Dear Ms. Marconi,

EB-2023-0328 – Application by Chapleau Public Utilities Corporation (“CPUC”) for leave to sell its distribution system to Hydro One Networks Inc. (“Hydro One”) – Supplemental Evidence

On November 20, 2023, CPUC and Hydro One filed a MAAD application for CPUC to sell its distribution system to Hydro One. Hydro One realizes that a couple items of evidence were missing from its application and would like to add the following to this application.

Net Metering Threshold

- There are no net metering customers in the current CPUC service area. Therefore, there will be no impact or restriction to any prospective net metered customers.

OMA Cost/Customer

- The MAAD filing requirements ask for a comparison of OMA costs per customer between the consolidating entities. Based on the OEB 2021 Yearbook, the following information was derived.

	CPUC	Hydro One
OMA	\$742,756	\$591,198,490
# customer	1,224	1,439,974
Cost/Customer	\$606.83	\$410.56

- Hydro One notes that these numbers are on a total company basis and do not account for variances in customer mix.

Sincerely,

Joanne Richardson
