

YOU'RE INVITED TO A COMMUNITY OPEN HOUSE

Leaside to Main Infrastructure Refurbishment Project

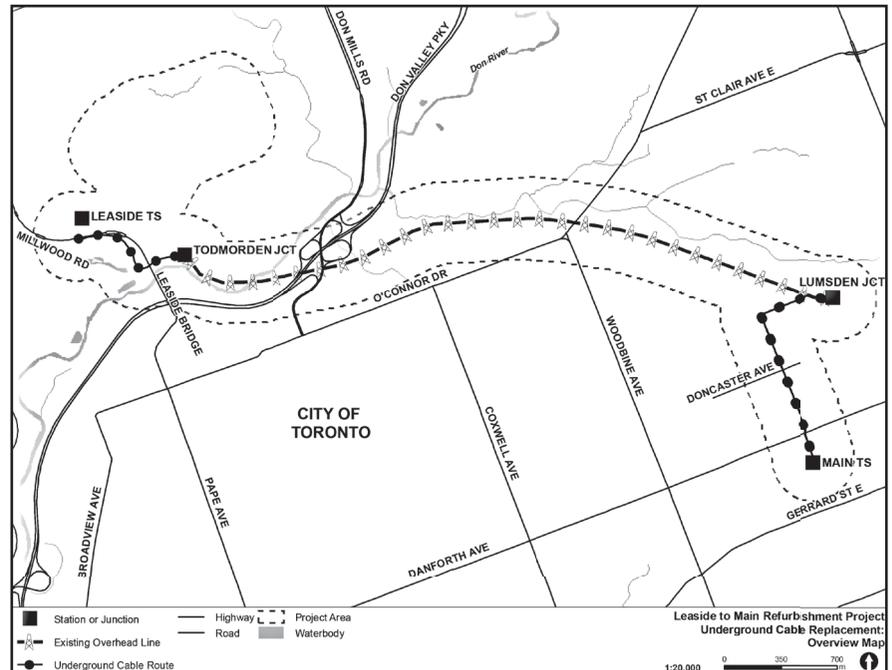

In February 2018, Hydro One will begin construction to refurbish existing transmission infrastructure located in the eastern part of Toronto. This equipment was installed in the 1960s and has reached its end-of-life. These upgrades are important to ensure a reliable and strong supply of power for Toronto Hydro customers.

The work will include:

1. Replacing two sections of underground 115 kilovolt (kV) transmission cable between:

- Leaside Transformer Station (TS) near Millwood Road and Overlea Boulevard, and Todmorden Junction (JCT), under Leaside Bridge and;
- Lumsden JCT, near Eastdale Avenue and Lumsden Avenue and Main Transformer Station (TS), near Main Street and Stephenson Avenue.

2. We will also be replacing and upgrading approximately 5 km of shield wire that protects our equipment from lightning along overhead towers between Todmorden JCT and Lumsden JCT in the vicinity of Taylor Creek Park. Our forestry team has coordinated the timing of routine vegetation maintenance along this corridor to be completed at the same time.

These activities will be staged over a one-year period.

To learn more about this project, we encourage you to drop in at one of our upcoming Community Open Houses.

January 17, 2018

6:00 p.m. – 8:00 p.m.
Hope United Church
2550 Danforth Avenue

*TTC will be in attendance to share details about track work and improvements planned for Main Station and the surrounding area, scheduled to begin in May 2018.

January 23, 2018

6:00 p.m. – 8:00 p.m.
Trace Manes Park
Community Centre
110 Rumsey Road

February 7, 2018

7:00 p.m. – 9:00 p.m.
Canadian Martyrs Catholic
School
520 Plains Road

Members of our team will be available to discuss the project, schedule and what you can expect when construction is occurring in your neighbourhood. We encourage you to attend a session to provide your input, ask questions and meet our team.

Keep in touch
