## COMMUNITY NOTICE

### **Hydro One is working in your community**

In the next few weeks, Hydro One will begin an important project to install additional electrical equipment at Holland Transformer Station (TS). This work will improve the reliability of the electricity transmission system and increase its capacity to deliver power to meet the growing needs of your community and Northern York Region. Holland TS is located at Miller's Sideroad and Dufferin Street, as shown on the map on the reverse.

All construction will be within the existing Hydro One property. Typical hours for our crews are during daylight hours, from 7:00 a.m. to 5:00 p.m., Monday to Friday. Some occasional weekend work could be required, although we make best efforts to avoid it.

Throughout the project, there will be an increase in the number of trucks and heavy equipment in your area. Access to the station will be gained from Miller's Sideroad and Bathurst Street.

We expect to complete this project by late fall 2017 and our crews and contractors will do our best to minimizing construction disturbance to nearby residents.

Thank you in advance for your patience as we complete this important work.
