would discuss with their Indigenous Relations team.
3.	<p>Overview of the criteria used in the route evaluation process</p> <ul style="list-style-type: none"> - Hydro One acknowledged that Bryne/Steve requested at the previous meeting to have a better understanding of the criteria used to assess the alternative routes. Hydro One provided an overview of the criteria used to evaluate the alternative routes, including the NOTL proposed route, confirming that the same list of criteria is being used to assess all routes. - Bryne asked for Hydro One to consider the following: <ul style="list-style-type: none"> o Impacts to forestry and plantations on private land, not just Crown land. o Species at Risk may be more prevalent farther south due to different habitat type. o The reliability when comparing the two transmission lines, with the proposed NOTL route being separated from existing lines.

Item	Description
	<ul style="list-style-type: none"> ○ Noted that less than 10% of property in northwestern Ontario is private property and the rest is Crown land. Would like to know why Crown land was not used more. - Hydro One confirmed that they would consider the points made above. - It was asked whether we can connect from Thunder Bay to Dryden directly. <ul style="list-style-type: none"> ○ Hydro One explained that they receive their direction from the Independent Electricity System Operator (IESO) who established the scope of the Project. This includes the requirement that the new transmission line must connect at Mackenzie Transformer Station in Atikokan before continuing to Dryden. ○ Bryne suggested installing a new transformer station in the Upsala area to address this requirement. Hydro One confirmed they would take this back.
4.	<p>Update on the analysis of the NOTL proposed route</p> <ul style="list-style-type: none"> - Hydro One confirmed they received the shapefile of the updated NOTL proposed route, with the two line deviations. - Hydro One's Engineering, Procurement and Construction contractor, Valard, reviewed the route and optimized it to address span length (e.g., over waterbodies) and angles. - Hydro One presented the modified route to Bryne and Steve and they accepted that the optimized route would be used in the analysis Hydro One is completing.
5.	<p>Next Steps</p> <ul style="list-style-type: none"> - Hydro One discussed the desire to provide weekly updates to the NOTL technical representatives, and would like to meet in person next week.

Actions:

- None

Hydro One / Waasigan Transmission Line Project

Document prepared by Marieanne Stransky & Trevor Fillion
2023-01-26

Property Descriptions:

Con 2 PT N PT LOT 5 RP 55R4946
Part 2 PCL 20361 TBF
Dawson Rd

Con 2 PT LOT 7 RP 55R3520
Part 1 & 2 PCL 7259 FWF
Dawson Rd

This is to act as a first draft of grievances in relation to the preliminary preferred route of the Waasigan Transmission Line Project currently being undertaken by Hydro One.

Background Information

In May 2018, we purchased the properties identified above primarily because of the peaceful serenity and natural elements of the landscape.

In late August 2022, after being away from our home for a few weeks, we returned to find a business card from Chad Bolger, Land Manager from Canacre and a door notice asking us to contact him regarding the HydroOne Waasigan Transmission Line Project. We called and left a message but did not get a response. We called again a few weeks after and finally spoke with Mr. Bolger. He requested access onto our property to complete an environmental assessment in regard to bird nestings and habitats. Reluctantly, we gave him permission. A short time later we contacted him again to inquire about the completed assessment. We were then told that they did not need to enter onto our property as they were looking at another route for the Waasigan Transmission Line Project. We were very relieved to hear this ... believing that the route would not be anywhere near us.

Summary of Concerns

On January 21, 2022, we were contacted by our neighbours (Hamer) who live across the street from us with some devastating news. They were informed that the proposed Waasigan Transmission Line would go right through their property. In fact, the proposed new line would be within eyesight of our property- approximately 600 meters. We were greatly disturbed by this news. We are shocked and disappointed in Hydro One as well as Canacre for leading us to believe that this would not affect us! Furthermore, we have never been contacted by Hydro One to inform us of this and the potential risks that are associated with TWO high power transmission lines being so close to our home. As a result, we now have some serious concerns:

- As land owners so close to the proposed power line, why were we NOT invited to any meeting or spoken to regarding the environmental and health risks? Does Hydro One not have a legal and ethical responsibility to do so? We believe our rights as Ontario residents have been violated.

- We called and left a message for Chad Bolger, Land Manager for CANACRE on Wednesday, January 25/23. Another individual by the name of Craig returned our call to say that Mr. Bolger no longer worked at CANACRE and that they were no longer involved in the proposed transmission line project. He also clearly indicated that the environmental assessments were not completed. So ... how can a transmission line be proposed without knowing the full impact? This is referred to as “**informed consent**.” Decisions should not and cannot be made without ALL necessary information ... especially if environmental and health concerns are a factor.

- Viewing the interactive map, it appears that we are within 600 meters of this new high voltage transmission line. We have NOT been informed by Hydro One as to how this will affect the following:

1. **Environmentally** ... how will this new line affect the numerous wildlife (birds, deer, wolves, foxes, rabbits, lynxes, etc.) currently in our area? Will they disappear? What about our watershed / well water? Will it be contaminated? We use our well water for drinking, showering and watering of our summer garden. What will happen to my soil after all the construction is completed? In the summer we plant our own vegetables in the numerous gardens that we have on our property. Should we be concerned about radiation being given off with these two high power lines being so close to our home? Currently, the existing power line is obscured from our view. If the new proposed line is installed beside this one, it will become more visible from our property. The natural beauty we fell in love with here ... will be gone forever. If we wanted to see large, steel electrical towers from our front windows we would have purchased property within an industrialized area. The question we have is, will we still be able to enjoy our home and outdoor living if this project goes forward? The answer to this question with the limited feedback we have received thus far is NO.
2. **Noise / Sound Pollution** ... at various times throughout the year, we hear a **buzzing** noise from the current transmission line. We were informed that the tree line currently in place acting as a buffer will be removed to accommodate the new power line. With two high power lines parallel to each other, will this noise **intensify**? We have been told that it will. We want to hear the birds singing and the peacefulness of nature; not the buzzing of electrical currents. Not to mention the noise from the construction of this project. The joy of our outdoor living will be destroyed.
3. **Health Risks** ... there are numerous reports stating that living so close to high voltage power lines have a direct link to serious health problems. The danger increases when there are two lines parallel to each other. The fact that Hydro One has not reached out to us regarding this is unacceptable! We moved to this

location to enjoy a healthier life style ... not to destroy our physical and mental well-being.

4. **Property Value** ... How will this new line affect our property value? According to the article "How Much Do Power Lines Decrease Property Value?" (aniyaequity.com), "*Many home buyers will not consider purchasing a property with power lines in the close vicinity, even if it can save them some money.*" The article goes on to say ... "*It may lower the value of your property by approximately 30 percent.*" We purchased our properties for a large amount of money. Over the past four years, we have made several expensive renovations to the property. We are now concerned that this new power line will negatively impact the return on our investment.

Resolution

Hydro One has shown no regard for our family's, community's or environmental well-being. The Waasigan Transmission Line Project website states ... "*Energizing life means more than supplying safe and reliable power, it means listening and taking action to meet your needs.*" **We ask that Hydro One please listen to our concerns and keep our needs as land owners in mind during this project.**

Respectfully,

Marianne Stransky & Trevor Fillion

Dear Patty Hajdu

Your invitation to the budget consultations were warmly received,. I would like to take this opportunity to ask you and the federal liberal parties position (advice) on a hot button issue that currently affects the Kaministiquia region. Recently as you know Hydro One has unilaterally without any public consultation decided to put the 240 v line through the kaministiquia Valley. Understandably the local residents are shocked and confused by the heavy handed gangster like tactics of this corporation to put this line in its present form.

Kaministiquia is a region of deep historical significance (I myself have a 170 year old log house that is still standing that the line will go directly through). The loss in tourism dollars will be immense and unnecessary if a more logical line is found with less impact (the hwy 11/17 corridor for example).

I myself ironically have built an off grid organic farm and open air bnb trying to do everything right to create a modern sustainable green economy for future generation to enjoy. The line in question will go directly through the eco village I have built. The loss of this green zone which would be incalculable both to me out of pocket and to the Thunder bay economy in the foreseeable future.

I have contacted the MNR about the multitude of rare wildlife in the area attracted to it being a safe zone where there is no hunting (Lynx, Badgers Fishers Cougars and Bald Eagles being a small fraction of the species observed on trail cams or by sight). Needless to say the construction of a 240v line through their habit would be the death of these rare species. The MNR it appears has not addressed these issues to Hydro One or, more likely, Hydro Oe has ignored them. Sadly in my opinion a more convenient transmission line is too high a price to pay for the loss of such national treasures'. Ironically this also takes place at a at a time when your government actively sponsored the accord on biodiversity.

Thank you for taking the time to read the concerns both of my community and I. Any advice you may have to address the strong arm tactics of this corporation would be highly appreciated.

best regards

Impact statements from Dale & Johanne Fenwick and daughters

3 messages

Johanne Fenwick <jodalefenwick@gmail.com>
To: Michelle Rosetta <michellerosetta108@gmail.com>

To whom it may concern at Hydro One and the Waasigan Transmission Line Project,

This letter is being written in response to your proposal to build a powerline through our property at 601 McGogy Road in Dryden. Our family bought this house and land eight years ago with the help of friends. Over the years we have upgraded the house room by room, built a new deck around our pool, updated the hot tub, resingled the house and barn with the help of our family. This land was intended to be gifted to one of our children so that they could raise their family here and enjoy everything we built and

We have buried some of our furry family members in carefully selected spots where we often go to visit. This land means everything to us and to the next generation.

We very recently began an extensive kitchen/dining room/living room renovation which began Jan 2, 2023... We found out about the Waasigan Power Transmission Line project on January 1st. Until that day we had no communication at all from anyone at Hydro One or any of the other companies doing preliminary assessments about the line proposed to run through our property. We

attended the meeting, everyone was quite friendly and sympathetic to our concerns, and we were even told we have a beautiful piece of land so obviously our property had been looked at

After a conversation with a Hydro One Real Estate representative at the information session, we were told we would be contacted by someone from Hydro One as soon as possible, and then they asked questions which he stated he would bring to his associates and get back to us. We have yet to hear a response from him since that conversation.

This was intended to be our retirement home and as mentioned, we envisioned one of our daughters would take it over. That is why we've done all the work to improve the property and make

We are too old to start over. My personal mental health has been affected since we found out, and my physical health has also declined as the undue stress has been the cause of nearly daily

I have attached our daughters impact statements as well as some photos of who and what this line is displacing and impacting due to this project.

Hydro One Community Relations

483 Bay Street
Toronto ON, M5G 2C9

Dear Waasigan Transmission Line Team,

As a Hydro One employee, I am writing to inform you of my disapproval for the handling of, and finalized planned route of the Waasigan Transmission Line project. While I understand the importance of supporting growth in northwestern Ontario, and know the economic opportunities this project will allow, I cannot comprehend how it reached this point in the project with such little correspondence or regard for the many people that will be impacted.

I grew up on McGogy road, just outside of Dryden, living first on the south side of the current D26A and M2D transmission lines, then on the north side; both accessed via the same driveway.

D20A and W20 transmission lines, then on the north side, both accessed via the same driveway. When my family moved to the adjacent north property, they built a brand new barn, including a attached 60' x 70' indoor riding arena for personal use and then expanding beyond a hobby farm to board horses, give lessons, and, establish West Wind Stables' feed store from their three stall garage; both of which are now threatened by the incoming Waasigan Transmission Line.

This property is not easily replaced in the area. It is a sand base, which is essential footing for the safety of the horse (my parents' lifestyle, and business), surrounded by an untouched boreal forest. Not to mention all the hard work and care that has gone into developing this farm over many years. It is less than two kilometers from city limits, currently undergoing a five-figure renovation, and has had a recent pool and hot tub addition, not even two years ago. Between two properties, we have laid to rest four horses, and our dog, Argus.

Working in the field, I encountered countless situations where we would work with the customer to achieve a solution; such as building distribution lines on the opposite side of a roadway. My family home is seeking a similar compromise. *For Family, For Life.*

Sincerely,

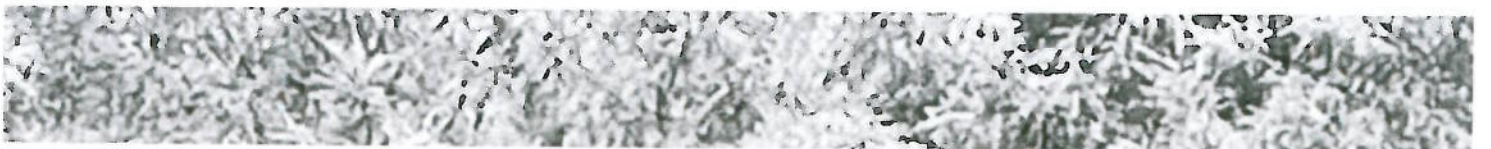

A handwritten signature in black ink, appearing to read 'Kirstin Fenwick', with a long horizontal flourish extending to the right.

Kirstin Fenwick

To whom it may concern at Hydro One,

This is my family home that I don't want to leave. I grew up here, had my friends over, & raised and buried animals here. We have some of mine and my families lifelong pets buried out there, and not to mention a million memories. My parents do not need the stress or that will come with finding a new property. In a place like Dryden there is no property as perfect for my family as this one.

A handwritten signature in black ink, reading "Ryan Pearson". The signature is written in a cursive style with a large, stylized initial 'R'.

Mandy's impact

Having grown up in Kaministiquia, on the land my great grandfather settled, grew his business and raised his family, I feel great connection. I roamed the fields my grandfather logged and forests my grandfather planted, came across ruins of old homesteads and dined on wild berries. I am very saddened to hear about the recent news of a proposed new and larger transmission line being run through these as well as through the heritage homesteads of my friends and neighbors. This action will not only destroy families livelihoods and lifestyles but also disrupt wild animal habitat, freshwater creeks and wetlands that provide essential, natural carbon capture. In this day and age of reconciliation and "green economy" it sure seems like the old colonial playbook. Displacing humanity for the sake of profits, for the sake of "progress" when it leaves us without our assets, without our livelihoods, how do we progress? Obviously this hydro line is not for the betterment of Canadians, but to power resource extraction projects and carelessly destroy the land, as is the way it's been. Proper environmental assessment without disruption, no boreholes! There are ancestors that originally settled these lands, buried on their homesteads and over the years the markers have been lost. Disturbing a corpse... I'm sure that is not what you intend. Lidar the landscape instead, it's the only way to avoid unintentional disruption of these graves.

I thank you for your concern and respect for these sacred sites.

Amanda Swanson

Hydro One / Waasigan Transmission Line Project

Document prepared by Jessika Fillion & Luigi Cavaliere
2023-01-30

Property Description:

157 Wilf's Road, Kaministiquia
Pt Lt 5, Concession 2 Dawson Road Lots

This is to act as a first draft of grievances in relation to the preliminary preferred route of the Waasigan Transmission Line Project currently being undertaken by Hydro One.

Background Information

In April 2020, we bought the property shown above primarily because of the peaceful serenity and natural elements of the landscape.

In late November 2022, we received a pamphlet in the mail showing the proposed transmission line route; the pamphlet was higher level (only showing a zoomed-out view of the overall route) and did not show the exact route through Kaministiquia. As my partner and I often work out of town we were unavailable for the community overview of the project. We therefore did not hear about the impact the line would have on us until our community started speaking about it; and more recently when we heard from neighbours that they were being approached and informed that they would be losing their land/homes in pursuit of the transmission lines preferred route through Kaministiquia.

Summary of Concerns

On January 21st 2022, we were contacted by our neighbours (Hamer) who live across the street from us with some devastating news. They were informed that the proposed Waasigan Transmission Line would go right through their property. In fact, the proposed new line would be within eyesight of our property- approximately 600 meters (about 1968.5 ft.). We were disturbed by this news.

We are shocked and disappointed with Hydro One for the lack of communication and lack of transparency with our community. We were never contacted and informed of the potential risks that are associated with TWO high power (230kV) transmission lines being so close to our home. As a result, we now have some concerns:

1. As landowners so close to the proposed power line, why were we NOT invited to any meeting or spoken to about the environmental and health risks? Does Hydro One not have a legal and ethical responsibility to do so? We believe our rights as Ontario residents have been violated.
2. In reviewing the transmission lines interactive map, as shown on the Hydro One website (<https://www.hydroone.com/about/corporate-information/major-projects/waasigan>), it shows that we are within 600 meters (about 1968.5 ft.) of the new high voltage transmission line. We have NOT been informed by Hydro One as to how this will affect the following:

Hydro One / Waasigan Transmission Line Project

Environmentally: How will this new line affect the many wildlife (birds, deer, wolves, foxes, rabbits, lynxes, etc.) currently in our area? Will they disappear? What about our watershed/well water? Will it be contaminated? We use our well water for drinking, showering, and watering of our summer garden. What will happen to my soil after all the construction is completed? Currently, the existing power line is obscured from our view. If the new proposed line is installed beside this one, it will become more visible from our property. The natural beauty we fell in love with here will be gone. The question we have is, will we still be able to enjoy our home and outdoor living if this project goes forward? The answer to this question with the limited feedback we have received thus far is NO.

Noise / Sound Pollution: At various times throughout the year, we hear a buzzing noise from the current transmission line. We were informed that the tree line currently in place acting as a buffer would be removed to accommodate the new power line. With two high power lines parallel to each other, will this noise intensify? We have been told that it will. We want to hear the birds singing and the peacefulness of nature; not the buzzing of electrical currents. Not to mention the noise from the construction of this project. The joy of our outdoor living will be destroyed.

Health Risks: There are many reports saying that living so close to high voltage power lines has a direct link to serious health problems. The danger increases when there are two lines parallel to each other. The fact that Hydro One has not reached out to us about this is unacceptable! We moved to this location to enjoy a healthier lifestyle; not to destroy our physical and mental well-being.

Property Value: How will this new line affect our property value? According to the article "How Much Do Power Lines Decrease Property Value?" (aniyaequity.com), "Many *home buyers (would) not consider purchasing a property with power lines in the close vicinity, even if it can save them some money.*" The article goes on to say ... "It may lower the value of your property by approximately 30 percent." Since buying our property, we have completed many renovations and property enhancements. We are now concerned that this new power line will negatively affect the return on our investment.

Resolution

Hydro One has shown no regard for our family, community, or environmental well-being. The Waasigan Transmission Line Project website states: "*Energizing life means more than supplying safe and reliable power, it means listening and taking action to meet your needs.*" **We ask that Hydro One please listen to our concerns and keep our needs as landowners in mind during this project.**

Respectfully,

Jessika Fillion & Luigi Cavaliere

January 30, 2023

Hydro One

I live within 500 meters of the newly proposed hydro line. I live here with my husband and three children. We love our property and home and have been working the land and renovating our house for 14 years with plans to live here in our retirement.

To be honest living within in one line has made me wonder of the health implications. Two lines back to back is a major red flag for me. I'd like to see some studies showing it is not going to impact my health or the health of my 3 growing children. I feel until you can provide adequate research you should not be advancing this project. We live in times where we know the environment we live impacts health and thus should be diligent to make better choices for the health of society and not advancing projects because it's the quickest cheapest route.

I also think of the community out here. I spent my childhood in Lappe and then returned when I had my own children because it's a healthy and safe place to live. I wanted them to experience the community and accessibility to nature like I did. Our community is for people. People who have spent their lives caring for their land, and in many cases generational land.

Sincerely yours,

Tammy Hakanen

Formal Grievance

Feb1/23

This grievance is between the land owners of **PCL 23530 SEC TBF,PT N ½ LT 5 CON 2 WARE PT1,2,3&4 55R3676,S/T LP A84146 DISTRICT OF THUNDER BAY PIN 623220340 AND HYDRO 1 (HONI).**

The proposed new Waasigan 230 kv transmission line is targeted to run through the above location and as home owners we know that this action will have horrible and forever lasting negative impacts.

The following list of concerns are as followed and we ask that this proposed hydro line be removed from Hydro1 interest and be relocated to a new location where far less impact would occur.

- 1) The noise pollution from the line will be unbearable due to the high volume of power being transported
- 2) The vegetation will be negatively impacted as will the ground water
- 3) My water supply to my home is spring fed and collected in a shallow well which will be contaminated
- 4) The wildlife will for sure disappear
- 5) The value of my home will be drastically reduced
- 6) The property behind the proposed easement becomes useless
- 7) The radiation from the new line in addition to the existing one will be detrimental to one's health

The above grievance will remain open to add concerns as they become of knowledge

HYDRO ONE

GRIEVANCE COMMENTS RE: THE WAASIGAN TRANSMISSION PROJECT

DEAR HYDRO ONE,

THIS IS TO ADVISE, THAT I AM OPPOSED TO A SECOND HIGH VOLTAGE POWER LINE BEING CONSTRUCTED ACROSS MY PROPERTY!

THE FOLLOWING ARE MY COMMENTS OF GRIEVANCE:

1-THE NEGATIVE HEALTH EFFECTS AND ENVIRONMENTAL DAMAGE CAUSED BY THE RADIATION EMITTED FROM HIGH VOLTAGE TRANSMISSION POWER LINES!

2-THE LOWERING OF PROPERTY VALUES, AS THESE POWER LINES ARE DANGEROUS AND VERY UNSIGHTLY!

3-THE INCREASE OF RECREATIONAL VEHICLE TRAFFIC! A LARGE PORTION OF THE GENERAL PUBLIC BELIEVE THAT HYDRO TRANSMISSION LINE RIGHT OF WAYS ARE PUBLIC PROPERTY AND THEY CAN TRESSPASS ON THEM 24/7 FOR THEIR OWN PLEASURE!

4-WHEN INSTALLED THIS PROJECT WILL EXPOSE AN ADDITIONAL 400 FEET OF MY DRIVEWAY TO THE EAST, WEST, AND NORTH WINDS CAUSING ADDITIONAL SNOW DRIFTING, RESULTING IN INCREASING THE COST AND EFFORT OF MAINTAINING ACCESS TO MY HOME!

"DO THE RIGHT THING" AND CONSTRUCT THIS TRANSMISSION LINE WHERE IT WILL NOT NEGATIVELY IMPACT SO MANY PEOPLE!

January 31, 2023

Bruce Hopper, Manager
Power Systems Projects
Hydro One

Dear Mr. Hopper:

RE: Waasigan Transmission Line Project (WTLP)
Grievance – Land Acquisition

On Monday, January 23, 2023, a package of information was received at our household, by mail, from Edward Barkauskas, Real Estate Representative, Hydro One Networks Inc. Included with the covering letter and Transmission Project Principles document was a topographical map of our “parent property” which delineated the Hydro One Right-of-Way acquisition requirement to support the implementation of the proposed Phase One of the Waasigan Transmission Line Project.

We are not in agreement with the proposed easement for this project based on the following:

1. Impact on Well:

Our water supply is provided by a 12 foot dug well which is located approximately 15 feet from the southerly (farthest) edge of the existing transmission corridor easement. The new easement, required for Phase One of the WTLP, will have a tower built approximately 200 feet east of our well.

Published procedure by Hydro One, relative to the development of a transmission corridor, identifies in the construction process the following first two critical steps:

Step 1 – Remove vegetation and install temporary access roads and work areas on the right-of-way.
Step 2 – Mobilize equipment and install foundations at the new tower locations.

It is stated by Hydro One that some of that heavy equipment will be grinders, gravel trucks, bulldozers, backhoes/excavators, flat bed trailers. With our eastern property line being Gus Wuori Road, it is our assumption that Hydro One would use the easement extensively to continue with the tower construction and line installation west of our property until the project reaches another location on the transmission corridor where access is as convenient.

Document prepared by Michelle Hamer
2023-01-17

Preliminary Introduction to Summary of Concerns

This is to act as a first draft of grievances to direct the resolution of the inappropriate placement of the preliminary preferred route of the Waasigan Transmission Line Project. Michelle and Jeanette Hamer attended the Hydro One's Open House at the Oliver Community Recreation Centre on January 16, 2023, to be informed by Hydro One Project Manager Bruce Hopper that the preliminary preferred route of the Waasigan Transmission Line Project would be placed on the Hamer's property in an area that will cause severe undue hardship and irreversible damage in all aspects of life for that of which no monetary compensation will be reasonable. This proposed route leaves three generations currently living on one of the oldest original homesteads in the Kaministiquia area with no ability to recover, as to buy or rebuild what is currently on this property is not possible given the current economic climate and history of the land. The farmhouse was kept with original exposed beams intact while internal rooms were fully renovated with an add on, along with exterior wood finishing in preparation for Mr. and Mrs. Hamer's retirement years. A secondary residence was due to be constructed in spring of 2023 for Michelle Hamer and her children, in preparation of care for her parents. The barn that has been upkeep yearly with maintenance is over 100 years old. The lack of humanity, disregard for community, lack of informed consent regarding EMFs, and oversight in the environmental assessment by Hydro One is possibly expected but is not accepted. Hydro One is not able to reasonably provide a fair exchange or have they proven sufficiently that there is evidence of a beneficial trade-off for this community to experience properties to once again be damaged and expropriated. In the case of the Hamer's, they will lose a lifetime of work. The landowners have no collective benefit from the proposed Waasigan Transmission Line Project. The act of putting in a second power line where already land was assumed for a similar line is merely Hydro One and the

Response by Owners of the Land Parcel 2265, District of Fort William Freehold Part of South of Lot 13, Concession 1, Township of Forbes of Thunder Bay to Waasigan Transmission Line Project

Document prepared by Michelle Hamer
2023-01-17

Waasigan Transmission Line taking all of what they need for either economic benefit, or benefits not yet disclosed, and leaving hard working Canadians in the wayside of destruction and at risk of health complications. If this second power line is not supporting economic development but in relation to nuclear developments in the area that it appears to be directed, then this must be disclosed to the public immediately. Hydro One shows no regard for family, well-being of community, health of the human, or environmental impact on the fields to produce hay and/or crops, of wildlife or the surrounding area and the homestead. The Kaministiquia Valley and hillside has already paid with enough sacrifice of her body to Hydro One in the name of public interest. Should this whole new power line that would multiply the carcinogenic EMFs already produced in the corridor, really be in the public interest of our Thunder Bay Region, then the burden can be shared elsewhere.

Contamination of Watershed

It is most likely that there will be adverse effects on the quality of water due to this preliminary preferred route contaminating the surface and ground water that serves as drinking water for humans, livestock, and wildlife, as it sits at the drainage basin opening into a spring water fed pond with Bass, measuring 60 meters by 122 meters draining into a creek flowing out of the property. The well that acts as the water source for the house and barn is positioned at the bottom of the slope of the area in question for the current line shown on the map, which would require the deforestation of old growth trees. The deforestation of these old growth trees irrevocably hurts the enjoyment of the land as trails have been constructed throughout, cosmetically damages the property, removes a necessary wind barrier to protect the land, along with a buffer to current EMFs, and most importantly will remove the root structure along the slope that keeps the soil intact ensuring the health of the pond and water supply. Any construction within such a proximity to the drainage basin will create extremely high

Document prepared by Michelle Hamer
2023-01-17

potentialities to contaminate the surface and ground water.

The Health Risks Hydro One is Not Acknowledging

While other countries have adopted safety regulations regarding EMF exposure, Canada has not. It does follow the international guidelines which are solely based on the protection from acute (short term) effects of EMFs, and not such as long-term living by two high voltage Hydro Towers in one corridor. More strict guidelines (2-10 mG) adopted in some countries, as cited in the following Toronto Staff Report would greatly restrict the use of hydro corridors for parks and recreational activities and the feeling was that although there is acknowledged risks to health, the health benefits may outweigh the risk. The Toronto City Staff Report Action Required brief titled Reducing Electromagnetic Field Exposure from Hydro Corridors states, "The International Agency for Research on Cancer (IARC) classifies the magnetic component of EMF as a possible carcinogen because of the association between exposures to EMF magnetic fields in the home and childhood leukemia. Given the possible link between the exposure to EMF and an increase in the risk of leukemia in children, taking practical low or no-cost actions to reduce exposures to young children is prudent."

This report continues on to say, "when new high-voltage transmission lines or increases in the capacity of existing transmission lines are proposed within the City of Toronto, the Chief Planner, in consultation with the Medical Officer of Health, request the proponent to undertake a health impact assessment to evaluate options available to minimise any increase to the yearly average exposure to EMF in Toronto; and the Board of Health forward this report to Health Canada, the Ontario Ministry of the Environment, Ministry of Health and Long-Term Care, other Boards of Health in Ontario,

Response by Owners of the Land Parcel 2265, District of Fort William Freehold Part of South of Lot 13, Concession 1, Township of Forbes of Thunder Bay to Waasigan Transmission Line Project

Document prepared by Michelle Hamer
2023-01-17

Toronto District School Board, Toronto Catholic District School Board, Conseil scolaire de district du Centre-Sud-Ouest, Conseil scolaire de district catholique Centre-Sud, Waterfront Secretariat, Toronto Hydro, Hydro One, Canadian Electricity Association, Canadian Standards Association, Ontario College of Family Physicians, and the Ontario Medical Association.”

EMF levels in hydro corridors were found to be higher than levels found in the general environment in the city, as “In February and March 2005, Toronto Public Health measured levels of EMF in 36 parks (18 parks inside hydro corridors and 18 parks outside of hydro corridors). Levels of magnetic fields taken in parks located in hydro corridors varied widely. Levels were usually highest directly underneath the high-voltage lines at midspan and decreased with increased distance from the lines (Table 1).” This report concludes that “evidence available does suggest that exposure to EMF at levels normally found in Canadian living and working environments is harmful.” Further discussed is the necessity of land-use planning measures, with right-of-way widths for power lines next to residential areas. We are requesting to see the health impact assessment and an EMF management plan that outlines the measures that Hydro One has taken to ensure the health of our community and environment in the Kaministiquia area.

In another report that has been included with this document, it is noted that a strong EMF field from high voltage power lines extends for about a ¼ of a mile. The diagram included states that within 50 meters of a power line there is increased cancer, stunted growth, and increased triglycerides. Within 507 meters abnormal EEGs are reported, while health complications are found right out to the distance of 2000 meters. This report notes that people who live within 299.92 meters of a power line at any point of age to 15 years were three times more likely to develop cancer as an adult. The

Response by Owners of the Land Parcel 2265, District of Fort William Freehold Part of South of Lot 13, Concession 1, Township of Forbes of Thunder Bay to Waasigan Transmission Line Project

Document prepared by Michelle Hamer
2023-01-17

California Department of Health concluded that EMFs were responsible for an increase in childhood leukemia, adult brain cancer, Lou Gehrig's disease and miscarriage in the 2002 report, an Evaluation of the Possible Risks From Electric and Magnetic Fields (EMFs) from Power Lines, Internal Wiring, Electrical Occupations, and Appliances. The study cited dozens of other epidemiological studies specifically linked to high voltage power lines including brain tumors, leukemia, birth defects, and lymphoma. As is, the Hamer's home is already in a high-risk zone, possibly and most hopefully buffered by the landscape. This is the same landscape and forestation that Hydro One seeks to destroy. Adding a whole other Hydro Tower power line in this current corridor approximately, and this is being generous, within 300 meters from the residential home doubles the exposure to not only this residence but to all households, wildlife and the environment. Hydro One has not provided the necessary 'Informed Consent' to residential owners regarding the dangers of the current power line corridor or what it actually means to add another power line in the same corridor to the health of the community, and those that live alongside power lines.

Socioeconomic Harm

The Hydro One preliminary preferred route of the Waasigan Transmission Line Project causes financial harm and undue hardship to the family, as this current property allows for multi-generational family living. This means that a family can share in responsibilities of daily life, and Mr. and Mrs. Hamer would have the benefit of living longer in their own home upon later years. Jeanette Hamer's mother spent a good portion of her life on the homestead, while our Great Aunt spent her last moments of life in the farmhouse choosing to pass with family. Furthermore, Michelle Hamer moved back to the homestead in May of 2022 not only due to what appears to be a health condition exacerbated possibly but not conclusively to EMF exposure while in an urban setting, but to provide

Document prepared by Michelle Hamer
2023-01-17

future support to elderly parents with the plan to build a much-needed manufacturing space for her current established business of over 15 years. The basis of the business is natural plant medicine. As she has attained her Clinical Herbalism, wildcrafting from this parcel of land along with growing herbs in the field settings for tinctures, teas and topicals for retail is the basis of the business plan. Not only does Hydro One's preliminary preferred route severely harm a current established business, but it completely disrupts all future aspiration of expansion. Amenities such as the equine training ring made to regulatory standard size was to be used this spring for an outreach activity for children with disabilities, equine training, and work shops. These types of facilities come at great cost and are not easily found or replicated due to space and now cost of materials. The ignorance of the damage that this preferred line route will cause, along with the proposal to add a second power line to the current corridor, is deeply disappointing to say the least.

Environmental Harm

These proposed routes in the corridor behind the Hamer's are enjoyed year-round with maintained trails for equine sleigh rides, sledding, cross country skiing, snowmobiling, hiking, horseback riding, and more. It will entirely change the nature of the land and spoil the enjoyment of the property that has been used since 1987. The old growth trees will not be replenishable and there is no stumpage fee that will replace them as a necessary environmental buffer for weather and EMFs caused currently by the power line corridor. The cabin and pond that are used year-round for swimming, fishing, rowing, and skating all within a less than 100 meters from the proposed line will be damaged absolutely. This area was also proposed to be used as a Hip Camp spot for travellers, earning the Hamer's a little retirement income. The audacity for Hydro One to offer the Hamer's to speak to a realtor without any comprehension of what this property is to so many lives, is disturbing and unacceptable.

Response by Owners of the Land Parcel 2265, District of Fort William Freehold Part of South of Lot 13, Concession 1, Township of Forbes of Thunder Bay to Waasigan Transmission Line Project

Document prepared by Michelle Hamer
2023-01-17

The Kaministiquia area is also rich and abundant with wildlife and vegetation. There are edible wild raspberries, saskatoons, and strawberries. More specifically, there are regionally rare plants such as Bur Oak, Blue Cohosh, Indian Hemp, Wood Nettle, Turtlehead, and Carrion Flower that are all within the scope of sustainable usage found in the field and woodland areas of the Hamer's.

Extending the amount of property damaged during construction of this second line not only reduces the area from which to harvest, but it exasperates the EMFs in the corridor expanding the unusable area for harvesting and growing.

Seemingly trivial to all other items listed is the sound pollution from not only one set of buzzing wires but two which cannot be overlooked, while the thought of a once pristine property being plowed over with machinery and metal for the length of the project is not just unbearable but not within the realm of what is admissible.

As this initial written grievance is concluded, it is important to mention that it would be our observation for us and the wider community that Canadian landowners and the population at large are increasingly reaching a tipping point of tolerance for poor, harmful, and unacceptable treatment by federal and provincial corporations and organizations. It is not necessarily the anticipation that Hydro One will care whether the family is split up, elders are left without a home, my small business and income is hurt, or the Timberwolves lose their den, but it is important that the foundation for the grievance is read in context. This preliminary preferred route of the Waasigan Transmission Line Project would appear to be an act via Hydro One that violates aspects of the Canadian Bill of Rights including, 'the right of the individual to life, liberty, security of the person and enjoyment of

Response by Owners of the Land Parcel 2265, District of Fort William Freehold Part of South of Lot 13, Concession 1, Township of Forbes of Thunder Bay to Waasigan Transmission Line Project

Document prepared by Michelle Hamer
2023-01-17

property, and the right not to be deprived thereof...' We have been made well aware over the last 24 hours of the heavy 'beast' many call Hydro One, but without discovery and disclosure there is no learning. We shall move forward with this grievance to educate ourselves and community with the hopes of saving the family homestead, a generational legacy, and the land that we love.

Signed:

Michelle Hamer

Attn: David LeBeter, President/CEO
Hydro One Networking Inc. a Waasigan
Transmission Line Project.

I am a property owner affected by the proposed twinning of the present line and new Waasigan Transmission Line. I oppose this project for the following reasons that I will list briefly at this point.

Firstly, I only received notice of this plan one week ago with a package and form letter addressed to me dated Jan. 17, 2023.

I have owned my property outright for almost 50 years and it is my right to protect it from any development or affects that I don't see as just. In this case my concern is for the environmental and health effects that the expanded line will have on my and other property's affected.

Also of great concern are how it will affect the actual homes and properties of my neighbours, some of whom have been on their land for generations. There's nothing in my mind that sees raining ones home and livelihood as just!

We know that there can be alternative routes of this line that would not adversely affect residents in our community and others in its path. This has been proven in other scenarios.

My final concern, and one that has not
be put up front, is the possibility that
the Waasigan Transmission Line is partly
in preparation for the proposed nuclear
waste dump in the Ignace area. I am
adamantly opposed to that proposal and the
transportation of that waste through our
comunities.

I stand behind these points and will
fight to protect my property and those
of my neighbours in Kamistiquia and
elsewhere.

Sincerely

Michael Meade

To: Hydro One

Re: Neighbours On The Line - WTLP Hydro Power Line

To Whom It May Concern:

“HYDRO ONE WANTS TO BE A GOOD NEIGHBOUR” is what Hydro One is saying. Really! Is this how to treat your neighbours? I don't think so.

I have lived in Kaministiquia my whole life and together with my husband and daughters, Kelly and Tammy, we built a home here on property my Mom and Dad gifted to us. Our property is under a mile from where I grew up. It is what families do in our Community.

We care about what happens to our friends and neighbours. We rely on each other and, in time of need, we come together to offer support and, whatever action is necessary.

Jeanette and Steve Hamer and their family are dear friends and neighbours. They have worked so hard over several years to get their home and property ready for their retirement. Now they find out that their plans are in jeopardy as Hydro One plans to run the WTLP Hydro Power Line in close proximity to an existing Hydro Power Line possibly causing several health issues and, the chance of contamination in their only Well on their property.

How is it even possible that Hydro One, a large provincial Corporation, is allowed to do this? I believe that if this was taking place in Southern Ontario, there would be a Health Assessment required. Has a Health Assessment taken place here?

How can this happen? Is it because we live in Northwestern Ontario and we don't matter?

We attended a meeting at the Kaministiquia Community Centre on January 25th and found out that several other people are in the same situation as Jeanette and Steve if the WTLP Hydro Power Line proceeds as planned. Some of the people directly involved just recently received packages from Hydro One.

We were also astounded to hear that at a meeting in Thunder Bay at the Oliver Recreation Centre, an employee of Hydro One directed Jeanette Hamer to consult with a Realtor. Now there is real compassion!!

We will join together with our friends and neighbours to help stop this atrocity.

Hoping for a change of heart, Hydro One.

*Sharon & Bill Hedman
& family*

TO: Hydro One WTLP Power Line Project

RE: Concerned Citizens of Kaministiquia

We are friends and neighbors of citizens affected by the Hydro One WTLP Power Line Project.

People live in this rural area by CHOICE because of the great quality of life.

This is where they raise or have raised their children and made plans to retire.

Many are residing on land that has been in the family for many generations. Now you're attempting to force residents to give up their home and property.

The impact on our friends is mentally and physically draining. They are extremely ANXIOUS (full of mental distress or uneasiness because of fear or misfortune, greatly worried). They are not sleeping. This situation will cause long term health issues.

We stand with our friends and neighbors as they are protecting that which is their right.

"PROTECTING THEIR PROPERTY"

You state you want to be a good neighbor.

Prove it by moving the WTLP Power Line to another location!!!

Independent Electricity System Operator
1600-120 Adelaide Street West
Toronto, ON M5H 1T1

Re: Wassigan Transmission Line Project

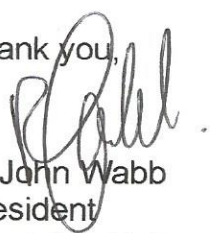

The Members of Canadian Union of Skilled Workers (CUSW) are responding to the recent recommendation by the Independent Electricity System Operator (IESO) to take a phased approach to the construction of the Waasigan Transmission Line project in Northwestern Ontario. Our participation on the Waasigan Community Roundtable has provided us with insight into the need and local support for the project. Many of our Members have gained valuable experience and employment opportunities on the East-West Tie Transmission Line and Wataynikaneyap Transmission Project, they are hoping to continue their careers on local infrastructure projects including this project. For many years, Hydro One has been vocal in their efforts to advocate for the need for this new transmission line to support planned economic growth in Northwestern Ontario. We do not agree with the phased approach and are supporting Hydro One's formal submission to the IESO.

We agree with Hydro One that the phased approach to construction of Waasigan would create:

- Investment uncertainty for industry;
- Limited ability for regional growth;
- Lack of stakeholder visibility to the "big picture";
- Increased and prolonged impacts and disturbance to public infrastructure/spaces;
- Increased risk of conflicting with future infrastructure projects;
- Increased risks to overall project;
- Increased risks to continuity of training, employment and procurement;
- Increased risk of competition for resources from future projects in the region; and
- Consultation and construction fatigue.

In addition, full benefits to Indigenous partners and communities can only be realized through building the whole line between Shuniah, Atikokan and Dryden.

Thank you,

R. John Wabb
President
Canadian Union of Skilled Workers

Lewis, Aisha

Sarah Cohanim

Senior Environmental Specialist

483 Bay Street, 14th Floor, North Tower,

Toronto, ON, M5G 2P5

Ms. Cohanim

I am writing to you to express my concerns regarding the Waasigan transmission line that Hydro One is planning to route from Atikokan to Shuniah.

Hydro One states “that the EA predicts and assesses potential natural environment and socio-economic effects and identifies actions that hydro One will take.”

I live in the Kaministiquia area of this line. There is no concern for the residents of the area, our health and well being. We are an established community and growing . We are omitted with only a suggestion that Locals will be hired for the duration of building the line.

Doubling the current hydro corridor through our township create many concerns not noted in the draft.

1/ This wide area remains barren land , that land owners can not use for gardens, for recreation areas, to build more homes. Still the landowner pays taxes on this land and have liability if someone gets injured using the land illegally.

2/ Hydro one will use defoliant on this area which can spread to their own gardens, affect small animals and birds. Already Hydro One is using these chemicals but this use will at least double with the increased width

3/ Home owners who are unfortunate to live near this planned power line will at least suffer a huge decrease in property value, at worst find their homes feel unsafe , might be unsaleable. This is a huge financial hit to the homeowner. It is

unbelievable that a corporation can create this disruption and financial drain legally. Some of these home owners will receive no compensation because the line crosses the neighbor's property close to the property line and very close to their home!

4/ I recognize that EMFs have not been proven to be a real risk to our health. Everyone has a story of a friend who lived near these lines and died young usually from cancer. Fearing the danger can be as harmful to health as facing a danger.

I don't know how this can be compensated for. I feel this risk should be recognized and dealt with in the EA. The easiest way is to put the lines in remote areas, let everyone can have a clear conscience and not fear being found out in the future that their actions contributed to another "love Canal" environmental disaster.;

5/ For some of us it is more basic, our view will be lost, our cozy surroundings. We live here to enjoy nature -trees, birds, animals wandering through. Removing trees, creating a barren landscape with towers in our front yards, might seem a small inconvenience but it is a big sacrifice. Where would this be addressed in the EA?

6/Where is the level of stress and anxiety, and mental health issues being created in the community with this proposed doubling of power line being addressed?

Thank you for reading my concerns; I trust that changes can be made to make this powerline a positive experience for Hydro One and the residents of our community.

Sincerely,

Mary Lee Barry

Re: Response to Hydro One Waasigan Transmission Line Project (WTLP)
Draft Environmental Assessment

Dear [REDACTED]

Please find attached letters documenting omissions, shortcomings and a lack of proper consultation calling the legitimacy of this WTLP Draft EA into question.

Pay close attention to the attached document 'Route Evaluation Shortfalls' prepared by [REDACTED].

This document discusses the unfair evaluation of NOTL's proposed alternate route. When using a simple comparison, the two routes (WTLP and NOTL) came out equal. It also clearly identifies deficiencies regarding the application of Indigenous Values, the lack of consideration of communities, human impact and the massive emphasis on twinning the transmission line. It shows that there was no explanation as to how the criteria weights were determined, and lack of alternate routes for the WTLP from the Silver Falls Road to Quetico Park.

It is apparent from the WTLP Draft EA that proper communication and consultation did not happen between Hydro One Networks Inc. and the impacted communities from Shuniah to Dryden, Ontario. See Appendix A, B and C.

There have been two alternate routes proposed by NOTL that were either not evaluated or unfairly evaluated, nor represented in the public forum in a reasonable manner. In Northwestern Ontario there is the opportunity and an extensive amount of space to avoid communities and private property. A precedent has been set in previous High Voltage Transmission Line Projects to date.

This seemingly intentional infliction of emotional and physical distress, financial hardship, along with mental anguish has been detrimental to the affected individuals and communities. This incomplete and faulty approach to this WTLP Draft EA will result in liabilities and unjustified destruction.

This Waasigan Transmission Line Project Environmental Assessment Draft must be rejected.

Sincerely,

Neighbours on the Line

Neighbours on the Line Response to the Hydro One Waasigan Draft EA

NOTL Alternate Route

We contend that Hydro One's evaluation of the NOTL Alternate route was unfairly evaluated. The evaluation should have shown that the NOTL Alternate Route to Hydro One's Preferred Route was much, much closer than what was presented to the Kaministiquia and Lappe Communities. Since the Draft EA was published we have been able to discover the weighting and scoring methodology that was used to evaluate the alternate routes. This information was withheld from members of the community since being requested on Jan. 16, 2023. The criteria information should have been available in the ToR, as it was supposedly used to determine Hydro One's Preferred Route. With this information and Hydro One's own numbers in their evaluation, we compared NOTL's Alternate Route with Hydro One's Preferred Route using a simple proportional comparison. We then applied a score for each indicator based on Hydro One's weight factors. This method, as opposed to Hydro One's dubious method, an all or nothing scoring, resulted in a score of 48.9 to 51.1 in favor of Hydro One's Preferred Route (see evaluation sheet 1, attached). The NOTL's evaluation is much closer than Hydro One's evaluation of 30.125 to 69.875.

Upon review of the Hydro One evaluation, there was one indicator that should not have been applied to the NOTL alternate route evaluation. That indicator was the proximity to an Indigenous Reserve. The proximity to the Lac des Mille Lac Reserve was 4.6 Km from the NOTL Alternate Route footprint. This indicator should be considered neutral as no other criteria outside of the 2.5Km study area either side of the proposed footprint was included in the route evaluation. With this criteria considered neutral, the evaluation results in a score of 50 to 50 (see evaluation sheet 2, attached).

With the preliminary evaluation of NOTL Alternate route and Hydro One's Preferred route being equal and the huge impact on the local communities, the NOTL Alternate must be given an Environmental Assessment on par with Hydro One's Preferred route. Since there were no route refinements made to the NOTL Alternate Route, we believe that with improvements for constructability and location, the NOTL proposal would score higher.

Route Evaluation Shortfalls

Proximity to Indigenous Reserve Lands

The inclusion of an indicator that gives preferred value to a community based on ethnicity invalidates the evaluation criteria. This is a Human Rights violation and is most likely illegal in Canada. This is particularly harmful where it causes a decision to be made that discriminates against the Rights of other citizens. For Example, treating one community differently than another based on heredity. We accept that legitimate Indigenous interests and concerns are part of the EA. That Spiritual and Special sites are avoided. We cannot accept that non Indigenous communities are treated differently based solely on their heritage.

Lack of Consideration to Community

A review of other recent Hydro One EA's indicates the Waasigan criteria values homes as only 1.6% of the total evaluation as opposed to 10% of the Chatham-Lakeshore criteria. How did the Waasigan TL project put so little consideration for homes and private property in the evaluation?

Huge Emphasis on Twinning Transmission Lines

A review of other recent Hydro One EA's indicates that the Waasigan TL criteria places 12% of the total evaluation on twinning the TL as opposed to only 4.8% of the Chatham-Lakeshore TL project criteria. This makes any proposal that varies from the twinning of an existing line virtually impossible to succeed.

No Explanation as to how the Criteria Weights were Determined

There is no description of how the alternate route evaluation criteria was derived at in either the ToR or the Draft Environmental Assessment documents. There is also no description of how the criteria weighting numbers were determined. This should be available, otherwise the only conclusion that can be derived at is that Hydro One fabricated the numbers to suit their desired outcomes.

Preferred Route Selection Options

Quetico Park to Silver Falls Road

There was only one route proposed for the TL from Quetico Park to Silver Falls Road. We could not find any rationale in the ToR or EA to explain why there was only one option in this area. There should have been more than one option in this area, given the numerous encumbrances, such as cottages, mining claims, resorts etc., in this area that could be avoided if there was an attempt made to investigate alternate options.

Unanswered Questions

Why is there no acknowledgement anywhere in the EA that NOTL submitted a second alternate route proposal that was received by Hydro One via email and then dismissed via email without a review? This route was submitted in response to the first NOTL Alternate route being turned down and based on the criteria values learned on the first submission. It would definitely score higher than Hydro One's Preferred Route if evaluated fairly.

Why must the Transmission Line go to Dryden via Atikokan rather than directly to Dryden? It would be very easy to include a more detailed rationale, if there is one, rather than the simple statement that the IESO directed Hydro One to do so.

If the transmission line was located along the first part of the NOTL Alternate Route and then from the Upsala area continue westward paralleling Highway 17 to Ignace and on to Dryden, the total length of the project would be 30Km shorter. The security of the electrical grid would be better served by the separation of the transmission lines in lieu of increasing weather related disruptions due to climate change. ie. Forest fires, ice storms, tornadoes etc. The Power would be closer to where it is most likely to be needed. ie. new mines, northern reserves etc. This route would avoid the majority of the community disruption and the impacts to the numerous Provincial Parks and Conservation Reserves that the Waasigan Preferred Route would produce.

Response Letters to Waasigan Transmission Line Project

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

RE: Environmental Assessment Waasigan Transmission Line

Dear [REDACTED]

We write this letter in response to the Environmental Assessment for the Waasigan Transmission Line. We are directly impacted by Hydro One Networks Inc Waasigan Transmission Line, our property is a total loss. The draft EA seems to be missing one glaringly obvious category for measurement....the human component is missing. No where in this report does it discuss the effect to the immediate property owners. We submitted our Human Impact statement February 4, 2023 to Hydro One Networks and to this date we have not received any acknowledgement from Hydro One as to how they have destroyed our lives. Please see attached for a copy of the impact statement submitted.

Update to my human impact statement: I have continued to travel to London every 2-4 weeks for procedures and medical care. On July 4, 2023 I will be having a major reconstructive surgery in an attempt to save my kidney. We were expecting to have our retirement home finished in order to recover there as it was to be set up with home dialysis, but instead we still only have the foundation of our home sitting there, because [REDACTED] at Hydro One "STRONGLY ADVISED" us not to build. Hydro has forced us to put our life on hold, we sit here day after day not able to build or carry on with our lives.

Prior to January 23, 2023 we had no information or notification (we had never heard of) the Waasigan Transmission Line. We were not invited to the June 2019 workshop regarding the line even though we are directly impacted and should have been informed. The following is a list of the events that have happened since we received the letter from Hydro indicating they were taking our property.

*January 23, 2023 received letter from Hydro One signed by [REDACTED] indicating expropriation intentions

*January 23, 2023 [REDACTED] called [REDACTED] at the number on the letter. [REDACTED] highly encouraged us to get legal advice and that he would be here to help us through this process.

*We then chose to apply for our Hydro hook up for the property as we intended to continue with our build on March 1. We received notification from Hydro One that they sent an engineer out to our property and they will do our main hook up March 1, 2023 for an approximate cost of \$4000.

February 4, 2023 submitted Human Impact Statement to Hydro One

February 27, 2023 [REDACTED] attempted to call [REDACTED] but was notified that he had been replaced by [REDACTED] spoke with [REDACTED] in an attempt to figure out what was happening and get some questions answered. At this time Mr. Costa "highly suggested we not build" putting our lives completely on hold.

We received a registered letter from Hydro regarding a meeting May 15, 2023. Within an hour of receiving the letter we received a phone call from [REDACTED] indicating he was in town and wanted to meet.

We met with [REDACTED] at our property, where he showed no empathy for our loss however did present three options as follows: 1. Moving the line south effecting our young neighbours significantly 2. Moving our foundation to the swamp area of our property or 3. A complete buyout. Although none of the options are ideal we did indicate that we would not put our neighbours in the situation we are in. We did agree to have [REDACTED] attend our property to complete an appraisal with no commitment to sell. We agreed that time is an issue and the appraisal would be completed within 14 days. At this time we also asked for the terms of reference for the type of appraisal in order for us to have an independent appraisal completed by The Appraisal Group in Thunder Bay.

[REDACTED] attended the meeting May 15, [REDACTED] was not well enough to attend. [REDACTED] was greeted by [REDACTED] who proceeded to offer him \$7500 for "reimbursement costs". [REDACTED] indicated to [REDACTED] that we had contacted a lawyer and would be obtaining an independent appraisal. [REDACTED] strongly encouraged us not to obtain our own appraisal as it would lower the payout we would receive. He also suggested that we make sure our lawyer is experienced in expropriation. After listening to the presentation [REDACTED] asked which of the five person Realty Team for Hydro One is a licenced Real Estate Agent. [REDACTED] indicated that none of them had a license, at this point [REDACTED] left the meeting.

June 2 [REDACTED] called regarding the status of the appraisal and [REDACTED] stated that engineering firms would have to be brought in as the appraiser was unable to assess the value of our property and he needed two more weeks

June 19 [REDACTED] called regarding the status of the appraisal. [REDACTED] indicated that this was now a multi month process and denied the two week commitment on June 2. [REDACTED] at that point called [REDACTED] a liar and hung up the phone.

Now we have received an email from [REDACTED] indicating we should communicate via lawyers only, please see attached email.

We have been lied to from Hydro employees and executives. Our life has been completely put on hold. [REDACTED] is gravely ill and time is very important, how much more/longer are you going to make us suffer.

Sincerely

[REDACTED]

February 4, 2023

Please accept this document as our impact statement regarding the Hydro One Waasigan Transmission Line.

Our story is long, I will try to make it brief.....

I have been struggling with Chronic Kidney Disease since 2013, since then my husband and I have travelled to London for surgery well over 30 times with no improvement. In 2019 the decision was made to take my left kidney. During this time I've been incredibly sick, missing years of work, missing significant events and family functions as well as missed opportunities for travel, in general too sick to enjoy life.

In 2019 my husband and I found a small piece of property that was perfect for us to plan our retirement home, we had been looking for awhile and our current tiny house doesn't meet my medical needs. It is a small manageable piece of property that is only an eight minute drive to town and an important twelve minute drive to Thunder Bay Regional Hospital. Our intent was to start building spring of 2020. We spent the winter preparing, buying materials and making plans. My husband was so excited he made me a 3D model of what our retirement home would eventually look like. It gave us hope while dealing with my constant illness. In the spring of 2020 we were hit by COVID. My husband worked tirelessly clearing and working on the property getting it ready for building. We were eventually not able to build due to the high cost and high demand of a lot of building materials. Our goal now was building in 2021, not what we want but we made progress. 2021 finally came we were hoping for better but it was more of the same....delays, frustrations with my health and high costs of materials. We decided sadly to delay again until 2022 however we did get the foundation in and the drilled well. In 2022 we were advised by my doctors that dialysis would be an eventuality for me. I went through all of the dialysis education and made a decision of which dialysis option was best for me. We altered our building plans so I would be able to eventually receive my treatments from the comfort of my own home not a clinical environment. We made our final plans for the house, bought the wood package, ordered the trusses and windows, we were ready to start March 2023 as the foundation is in we did not need wait for the ground to thaw.

On January 23 we received the letter from Hydro One stating they are taking all of our dreams away. The transmission line is planned to go right through the foundation and well of our new home. Hydro One's "form letter" made our world come crashing down. We have been putting one foot in front of the other since 2013, the property gave us a goal and hope, something to look forward to when our life seemed to be filled with medical appointments, travelling for surgery and feeling like crap. We've used our property since the day we bought it. We've planted a garden every summer, our RV is there to sleep in or hang out, we've had BBQ's and bonfires with family and friends, our dog has made her own paths to run through the bush, this is our home, our future that Hydro One is taking away. They indicate they will give us market value for our property however our property is irreplaceable to us. Where do you find a small manageable piece of property semi rural but that's still only 12 minutes to the hospital, already cleared and leveled with the well drilled and the foundation poured!!!!!!

The only communication we have had from Hydro One is their initial letter and nothing since. So now we sit here day after day wondering what to do next feeling defeated.....how do we keep putting one foot in front of the other???????

Please help us!

To Whom It May Concern

In addition all the concerns illustrated by our neighbours we would like to highlight the bullying tactics and lack of due diligence on the part of Hydro One's EA and land representatives. We have been at every Hydro One meeting and open house available to us as private citizens of Canada. At no time have any of our written and verbal comments resulted in any positive response from Hydro One.

We have requested through the Hydro One representatives, several mitigations measures related to trespassing, spraying of herbicides, environmental damage, loss of use for hunting and gathering, tower and land rental, legal liability of trespassers, and increased fire risks.

We have requested reasonable mitigation measures to address the above. Hydro One has not made any effort besides providing the reoccurring narrative "No"

Hydro One's negotiation method utilized at open houses and utilized by their representatives is that the landowner should just agree to Hydro Ones terms and conditions or your property will be expropriated. This is not consultation and mitigation in good faith, nor does it meet the requirements of the EA Process. This is not how project development in a democracy is performed.

The EA process requires that comments are catalogued and replied to and where possible and reasonable the concerns of the affected stakeholders are mitigated.

Hydro One has not met its requirements under the EA process. They have only dictated the terms under threat of expropriation of our land. This is not consultation in good faith, nor is it up holding the Honor of the Crown.

We look forward to meaningful and respectful dialogue with Hydro One in the future to discuss appropriate mitigation measures to address our concerns.

Sincerely

From: [REDACTED]
Subject: To: [REDACTED]
Date: June 21, 2023 at 3:20:28 PM EDT
To: community.relations@hydroone.com

In my attempt to review the WTLP Draft EA document in the time allotted, I was unable to find where it addressed my concerns regarding my property. I did find it to be very favourable for Hydro One and their indigenous partners in the Wassigan Transmission Project. They will gain substantial financial benefit in the future!!

As a private land owner over who's land the project will be constructed, I will be subjected to continuous pain and suffering in the future for the following reasons.

1. The project will leave me with a deforested depressing scar across the front of my property measuring 92m wide by 866m long containing two high voltage power lines with 5 very unsightly steel towers. VERY DEPRESSING!!!

2. This whole process has been very stressful and disturbing, as I am still concerned about the negative health effects due to radiation and the overall environmental damage. I spend a lot of time on my driveway maintaining proper drainage, cutting grass, removing snow, traveling to and from my home. This will place me directly under the new line in some places and in close proximity in other places!
My well is situated just 24m south of new proposed easement!

3. This project will lower the value of my property for which I pay taxes that keep increasing. A LOSE LOSE SITUATION!!

4. Based on my experiences with the existing power line, I am worried about the increase in trespassing occurrences. A large portion of the general public believe that the hydro line right of ways are public property and they can play on them with their snow machines ATV'S etc. I have had to clean up beer cans and garbage left by these trespassers! I have had people use the right of way as a shooting range to sight in their rifles. There is no enforcement and I'm liable!!

5. The deforesting of my property including many trees we planted will cause increased exposure to the east, west, and north winds. This causes problems with snow removal, home heating, and maintaining access to my home!! VERY DEMORALLIZING!!

In the spring of 1972 my family and I moved on to our property. In the following two years we deliberately built our home 137m south of the existing high voltage power line to provide a substantial green belt of trees and to reduce some of the negative effects associated with high Voltage power lines. The proposed location of the Waasigan Line would remove a large portion of the green belt and bring me 46m closer to the negative effects of a high voltage power line!!

I am the 4th generation in the Law family to own property in this area, dating back to my great grandfather [REDACTED] who owned land in the settlement of " Intola" back in 1910 !
There does not seem to be much consideration for my traditional rights to OWN AND ENJOY MY PROPERTY !!

Would you please tell me where my concerns regarding my property as a result of this project were addressed in the Draft Environmental Assessment ?

Ontario Hydro One

Re: WTLP Hydro Line -- Residential and Human Impact

Our family lives at [REDACTED] Salmi Road. Salmi Road will be one of the areas impacted by the WTLP hydro line. For some, directly on their land and for others, they will experience the health hazards of proximity. As this time, my land will not be directly impacted, however my health will be. Having a 'double' line within 500 feet of my home, as well as the homes of my neighbours is of significant concern.

I understand the line is being built to support First Nation Communities in the North and I support and respect that decision. I do not support the decision made by the planners to simply take the easy route and follow the existing line and in doing so, double the Electric Magnetic Fields that although considered minimal by some, yet others, significant.

I also am dismayed by the lack of transparency by Hydro One. I only heard about this plan a week ago, yet one year ago I heard you were already approaching households to explore the possibility of hydro towers on their land for a fee of \$1,500.00. Of course, you stated it was for 'exploration only' but let's be honest, this is your way of getting your corporate foot in the door of unsuspecting land owners.

On Wednesday, January 25th, youth, elders and everyone in between gathered at the Kaministiquia Community Center, led by a person whose land will be significantly impacted and that gathering was strong. Strong in voice, strong in research and strong in commitment to stop this at or at least minimize the impact of WLTB on our land, health and community. You have the choice to change the route; one that absolutely does not include invading people's homes and land.

We live in the electronic age, where sharing information and research is more accessible. You no longer have a place to hide. There needs to be more consultations held in the very areas impacted such as our Kaministiquia Community Center. A consultation that has a handful of people is NOT a consultation. Consultation takes a lot of time and effort. Not including the very people impacted by this line is irresponsible and, in some ways dishonest. Be transparent, honest and be the 'good neighbours' you claim to be. Please respond to my letter. You may also contact me at [REDACTED]

[REDACTED]
[REDACTED]
NEIGHBOURS ON THE LINE

The present hydro transmission line is located on my property. The easement was used as a property line when the homestead farm was subdivided into three lots.

My husband and I will be greatly affected by the Waasigan project but will see no financial compensation. Instead, our property value will drop.

The proposed line would really affect our neighbours to the south. You want 9 acres of their beautifully treed property.

The residents of this rural part of Northwestern Ontario chose to live here, away from cities and towns, because we love the **Natural Environment** in Shuniah, Gorham Township, Ware Township, and Kaministiquia and west to Atikokan and Dryden.

We treasure the peace and quiet living in the natural environment which surrounds us. We take care of Mother Nature out here.

Twinning the line will destroy our peaceful and natural environment.

On Page 7.1-89 you refer to our townships as “Unorganized”. We are unincorporated but not unorganized!! We have structure:

- Our Local Services Boards manage Fire Protection, Recreation and Library Services, in some cases.
- Our Roads Boards work with the Ministry of Transportation to keep our roads maintained.

On Page 7.2-34, Section 7.2.5.2.4.2 Community Fire Services are discussed under the heading “Fire Services”.

In the list of available Fire Services the Volunteer Fire Departments of East Gorham, Lappe, Kaministiquia and Shebandowan were not included.

As far as Visual Aesthetics, Page 7.4-16, you have neglected to include Lappe.

My neighbours and my family on Gus Wuori Road experience extremely “frequent and continual” **viewing opportunities** of the present unsightly transmission line. Twinning the line will double the negative effect on the visual aesthetic that we would have to live with.

On Page 7.1-176 **Increased Access** is discussed. It is stated that “Recreational activities including snowmobiling, are not permitted on Hydro One ROW’s unless it is agreed to by the property owner...”.

Twinning the lines will create a superhighway for the snowmobilers and ATV operators who already trespass on my property presently.

The noise level will increase disturbing our peace and quiet. The damage to vegetation will increase.

What does Hydro One have planned to help patrol my property to ensure these recreational vehicles do not trespass?

What will Hydro One do to help us if there is an accident on my portion of the right of way and we are held liable?

In the tables in Section 8 the net effects of the Waasigan TLP are discussed. There will be direct affects to:

- The surface water
- The groundwater
- Wetlands
- The vegetation
- The birds and animals
- Species at risk

But in most cases you feel these effects will not be significant.

So, if you are comfortable disturbing the natural surroundings, the homes of wildlife and human beings with your preferred route, why will you not consider the alternate route proposed by the Neighbours on the Line, (NOTL)?

The natural surroundings and homes of wildlife would be disturbed along that route, but our homes and quality of life would not be.

In the table on Page 7.1-48 the Campus Lake Conservation Reserve is mentioned. A utility corridor is permitted through this Reserve if there is no 'reasonable alternative'.

- There is a reasonable alternative: The NOTL proposed route.
- Why would you disturb this nature reserve further by adding a second line through it?

Community Well Being (Section 7.2) states there will be 'negligible net effects'. I do not agree.

In Section 7 in the table on Page 7.2-5, it is stated that you would avoid or minimize effects to populated areas. This could be accomplished if you consider the NOTL alternate route.

Throughout this whole planning, preparing, and evaluating of the Wassigan Transmission Line Project It appears that we non-indigenous human beings do not count and really have no say in how we are treated.

Based on the above points, I feel that it is imperative that Hydro One review the alternate route proposed by NOTL again and reassess this route in a fairer, more inclusive manner.

Then do the right thing:

**Build the Waasigan Power Transmission line along
the NOTL proposed route.**

You want to provide power to the north, build the line in the north!!

Thank you.

Yours truly,

[REDACTED]

[REDACTED]

P.S. I am curious. What does the construction of the new Thunder Bay Correctional Complex have to do with your Environmental Assessment?

Also on Page 8.0-10 there are several typos. Every mention of the Trumpeter Swan, swan is spelled "Swam".

Response by [REDACTED]
Township of Forbes of Thunder Bay to Waasigan Transmission Line Project EA Draft

Document prepared by [REDACTED]
2023-06-25

Dear [REDACTED]

Re: In response to the Waasigan Transmission Line Project Environmental Assessment Draft

The Hydro One Networks Inc. WTLP EA Draft fails to represent the true impact of harm, liability, and injustices of the WTLP preferred route by not including documented information and/or omitting known factors. None of our family's objections to this development since my mother, [REDACTED] and I attended the Hydro One Networks' Open House at the Oliver Community Recreation Centre on January 16, 2023, are included. January 16, 2023, would be the first time anyone in our home would be informed by a Hydro One Networks Representative, namely Project Manager [REDACTED], that the preliminary preferred route of the Waasigan Transmission Line Project would be placed on this property. It is placed in an area that will cause severe undue hardship and irreversible damage in all aspects of life for that of which no monetary compensation will be reasonable. The Hydro One Networks' letter threatening expropriation arrived on January 21, 2023, essentially suggesting seniors could be displaced from their homes in mere months to come without immediate cooperation.

This preferred WTLP route leaves three generations currently living on one of the oldest original homesteads in the Kaministiquia area with no ability to recover, as to buy or rebuild what is currently on this property is not possible given the current economic climate and history of the land. The farmhouse was kept with original exposed beams intact while internal rooms were fully renovated with an add on, along with exterior wood finishing in preparation for my parent's retirement years. A secondary residence was due to be constructed in spring of 2023 for myself and children, in preparation of care for my parents. The barn that has been upkept yearly with maintenance is over 100 years old. The lack of humanity, disregard to the impact of community and property owners not directly impacted by the line immediately on their property, the lack of informed consent regarding EMRs, the lack of commitment to no defoliant use for maintenance, and oversites or omissions to the environmental assessments done on properties by Hydro One Networks Inc. can really be represented by the 1.6% value out of the 100% evaluation criteria given to residences impacted by the WTLP route.

Document prepared by [REDACTED]
2023-06-25

There has to date not been any written commitments in this Draft EA or otherwise, as to how Hydro One Networks will not 'displace' any homeowners as per the announcement on TBT News. When pushed to answer, there are no answers given by any Hydro One Networks representatives. This corporation is not able to reasonably provide a fair exchange, or have they proven sufficiently that there is evidence of a beneficial trade-off for this community to experience damage of property, displacement, or suffer loss of enjoyment or use of land, therefore this would appear to be theft of private property.

In the case of our home, this will represent the loss of a lifetime of work. The landowners have no collective benefit from the proposed Waasigan Transmission Line Project. The act of putting in a second power line where already land was assumed for a similar line is merely Hydro One Networks and the WTLP Partners taking all of what they need for either economic benefit, or benefits that have not been disclosed in this EA Draft, while leaving the impacted communities in the wayside of destruction, harming property values, losing a tax base, along with the risk of health complications. Neither are the very clearly communicated concerns over devastating use of defoliants for maintenance on these lines discussed in completion. The chemical defoliants seep into ground soil and water sheds contaminating entire areas. Regardless as to whether one owner agrees or disagrees to use, these chemicals spread everywhere once sprayed. Hydro One Networks shows no regard for family, well-being of community, health of the human, or environmental impact on the fields that are still used to produce hay and/or crops, of wildlife or the surrounding area and the homestead.

Contamination of Watershed

This WTLP Environmental Draft EA is invalid, as it either via premeditation or a lack of proper due process, fails to recognize any of the water sheds, sources, wells, or otherwise on this property in the Draft EA. When any of the Hydro One Networks representatives from Community Relations to the Environmental Specialists were asked to provide our Environmental Assessment it was not. There had in fact been an Environmental Assessment completed on our property. When we asked at the Oliver Road Recreation Centre, I was told that the EA was in fact completed on our property and would be available for us to look at in the coming weeks. We have been asking for it since with no reply. This is the general failing of much of the Draft EA on this WTLP preferred route, wherein massive

Document prepared by [REDACTED]
2023-06-25

amounts of detrimental information within the 500 m EA are omitted and/or incomplete. This would seem to be a major liability to anyone that chooses to sign off on this EA Draft, as it has now been made known in the public forum and to suggest ignorance is no longer an option.

It is most likely that there will be adverse effects on the quality of water due to this preliminary preferred route contaminating the surface and ground water that serves as drinking water for humans, livestock, and wildlife, as it sits at the drainage basin opening into a spring water fed pond measuring 60 meters by 122 meters draining into a creek flowing out of the property. The well that acts as the water source for the property is positioned at the bottom of the slope of the area in question for the current line shown on the map, which would require the deforestation of the tree line originally planted well over 40 years ago to protect the property. The deforestation of these tree lines irrevocably hurts the enjoyment of the land as trails have been constructed throughout, cosmetically damages the property, removes a necessary wind barrier to protect the land, along with a buffer to current EMRs, and most importantly will remove the root structure along the slope that keeps the soil intact ensuring the health of the pond and water supply. Any construction within such a proximity to the drainage basin will create extremely high potentialities to contaminate the surface and ground water. And yet it is NOT included in this EA Draft. It would appear Hydro One Networks Inc. is hiding pertinent information about the amount of destruction this line will cause to have it approved.

The Health Risks Hydro One is Not Acknowledging

While other countries have adopted safety regulations regarding EMR exposure, Canada has not. It does follow the international guidelines which are solely based on the protection from acute (short term) effects of EMRs, and not such as long-term living by two high voltage Hydro Towers in one corridor. More strict guidelines (2-10 mG) adopted in some countries, as sited in the following Toronto Staff Report would greatly restrict the use of hydro corridors for parks and recreational activities and the feeling was that although there is acknowledged risks to health, the health benefits may outweigh the risk. The Toronto City Staff Report Action Required brief titled Reducing Electromagnetic Field Exposure from Hydro Corridors states, 'The International Agency for Research on Cancer (IARC) classifies the magnetic component of EMF as a possible carcinogen because of the association between

Document prepared by [REDACTED]
2023-06-25

exposures to EMF magnetic fields in the home and childhood leukemia. Given the possible link between the exposure to EMF and an increase in the risk of leukemia in children, taking practical low or no-cost actions to reduce exposures to young children is prudent.”

This report continues on to say, “when new high-voltage transmission lines or increases in the capacity of existing transmission lines are proposed within the City of Toronto, the Chief Planner, in consultation with the Medical Officer of Health, request the proponent to undertake a health impact assessment to evaluate options available to minimise any increase to the yearly average exposure to EMF in Toronto; and the Board of Health forward this report to Health Canada, the Ontario Ministry of the Environment, Ministry of Health and Long-Term Care, other Boards of Health in Ontario, Toronto District School Board, Toronto Catholic District School Board, Conseil scolaire de district du Centre-Sud-Ouest, Conseil scolaire de district catholique Centre-Sud, Waterfront Secretariat, Toronto Hydro, Hydro One, Canadian Electricity Association, Canadian Standards Association, Ontario College of Family Physicians, and the Ontario Medical Association.”

EMR levels in hydro corridors are found to be higher than levels found in the general environment in the city, as “In February and March 2005, Toronto Public Health measured levels of EMF in 36 parks (18 parks inside hydro corridors and 18 parks outside of hydro corridors). Levels of magnetic fields taken in parks located in hydro corridors varied widely. Levels were usually highest directly underneath the high-voltage lines at midspan and decreased with increased distance from the lines (Table 1).” Further discussed is the necessity of land-use planning measures, with right-of-way widths for power lines next to residential areas. We are requesting to see the health impact assessment and an EMR management plan that outlines the measures that Hydro One Networks has taken to ensure the health of our community and environment in the Kaministiquia area.

In another report it is noted that a strong EMR field from high voltage power lines extends for about a ¼ of a mile, stating that within 50 meters of a power line there is increased cancer, stunted growth, and increased triglycerides. Within 507 meters abnormal EEGs are reported, while health complications are found right out to the distance of 2000 meters. This report notes that people who live within 299.92 meters of a power line at any point of age to 15

Document prepared by [REDACTED]
2023-06-25

years were three times more likely to develop cancer as an adult. The California Department of Health concluded that EMRs were responsible for an increase in childhood leukemia, adult brain cancer, Lou Gehrig's disease and miscarriage in the 2002 report, an Evaluation of the Possible Risks From Electric and Magnetic Fields (EMFs) from Power Lines, Internal Wiring, Electrical Occupations, and Appliances. The study cited dozens of other epidemiological studies specifically linked to high voltage power lines including brain tumors, leukemia, birth defects, and lymphoma. As is, the property home is already in a high-risk zone, possibly and most hopefully buffered by the landscape. This is the same landscape and forestation that Hydro One Networks seeks to destroy. Adding a whole other High Voltage Transmission line in this current corridor approximately, and this is being generous, within 300 meters from the residential home doubles the exposure to not only this residence but to all households, wildlife and the environment. Hydro One has not provided the necessary 'Informed Consent' to residential owners regarding the dangers of the current power line corridor or what it means to add another power line in the same corridor to the health of the community, and those that live alongside power lines.

Socioeconomic Harm

The Hydro One preliminary preferred route of the Waasigan Transmission Line Project causes financial harm and undue hardship to our family, as this current property allows for multi-generational family living. This is once again omitted from the WTLP Draft EA. This means that a family can share in responsibilities of daily life, and my parents would have the benefit of living longer in their own home upon later years. My Grandmother spent a good portion of her life on the homestead, while our Great Aunt spent her last moments of life in the farmhouse choosing to pass with family. Furthermore, I moved back to the homestead in May of 2022 to provide future support to elderly parents with the plan to build a much-needed manufacturing space for my current established business of over 15 years. The basis of the business is natural plant medicine. As I am a Clinical Herbalism, wildcrafting from this parcel of land along with growing herbs in the field settings for tinctures, teas and topicals for retail is the basis of the business plan. Not only does Hydro One Networks' preliminary preferred route severely harm a current established business, but it completely disrupts all future aspiration of expansion. Amenities such as the equine training ring made to regulatory standard size was to be used this spring for an outreach activity for children with disabilities, equine training, and work shops. These types of facilities come at great cost and are not easily found or

Document prepared by [REDACTED]
2023-06-25

replicated due to space and now cost of materials. The ignorance of the damage that this WTLP preferred route will cause, along with the proposal to add a second power line to the current corridor, is criminal especially given the complete lack of consultation with the community and impacted property owners.

Environmental Harm

The preferred WTLP route destroys trails that are enjoyed year-round that are maintained for equine sleigh rides, sledding, cross country skiing, snowmobiling, hiking, horseback riding, and more. It will entirely change the nature of the land and spoil the enjoyment of the property that has been used since 1987. The trees will not be replenishable and there is no stumpage fee that will replace them as a necessary environmental buffer for weather, noise, visual pollution and EMRs caused currently by the power line corridor. The cabin and pond that are used year-round for swimming, fishing, rowing, and skating all within a less than 100 meters from the proposed line will be damaged absolutely.

The Kaministiquia area is also rich and abundant with wildlife and vegetation. This farm, as has been seen and recorded, is a known habitat for several species of Woodpeckers, including the Pileated Woodpecker. There are edible wild raspberries, saskatoons, and strawberries. More specifically, there are regionally rare plants such as Bur Oak, Blue Cohosh, Indian Hemp, Wood Nettle, Turtlehead, and Carrion Flower that are all within the scope of sustainable usage found in the field and woodland areas of this property. Extending the amount of property damaged during construction of this second line not only reduces the area from which to harvest, but the width of the corridor negatively impacts wildlife by 4%.

Seemingly trivial to all other items listed is the sound pollution from not only one set of buzzing wires but two which cannot be overlooked. The amount of disruption to life that Hydro One Networks states is 'interim' is long lasting and while the developmental destruction will take decades to restore.

The documented lack of consultation and behaviour by Hydro One Networks Inc. with impacted communities, property owners, and our own family currently appears almost unlawful. In Northwestern Ontario there is the space

Response by [REDACTED],
[REDACTED] Township of Forbes of Thunder Bay to Waasigan Transmission Line Project EA Draft

Document prepared by [REDACTED]
2023-06-25

to go around communities and private property. This is the precedent that has be set with several well known and recent Transmission line projects. The Draft EA should be rejected. Failure to do so will call into question the entire legitimacy of this process and individuals with signing approval, as the lack of true representation of impact, the complete disregard for proper consultation and inclusion of property owners and communities that have already and will continue to be negatively harmed by this WTLP route is documented in the public domain and cannot go ignored.

Sincerely,

[REDACTED]

As a 50 year resident of Kaministiquia I am very concerned about your choice of lies going directly through my community.

All together 750 homes are impacted either directly or indirectly. Directly by having our homes destroyed as the worst case or having our homes directly in the path of the lines and towers. Which is also destroying our health and well being. We feel dismissed as a community having not received fair notification i.e. first contact with Hydro One Wassigan in January, 2023 which is five months ago. This is poor treatment of our families, especially our elders and children.

It seems that only people with homes on the properties your wish to use are being contacted but that is not true. All of our community is affected. You are breaking a historical community into fragments of families who are being isolated from each other as you go door to door making offers that affect ALL of our lives.

We are concerned about the spraying of chemicals and the emissions (we all know there is danger but we do not yet know just how much) and the impact on our flora and fauna and of course the water sheds that keep our land nurtured.

Volunteer professions gave their time to research and propose an alternate route. You threw it out. Why? No families were impacted and yet you used your biased method to rate it unusable.

I want to hear back from you regarding my comments and concerns.

As a resident of Ware township for 55 years I would like to know who signed off on our rights from the start, I understand someone on the local MTO office was to do this as a community I think we should be given an opportunity at the beginning not to get in on the end run when you are tying up the loose end before the project goes to the MOE. This EA process began 3 years ago yet we were only apprised of it in January 2023. Why wasn't our community involved from the start. This is a mega project that will affect the community forever with no benefits. Property values could be affected by anyone near the line, lost tax base with homes too close, loss of potential future building lot sites. Will any of the be addressed in the EA report.

Good afternoon,

At Hydro One, we are committed to ongoing engagement with residents and communities. We recently reached an important milestone in the Waasigan Transmission Line project with the release of our Draft Environmental Assessment (EA) Report. We invite you to drop-in at our upcoming open houses to learn more, speak with our project team and provide feedback on the Draft EA report.

As a reminder, the draft EA Report is available for public review and comment until July 7, 2023 at 4 p.m. (EDT) and can be accessed on the project website at www.HydroOne.com/Waasigan. The EA captures the process to identify a preferred route, predicts and assesses potential natural environment and socio-economic effects and identifies the actions Hydro One will take to minimize and avoid them.

June 14, 2023

[REDACTED]

Dear [REDACTED]

We have lived in Kaministiquia, ON for the past 44 years, it is a very strong, supportive and close knit community. Our farm is over a 100 years old, one of the first dairy farms in this area. We have spent many years, and a good amount of money to restore the original home, heritage barn, and pasture land. The hydro line that was put in 1967 made the pasture in that area not suitable for our horses, as they will not graze under the power lines due to the noise. We had to install fencing in the area close to the front of the property by the road for new pasture. This is also noticeable with the deer, migrating birds and other wild life which we have an abundance of.

We have a pond area that is a natural environment for fish, frogs, birds, deer, wolves, fox, bears, and so many other species. Trees were planted many years ago to create a buffer on the north side of the pond, which is also the head waters for the watershed which feeds our pond, well, and three other properties before it drains into the Matawan River. Hydro One wants to cut down this plantation of forest which will affect the watershed, impact our well which is close to the pond and destroy the beauty that we have worked hard on for so many years. If they go on either side of the existing power line they will destroy a plantation of trees that is a current buffer from the current high voltage line. 40 years of work by us and another 60 years by the original owners will be wiped out in a matter of one year by Hydro One Networks Inc. In this day and age where the environment is such a big issue to preserve and protect, how can this be approved for Hydro One Networks to come in, take away and destroy our home, property and lifestyle!?

Last summer in 2022, we were approached to have an Environmental Assessment (EA) done on our property. We agreed to this only because we wanted Hydro One Networks to see how destructive this would be. Our farm is already cut in half with the existing line, to have another beside it is unimaginable. When the two people who did the EA finished at end of day, they said to me that 'yes all the water was on the South side of the existing power line and the watershed was being protected by the forested area.' We have NEVER received a report of our EA from Hydro One, even after we requested it. Now we find out that our farm, our watershed and pond are not even included in their EA Draft. It has been a very emotional upsetting and very difficult time for our family since we found out in January 2023 what Hydro One Networks was attempting to do to our farm and community.

Upon research we have found out that the Terms of Reference which Hydro One did in June 24-26, 2019 did not include any unincorporated townships and property owners that the line crosses from Atikokan to Shuniah. This being said this Environmental Assessment is invalid and is not legal. Hydro One Networks has demonstrated no concern for human impact, the health and well-being of those living in our community, the seniors that have lived here all their lives and the young generation that will be passed down the homes and properties of their families.

All our written letters, meetings and phone calls expressing our concerns and personal impacts seem to be meaningless. Hydro One Networks had no other alternate route even considered between the Silver Falls Road and Atikokan. This corporation only wants to go the cheapest and shortest route with no consideration for property owners. They do have another alternate route, which we presented to them and it would be all on crown land with no human impact. We do hope you will take all of the above into consideration and respect our objections and fears of what will happen if you approve Hydro One Networks to go ahead with such a monstrous and horrific project in our community.

We would also very much appreciate to hear back from you directly, to let us know your thoughts and concerns and what you will do, if anything, to address our situation with Hydro One.

Sincerely,

RE: Waasigan Transmission Line Project, Land Acquisition Compensation Principles

Dear [REDACTED]

I am writing to inform you that you are a directly impacted property owner on the Waasigan Transmission Line Project (the "Project").

As mining and forestry continue to play a key role in driving economic growth in Northwestern Ontario, so too does the demand for electricity which this Project aims to address by increasing high-voltage transmission capacity. Hydro One Networks Inc. ("Hydro One") is currently in the planning and approval phase for a new double-circuit 230 kilovolt ("kV") transmission line between Lakehead Transformer Station ("TS") and Mackenzie TS (Phase 1), and a new single-circuit 230 kV transmission line between Mackenzie TS and Dryden TS (Phase 2). At this time, Hydro One is commencing land acquisition activities for Phase 1 of the Project.

Please find enclosed a booklet that sets out Hydro One's Land Acquisition Compensation Principles ("LACP"), as well as an individual property map identifying the routing on your property. This booklet is intended to inform directly impacted property owners of the compensation principles that Hydro One will apply to voluntarily acquire the necessary property interests for this Project.

Hydro One's goal is to secure voluntary property settlements with impacted property owners along the preferred route in a timely manner. Included in the LACP are financial incentives and choices, which we believe provide a fair balance between the needs of property owners, Hydro One and the ratepayers of Ontario.

Adoption and application of these compensation principles provides real value for timely settlements and seeks to avoid potentially lengthier, less flexible and less certain outcomes associated with the legislated expropriation process.

As your dedicated Real Estate Representative, I will be contacting you shortly in an effort to establish a meeting time to discuss this Project with you directly. Our first meeting is intended to inform you about the compensation principles that Hydro One will apply in acquiring the necessary property interests for the Project. My goal is to work with you to secure voluntary property rights in an open, fair and transparent manner.

If you have immediate questions regarding the LACP, or property settlement process, please do not hesitate to contact me at [REDACTED] any general Project information please visit our website at: www.HydroOne.com/Waasigan.

Sincerely,

Hello Waasigan Transmission Line Project First Nation Groups:

My name is ██████████, and my mother is ██████████, and my grandparents are Steven and Jeanette Hamer. We are one of the families in the Kaministiquia area that is severely impacted by this current proposed WTLP route. I cannot express my disappointment in the apparent hypocrisy of this situation.

I am a third year Lakehead University Computer Science student, and I am also a Treaty 3 Status Indian of the Couchiching Band. When I found out it was these First Nation Bands that would play a part in the destruction of this land, along with the displacement of my Grandparents, my mother, and my siblings it angered me in such a way that I realized I need to write to your groups to let them know my feelings.

Firstly, I am holding Hydro One and the Waasigan First Nation groups personally responsible for harming my Grandparents. My Papa and Grandma are not sleeping at night, while my Papa is pacing the floor trying to understand how they are going to manage this. They will have nowhere to go, and no one should be doing this to seniors at this age. They have worked hard their whole lives, to now have what they have worked for threatened to be stolen by you.

My Grandparents have always been there for me. I have lived on this farm as a child for several years. I have also lived on the Couchiching Reserve, in Toronto, and in Thunder Bay but the one thing our whole family has been able to count on was to have the farm to return to for a break, and as a constant foundation. When I lived with my father on the Couchiching Reserve, he had requested a four-bedroom house over ten times during the years I spent there with no success. It is very ironic that now these First Nation Groups are involved in taking my Grandparents' home that is their retirement and my second home, my mother's current home and inheritance, and subsequently my own inheritance, especially when my father was not able to acquire a suitable home when I was child.

Secondly, the current transmission line that was put in during the 60s through this valley should have never been allowed in the first place based on the historical nature of this area. It has always been a cradle of biodiversity and an important part of the history of the land far beyond the last 400 years. I thought First Nations are all about land management and care for history. This is not proper stewardship of human communities or land.

These groups must do better. If you want to reach out to me, I would be happy to talk to anyone about this. My cell phone number is ██████████.

Respectfully,

██████████

[REDACTED]

Here are our comments and questions for Hydro One Waasigan Line.

The effects of the Electro Magnetic Fields on humans and the safe distance one needs to be safe. What is the safest distance for a home owner from the line/tower.? I do not see this in addressed In the EA and when it is, it appears that negative effects are minimized without actual scientific research proof.

As well, there are the chemical sprays and as organic gardeners, we are very very concerned about the chemical sprays used to control the growth under and around the hydro towers and lines. Of course these chemicals leak into the water systems and into peoples drinking water from the wells. I understand that you leave the decision up to each individual family but if myt neighbour gives permission to the spray, we are totally affected.

This line is damaging our community, our homes and our families. This ecological disturbance Is also dangerous in terms of fire from lightening strikes and because these lines are used by recreational vehicles through all seasons the chance of reckless behaviour in terms of fires Increases.

In your EA it seems that so much is actually missing for the actual people who will be living by them. Our lives have been disrupted; we do not feel safe in our homes anymore. We look forward to your response to our concerns.

Sincerely

Dear [REDACTED]

Nobody has been displaced according to Hydro One yet we hear that some properties were purchased by Hydro One. Does that not mean residents were displaced?

With respect to the environmental assessment draft, how and what did Hydro One staff do To present in their report that less than one percent (1%) of residents will be affected?

Yours truly,

Marcia Hiro

To whom it may concern,

My name is ██████████ and I am a property owner who is directly impacted by this current Waasigan Transmission Line route. I do not want this line crossing my property. I have stated multiple times to Hydro One Networks representatives that I am not in agreement, and I am very concerned about the loss of land, the decrease in value of this land, the concerns around fire and having two HV lines in tandem, along with more required maintenance to these lines and the destruction due to development. This is a severe concern for the whole area.

No where in this Draft EA does it appear that my concerns have been addressed, they appear to be omitted completely and I will be challenging the legitimacy of this project. It is very badly done, and no community has been considered.

Best regards,

A handwritten signature in black ink, appearing to be "J. Jones", written over a horizontal line.

To Whom it may Concern,

We are community members and property owners in the Kaministiquia Community, and we have been considered not impacted because the preferred Waasigan Transmission Line route is not directly crossing our property. We feel this is not true or a proper representation of the situation. One of our major concerns that we feel has not been addressed nor properly rectified by any type of written statement by Hydro One Networks Inc. is the concern about contamination of water outside of the 500 metre Environmental Assessment. We do not believe it is a fair or true presentation of how water veins work and the potential contamination to community water sources at large due to such impactful development. The maintenance chemicals will contaminate land, vegetation and wildlife along the current and potential new High Voltage Line.

We regularly forage for wild berries, mushrooms, wild onions, and herbs. This line drastically impacts the ability to use our land and community natural resources to practice my holistic lifestyle and care for our family. We moved here to this area to live off the land and sustain our health as a family and this directly affects this. When these lines are sprayed with chemical contaminants Hydro One cannot ensure where the wind takes these toxins, or where the surface and ground water drains, and they cannot control whether animals and wildlife consume these toxins. This in turn could contaminate our family if we hunt on our property which is our right to do so. This Waasigan TLP is of great cost to the entire community, and no where in this Draft EA is this recognized. The fact that communities and the wellbeing of our family is not considered in this EA appears to have serious complications with the legitimacy of the criteria used to develop and choose the WTLP route.

We will be challenging this Environmental Assessment Draft for what has been omitted and not satisfactorily addressed or rectified.

A handwritten signature in black ink, appearing to read 'A. B. L. G. M.', is written over a horizontal line. The signature is cursive and somewhat stylized.

ATTN: Ministry of the ENVIRONMENT

RE: HYDRO ONE / WAASIGAN TRANSMISSION
LINE

ENVIRONMENT - MEANING

The surrounding or conditions in which
a PERSON, ANIMAL or PLANT Lives or
OPERATES.

Our ENVIRONMENT is going to be
impacted by this Line!!

- Groundwater will be affected. (In rural areas we rely on the water that flows in streams underground.)
- Loss of homes
- with change in the environment our neighbours mental and physical health will be affected. It is now WORRY!!
- 10% of land in North western Ontario is privately owned.
- 90% is CROWN Land.

MOVE THE LINE WHERE THE IMPACT
IS NOT FELT

[REDACTED]:

Here are our comments and questions for Hydro One Waasigan Line.

The effects of the Electro Magnetic Fields on humans and the safe distance one needs to be safe. What is the safest distance for a home owner from the line/tower.? I do not see this in addressed In the EA and when it is, it appears that negative effects are minimized without actual scientific research proof.

As well, there are the chemical sprays and as organic gardeners, we are very very concerned about the chemical sprays used to control the growth under and around the hydro towers and lines. Of course these chemicals leak into the water systems and into peoples drinking water from the wells. I understand that you leave the decision up to each individual family but if myt neighbour gives permission to the spray, we are totally affected.

This line is damaging our community, our homes and our families. This ecological disturbance Is also dangerous in terms of fire from lightening strikes and because these lines are used by recreational vehicles through all seasons the chance of reckless behaviour in terms of fires Increases.

In your EA it seems that so much is actually missing for the actual people who will be living by them. Our lives have been disrupted; we do not feel safe in our homes anymore. We look forward to your response to our concerns.

Sincerely

[REDACTED]

WAASIGAN TRANSMISSION LINE
TERMS OF REFERENCE
SITING REPORT OCTOBER 2020

2.1.2 Calibrating the Siting Model with Internal and External Input

June 2019 Corridor Workshops

The main activity held to calibrate the siting model was a three-day workshop held from June 24 to 26, 2019. The workshops were hosted by Hydro One and held in the City of Thunder Bay. Each day of the workshop was focused on a different perspective: Natural Environment, SocioEconomic, and Technical (Engineering). To plan for the workshops, following a Project introduction conference call and presentation with provincial agencies in late March 2019, Hydro One and the consulting team identified the key technical knowledge holders to be invited to the workshops to represent the draft model siting criteria list. An invitation package was prepared and distributed to invitees in May 2019 which provided a description of the Project, an outline of the workshop and its purpose, and a draft model siting criteria list. A list of invitees is provided in Table 2-1.

Table 2-1: June 2019 Workshop Invitees

<ul style="list-style-type: none"> • Canadian Nuclear Safety Commission • Canadian Pacific Railway • City of Dryden • City of Thunder Bay • Canadian National Railway • Fisheries and Oceans Canada • Fort William First Nation • Grand Council Treaty #3 • Infrastructure Ontario • Lac des Mille Lacs First Nation • Lac La Croix First Nation • Lac Seul First Nation • Lakehead Region Conservation Authority • Lakehead Roads Board • Métis Nation of Ontario – Region 1 • Métis Nation of Ontario – Region 2 • Migisi Sahgaigan (Eagle Lake First Nation) • Ministry of Agriculture, Food and Rural Affairs • Ministry of Energy, North Development and Mines • Ministry of the Environment, Conservation and Parks • Ministry of Municipal Affairs and Housing 	<ul style="list-style-type: none"> • Ministry of Natural Resources and Forestry (MNRF) • Ministry of Heritage, Sport, Tourism and Culture Industries • Ministry of Transportation Ontario • Municipality of Oliver Paipooonge • Municipality of Shuniah • Nigigoonsiminikaaning First Nation • Nuclear Waste Management Organization • Ontario Federation of Snowmobile Clubs • Ontario Mining Association • Ontario Parks • Ontario Power Generation • Red Sky Métis Independent Nation • Ojibway Nation of Saugeen • Seine River First Nation • Town of Atikokan • Township of Conmee • Township of Ignace • Township of O'Connor • TransCanada Pipelines • Union Gas • Wabigoon Lake Ojibway Nation
--	---

[Googled "Lakehead Roads Board" which is listed as an invitee and nothing specific to that organization was identified. What did get suggested was the Lakehead Rural Municipal Coalition. It is described as follows:

Representing Our And Our Neighbours' Common Interests

The Lakehead Rural Municipal Coalition (LRMC) was formed to consider issues common to the six rural communities surrounding the City of Thunder Bay. They are the Township of Conmee, Township of Gillies and Township of O'Connor, Municipality of Neebing, Municipality of Oliver Paipooonge and the Municipality of Shuniah. The Mayor or Reeve and a senior administration staff member from each municipality meet monthly to discuss issues affecting the rural municipalities and to determine courses of action.]

**Those who participated are indicated with a "P" and those who observed are indicated with an "O."*

Corridor Workshop Process Corridor Workshop session participants first reviewed the preliminary list of model siting criteria and indicators which the Project team had developed prior to the workshop. The siting criteria represent different land based features or uses in the study area. As an example, for the criterion "Slope", three indicators were identified ranging from 0% to 30% slope. The participants provided input and the list of model siting criteria was modified and confirmed. The participants then completed surveys where they ranked each criterion from 1 (best) to 9 (worst) based on the relative suitability for constructing a transmission line in proximity to these criteria/features. Most participants then completed pairwise comparisons of each group of criteria or features, to determine the relative importance of these features when siting a transmission line. This resulted in a weight being established for each criterion which is represented by a percentage. The higher the percentage, the more important that the criterion is to the participants when siting the transmission line. After the first round of input, the group discussed the results and statistically evaluated the data, reviewing the minimum, maximum, median and mean values of the group and the standard deviation. The

participants discussed the results and, at times, made a case for the group to assign importance to certain criteria differently based on their point of view. After the group discussion, the participants completed another survey and the results were reviewed by the group. The purpose of the follow-up rounds was to achieve a higher level of consensus among the participants in regards to the criteria weightings (i.e., to reduce the standard deviation of the scores). Ultimately, the average scores of the participants input from the final round is to be used in the siting model.

Extract from Table 2-6: Siting Criteria Notes (page 23)

Building Density	The Building Density layer is classified by the number of buildings per acre. The higher the density, the less suitable that location is for a potential transmission line.
Building Proximity	The Building Proximity layer considers the most suitable location for a new transmission line is beyond 1 km from a building. The least suitable areas are within 100 m of a building.
Linear Infrastructure	The Linear Infrastructure layer is characterized by two options; either the location is parallel to existing infrastructure or the location is not. The areas that are parallel to existing linear infrastructure are more suitable for a new transmission line.
Non-Indigenous Known Cultural Resources	The Non-Indigenous Known Cultural Resources layer considers cultural resources that have been identified from non-indigenous sources.
Landscape Character (Visual Sensitivity)	The Landscape Character (Visual Sensitivity) layer is a weighted average of the following visual indices: Commercial Outpost Camps (6.7), Remote Campsite (7.1), Residential Land (7.7), Canoe Routes/Trails (7.7), Restricted Access Lakes (5.5), Known Cultural Resources (7.6), Resort Lodges and Campgrounds (8.1), and Cottage Areas (9). A visual analysis was performed on each of these features and normalized on a value of 1 to 9 with 9 being the most visible and 1 is not visible. The visual indices were then combined using a weighted average. Any location on the map that was beyond 5.6 km is judged to be beyond a visual impact for this analysis
Biodiversity Gap Analysis	A Biodiversity Gap Analysis layer is utilized in the Natural Perspective to analyze the probability of each area to have a good representation of biodiversity as opposed to poor representation. Areas with a good representation are considered less suitable. The biodiversity gap analysis was performed by MNRF
Wildlife Connectivity Index	The Wildlife Connectivity Index layer resulted from the analysis of areas to determine the probability of wildlife utilization. The lower the connectivity, the less likely the wildlife will utilize the location and the higher the connectivity the more likely wildlife will use that location. Areas with higher the connectivity are considered less suitable for a transmission line. The index was created by MNRF
Linear Infrastructure	The Linear Infrastructure layer considers co-locating with roads, railroads, pipelines, provincial highways, and transmission lines. Least suitable are locations where there is no opportunity to parallel existing linear infrastructure. Areas parallel to existing transmission lines are considered the most suitable areas within this layer.
Spannable Waterbodies	The Spannable Waterbodies layer categorizes waterbodies based on the distance it would take for a transmission line to span them. This layer

	assumes a standard structure span would be 330 m and a specialty structure can span 420 m. Waterbodies that span further than 420 m would fall into the "Non Spannable Waterbodies" category. These are the least suitable locations for a transmission line. The most suitable location is an area without waterbodies. The Spannable Waterbodies layer categorizes waterbodies based on the distance it would take for a transmission line to span them. This layer assumes a standard structure span would be 330 m and a specialty structure can span 420 m. Waterbodies that span further than 420 m would fall into the "Non Spannable Waterbodies" category. These are the least suitable locations for a transmission line. The most suitable location is an area without waterbodies.
--	--

Page 28

2.4 Identification of Alternative Routes 2.4 Identification of Alternative Routes

... To characterize the preliminary alternative routes, it was assumed that, for modelling purposes, an average 45 m ROW would be required for a greenfield route and an average 40 m ROW when paralleling an existing transmission line would be required.

Decisions related to identifying alternative routes were based on a variety of factors, including consultation, input and data received during the Corridor Workshops (e.g., overwhelming consensus to co-locate with existing similar infrastructure in the area in all three perspectives), the general character of the area (e.g., land use and location of sensitive features), the type and location of existing, previously disturbed ROWs that could potentially be paralleled (e.g., many are located very close to each other thus not providing any material difference), and a preference for co-location with existing infrastructure when possible, as outlined in the PPS (2020). Also considered in alternative route identification (and to be further considered during the EA, as warranted), as referenced in the Code of Practice: Preparing and Reviewing Terms of Reference for Environmental Assessments in Ontario (MECP, 2014), were the following screening criteria:

Do they provide a viable solution to the problem or opportunity to be addressed?

Are they proven technologies?

Are they technically feasible?

Are they consistent with other relevant planning objectives, policies and decisions (e.g., PPS)?

Are they consistent with provincial government priority initiatives (e.g., waste diversion, energy efficiency, source water protection, reducing greenhouse gas emissions)?

Could they affect any sensitive environmental features (e.g., provincially significant wetlands, prime agricultural area, endangered species habitat, floodplains, archaeological resources, built heritage resources or cultural heritage landscapes)?

Are they practical, financially realistic and economically viable?

Are they within the ability of the proponent to implement?

Can they be implemented within the study area?

Are they appropriate to the proponent doing the study?

Are they able to meet the purpose of the EA Act?

Page 30

Table 2-7: General Routing Selection Considerations

Factor	Rule
Natural	<p>Minimize potential disturbance to significant natural features (e.g., Areas of Natural and Scientific Interest [ANSIs], species at risk [SAR], SAR habitat, environmentally sensitive areas, wetlands, waterbodies, Significant Wildlife Habitat), critical Landform/Vegetation types and adhere to appropriate setback requirements. Minimize potential disturbance to significant natural features (e.g., ANSIs, SAR, environmentally sensitive areas, wetlands and waterbodies), critical Landform/Vegetation types and adhere to appropriate setback requirements.</p> <p>Minimize watercourse crossings and reduce potential for effects to woodlands, wetlands, fish and wildlife habitats, and natural areas. Minimize use of areas with unstable slopes</p>
SocioEconomic	<p>Maximize the distance from cultural heritage resources (i.e., archaeological, built heritage resources and cultural heritage landscapes).</p> <p>Minimize incompatibility with existing sensitive land uses (e.g., First Nation reserves, residences and built-up areas, agricultural lands, forest management areas, mining claims).</p> <p>Minimize the use of private properties (e.g., use of existing ROW is favoured to minimize disruption to property owners, primarily dwellings).</p> <p>Minimize potential disturbance to adjacent residences (and known traditional lands) which may be affected by construction activities.</p> <p>Minimize potential disturbance to adjacent commercial and industrial properties which may be affected by construction activities.</p> <p>Minimize potential disturbance to adjacent institutional and recreational properties which may be affected by construction activities, including tourism areas.</p> <p>Maximize conformity with local land use policy. Minimize potential disruption to local traffic.</p> <p>Minimize potential effects to water wells, aquifer recharge areas and active mining/aggregate operations. Technical Find the shortest and most direct routes.</p> <p>Minimize rail and road crossings.</p> <p>Minimize use of areas with an insufficient amount of construction work space or uneven terrain.</p>
Technical	<p>Minimize the number of overhead transmission line crossings.</p> <p>Maximize use of existing roads and infrastructure corridors (where appropriate) in order to minimize potential environmental effects.</p>

	Select the best topographical/terrain areas for the route (dry, flat and stable ground is favourable).
Indigenous	Minimize effects to traditional use of land and resources. Minimize potential disturbance to cultural and/or spiritual areas and sites. Minimize potential disturbance to landscapes of importance.

EPRI-GTC Overhead Electric Transmission Line Siting Methodology 2019 Update

EPRI-GTC Overhead Electric Transmission Line Siting Methodology 2019 Update

2019 TECHNICAL REPORT

Natural Environment Perspective Stakeholder Summary

The stakeholders put the greatest weight on the public lands and conservation areas data layer, emphasizing the importance of these areas. In addition, they gave more protection to the features in the streams/wetlands and public lands and conservation areas data layers. They recalibrated developed land in the land cover data layer, making it more preferable than areas with agricultural activities.

Questions for the Natural Environment Sensitivity Testing

- Does the increased emphasis on streams/wetlands and public lands and conservation areas give them greater protection?
- Does the recalibration of the developed land feature in the land cover data layer serve to make this land use more preferable compared with agricultural areas?

Engineering Requirements Perspective Stakeholders

The engineering requirements perspective stakeholders consisted of individuals representing transmission planners from GTC, Georgia Power Company (GPC), and the Southern Company. Planners from the Georgia Department of Transportation, Norfolk Southern Railroad, and Colonial Pipeline also participated. Dr. Paul Zwick, Chair of the Urban and Regional Planning Department at the University of Florida, facilitated this session.

Review of Engineering Data Layers

The stakeholders reviewed and discussed each of the three data layers (linear infrastructure, slope, and intensive agriculture) to determine if changes or additions to the layers were desirable. They did not recommend alterations to the number or type of data layers. However, in the linear infrastructure data layer, the concept of co-location with existing infrastructure was the subject of intense discussion. Some stakeholders considered co-locating with roads, pipelines, and railroads as an opportunity to minimize impacts to the built and natural environment. Others saw co-location as a constraint, citing difficulties in acquiring easements or permits when paralleling roads, highways, railroads, or pipelines. Additionally, the issue of co-locating with existing transmission lines was debated. While some stakeholders argued that co-location with other transmission lines reduced acquisition costs and minimized impacts to property owners, others cited transmission system planning concerns, including:

- Co-locating multiple transmission lines in a common corridor puts the electrical grid at an increased risk if an electrical or weather-related disruption occurs. This risk increases when co-locating multiple transmission lines of critical importance within a common corridor.
- Difficulty in working on routine or emergency maintenance projects while in close proximity to other energized facilities.
