RE: Individual Environmental Assessment for the Lake Superior Link Project located between Wawa and Thunder Bay, Ontario.

Dear *Insert Name*,

Hydro One Networks Inc. (Hydro One) has initiated the Terms of Reference for an Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* for the proposed Lake Superior Link project. The Independent Electricity System Operator's (IESO) Updated Assessment of the Need for the East-West Tie Expansion, 2017 states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term." The EA will consider two route alternatives for a new double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa.

The attached Notice of Commencement and invitation to Community Information Centres will be published in local newspapers leading up to the June Community Information Centres

If you have further questions, please contact us at Community.Relations@HydroOne.com or 1-877-345-6799. Alternatively, you can contact Bruce Hopper at 416-779-0257 or Bruce.Hopper@HydroOne.com.

Sincerely,

A handwritten signature in black ink that reads "Bruce Hopper".

Information

Dear Mayor *xxx* and Council:

Hydro One Networks Inc. (Hydro One) has initiated the Terms of Reference for an Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* for the proposed Lake Superior Link project. The Independent Electricity System Operator's (IESO) Updated Assessment of the Need for the East-West Tie Expansion, 2017 states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term." The EA will consider two route alternatives for a new double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa.

The attached Notice of Commencement and invitation to Community Information Centres will be published in local newspapers leading up to the June Community Information Centres. The attached community flyer, which contains similar information, will be delivered to residents and interest groups in your community and along the project route.

We are eager to continue our conversation with local elected officials, and would like to offer you, Council and any interested staff a "preview" in the hour leading up to the public sessions. You are more than welcome to stay for the public session as well. If you would prefer to set up a meeting at a different time, please contact us at your earliest convenience.

If you have further questions, please contact us.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Mantifel".

NOTICE OF COMMENCEMENT OF TERMS OF REFERENCE AND INVITATION TO COMMUNITY INFORMATION CENTRE Lake Superior Link Project – Hydro One Networks Inc.

Hydro One Networks Inc. (Hydro One) is initiating an Environmental Assessment (EA) under the *Environmental Assessment Act* for the proposed Lake Superior project. The Independent Electricity System Operator's (IESO) *Updated Assessment of the Need for the East-West Tie Expansion, 2017* states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term." The EA will consider two route alternatives for a new 400 km, double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa, as shown on the map. The reference route generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new section of corridor near Dorion and a section through Pukaskwa National Park where existing infrastructure would be modified. The reference route alternative generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new corridor section near Dorion and a section that traverses around Pukaskwa National Park.

In March 2018, Hydro One hosted public information drop-ins along the project route to provide initial opportunities for stakeholders to learn more about the Lake Superior Link project, meet the project team and provide feedback. Hydro One is aware of the extensive consultation already completed on the reference route alternative and will make best efforts to streamline consultation and studies whenever possible.

The Planning Process

This EA will be carried out in accordance with the requirements of the Ontario *Environmental Assessment Act*. The first step is the preparation of a Terms of Reference (ToR) which will set out the framework and work plan for addressing *Environmental Assessment Act* requirements when preparing the EA, including an outline of the studies and consultation activities that will be undertaken. Important elements of this work will be to evaluate the reference route and reference route alternative, assess potential effects and determine measures to reduce or mitigate these effects.

A draft ToR will be made available for review and comment during early summer 2018. Hydro One anticipates that the ToR will be completed mid-summer 2018, at which point it will be submitted to the Minister of the Environment and Climate Change (Minister) for review and decision. If approved by the Minister, the EA will proceed as outlined in the ToR.

Consultation

Indigenous communities, government agencies, municipal officials, members of the public and other interested persons are encouraged to actively participate in the planning process. Consultation and engagement opportunities will be organized throughout the planning process and communicated via community newspaper advertisements, mailings and on the project website. Members of Hydro One's project team are always available to discuss the project with interested parties.

We will be hosting another round of Community Information Centres as outlined below to provide a project update and continue discussions about delivering tangible benefits to communities in the project area.

All personal information in a submission – such as name, address, telephone number and property location – is collected, maintained, and disclosed by the Ministry of the Environment and Climate Change for the purpose of transparency and consultation. The information is collected under the authority of the *Environmental Assessment Act*, or is collected and maintained for the purpose of creating a record that is available to the general public, as described in s. 37 of the *Freedom of Information and Protection of Privacy Act*. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. For more information, please contact the Ministry of the Environment and Climate Change's Freedom of Information and Privacy Coordinator at 416-327-1434.

AVIS – COMMENCEMENT DU CADRE DE RÉFÉRENCE ET INVITATION À UNE SÉANCE D'INFORMATION PUBLIQUE concernant le Projet du Corridor Lac Supérieur – Hydro One Networks Inc.

Hydro One Networks Inc. (Hydro One) entreprend actuellement, conformément à la *Loi sur les évaluations environnementales* de l'Ontario, une évaluation environnementale (EE) pour le Projet du Corridor Lac Supérieur. L'étude de la Société indépendante d'exploitation du réseau d'électricité (SIERE) – *Updated Assessment of the Need for the East-West Tie Expansion, 2017* – qui évalue la nécessité d'étendre la ligne de connexion Est-Ouest existante, indique qu'une nouvelle ligne de transport « demeure la solution de rechange recommandée pour maintenir dans le long terme un approvisionnement d'électricité fiable et rentable dans le Nord-Ouest de l'Ontario ». L'EE examinera deux itinéraires possibles pour l'implantation d'une nouvelle ligne de transport à deux circuits à 230 kilovolts, qui s'étendrait sur 400 km entre le poste de transformation (PT) de Lakehead, près de Thunder Bay, et le PT de Wawa, près de Wawa (voir la carte). L'itinéraire de référence globalement suit en parallèle le corridor de connexion Est-Ouest existant de Hydro One, sauf qu'un nouveau tronçon de corridor est prévu près de Dorion et qu'une section de l'infrastructure traversant le parc national Pukaskwa serait modifiée. L'autre itinéraire de référence globalement suit en parallèle le corridor de connexion Est-Ouest existant de Hydro One, sauf en ce qui concerne ici aussi un nouveau tronçon de corridor prévu près de Dorion et un autre tronçon qui passera à l'extérieur du parc national Pukaskwa.

En mars 2018, Hydro One a tenu des haltes-information le long de l'itinéraire envisagé pour permettre aux intervenants de mieux se renseigner sur le Projet du Corridor Lac Supérieur, de rencontrer l'équipe responsable et de faire part de leurs commentaires. Hydro One est au courant de la vaste consultation qui a été déjà menée sur l'autre route de référence et fera tout son possible pour simplifier la consultation et les études.

Processus de planification

L'EE est menée conformément aux exigences de la *Loi sur les évaluations environnementales* (la Loi). La première étape consiste à préparer un cadre de référence qui établit le plan des travaux et études à mener en réponse aux exigences de la Loi; le cadre indique en particulier les études et les activités de consultation qui seront entreprises. Une partie importante des activités consistera à examiner l'itinéraire de référence envisagé et l'autre itinéraire de référence, d'en évaluer les effets potentiels et de déterminer les mesures à prendre pour réduire ou atténuer ces effets.

Une version provisoire du cadre de référence sera mise à la disposition de la collectivité pour examen et commentaires au début de l'été 2018. Hydro One pense que le cadre de référence sera achevé en milieu d'été, après quoi il sera présenté au ministre de l'Environnement et de l'Action en matière de changement climatique (le ministre) pour examen et décision. S'il est approuvé, Hydro One entamera l'étude environnementale conformément au cadre de référence.

Consultation

Nous encourageons les parties intéressées, notamment les collectivités autochtones, les organismes gouvernementaux, les dirigeants municipaux et les membres du public à prendre part activement au processus de planification. Des occasions de consultation et de participation seront organisées tout au long du processus de planification; elles seront annoncées dans les journaux locaux, au moyen d'envois postaux et sur le site Web du projet. Les membres de l'équipe Hydro One sont toujours disponibles pour discuter le projet avec les parties.

Nous tiendrons une autre série de séances d'information publique (voir ci-dessous) pour faire le point sur le projet et poursuivre les discussions sur les avantages tangibles que ce projet représente pour les collectivités de la région.

Tous les renseignements personnels requis lors de la soumission de commentaires, tels que le nom, l'adresse, le numéro de téléphone et l'adresse de la propriété, sont recueillis, conservés et divulgués par le ministère de l'Environnement et de l'Action en matière de changement climatique (MEACC) à des fins de transparence et de consultation. Ces renseignements sont recueillis en vertu de la *Loi sur les évaluations environnementales* ou sont recueillis et conservés dans le but de créer un dossier qui sera mis à la disposition du grand public, comme le prévoit l'article 37 de la *Loi sur l'accès à l'information et la protection de la vie privée*. Les renseignements personnels feront partie d'un dossier public qui sera à la disposition du grand public, sauf si vous demandez qu'ils soient tenus confidentiels. Pour obtenir de plus amples renseignements, veuillez contacter le coordonnateur de l'accès à l'information et de la protection de la vie privée du MEACC au 416 327-1434.

DEAR RESIDENT:

Powering northern Ontario is an important part of Hydro One's past and future. Hydro One has a vision for the North, which is why earlier this year we applied to the Ontario Energy Board for approval to construct a new transmission line between our Lakehead Transformer Station (TS) and our Wawa TS, as shown on the map below. Our project, the Lake Superior Link, is the most innovative and cost-effective solution for Ontario electricity customers. Hydro One is committed to delivering safe, reliable and affordable power to homes and businesses in the North.

We have initiated an Environmental Assessment (EA) under the *Environmental Assessment Act* for the proposed project. The EA will consider two route options for a new double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa, as shown on the map below. The reference route would primarily be built on or adjacent to Hydro One's existing East-West Tie transmission corridor, with the exception of a new corridor section near Dorion. Through Pukaskwa National Park, the existing line would be upgraded without widening the corridor. As shown below, the reference route alternative follows that same path, with the exception of a variance around Pukaskwa National Park.

WE WANT TO HEAR FROM YOU!

We started conversations with local communities in March during our first round of information drop-ins, and we would like to continue to speak with community members about how our proposed project will deliver tangible benefits. We will be hosting a series of Community Information Centres along the proposed route – please stop by to learn more about the EA process, get a project update, and provide your feedback.

CHÈRE RÉSIDENTE, CHER RÉSIDENT,

Approvisionner le Nord de l'Ontario en électricité est et sera toujours pour Hydro One une part importante de sa mission. Nous avons une vision pour cette région; c'est pourquoi, plus tôt cette année, nous avons demandé à la Commission de l'énergie de l'Ontario l'autorisation de construire une nouvelle ligne de transport entre notre poste de transformation (PT) de Lakehead et celui de Wawa (voir la carte). Notre projet, le Corridor Lac Supérieur, représente la solution la plus novatrice et la plus économique pour les abonnés d'électricité de l'Ontario. Hydro One est là pour assurer un approvisionnement sûr et fiable et de coût abordable aux habitations et aux entreprises du Nord.

Nous avons, conformément à la Loi sur les évaluations environnementales, entrepris une évaluation environnementale (EE) pour ce projet. L'EE examinera deux itinéraires possibles pour l'implantation d'une nouvelle ligne de transport à deux circuits à 230 kilovolts entre le PT de Lakehead, près de Thunder Bay, et le PT de Wawa. L'itinéraire de référence suivrait principalement le corridor de connexion Est-Ouest existant de Hydro One ou un tracé adjacent à ce corridor, à l'exception d'un nouveau tronçon qui serait aménagé près de Dorion. Dans le parc national Pukaskwa, la ligne existante serait rénovée sans qu'il y ait élargissement du corridor. L'autre itinéraire de référence suit le même tracé, à l'exception d'un nouveau tronçon de corridor qui contournerait le parc national Pukaskwa.

NOUS SOUHAITONS CONNAÎTRE VOS COMMENTAIRES!

Nous désirons poursuivre la conversation entamée avec vous en mars, lors de notre première série de haltes-information, pour vous parler des avantages concrets que notre projet représente pour vous. Nous tiendrons plusieurs séances d'information publique le long de l'itinéraire proposé pour vous en dire plus sur le processus d'EE, faire le point sur le projet et recueillir vos commentaires.

LAKE SUPERIOR LINK TRANSMISSION PROJECT

NOTICE OF COMMENCEMENT OF TERMS OF REFERENCE AND INVITATION TO COMMUNITY INFORMATION CENTRE Lake Superior Link Project – Hydro One Networks Inc.

Hydro One Networks Inc. (Hydro One) is initiating an Environmental Assessment (EA) under the *Environmental Assessment Act* for the proposed Lake Superior Link project. The Independent Electricity System Operator's (IESO) *Updated Assessment of the Need for the East-West Tie Expansion, 2017* states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term." The EA will consider two route alternatives for a new 400 km, double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa, as shown on the map. The reference route generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new section of corridor near Dorion and a section through Pukaskwa National Park where existing infrastructure would be modified. The reference route alternative generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new corridor section near Dorion and a section that traverses around Pukaskwa National Park.

In March 2018, Hydro One hosted public information drop-ins along the project route to provide initial opportunities for stakeholders to learn more about the Lake Superior Link project, meet the project team and provide feedback. Hydro One is aware of the extensive consultation already completed on the reference route alternative and will make best efforts to streamline consultation and studies whenever possible.

The Planning Process

This EA will be carried out in accordance with the requirements of the Ontario *Environmental Assessment Act*. The first step is the preparation of a Terms of Reference (ToR) which will set out the framework and work plan for addressing *Environmental Assessment Act* requirements when preparing the EA, including an outline of the studies and consultation activities that will be undertaken. Important elements of this work will be to evaluate the reference route and reference route alternative, assess potential effects and determine measures to reduce or mitigate these effects.

A draft ToR will be made available for review and comment during early summer 2018. Hydro One anticipates that the ToR will be completed mid-summer 2018, at which point it will be submitted to the Minister of the Environment and Climate Change (Minister) for review and decision. If approved by the Minister, the EA will proceed as outlined in the ToR.

Consultation

Indigenous communities, government agencies, municipal officials, members of the public and other interested persons are encouraged to actively participate in the planning process. Consultation and engagement opportunities will be organized throughout the planning process and communicated via community newspaper advertisements, mailings and on the project website. Members of Hydro One's project team are always available to discuss the project with interested parties.

We will be hosting another round of Community Information Centres as outlined below to provide a project update and continue discussions about delivering tangible benefits to communities in the project area.

All personal information in a submission – such as name, address, telephone number and property location – is collected, maintained, and disclosed by the Ministry of the Environment and Climate Change for the purpose of transparency and consultation. The information is collected under the authority of the *Environmental Assessment Act*, or is collected and maintained for the purpose of creating a record that is available to the general public, as described in s. 37 of the *Freedom of Information and Protection of Privacy Act*. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. For more information, please contact the Ministry of the Environment and Climate Change's Freedom of Information and Privacy Coordinator at 416-327-1434.

Local

MPP Michael Gravelle Visits the area

By Gail Johnson

Michael Gravelle, the MPP for Thunder Bay Superior North, was in our area campaigning on Wednesday, May 23rd. He stopped by the Terrace Bay Post Office and then went on to Superior Senior Centre. This reporter caught him on his way out when he stopped to chat with Daryl Davis and Louise Regis. His next stop was Schreiber..

Daryl Davis and Louise Regis pose with our MPP Michael Gravelle across from the Senior Centre.

LAKE SUPERIOR LINK TRANSMISSION PROJECT

NOTICE OF COMMENCEMENT OF TERMS OF REFERENCE AND INVITATION TO COMMUNITY INFORMATION CENTRE Lake Superior Link Project – Hydro One Networks Inc.

Hydro One Networks Inc. (Hydro One) is initiating an Environmental Assessment (EA) under the *Environmental Assessment Act* for the proposed Lake Superior Link project. The Independent Electricity System Operator's (IESO) *Updated Assessment of the Need for the East-West Tie Expansion, 2017* states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term." The EA will consider two route alternatives for a new 400 km, double-circuit 230 kilovolt transmission line between Lakehead Transformer Station (TS) near Thunder Bay and Wawa TS near Wawa, as shown on the map. The reference route generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new section of corridor near Dorion and a section through Pukaskwa National Park where existing infrastructure would be modified. The reference route alternative generally parallels Hydro One's existing East-West Tie transmission corridor with the exception of a new corridor section near Dorion and a section that traverses around Pukaskwa National Park.

In March 2018, Hydro One hosted public information drop-ins along the project route to provide initial opportunities for stakeholders to learn more about the Lake Superior Link project, meet the project team and provide feedback. Hydro One is aware of the extensive consultation already completed on the reference route alternative and will make best efforts to streamline consultation and studies whenever possible.

The Planning Process

This EA will be carried out in accordance with the requirements of the Ontario *Environmental Assessment Act*. The first step is the preparation of a Terms of Reference (ToR) which will set out the framework and work plan for addressing *Environmental Assessment Act* requirements when preparing the EA, including an outline of the studies and consultation activities that will be undertaken. Important elements of this work will be to evaluate the reference route and reference route alternative, assess potential effects and determine measures to reduce or mitigate these effects.

A draft ToR will be made available for review and comment during early summer 2018. Hydro One anticipates that the ToR will be completed mid-summer 2018, at which point it will be submitted to the Minister of the Environment and Climate Change (Minister) for review and decision. If approved by the Minister, the EA will proceed as outlined in the ToR.

Consultation

Indigenous communities, government agencies, municipal officials, members of the public and other interested persons are encouraged to actively participate in the planning process. Consultation and engagement opportunities will be organized throughout the planning process and communicated via community newspaper advertisements, mailings and on the project website. Members of Hydro One's project team are always available to discuss the project with interested parties.

We will be hosting another round of Community Information Centres as outlined below to provide a project update and continue discussions about delivering tangible benefits to communities in the project area.

Pic Mobert Youth have talent weekend

Calling all Pic Mobert Youth and First Nation Youth from the area between grade 7 to age 30!

Facilitated by Ron Kanutski!

Work with one or more of the artists all weekend to try out your talents – Singing, Rap Music, Recording, Guitar, Acting, Film, T-Shirt Art, and Comedy and more!!

Friday, June 1 - Opening Evening 5:30 pm: Pizza, meet the artists, sign up for your favourite workshops, FUN games and impromptu talents!

Saturday, June 2 - 9 am -10 pm: Divide into Small Workshops. Make

and record a RAP song. Silk screen your unique T-Shirt. Learn to do comedy. Act on a mini film production. Sing solo or with a group and record. Write your music! Meals included for participants.

Sunday, June 3 - 9 am – 4 pm. Finish your Artistic Productions and get ready for the show. Adults and families invited YOUTH TALENT SHOW - 3 pm- 4 pm.

Supper and Comedy Show with Ron Kanutski 4:30 – 6:30 pm! Everyone

Invited!

For more information call Nicole Simpson (Pic Mobert Student Success Coordinator) at 822-1860, or Rosalind Andrews (Health and Social Services Director) at 822-2625.

Youth please REGISTER AHEAD so we have enough food and supplies! Call Nicole.

THE ASSOCIATED PRESS

Alex Bowman (88) drives past a spinout by Jimmie Johnson (48) during a NASCAR race in Charlotte, N.C. last week. The 25-year-old Bowman is 0-for-94 in his NASCAR career so far.

Young stars can't break through

BY DAN GELSTON
THE ASSOCIATED PRESS

LONG POND, Pa. — Kyle Busch tossed his son into the air at Texas. Clint Bowyer waited for his toddler to run toward him with open arms at Martinsville. Kevin Harvick rested his hands on his son's shoulders as they gazed at a trophy in Atlanta.

Hey, who says the young kids in NASCAR can't celebrate in victory lane?

OK, in the sagging sport's version of that story, it's the ballyhooed youth movement that would have paid dividends with checkered flags and publicity bursts as NASCAR nears the halfway point.

But NASCAR is still very much a veteran driver's game.

Ryan Blaney and Chase Elliott each won qualifying races in Speedweeks for the Daytona 500, seemingly setting the stage for the new generation to take the reins in 2018. And who won the pole for Daytona? Yup, 25-year-old Alex Bowman in his debut race for Hendrick Motorsports.

The sizzling starts haven't carried over as the season nears the midway point. Elliott, winless in 90 career starts, has three top-five finishes this season.

Bowman, 0 for 94, has just one top five in 2018.

"I haven't had one (car) feel like what I want so far this year because we haven't won yet," Bowman said. "I don't think I'm going to have one that I like until we win, but we are getting closer."

Bowman finished a solid ninth last week at the Coca-Cola 600 in his best career finish on an intermediate track. Bowman said he hasn't felt stress from replacing the retired Dale Earnhardt Jr. in the No. 88 Chevrolet. But rather, the burden comes from failing to bring home trophies for one of the most storied organizations in NASCAR history.

"Hendrick Motorsports is known for winning races and winning championships and that is what I'm expected to do," Bowman said. "I think most of my pressure comes from myself and the fact that I just want to win races and prove that I can do it."

As the series shifts to Pocono Raceway, Blaney's win for the Wood Brothers last June marked the last time a driver won his first career Cup race. Sure, there have been close calls and blown leads and bad breaks.

Darrell Wallace Jr., Erik Jones, William Byron, the list goes on of 20-something drivers stuck with the 0 in the win column.

It's rare at Pocono for a driver to break through for his first career Cup victory.

Jeremy Mayfield (June 1998), Denny Hamlin (June 2006), Chris Buescher (August 2016) and Blaney all scored their first wins on the tri-oval track nestled in the mountains.

Blaney's win ended a five-race stretch last season that included first-time winners Ricky Stenhouse Jr. and Austin Dillon. Stenhouse and Dillon, the 2018 Daytona 500 champion, each won again.

The rest of the list reads like much like it has for most of the last five years; Harvick and Busch, Martin Truex Jr., Brad Keselowski and Denny Hamlin headline the drivers with multiple victories since last June.

The 42-year-old Harvick and 33-year-old Busch, each former series champions, have nine of the 13 wins in Cup this season.

The veterans aren't ready to pass the torch.

The so-called young guns are still shooting blanks.

All personal information in a submission – such as name, address, telephone number and property location – is collected, maintained, and disclosed by the Ministry of the Environment and Climate Change for the purpose of transparency and consultation. The information is collected under the authority of the *Environmental Assessment Act*, or is collected and maintained for the purpose of creating a record that is available to the general public, as described in s. 37 of the *Freedom of Information and Protection of Privacy Act*. Personal information you submit will become part of a public record that is available to the general public unless you request that your personal information remain confidential. For more information, please contact the Ministry of the Environment and Climate Change's Freedom of Information and Privacy Coordinator at 416-327-1434.

Wawa Goose Seniors Club News: Goose Droppings

"Victoria Day", May 24th Weekend, the opening of pickerel season Here comes summer!!

We did have a meeting of the general membership of the Wawa Goose Seniors' Club on May 9th. We thank Michael Allemano for the knowledge and written materials he brought to us on the topic on incorporation, a very good beginning for considerations to be undertaken before too long. Decision time will probably come with a new executive to be sworn in at the September meeting.

In the meantime we have hamburger meat pie orders to fill. Help to peel and brown and measure, stir and cool both crusts and fillings on Monday, May 28th.

Then we need the big crew of holy rollers, fillers, crimpers, baggers, taggers and stashes to get the actual pies into the freezer on Tuesday, May 29th. If you can help out we would begin at 9:00 a.m. and love to see you at the Drop In. We usually get things done early afternoon. And if you have not yet ordered we will take your

order but cannot guarantee to get late orders filled.

We also have a Nomination Committee getting a fix on possible candidates for the four positions open on the executive. If they have overlooked you for some reason unknown, feel free to call Kathy Culhane or Ray Parise at (705) 856-7394. And don't forget to come to the June Meeting on Wednesday, June 13th. Voting is good, too.

The Lounge is available to seniors or other community members at the rate of \$10.00 per hour or \$25.00 for

a half day. Renting the entire Drop In would cost \$75.00. Members are entitled to a 25% discount. Call (705) 856-7394 for more information or booking.

We also promised Silvana Dereski at the Family Health Team that we would man the water station at Wawa Lake the morning of Saturday, June 16th during the Black Fly Run. If you can pour water into glasses, hand out the glass to someone flying by, and pick up the empty, we really would like four nice persons to volunteer. Last year it wasn't half bad, even in the rain.

Mah jongg had four people out to learn on Wednesday at one; bridge learners can have some fun and learn a lot on Tuesday at one; and on Thursday Mary Anne Mitrikas had a twenty four hand in cribbage. And the 16

noisy bridge players had great fun on Monday.

And please remember to circle June 24th, Sunday, for our business year end Pot Luck Dinner. Come on out for great food and fun!

Dear *Insert Name*:

Hydro One Networks Inc. (Hydro One) recently sent you a Notice of Commencement of the Terms of Reference (ToR) for our Lake Superior Link transmission line Environmental Assessment (EA). The project is for a new transmission line between our Lakehead Transformer Station (TS) and Wawa TS. The draft ToR document is open for review and public comment from June 11, 2018 to July 10, 2018.

The ToR sets out the framework and work plan for addressing Environmental Assessment Act requirements when preparing the EA, including an outline of the studies and consultation activities that will be undertaken. Important elements of this work will be to evaluate the reference route and reference route alternatives, assess potential effects and determine measures to reduce or mitigate these effects.

Indigenous communities, government agencies, municipal officials, members of the public and other interested persons are encouraged to actively participate in the planning process. The draft ToR document can be reviewed on Hydro One's Lake Superior Link Project page www.HydroOne.com/LakeSuperiorLink.

Upon completion of the ToR, the document will be submitted to the Minister of the Environment and Climate Change (Minister) for review and decision. If approved by the Minister, the EA will proceed as outlined in the ToR

If you have comments or would like to discuss please feel free to reach out to me at 1-416-779-0257 or email Bruce.Hopper@HydroOne.com or 1-416-345-6596 or email Adam.Haulena@HydroOne.com.

Sincerely,

A handwritten signature in black ink that reads "Bruce Hopper".

The ToR sets out the framework and work plan for addressing Environmental Assessment Act requirements when preparing the EA, including an outline of the studies and consultation activities that will be undertaken. Important elements of this work will be to evaluate the reference route and reference route alternative, assess potential effects and determine measures to reduce or mitigate these effects.

Indigenous communities, government agencies, municipal officials, members of the public, potentially affected landowners and other interested persons are encouraged to actively participate in the planning process. The draft ToR document can be reviewed on Hydro One's Lake Superior Link Project page www.HydroOne.com/LakeSuperiorLink. The ToR will also be made available for public viewing at the following local municipal/township Clerk's office of Wawa, Thunder Bay, Marathon, Dorion, Nipigon, Red Rock, Schreiber, Shuniah, Terrace Bay, and White River.

Upon completion of the ToR, the document will be submitted to the Minister of the Environment and Climate Change (Minister) for review and decision. If approved by the Minister, the EA will proceed as outlined in the ToR

If you have comments, inquiries or requests for additional information please feel free to reach out to me at 1-877-345-6799 or email Community.Relations@HydroOne.com

*Insert Contact
Information*

Dear Chief *Insert Name*:

Hydro One Networks Inc. (Hydro One) has initiated the Terms of Reference (ToR) for an Environmental Assessment (EA) under the Ontario *Environmental Assessment Act* for the proposed Lake Superior Link project. The Independent Electricity System Operator's (IESO) Updated Assessment of the Need for the East-West Tie Expansion, 2017 states that a new transmission line "...continues to be the recommended alternative to maintaining a reliable and cost-effective supply of electricity in Northwestern Ontario for the long term."

Hydro One has developed a draft ToR which is currently available online for review and open for public comment from June 11 to July 10 and can be found at www.HydroOne.com/LakeSuperiorLink.

Your organization has been identified as an emergency and medical services stakeholder in the project area. We wanted to take this opportunity to notify you of the project and provide you with our contact information should you have any additional questions.

As we continue with the Environmental Assessment development work we will provide updates via project notifications to Indigenous communities, government agencies, municipal officials, members of the public and other interested stakeholders.

Please feel free to contact us if you would like more information.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Mantifel".
