

Notice of completion of draft Environmental Study Report

D6 Relocation Project

February 2026

Hydro One has completed the draft Environmental Study Report (ESR) for the D6 Relocation project. Now, you're invited to provide feedback. The proposed project includes relocating approximately 25 kilometres of the line between Chalk River Junction (JCT) in the township of Laurentian Hills and Petawawa JCT in Petawawa. Once built, the new line will improve reliability for the Petawawa area and minimize impacts to nearby military activities.

As part of the Class Environmental Assessment (EA) for the project, Hydro One has selected the preferred route shown on the map below. The route was selected as it limits impacts to the community and natural environment and will not limit the Department of National Defense's operations or constrain the Ministry of Transportation's future plans. Please visit [HydroOne.com/D6Relocation](https://hydroone.com/D6Relocation) for more information.

Next steps and providing your input

The draft ESR is available for public review and comment from Friday, February 13 to Sunday, March 15, 2026. The report summarizes the Class EA process, which was conducted in accordance with the Class EA for Transmission Facilities (2024) in accordance with the *Ontario Environmental Assessment Act*.

Please provide any comments by **4:30 p.m. on Sunday, March 15, 2026** to:

Jeff Hankin Environmental Planner/Engineer Hydro One Networks Inc., 483 Bay Street, North Tower, 14th Floor Toronto, ON, M5G 2P5 Community.Relations@HydroOne.com	OR Hydro One Community Relations Community.Relations@HydroOne.com 1.877.345.6799
--	---

Hydro One welcomes your feedback. We'll review and address concerns brought to our attention before finalizing and submitting the ESR to the Ministry of the Environment, Conservation and Parks (MECP). Once comments are addressed, MECP considers the project ready to proceed. We'll continue working with community members throughout the design and construction planning process.

A request may be made to the MECP for an order requiring a higher level of study (i.e. a Comprehensive EA approval) or a request that a certain condition be implemented (e.g. require further studies) before the project can proceed. However, this request can only be made on the grounds that the request may prevent, mitigate or remedy adverse impacts on constitutionally protected Indigenous and Treaty rights.

The MECP will not consider requests on other grounds. Requests should include the requester's contact information and specify what kind of order is being requested (request for conditions or Comprehensive EA); how an order may prevent, mitigate or remedy potential adverse impacts on Indigenous and treaty rights; and any information in support of the statements in the request.

The request should be sent in writing to:

Minister, Ministry of the Environment, Conservation and Parks

777 Bay Street, 5th Floor, Toronto ON M7A 2J3
Minister.mecp@ontario.ca

Director, Environmental Assessment Branch

Ministry of the Environment, Conservation and Parks

135 St. Clair Avenue West, 1st Floor, Toronto ON M4V 1P5
EABDirector@ontario.ca

Requests should also be copied to Hydro One at the address provided above. Please visit the Ministry's website for more information on requests for orders under Section 16 of the Environmental Assessment Act at: ontario.ca/page/class-environmental-assessments-section-16-order.

If no Section 16 Order requests are submitted during the comment period, Hydro One will proceed with the project under the *Environmental Assessment Act*.

We're here to help

If you would like any further information on this project or have any questions or feedback, please contact us at:
