

NOTICE TO TRAIL USERS

As part of Hydro One's Leaside to Main Refurbishment Project, we will be installing a new underground cable between Leaside TS and Todmorden Jct, as shown on the below map. These upgrades will ensure a safe and reliable supply of power to Toronto Hydro customers.

In order to ensure public safety, temporary restrictions to informal pathways shown below will be in effect while construction is completed between February 2018 – June 2018.

We recognize this area is regularly used by community members and have identified one location where alternate access can be accommodated when conditions are deemed safe. During this time, you will also notice an increase in noise, activity and heavy machinery.

Thank you for your patience while we complete this important project.
