NOTICE OF APPLICATION AND WRITTEN HEARING

Application by Hydro One Networks Inc. for a Six Month Exemption from the Timelines for the Connection of Micro-Embedded Generators

Hydro One Networks Inc. ("Hydro One") has applied to the Ontario Energy Board ("Board") for a six month exemption from the required timelines to connect micro-embedded generation facilities to Hydro One's distribution system. Hydro One states the volume of requests to connect micro-embedded generation projects has been well beyond its expectations and that it expects the volume of connection requests to continue to increase. Hydro One also requests an immediate interim stay of obligations from the timelines for the connection of micro-embedded generation facilities as of the date the application was filed and until the Board renders a final decision on the matter.

The timelines Hydro One is currently required to meet and for which it has applied for a six month exemption are found in sections 6.2.6 and 6.2.7 of the Ontario Energy Board's Distribution System Code ("DSC").

Those sections require a distributor make an offer to connect or provide reasons for refusing connection of micro-embedded generation facilities within:

- 15 days if the applicant is located at an existing customer connection; or
- 60 days if the applicant is not located at an existing customer connection.

In either case, the distributor is not permitted to charge for the preparation of the offer to connect and must give the applicant at least 30 days to accept the offer to connect. The distributor is not permitted to revoke the offer to connect until the 30 day period has expired.

The DSC also requires the distributor to connect the applicant's micro-embedded generation facility to its distribution system within 5 days of an applicant informing the distributor that it has:

- received all necessary approvals;

- provided the distributor with a copy of the authorization to connect from the Electrical Safety Authority;
- entered into a Connection Agreement; and
- paid the distributor for the connection costs, including costs for any necessary new or modified metering.

During the six month exemption, Hydro One proposes to conform to sections 7.2.1 and 7.2.3 of the DSC, which require that connections must be completed within five business days from the day on which all applicable service conditions are satisfied, or at a later date agreed to by the customer and distributor. Sections 7.2.1 and 7.2.3 also stipulate that this requirement must be met at least 90% of the time on a yearly basis.

Hydro One states a period of six months would be sufficient to allow it to deal with the anticipated high volume of micro-embedded generator applications to manage its activities through the summer construction, new connects and high load periods, and to make any necessary revisions to business processes.

Written Hearing

Hydro One has requested this matter proceed by way of written hearing. If you object to the Board holding a written hearing in this matter, you must file with the Board written reasons why an oral hearing is necessary and copy these reasons to the applicant within **10 days** of the publication or service date of this notice.

Interim Order

Hydro One has also asked the Board to immediately but temporarily relieve Hydro One of its obligations under Section 6.2.6 and 6.2.7 of the DSC from the date that Hydro One filed its application until the date the Board renders its decision on the exemption request. If you would like to make a submission on this request for immediate relief you must provide your written submission to the Board and copy Hydro One within **10 days** of the publication or service date of this Notice. Hydro One may file a response to any submissions made on its request for immediate relief with the Board no later than **17 days** following the date of the publication or service date of the Notice and shall copy all parties that made submissions on this issue.
