

LAKE SUPERIOR LINK

TRANSMISSION PROJECT

Powering northern Ontario is an important part of Hydro One's past and future. We have more than 100 years of history building the electrical system in Ontario's North, with made-in-Ontario solutions. We live and work in these communities and focus every day on delivering a safe and reliable supply of electricity to local homes and businesses.

We know we can deliver this critical project for the right price and bring tangible benefits to electricity customers, the environment and the province. This is why we applied to the Ontario Energy Board (OEB) to construct what we call the Lake Superior Link, a new transmission line between our Lakehead Transformer Station (TS) near Thunder Bay and our Wawa TS near Wawa.

Over the past months, we have been meeting with communities, consulting on the project and taking feedback into consideration so that our project will benefit local communities and create employment opportunities for people who call the North their home.

PROJECT FACTS

- The OEB Leave to Construct is a competitive process.
- The construction of the proposed transmission line has not yet been awarded to any company.
- An OEB hearing to select a winning company to build the project has been set for October 2, 2018

BENEFITS OF HYDRO ONE'S PROPOSAL

CREATING
JOBS

DEVELOPING
PARTNERSHIPS

POWERING
ECONOMIC
GROWTH

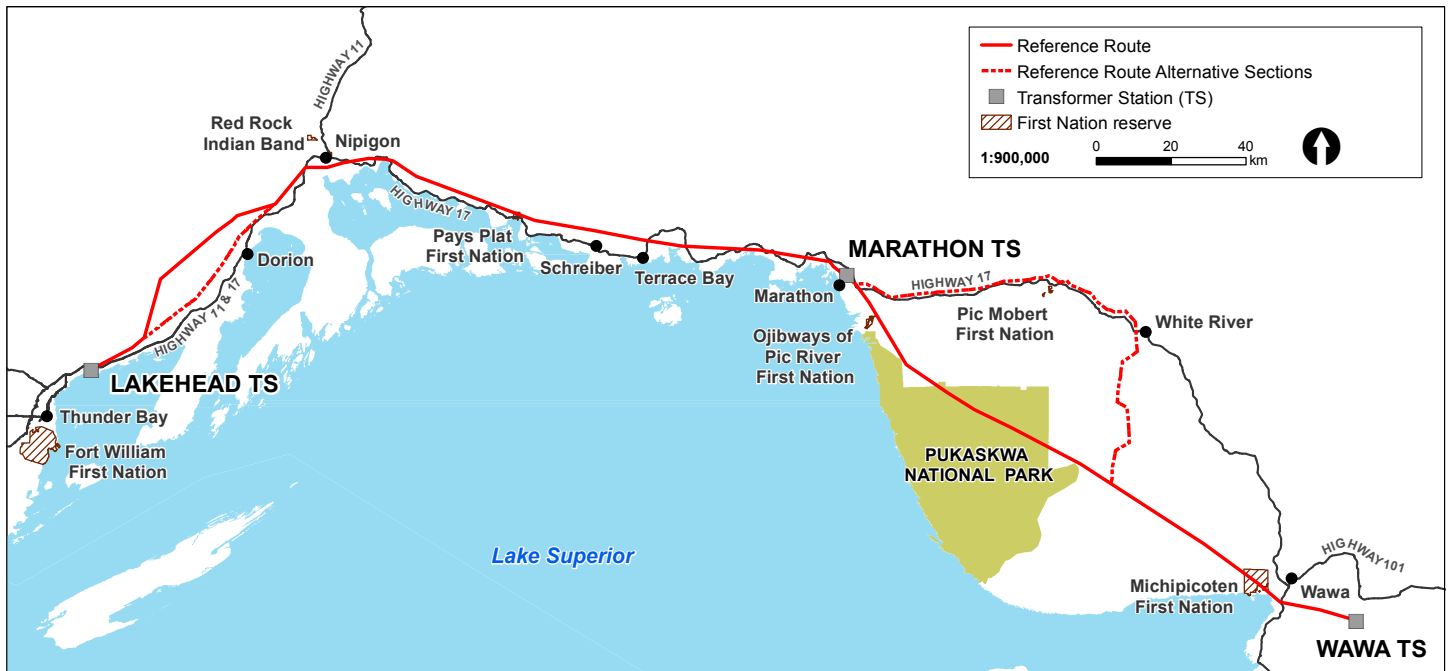

DELIVERING
COST SAVINGS

PROJECT MILESTONES

- Hydro One has submitted a Terms of Reference (ToR) for the Environmental Assessment to the Ministry of Environment, Conservation and Parks.
- Our ToR is open for public comment until October 7, 2018.
- We have hosted more than 19 community open houses throughout the project area and our project team remains committed to continued dialogue.

ANTICIPATED PROJECT SCHEDULE

Fall/Winter 2018	Terms of Reference Approval
Winter 2018	Continued consultation with stakeholders and the public
Summer 2019	Approval of Environmental Assessment
Fall/Winter 2021	Project In-service
