Re: Transmission Line Upgrade from Essa Transformer Station to Barrie Transformer Station in the Township of Springwater and City of Barrie

Dear Chief Mary McCue-King,

I am writing to provide you with information on a project that Hydro One Networks Inc. (Hydro One) is planning in your community. A Class Environmental Assessment (EA) will be initiated to upgrade the transmission lines and tower structures between Essa Transformer Station (TS), located at 2182 Sunnidale Road Utopia, and Barrie TS, located at 306 Tiffin Street Barrie, as shown on the enclosed map. This project is required to replace equipment that has reached its end of life as well as to provide additional capacity to address the region's forecasted increase in electricity demand.

The project will involve the replacement of the two existing 115 Kilovolt (kV) single-circuit transmission lines and wooden frame structures with new, double circuit 230 kV lines and steel lattice structures along the transmission corridor. One of the existing 115 kV single circuit transmission lines will be maintained as a temporary line by-pass and removed following construction of the new line.

In addition, Barrie TS will need to be expanded within Hydro One owned property and upgraded from a 115 kV to a 230 kV station. Equipment upgrades and refurbishment work will also be undertaken at Essa TS.

This project is being planned in accordance with the "Class Environmental Assessment for Minor Transmission Facilities" document, an approved planning process under the *Ontario Environmental Assessment Act*. The Class EA was developed as a streamlined process to ensure that minor transmission projects that have a predictable range of effects are planned and carried out in an environmentally acceptable manner.

Hydro One also requires approval from the Ontario Energy Board under Section 92 of the *Ontario Energy Board Act* and, contingent on the outcome of the environmental and regulatory approvals, construction could begin as early as 2018.

We welcome your comments and feedback regarding this project. If you are interested, we would be pleased to arrange a meeting to gather your input and discuss project details. If you would like to meet please let us know and we will arrange as soon as

possible. Should there be any update to the project information provided, I will ensure you are promptly informed.

If you have any questions, or would like additional information regarding this project, please contact Sarah Cohanin, Environmental Planner at 416-345-4385 or sarah.cohanin@HydroOne.com.

Dear «First_Name» «Last_Name»,

Hydro One Networks Inc. (Hydro One) has initiated a Class Environmental Assessment (EA) to upgrade the transmission lines and structures between Essa Transformer Station (TS) and Barrie TS, as shown on the enclosed map. This project is required to replace equipment that is reaching its end of life and to meet the area's growing electricity demand.

The proposed undertaking will involve replacing the two existing 115 kilovolt (kV) single-circuit transmission lines and wooden frame structures with a new, double-circuit 230 kV line and steel structures along the existing transmission corridor. Barrie TS will be expanded within Hydro One owned property and upgraded from a 115 kV to a 230 kV station. Equipment upgrades and refurbishment work will also be undertaken at Essa TS.

One of the existing 115 kV single-circuit transmission lines will be maintained as a temporary bypass and will be removed following construction of the new line.

This project is being planned in accordance with the "Class Environmental Assessment for Minor Transmission Facilities" (Class EA; Ontario Hydro, 1992), an approved planning process under the Ontario *Environmental Assessment Act*. The Class EA was developed as a streamlined process to ensure that minor transmission projects that have a predictable range of effects are planned and carried out in an environmentally acceptable manner. Hydro One will also require approval from the Ontario Energy Board under Section 92 of the *Ontario Energy Board Act*. Contingent on the outcome of the environmental and regulatory approvals, construction could begin as early as 2018.

Public Information Centres (PICs) are scheduled for January 31 and February 1, 2017 in the City of Barrie and Township of Springwater, respectively. The purpose of these PICs is to provide interested parties and groups with the opportunity to learn more about the project and the Class EA process, as well as provide feedback and discuss any questions or concerns with our project team. Please see the enclosed newspaper ad for additional details regarding the upcoming PICs.

If you have any questions or would like additional information regarding this project, please contact me at 416-345-4385 or Sarah.Cohanim@HydroOne.com. Information and updates regarding this project are also available on our website at www.HydroOne/Projects/BarrieAreaUpgrade.

Sincerely,

Sarah Cohanim, Environmental Planner
Environmental Engineering and Project Support

NOTICE OF COMMENCEMENT AND INVITATION TO PUBLIC INFORMATION CENTRES

Class Environmental Assessment for the Barrie Area Transmission Upgrade

Hydro One Networks Inc. (Hydro One) is initiating a Class Environmental Assessment (Class EA) to upgrade the aging transmission lines and structures between Essa Transformer Station (TS), located in the Township of Springwater, and Barrie TS, located in the City of Barrie, as shown on the map. This project is required to meet the growing demand for electricity in the Barrie area.

Hydro One is proposing to replace the two existing single-circuit 115 kilovolt (kV) transmission lines and wooden frame structures with a new, two-circuit 230 kV transmission line on steel structures along the current transmission corridor.

As part of this project, Barrie TS would be expanded within Hydro One owned property and the station equipment upgraded from 115 kV to 230 kV. Equipment upgrades and refurbishment work would also be undertaken at Essa TS within the existing station footprint.

PROJECT APPROVAL REQUIREMENTS

This project is subject to the provincial *Environmental Assessment Act* and is being planned in accordance with the *Class Environmental Assessment for Minor Transmission Facilities 1992* process. Approval from the Ontario Energy Board (OEB) under Section 92 of the *Ontario Energy Board Act, 1998* is also required.

Contingent on the completion of the Class EA and OEB approval, construction could begin as early as 2018.

WE WANT TO HEAR FROM YOU

The Class EA process provides opportunities for public and stakeholder consultation and your feedback is very important to us.

Please join us on the following dates:

Tuesday, January 31, 2017

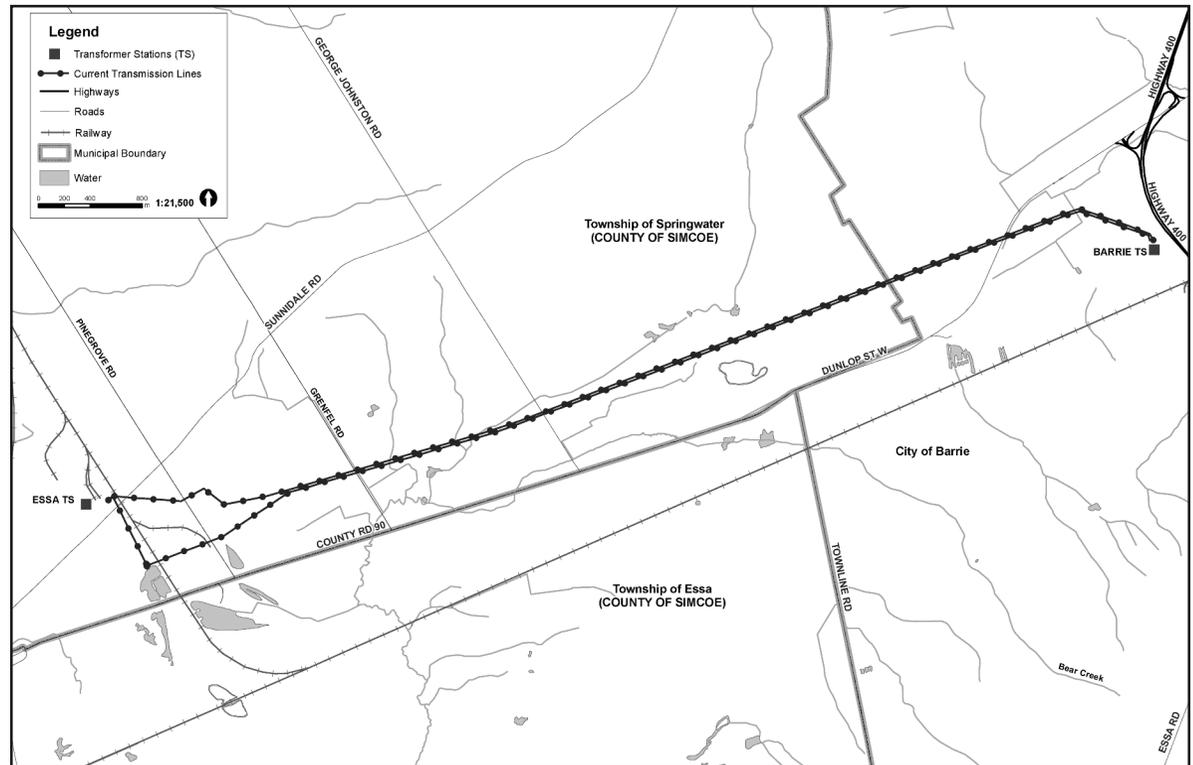

5:00 p.m. – 8:00 p.m.

Lampman Lane Community Centre
59 Lampman Lane, Barrie

Wednesday, February 1, 2017

5:00 p.m. – 8:00 p.m.

Grenfel Community Centre
1989 Sunnidale Road
Township of Springwater

Partners in Powerful Communities

Learn more about the Barrie Area Transmission Upgrade project.

Dear Neighbour:

Hydro One is planning to upgrade the transmission lines and structures between Essa Transformer Station (TS), located at 2182 Sunnidale Road, Utopia, and Barrie TS, located at 306 Tiffin Street, Barrie, (please see map on reverse). This project is required to replace equipment that is reaching its end of life and to meet the area's growing demand.

The project will involve replacing the two existing 115 kilovolt (kV) single-circuit transmission lines and wooden frame structures with a new, double circuit 230 kV line and steel structures along the existing transmission corridor.

In addition, Barrie TS will be expanded within Hydro One owned property and upgraded from a 115 kV to a 230 kV station. Upgrades and refurbishment work will also be undertaken at Essa TS.

This project is being planned in accordance with the *Class Environmental Assessment (EA) for Minor Transmission Facilities*, an approved planning process under Ontario's *Environmental Assessment Act*. The Class EA was developed as a streamlined process to ensure that minor transmission projects that have a predictable range of effects are planned and carried out in an environmentally acceptable manner. Hydro One will also require approval from the Ontario Energy Board.

Contingent on the completion of the Class EA and regulatory approval, construction could begin as early as 2018. Your local electricity service will not be interrupted as a result of this work.

Public input and feedback is an important part of the planning process and we want to hear from you. Please join us at one of our upcoming Public Information Centres to learn more about the proposed work in your community:

Tuesday, January 31, 2017
5:00 p.m. – 8:00 p.m.
Lampman Lane Community Centre
59 Lampman Lane, Barrie

Wednesday, February 1, 2017
5:00 p.m. – 8:00 p.m.
Grenfel Community Centre
1989 Sunnidale Road, Grenfel, Township of Springwater

Butler, Kyal

From: COMMUNITY Relations
Sent: January 16, 2017 10:25 AM
Subject: Barrie Area Transmission Upgrade Project
Attachments: Barrie Area Resident Notification Jan 2017.pdf

Hello,

Hydro One is planning to upgrade and replace the aging transmission infrastructure from Barrie Transformer Station to Essa Transformer Station, which is located in the Township of Springwater. The attached notification outlines more detail about the project and includes a map to illustrate the proposed project area.

Information is also available at www.hydroone.com/Projects/BarrieAreaUpgrade

We will be hosting Public Information Centres on January 31 in Barrie and February 1 in Springwater. I would like to personally invite you to attend our Public Information Centres to learn more about the project and meet our team. Please pass on this invitation to anyone that may be interested in learning more about this project.

Thank you and please contact me on 1-877-345-6799 if you have any questions or would like more information.

Kindest regards,

Kyal.

APPENDIX A-3: Correspondence Log

Correspondence with First Nations Communities

First Nations and Métis Communities

Date	Communication Method	Event Name	Stakeholder Contact(s)	Project Team Member(s)	Communication Summary
First Nations & Métis Community					
Beausoleil First Nation					
October 6, 2016	Email - Outgoing	Notice of Commencement	Chief Mary McCue-King	Brian McCormick (Hydro One Networks)	Class EA Notice of Commencement sent to Beausoleil First Nation.
January 13, 2016	Email - Outgoing	PIC Information/Meeting Offer	Chief Mary McCue-King	Sarah Cohanim (Hydro One Networks)	Hydro One provided an update on the project and information on the upcoming PICs. An offer was provided to have Hydro One hold a PIC in their community.
January 20, 2017	Phone Call - Outgoing	Notice of Commencement	Joanne Sandy, Chief Councillor	Sarah Cohanim (Hydro One Networks)	Hydro One spoke to Chief Councillor and offered to present project information to the community. Chief Councillor recommended to send the information to the Chief's administrative assistant and provided their email information.
January 20, 2017	Email - Outgoing	Notice of Commencement	Joanne Sandy, Chief Councillor	Sarah Cohanim (Hydro One Networks)	Email to follow-up on Notice of Commencement Letter was received by Chief Councillor who forwarded to the appropriate contacts.
January 25, 2017	Email - Incoming	Notice of Commencement	Susan Copegog, Lands Consultation Liaison	Sarah Cohanim (Hydro One Networks)	Lands Consultation Liaison sent response to Notice of Commencement Letter. Response letter requested a copy of the EA document to be sent for review, and to advise of any archaeological issues immediately.
Chippewas of Georgina Island					
October 6, 2016	Email - Outgoing	Notice of Commencement	Chief Donna Big Canoe	Brian McCormick (Hydro One Networks)	Class EA Notice of Commencement sent to Chippewas of Georgina Island.
October 18, 2016	Email - Incoming	Notice of Commencement	Natasha Charles, Project Consultant	Sarah Cohanim (Hydro One Networks)	Confirmed receipt of the notice and project information. Indicated the First Nation has no comments presently but would like to continue to receive information on the project and be notified if any First Nation has an objection to the project.
January 13, 2017	Email - Outgoing	PIC Information/Meeting Offer	Chief Donna Big Canoe; Natasha Charles, Project Consultant	Sarah Cohanim (Hydro One Networks)	Hydro One provided an update on the project and information on the upcoming PICs. An offer was provided to have Hydro One hold a PIC in their community.
Chippewas of Rama First Nation					
October 6, 2016	Email - Outgoing	Notice of Commencement	Chief Rodney Noganosh (Chippewas of Rama First Nation)	Brian McCormick (Hydro One Networks)	Class EA Notice of Commencement sent to Chippewas of Rama First Nation.
October 12, 2016	Email - Incoming	Notice of Commencement	Chief Rodney Noganosh (Chippewas of Rama First Nation)	Sarah Cohanim (Hydro One Networks)	Chippewas of Rama First Nation thanked Hydro One for the letter. They advised that letter was shared with Council and has been forwarded to Williams Treaties First Nation Process Co-ordinator/Negotiator who will review the letter and take the necessary action, if required.
January 13, 2017	Email - Outgoing	Notice of Commencement	Karry Sandy McKenzie, Williams Treaties First Nation Process Co-ordinator/Negotiator	Sarah Cohanim (Hydro One Networks)	Hydro One provided an update on the project and information on the upcoming PICs. An offer was provided to have Hydro One hold a PIC in their community.
January 24, 2017	Phone Call - Outgoing	Non-Event Communication	Karry Sandy McKenzie, Williams Treaties First Nation Process Co-ordinator/Negotiator	Sarah Cohanim (Hydro One Networks)	Hydro One phoned Williams Treaties First Nation Process Co-ordinator/Negotiator. A voicemail was left introducing the Environmental Planner, and indicated that they would be happy to meet with the Chief and Council and community members to provide project information and answer any questions they have.
February 21, 2017	Email - Outgoing	Non-Event Communication	Chief Rodney Noganosh (Chippewas of Rama First Nation)	Sarah Cohanim (Hydro One Networks)	Hydro One left a voicemail and followed up with an e-mail requesting available dates for Chippewas of Rama to meet with Hydro One to discuss the project.
March 14, 2017	Email - Outgoing	Non-Event Communication	Williams Treaties First Nation Process Co-ordinator/Negotiator	Sarah Cohanim (Hydro One Networks)	Hydro One followed up to schedule a meeting with the Chippewas of Rama to discuss the project.
April 7, 2017	Email - Outgoing	Non-Event Communication	Chief Rodney Noganosh (Chippewas of Rama First Nation)	Sarah Cohanim (Hydro One Networks)	Hydro One contacted the Chief to inform that no response had been received with respect to Hydro One's offer to meet with the community and discuss the project, and that Hydro One is available to provide an update on the project.
April 7, 2017	Email - Incoming	Non-Event Communication	Karry Sandy McKenzie, Williams Treaties First Nation Process Co-ordinator/Negotiator	Sara Jane Souliere (Hydro One Networks), Daniel Charbonneau (Hydro One Networks), Sarah Cohanim (Hydro One Networks)	Williams Treaties First Nation Process Co-ordinator/Negotiator indicated that a response was sent to Hydro One previously, stating that the Chippewas of Rama First Nation does not have any concerns at this time and does not require a community meeting on this matter. The earlier response was not received by Hydro One.

Barrie Area Transmission Upgrade - Draft Environmental Study Report

Date	Communication Method	Event Name	Stakeholder Contact(s)	Project Team Member(s)	Communication Summary
Huron-Wendat					
October 6, 2016	Email - Outgoing	Notice of Commencement	Chief Line Gros-Louis (Huron-Wendat)	Brian McCormick (Hydro One Networks)	Class EA Notice of Commencement sent to the Huron-Wendat.
October 7, 2016	Email - Outgoing	Notice of Commencement	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Brian McCormick (Hydro One Networks)	Class EA Notice of Commencement sent to the Huron-Wendat.
October 13, 2016	Email - Incoming	Notice of Commencement	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Project Coordinator - Ontario responded to the initial notification letter indicating that the Huron-Wendat would like to know if any archaeological assessments had been conducted yet for the project.
October 18, 2016	Email – Outgoing	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Hydro One indicated that a Stage 1 Archaeological Assessment for the project was completed and a Stage 2 archaeological assessment would be scheduled for late 2017.
October 18, 2016	Email – Incoming	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Huron-Wendat requested a copy of the Stage 1 archaeological assessment report.
November 3, 2016	Email – Outgoing	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Hydro One indicated that the Stage 1 archeological assessment report was not yet finalized but a copy of the report would be project once finalized.
November 3, 2016	Email – Incoming	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	The Huron-Wendat confirmed interest in having a monitor onsite during the Stage 2 archaeological assessment.
January 13, 2017	Email – Outgoing	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Hydro One provided an update on the project and information on the upcoming PICs. An offer was provided to have Hydro One hold a PIC in their community. An electronic copy of the Stage 1 archeological assessment report was also provided.
April 25, 2017	Email – Outgoing	Non-Event Communication	Maxime Picard, Project Coordinator - Ontario (Huron-Wendat)	Sarah Cohanin (Hydro One Networks)	Hydro One provided an update on the Stage 2 archaeological assessment in order to begin coordination of having a monitor from the Huron-Wendat onsite during the assessment.

City of Barrie					
Mayor & Council and Administration					
October 17, 2016	Email - Outgoing	Notice of Commencement	Jeff Lehman (Mayor) & Council	Kyal Butler (Hydro One Networks)	Hydro One sent Mayor and Council an introduction to the project. Requested to include this project in the agenda for the next Council meeting.
October 26, 2016	Phone Call - Outgoing	Notice of Commencement	Jeff Lehman (Mayor)	Kyal Butler (Hydro One Networks)	Hydro One followed-up with the Mayor directly via phone. He did not want to meet in person at that time. He did want to know how much taller the towers will be to the existing H frames. Hydro One explained that the tower height would be determined in the design phase.
October 26, 2016	Phone Call - Outgoing	Notice of Commencement	Peter Silveira (Councillor-Ward 5)	Kyal Butler (Hydro One Networks)	Follow up on Notice of Commencement Letter and invitation to PICs.
October 27, 2016	Email - Outgoing	Notice of Commencement	Jeff Lehman (Mayor)	Kyal Butler (Hydro One Networks)	Hydro One informed the Mayor that they will notify local residents surrounding the project area in early November and provided information on the PICs. Hydro One would forward copies of notification to the Mayor's office as well.
November 1, 2016	Phone Call - Outgoing	Notice of Commencement	Peter Silveira (Councillor-Ward 5)	Kyal Butler (Hydro One Networks)	Discussed the project and advised of the PIC. Hydro One offered to meet to discuss the project further.
November 1, 2016	Email - Outgoing	Notice of Commencement	Peter Silveira (Councillor-Ward 5)	Kyal Butler (Hydro One Networks)	After speaking on the phone, Hydro One emailed project and PIC information. Hydro One explained they would be notifying local residents and advertise the project and PIC information in the Barrie Examiner.
December 6, 2016	Email - Outgoing	Non-Event Communication	Jeff Lehman (Mayor) & Council	Kyal Butler (Hydro One Networks)	Hydro One provided an e-mail update on the project and notified that the PICs would be delayed from the earlier communicated date.
January 10, 2017	Email - Outgoing	Notice of Commencement & Invitation to PIC	Mayor, CAO, Clerk, and Councillor-Ward 5	Kyal Butler (Hydro One Networks)	Hydro One sent update e-mail with the Notice of Commencement ad that was places in the newspapers and an invitation to the PIC.
January 12, 2017	Email - Outgoing	Notice of Commencement & Invitation to PIC	Peter Silveira (Councillor-Ward 5)	Kyal Butler (Hydro One Networks)	Hydro One sent follow-up e-mail regarding invitation to PIC.
January 24, 2017	Phone Call - Outgoing	Invitation to PIC	Deborah Ferrier (CAO)	Kyal Butler (Hydro One Networks)	Phoned and spoke with CAO Executive Assistant.
January 24, 2017	Email - Outgoing	Notice of Commencement	Deborah Ferrier (CAO)	Kyal Butler (Hydro One Networks)	E-mail was sent to follow up with the City regarding whether they would like to meet with the project team to discuss the project. A reminder of the PICs and the flyer with the PIC details was also provided.
January 25, 2017	Email - Incoming	Non-Event Communication	Deborah Ferrier (CAO)	Kyal Butler (Hydro One Networks)	CAO Executive Assistant advised Hydro One that the project information was shared with the Engineering Department's management and they will be contacting Hydro One directly to coordinate a meeting.

January 13, 2017	Email - Outgoing	Notice of Commencement	Stephen Naylor (City of Barrie), Eric Hodgins (City of Barrie), Kathy Brislin (City of Barrie), Kevin Rankin (City of Barrie)	Sarah Cohanim (Hydro One Networks)	Notice of Commencement and invitation to PICs sent.
February 13, 2017	Email - Incoming	Non-Event Communication	Brett Gratrix (City of Barrie)	Kyal Butler (Hydro One Networks)	Infrastructure Project Engineer provided City-identified road widening project in the vicinity of the project area.
February 17, 2017	In-Person / Face-To-Face	Non-Event Communication	Brett Gratrix (City of Barrie)	Dima Ostrovsky (Hydro One Networks)	Hydro One Project Manager met with the Infrastructure Project Engineer regarding the project. Hydro One confirmed that they would coordinate the work with the City's road widening project and Hydro One will repair any damage or modification made to access the Hydro One corridor, to the City's specifications.
November 6, 2017	Email - Outgoing	Non-Event Communication	Andrea Bourrie (City of Barrie)	Sarah Cohanim (Hydro One Networks)	Hydro One emailed the Director of Planning & Building Services to provide an update on the project and offer to meet with their department if they were interested.
November 6, 2017	Email - Incoming	Non-Event Communication	Andrea Bourrie (City of Barrie)	Sarah Cohanim (Hydro One Networks)	Director, Planning & Building Services confirmed that they would be interested in meeting with Hydro One to get further information on the project.
Township of Springwater					
Mayor & Council and Administration					
October 17, 2016	Email - Outgoing	Notice of Commencement	Bill French (Mayor) & Council	Kyal Butler (Hydro One Networks)	Hydro One sent Mayor and Council an introduction to the project. Requested to include this project in the agenda for the next Council meeting.
October 17, 2016	Email - Outgoing	Notice of Commencement	Renee Chaperon (Clerk)	Kyal Butler (Hydro One Networks)	Hydro One forwarded the email which was sent to Mayor and Council.
October 26, 2016	Phone Call - Outgoing	Notice of Commencement	Sandy McConkey (Councillor - Ward 4)	Kyal Butler (Hydro One Networks)	Hydro One offered a meeting with the Councillor. Councillor confirmed they would be available for a meeting and suggested that Hydro One publish their project notifications in the Springwater News.
October 26, 2016	Email - Outgoing	Notice of Commencement	Sandy McConkey (Councillor - Ward 4)	Kyal Butler (Hydro One Networks)	E-mail to follow-up on the phone conversation earlier that day providing the notice that was sent to Mayor and Council on October 17, 2016.
October 26, 2016	Phone Call - Outgoing	Notice of Commencement	Bill French (Mayor)	Kyal Butler (Hydro One Networks)	Hydro One spoke to the Mayor who indicated that he did not need a private meeting. Requested detailed mapping to be available at the PIC.
October 26, 2016	Email - Outgoing	Notice of Commencement	Bill French (Mayor)	Kyal Butler (Hydro One Networks)	Thanked Mayor French for his feedback on the detailed map and informed the Mayor that Hydro One will ensure the visuals are available for PIC.
November 10, 2016	Phone Call - Incoming	Notice of Commencement	Robert Brindley (CAO)	Kyal Butler (Hydro One Networks)	CAO recommended newspapers to advertise the Notice of Commencement and PICs. Hydro One confirmed they would be advertising in the Barrie Examiner and Barrie Advance.
December 6, 2016	Email - Outgoing	Non-Event Communication	Bill French (Mayor)	Kyal Butler (Hydro One Networks)	Hydro One provided an e-mail update on the project and notified that the PICs would be delayed from the earlier communicated date.
January 10, 2017	Email - Outgoing	Notice of Commencement & Invitation to PIC	Mayor, CAO, Clerk, and Councillor - Ward 4	Kyal Butler (Hydro One Networks)	Hydro One sent update e-mail with invitation to PIC to Mayor, CAO, Clerk, and Affected Councillors.
January 12, 2017	Email - Outgoing	Notice of Commencement & Invitation to PIC	Sandy McConkey (Councillor - Ward 4)	Kyal Butler (Hydro One Networks)	Hydro One sent an e-mail inviting Councillor to the PIC and extended an invitation to meet.

Date	Communication Method	Event Name	Stakeholder Contact(s)	Project Team Member(s)	Communication Summary
January 25, 2017	Email - Outgoing	Non-Event Communication	Jeff Schmidt (Acting CAO)	Kyal Butler (Hydro One Networks)	Email from Hydro One to explain that the project will entail the use of the existing transmission corridor and no new property expansion should be required. The project does include plans to replace the current two rows of side-by-side wooden structures with one row of upgraded steel structures to reduce the footprint on the ground.
February 1, 2017	In-Person / Face-To-Face	Non-Event Communication	Sandy McConkey (Councillor - Ward 4); Jeff Schmidt (Acting CAO)	Kyal Butler (Hydro One Networks), Sarah Cohanim (Hydro One Networks), Farah El Ayoubi (Hydro One Networks), Dima Ostrovsky (Hydro One Networks)	Discussion regarding project and new towers.

Lake Simcoe Region Conservation Authority					
January 13, 2017	Email - Outgoing	Notice of Commencement	Charles Burgess (LSRCA)	Sarah Cohanim (Hydro One Networks)	Notice of Commencement and invitation to PICs sent.
January 26, 2017	Email - Outgoing	Notice of Commencement	Charles Burgess (LSRCA)	Sarah Cohanim (Hydro One Networks)	Confirmed receipt of the Notice of Commencement and provided contact information for the Development Planner who would be Hydro One's contact on this project.
January 26, 2017	Email - Outgoing	Notice of Commencement	Lisa-Beth Bulford (LSRCA)	Sarah Cohanim (Hydro One Networks)	Hydro One sent project notification information, including notification letter, project area map, and invitation to PIC. Hydro One indicated that LSRCA could also call should there be any further questions, and to discuss further.
February 17, 2017	Email - Outgoing	Notice of Commencement	Lisa-Beth Bulford (LSRCA)	Sarah Cohanim (Hydro One Networks)	LSRCA responded to the Notice of Commencement letter. Their response indicated that the transmission line crosses some wetlands, woodland, Dyments Creek, and that it is part of a floodplain. It also identified a portion of Highly Vulnerable Aquifer and/or a Wellhead Protection Area within the study area.
August 30, 2017	Email - Outgoing	Non-Event Communication	Lisa-Beth Bulford (LSRCA)	Sarah Cohanim (Hydro One Networks)	Hydro One provided an update to the LSRCA on the project.
Nottawasaga Valley Conservation Authority					
January 13, 2017	Email - Outgoing	Notice of Commencement	Chris Hibberd (NVCA)	Sarah Cohanim (Hydro One Networks)	Notice of Commencement and invitation to PICs sent.
January 25, 2016	Phone Call - Outgoing	Notice of Commencement	Chris Hibberd (NVCA)	Sarah Cohanim (Hydro One Networks)	Hydro One called NVCA to follow-up on the project information that was sent, confirm it reached the correct person, and see if they would like to have a face to face meeting to discuss the project in detail. NVCA acknowledged that the study area crosses a lot of natural hazard areas, and wetlands. He committed to providing a review and will meet with his ecologists and engineer to discuss.
January 25, 2016	Email - Outgoing	Non-Event Communication	Chris Hibberd (NVCA)	Sarah Cohanim (Hydro One Networks)	Hydro One followed up the phone conversation by providing the link to the project website.
February 27, 2017	In-Person / Face-To-Face	Non-Event Communication	Logan Juffermans (NVCA)	Sarah Cohanim (Hydro One Networks), Farah El Ayoubi (Hydro One Networks), Stew Morton (Hydro One Networks), Dima Ostrovsky (Hydro One Networks)	Project Introduction Meeting. Purpose of the meeting was to introduce the project and project need, discuss plan for natural environment surveys, provide details on construction methods, and gather any information, input, and feedback from NVCA pertaining to the project.
February 27, 2017	Email - Incoming	Non-Event Communication	Logan Juffermans (NVCA), Dave Featherstone (NVCA)	Sarah Cohanim (Hydro One Networks)	NVCA confirmed the natural features in the project area. Also recommended contacting MNRF regarding any studies pertaining to the wetland in the area.
August 30, 2017	Email - Outgoing	Non-Event Communication	Logan Juffermans (NVCA)	Sarah Cohanim (Hydro One Networks)	Hydro One provided an update to the NVCA on the project.

January 19, 2017 January 26, 2017	Newspaper	Notice of Commencement	Notice of Commencement and PIC Invitation published in the Newspaper.	-	Published in Barrie Examiner and Barrie Advance (January 13 and 19) Published in Springwater News (January 26)
January 31, 2017	In Person/Face-to-Face	Public Information Centre	All Interested Persons	Kyal Butler (Hydro One Networks), Sarah Cohanim (Hydro One Networks), Farah El Ayoubi (Hydro One Networks), Dima Ostrovsky (Hydro One Networks), Marilena DiGiuseppe (Arcadis)	Hydro One hosted a PIC at the Lampman Lane Community Centre in the City of Barrie to provide information about the project and gather input from the public.
January 31, 2017	Survey/Questionnaire	Public Information Centre	Member of the Public/Local Property Owner	-	Completed comment form at Barrie PIC. Found PIC helpful in understanding the transmission upgrade project, and adequate opportunity to express views to Hydro One's project team. Had no particular comments, questions or concerns regarding the project.
January 31, 2017	Survey/Questionnaire	Public Information Centre	Member of the Public/Local Property Owner	-	Completed comment sheet at PIC in Barrie. Had concerns regarding EMF and property values. Hydro One team member later contacted stakeholder via telephone to discuss concerns.
February 1, 2017	In Person/Face-to-Face	Public Information Centre	All Interested Persons	Kyal Butler (Hydro One Networks), Sarah Cohanim (Hydro One Networks), Farah El Ayoubi (Hydro One Networks), Dima Ostrovsky (Hydro One Networks)	Hydro One hosted a PIC at the Grenfel Community Centre in the Township of Springwater to provide information about the project and gather input from the public.
February 23, 2017	Phone Call - Outgoing	Public Information Centre	Member of the Public/Local Property Owner	Kyal Butler (Hydro One Networks), Jason Hoffman (Hydro One Networks)	Attended PIC and provided comment form with concerns regarding EMF. Hydro One phoned to discuss and provided an email response after the discussion. E-mail reply discussed safe limits of EMF, Health Canada brochure, etc.
May 25, 2017	Email - Outgoing	Non-Event Communication	Local Property Owner	Kyal Butler (Hydro One Networks)	Inquiry about access road material, information provided that there are three sewage tile beds located just outside transmission corridor, not informed of planned outages that took place last summer.
May 25, 2017	Email - Outgoing	Non-Event Communication	Local Property Owner	Kyal Butler (Hydro One Networks)	Requested information on EMF and provided information on septic system in the area.
May 25, 2017	Email - Outgoing	Non-Event Communication	Local Property Owner	Kyal Butler (Hydro One Networks)	Inquiry about access road material, requested to be notified in advance of Hydro One entering property, and asked if Hydro One could provide copies of the reports once all studies and reporting are complete.
May 25, 2017	Email - Outgoing	Non-Event Communication	Local Property Owner	Kyal Butler (Hydro One Networks)	Inquiry regarding any environmental effects due to the transmission upgrade project.
December 13, 2017	Email - Outgoing	Non-Event Communication	Local Property Owners	Marylina Stea (Hydro One Networks); Sarah Cohanim (Hydro One Networks)	At the request of specific property owners, summaries of the field surveys which were completed on their properties were provided.

Appendix A-4: PIC Summary

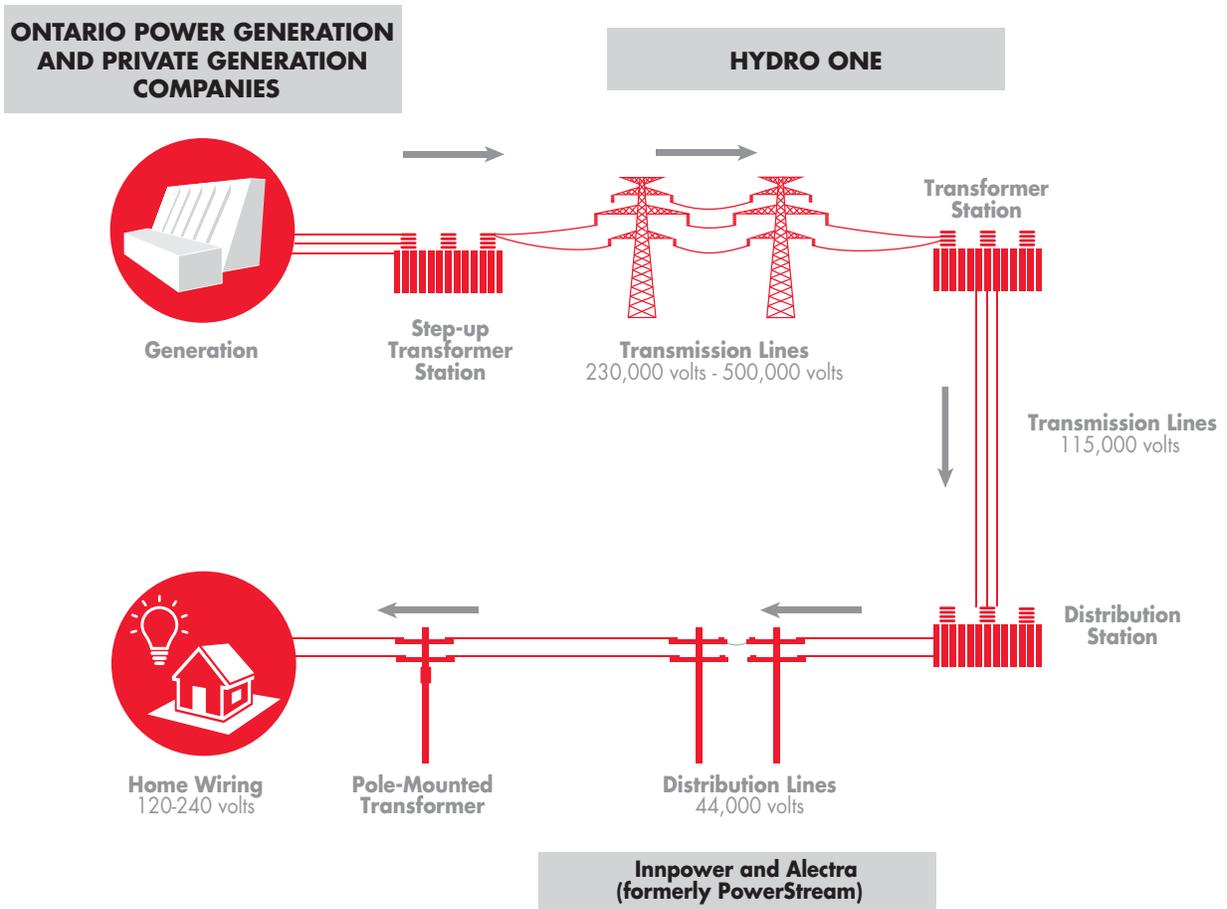

Welcome to our Information Centre

The purpose of this Information Centre is to meet our team and learn more about:

- The proposed project in your community
- The planning and approvals process
- Next steps and opportunities for your participation

We're here to listen to your comments, obtain your feedback and answer your questions.

What is Hydro One's Role in Delivering Electricity

Key Organizations

Hydro One Networks Inc.

Builds, owns, operates and maintains electricity transmission and distribution facilities across Ontario.

Ministry of Environment and Climate Change

The provincial Ministry that protects the environment and leads Ontario's actions on climate change.

Independent Electricity System Operator

Develops plans to ensure electricity needs are met for the benefit of Ontario, both now and in the future.

Ontario Energy Board

Oversees the energy sector in Ontario. Approves electricity rates and the construction of new transmission lines more than 2 km long.

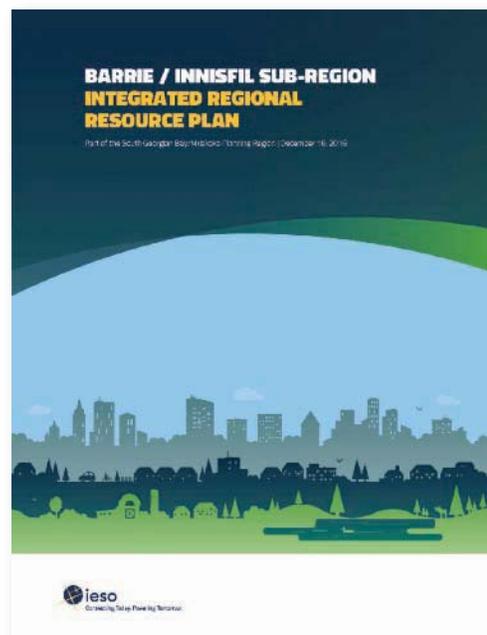

Local Distribution Companies

Distribute electricity supplied by Hydro One's transmission system to local homes and businesses.

Project Need

1. This infrastructure is approximately 50 – 60 years old and is nearing its end-of-life.
2. The current equipment is reaching capacity and requires upgrading to meet growing demand in the Barrie and Innisfil area.
3. The IESO has recommended Hydro One proceeds with the project as outlined in the *Barrie / Innisfil Sub-Region Integrated Regional Resource Plan*.

Project Description

To improve the overall transmission network, Hydro One has initiated planning to replace and upgrade aging infrastructure.

The project will involve:

1. Upgrading and expanding Barrie Transformer Station (TS).
2. Upgrading the existing transmission lines and structures between Barrie TS and Essa TS from 115 kilovolt (kV) to 230 kV.
 - Two existing side-by-side wooden structures will be replaced with a single line of taller steel structures.
3. Reconfiguring sections of Essa TS within the existing station footprint.

Why is Local Electricity Demand Forecasted to Grow?

Hydro One's Barrie TS serves a large portion of the City of Barrie and Town of Innisfil. The station is forecasted to experience high growth in demand over the next 20 years that will require capacity to increase.

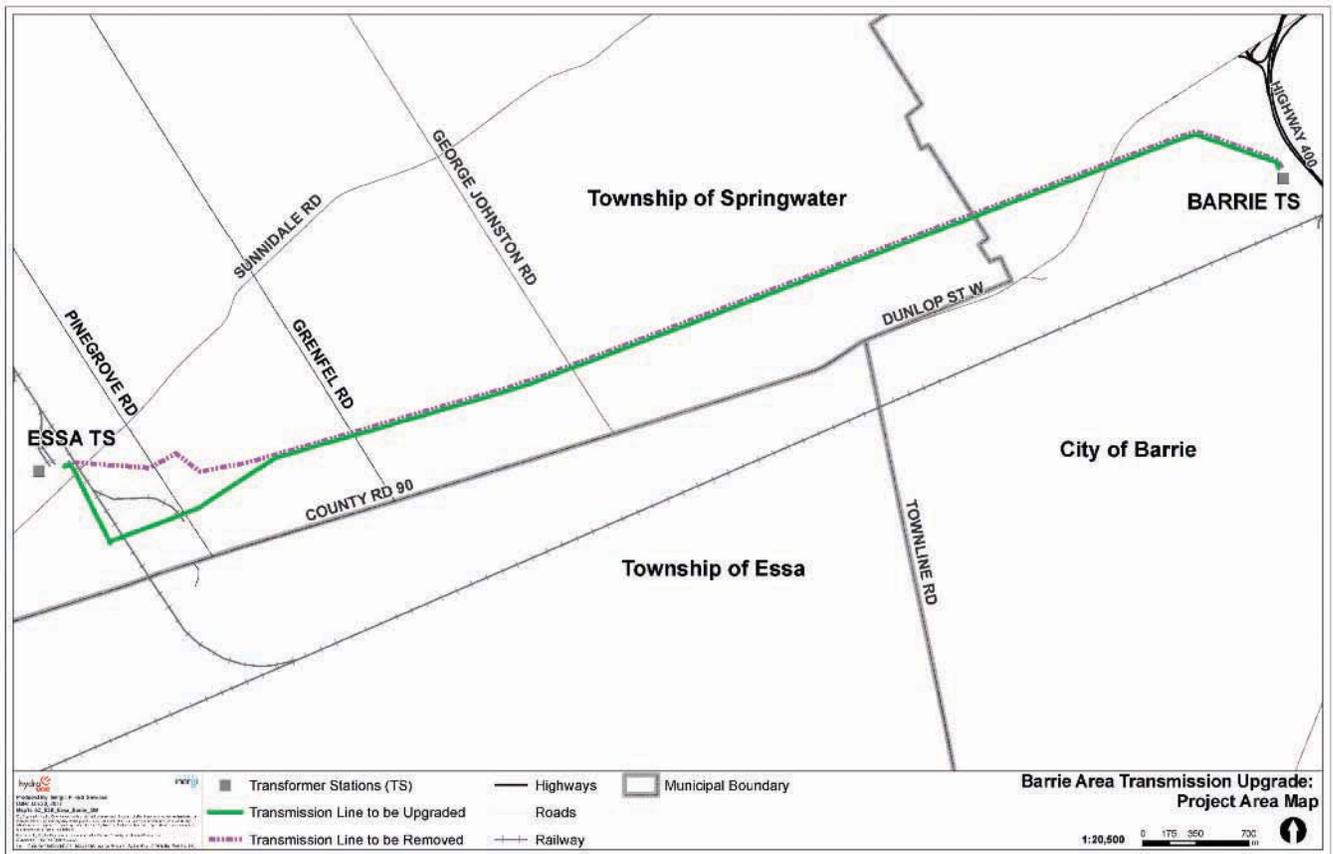

This increase in demand is due to:

- The City of Barrie being identified as an urban growth area.
- The increased demand from the development of data centres in the City of Barrie.
- The forecasted growth for the Town of Innisfil, including the proposed Innisfil Heights commercial development.

The proposed electrification of the Barrie Line by Metrolinx is also planned to connect to the upgraded Barrie TS.

Source: IESO "Barrie / Innisfil Sub-region Integrated Regional Resource Plan"

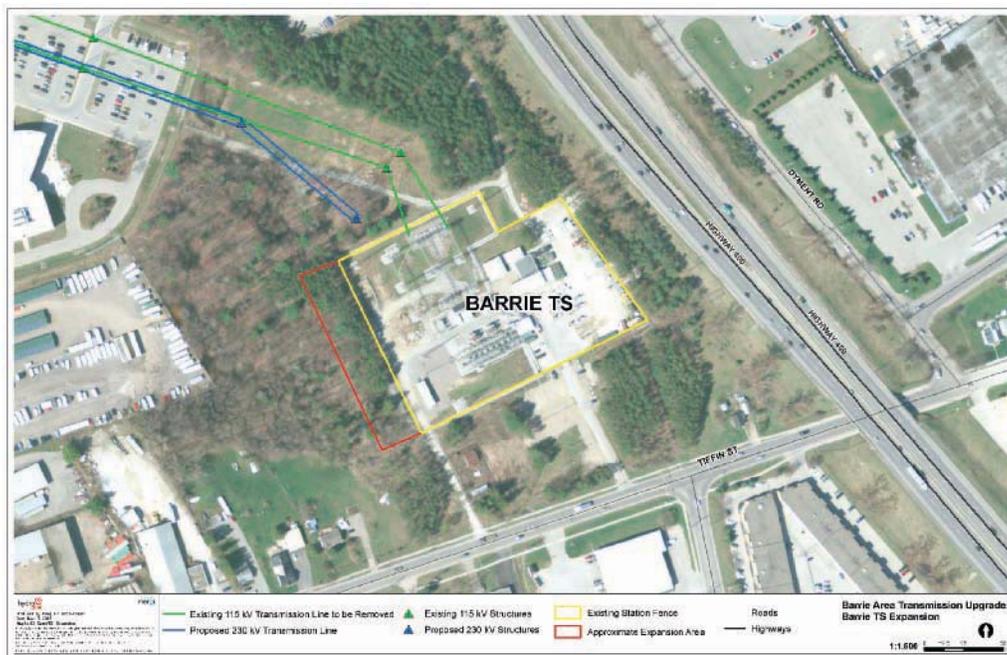

Project Location

Project map of the existing and proposed transmission corridor from Barrie TS to Essa TS

Barrie TS

- Aging equipment will be replaced and upgraded from 115 kV to 230 kV.
- The station will be expanded by approximately 25 metres on the west side.
- Tree clearing within Hydro One owned property will be required to facilitate the expansion and construction activity.

The existing Barrie TS is planned to expand as part of the upgrade project

Transmission Lines and Structures

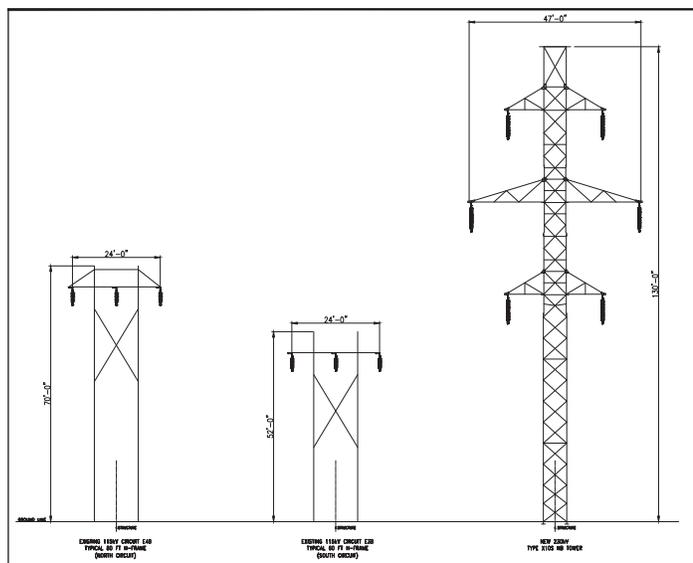

In order to carry more electricity, the lines from Barrie TS to Essa TS will be upgraded from 115 kV to 230 kV.

This requires replacing the two existing side-by-side wooden structures with a single line of steel towers.

The proposed configuration will result in less towers along the corridor.

New structures are required because:

- The upgraded lines will be larger and heavier to allow for the increased capacity.
- The new lines will need to be higher from the ground; taller structures will ensure a safe clearance.

The side-by-side existing structures (left) will be replaced with a single line of new towers (right)

Existing and Proposed Tower Structures

The existing structures are between 50-80 ft high

The planned new structures are between 130-150 ft high

Essa TS

- All 115 kV transformers at Essa TS will be decommissioned and removed.
- The station will be reconfigured to support the new 230 kV line to Barrie TS.
- All work will take place within the existing station footprint with no expansion required.

Current view inside Essa TS

Environmental Assessment Process

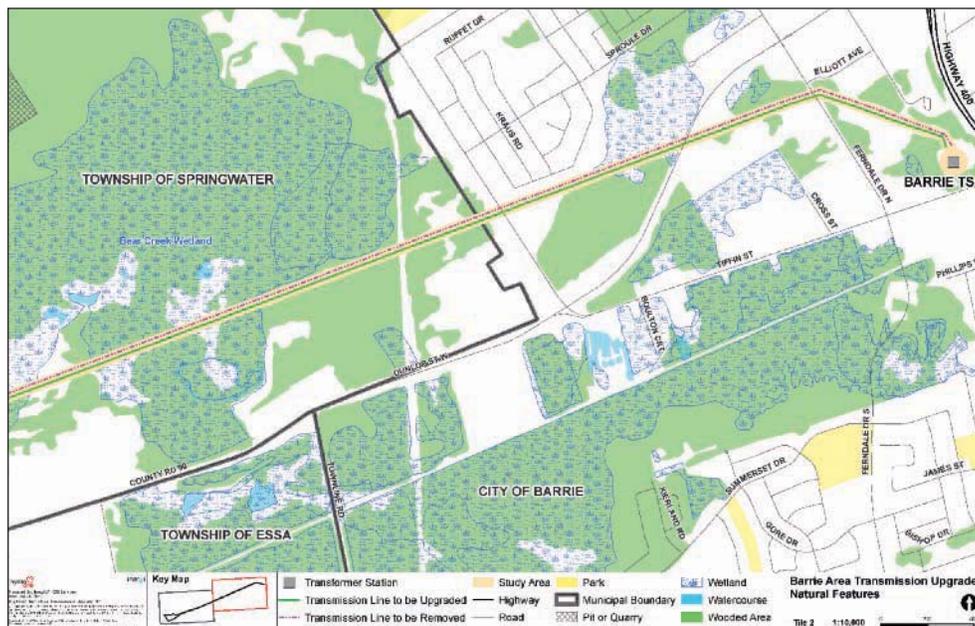

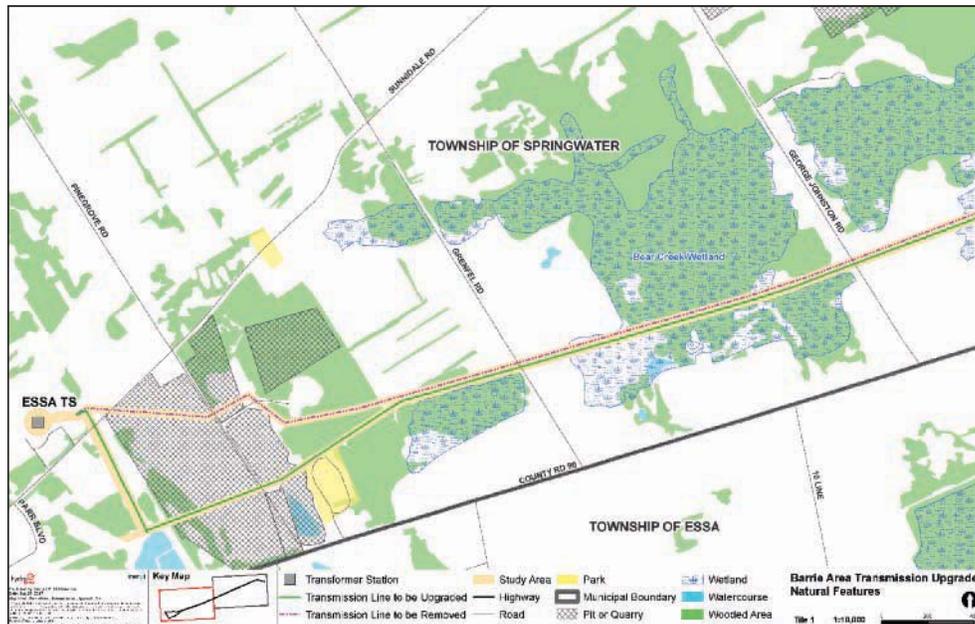

- The Barrie Area Transmission Upgrade project is subject to the provincial *Environmental Assessment Act*, and is being planned in accordance with the *Class Environmental Assessment for Minor Transmission Facilities, 1992* (Class EA) process.
- This Class EA process ensures that transmission projects that have a predictable range of effects are planned and carried out in an environmentally acceptable manner.
- As part of the Class EA consultation process, a draft Environmental Study Report (ESR) is planned to be available for public review and comment in the fall of 2017.
- Hydro One will make best efforts to resolve any concerns raised during the public review and comment period before filing the final ESR with the Ontario Ministry of the Environment and Climate Change (MOECC).
- If you feel that concerns were not addressed during the public review period, you can submit a written request (called a "Part II Order") to the MOECC asking for a higher level of assessment, known as an *Individual Environmental Assessment*.

Class EA Process Considerations

The Class EA process identifies potential project effects on:

- First Nations Communities
- Local businesses, residential property owners and community groups
- Planned land uses and existing infrastructure
- The Bear Creek Wetlands and other natural features
- Environmentally significant areas
- Archaeological and heritage resources
- Community recreational uses, including local hunting and snowmobile clubs

Natural Features

Biodiversity Initiative

- Some vegetation removal may be required to undertake construction activities.
- During the Class EA, we will work with interested parties to ensure that adverse effects to vegetation and other natural features are avoided or mitigated, where feasible.
- A biodiversity initiative will be implemented to compensate for effects to the natural environment.

Ontario Energy Board Approval

- The Ontario Energy Board (OEB) regulates the electricity market in Ontario and approves the rates that companies can charge customers for electricity.
- In addition to the Class EA process, the OEB must also approve the Barrie Area Transmission Upgrade project under Section 92 of the *Ontario Energy Board Act, 1998*.
- OEB approval is required because capacity is being increased from 115 kV to 230 kV across more than 2 km of line.
- Further information from the OEB on this project will be made available in local papers and at **www.ontarioenergyboard.ca**.
- Join our project mailing list for important updates.

What Can I Expect During Construction?

- The existing southern set of structures will be replaced first. Once this work is complete, the northern structures will be removed.
- Vegetation removal may be required along the right-of-way.
- Gravel access roads and working pads may be required in sections of the corridor to enable construction equipment access.
- Construction work areas will be temporarily fenced and not accessible during construction periods for safety reasons.
- Road closures are not anticipated during construction, but temporary lane restrictions may be necessary to string the new transmission lines along certain roads in the project area.
- Residents will be notified with further construction details closer to the date as planning progresses.

What if I have a Structure or Right-of-Way on my Property?

- A Hydro One Real Estate Coordinator will work with property owners that have an existing structure or corridor on their property.
- We have developed specific *Land Acquisition Compensation Principles (LACP)* based on our past experience with transmission projects. These principles will be made available in the coming weeks.

These principles aim to:

- Treat owners in a fair, transparent and consistent manner.
- Offer choices to property owners.
- Use independent property valuations.
- Reach voluntary outcomes in a timely manner.

Project Timeline

Notification sent to First Nations	October 2016
Notice of Commencement issued for the Class Environmental Assessment	January 2017
Public Information Centres	January - February 2017
Anticipated draft Environmental Study Report (ESR) available for 30 day public review period	Fall 2017
Anticipated final Environmental Study Report (ESR) filed with the Ministry of the Environment and Climate Change	Fall 2017
Anticipated OEB Section 92 approval	Nov 2018
Anticipated start of construction	Feb 2019
Anticipated in-service	Nov 2020

Your Input is Important to Us

COMMENT FORM

Barrie Area Transmission Upgrade Project

www.HydroOne.com/Projects/BarrieAreaUpgrade

Thank you for your interest in Hydro One's Barrie Area Transmission Upgrade project. Please take a moment to answer a few questions.

1. Did you attend the Public Information Centre in Barrie on January 31, 2017 or in Springwater on February 1, 2017?

Yes / No

2. How did you hear about this project?

- a. Newspaper
 - b. Word of mouth
 - c. Hydro One notices
 - d. Project Website
 - e. Other (please specify)
-

3. Do you have any particular comments, questions, or concerns regarding this project?
(Additional space on reverse)

Please provide your contact information so that we may follow-up with you on your comments or questions, and add you to our project contact list for future communications.

Name: _____

Mailing Address & Postal Code: _____

Tel: _____ Email: _____

Please send your comment form:
