

NOTICE OF A HEARING

Hydro One Networks Inc. has applied for approval to build a high-voltage transmission line in Southwestern Ontario

The application seeks:

- Permission for Hydro One Networks Inc. (HONI) to construct a 230 kilovolt double-circuit transmission line from the Lambton Transformer Station, connecting to the Wallaceburg Transformer Station and ending at the Chatham Switching Station. The approximate length of the transmission line facilities is 64 km.
- Permission for HONI to convert the Wallaceburg Transformer Station from a 115 kilovolt supply to a 230 kilovolt supply to repurpose the existing 115 kV transmission supply line corridor for the new transmission line.
- Approval to complete any associated any station facility expansions or upgrades required at the terminal stations.
- Approval of the forms of agreement that HONI will offer affected landowners.

The OEB hearing is not the only approval process required before a line is built.

Environmental issues, or issues related to the Crown's duty to consult Indigenous peoples, are not part of the OEB's review unless there is a direct impact on price and the reliability and quality of electricity service.

A map of the proposed route for the transmission line is provided on the right:

YOU SHOULD KNOW

There are three types of OEB hearings: oral, electronic and written. The applicant has requested a written hearing. If you think a different hearing type is needed, you can write to us to explain why.

During this hearing, we will hear questions and arguments from participants about this case. We will also hear questions and arguments from participants that have registered as Intervenor. After the hearing, we will decide whether to approve the application.

HAVE YOUR SAY

You have the right to information about this application and to participate in the process. Visit www.oeb.ca/notice and use file number **EB-2024-0155** to:
