

Investor overview

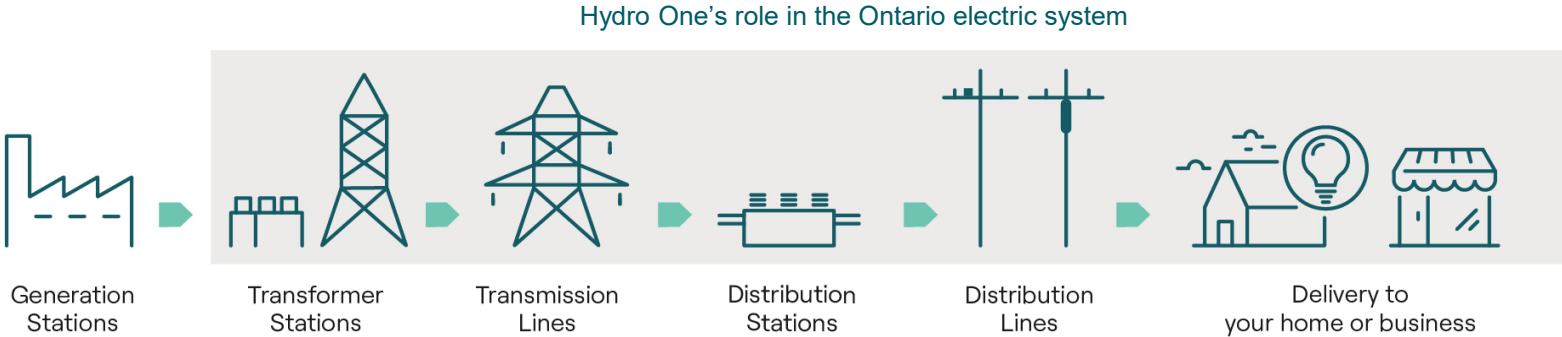

Post second quarter 2022

Why invest in Hydro One

A unique low-risk opportunity to participate in the transformation of a premium, large scale regulated electric utility

- One of the largest electric utilities in North America with significant scale and leadership position across Canada's most populated province.
- One of the strongest investment grade balance sheets in the North American utility sector.
- Unique combination of pure-play electric power transmission and local distribution, with no generation or material exposure to commodity prices.
- Stable and growing cash flows with 99% of business fully rate-regulated in a constructive, transparent and collaborative regulatory environment.
- Predictable self-funding organic growth profile with expanding rate base and strong cash flows, together with broad support for refurbishment of aging infrastructure and with ~6% expected rate base CAGR¹. No external equity required to fund planned growth.
- Transparency in our Environmental, Social and Governance (ESG) reporting.
- Increased \$1.1184 annualized dividend with 70% - 80% target payout ratio.
- Opportunity for continued dividend growth with rate base expansion, continued consolidation and efficiency realization.

~6%	Rate base growth ¹
4-7%	EPS growth over 2019-2022 ²
~5%	Average annual dividend growth

¹ Subject to change upon approval of Joint Transmission and Distribution Rate Application for 2023 -2027.
² Future guidance to be updated post approval of the Joint Transmission and Distribution Rate Application

Recent developments

Organization Priorities

Second Quarter Highlights

- Second quarter basic earnings per share (EPS) of \$0.43 was 7.5% higher compared to EPS of \$0.40 for the same period in 2021.
- EPS for the quarter was higher year over year primarily due to approved rates for the transmission and distribution segments, and higher demand, partially offset by higher depreciation, amortization and asset removal costs and higher financing charges.
- Hydro One restores power to approximately 760,000 customers following the May 21, 2022 devastating storm.
- Hydro One released its annual sustainability report (www.hydroone.com/sustainability) that demonstrates continued progress in setting and meeting its sustainability goals.
- The Company announced that members of the Canadian Union of Skilled Workers (CUSW) ratified the renewal of the collective agreement.
- Hydro One won the Gold Best Practices Award in customer service from Chartwell Inc., a company that has been helping utilities improve customer experience and satisfaction as well as operational efficiency for 25 years.
- Hydro One earns 12th Emergency Response Award from the Edison Electric Institute for restoring power to more than half of affected customers within the first 24 hours following severe storm during the Easter long weekend.
- Hydro One was recognized again by Corporate Knights as a Best 50 Corporate Citizen in Canada.
- William (Bill) Sheffield appointed as Interim President and CEO following Mark Poweska's resignation to assume a leadership position at a utility closer to his family in Western Canada later this year. Mark remains with the Company as an advisor to support Bill with the transition.
- The Company's capital investments and in-service additions for the quarter were \$612 million and \$547 million, respectively, compared to \$553 million and \$300 million in 2021.
- Quarterly dividend declared at \$0.2796 per share, payable September 29, 2022.

The value of Hydro One

ABOUT THE COMPANY

Transmission & Distribution

~30,000 circuit KMs of transmission lines

Largest Local Distribution Company in Ontario with approximately 1.5 million customers

Combined 2022 Transmission & Distribution Rate Base of \$23.6B²

Market Capitalization of ~\$20.7¹ billion

Regulated and Privatized Operations

99% of revenue from regulated operations

Privatization initiative by Province of Ontario to divest majority stake in Hydro One largely complete with post November 2015 IPO (15%), April 2016 secondary (15%), and May 2017 secondary (20%) offerings

HOW WE DID IN 2021

Hydro One's strategy

Strategic priorities

Plan, design, and build a grid for the future

Be the safest and most efficient utility

Be a trusted partner

Advocate for our customers and help them make informed decisions

Innovate and grow the business

Areas of focus

We will plan, design and build a reliable grid taking into account changing technologies to prevent future outages.

There will be increased focus on grid resilience in order to restore power after events. Climate change and sustainability factors will be taken into consideration in our planning processes to increase resilience and lower our environmental footprint.

We will incorporate distributed energy resources to enable customer choice while delivering exceptional value to customers through best-in-class asset management practices.

We will transform and improve our safety culture through robust safety analytics as well as grass-roots engagement with our employees.

Field operations will be more empowered to drive efficiency, productivity and reliability and provided with efficient corporate support.

There will be a focus on efficient capital delivery to support an ongoing growing work program.

We will make concerted efforts to build and grow relationships with Indigenous peoples, government and industry partners.

We will proactively address community concerns and establish strong partnerships with our customers through local investment and economic development for the benefit of Ontarians.

We will make it easier to do business with Hydro One by strengthening the customer experience through innovative customer centric practices.

We will help our customers make informed decisions with deeper insights and leverage our position as energy experts. We will expand access to energy offerings to become the provider of choice to our customers.

We will continue to invest responsibly in our core transmission and distribution business.

In addition, we will pursue incremental regulated and unregulated business opportunities through innovation and our focused presence in Ontario.

Enablers

- A people focus that inspires employees and prepares the right workforce for evolving needs
- A regulatory focus to support our strategic vision
- A technology focus to enhance workforce efficiency

Achievements and efficiencies

Paving New Paths in Productivity Savings (\$M)

Generated productivity savings of \$343.9 million in 2021 comprised of \$160.4 million in OM&A and \$183.5 million in capital and totaling approximately \$1.1 billion dollars since 2015

Forestry transformed work execution by streamlining overhead lines and pole inspections – eliminating the cost of the historical line patrol program

Strategic sourcing initiatives led to price reduction for materials and services as a result of consolidating spend across Hydro One and increasing competition among vendors

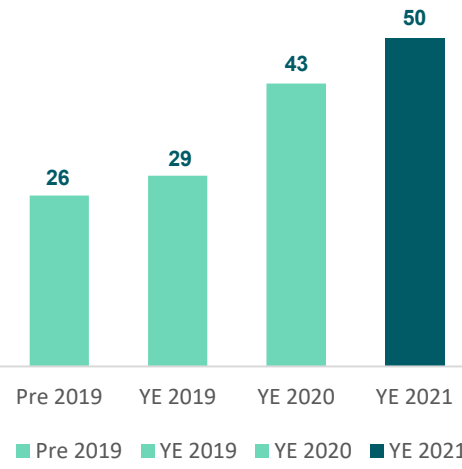

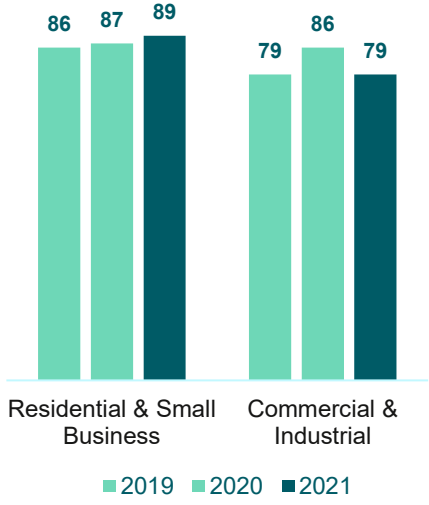

Hydro One leveraged telematics data to identify underutilized fleet equipment leading to fleet optimization

Managed contract cost reduction in IT services. Hydro One leveraged negotiated rate reductions to optimize IT project delivery

High Customer Satisfaction (%)

Greening the Fleet

The regulated business

Transmission

- Transmission produces reliable cash flow with low volatility under the OEB Custom IR framework
- Hydro One filed a 5-year Custom IR application for Transmission from 2023-2027
- Growing rate base with planned annual capital investments of ~\$1,180 - ~\$1,700 million till 2027²
- Current allowed ROE of 8.52% with 40% / 60% deemed equity/debt capital structure through 2022
- Hydro One owns and operates 98% of Ontario's transmission capacity¹
- Emerging industries and system requirements helping drive expansion of transmission network

37 LDC customers

85 Large directly connected industrial customers

~30,000 Transmission lines (circuit km)

306 Transmission stations in service

Distribution

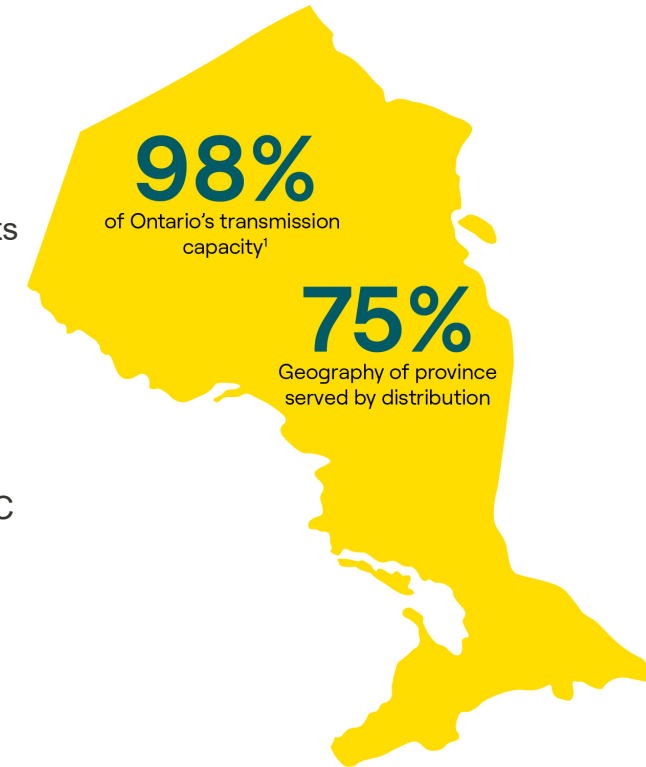

- Distribution is a stable, rate-regulated business operating under OEB's Custom IR framework
- Hydro One filed a 5-year Custom IR application for Distribution from 2023-2027
- Growing rate base with planned annual capital investments of ~\$800 - ~\$1,200 million till 2027²
- Current allowed ROE of 9.00% with 40% / 60% deemed equity/debt capital structure through 2022
- OEB decision in place transitioning residential distribution rates to fully fixed
- Orillia, Peterborough, Haldimand, Woodstock, Norfolk LDC acquisitions

over **90** LDC's consolidated since 1999

~125,000 Distribution lines (circuit KM)

~1.5M Distribution end customers

~1,000 Distribution and regulating stations

1) Based on revenue approved by the OEB
2) Subject to change upon approval of the Joint Transmission and Distribution Rate Application for 2023-2027

Electric Local Distribution Company (LDC) consolidation

<p>Consolidator of Choice</p>	<ul style="list-style-type: none"> Hydro One is the largest LDC in Ontario; 55 LDCs are Hydro One transmission or distribution customers Hydro One has significant scale in Ontario and serves customers through a distribution system spanning 125,000 circuit kilometers
<p>Historical Acquisitions</p>	<ul style="list-style-type: none"> Hydro One has acquired more than 90 LDCs in Ontario since the year 1999 Recent acquisitions include Peterborough and Orillia (2020), Woodstock and Haldimand (2015) and Norfolk (2014)
<p>Synergy Potential</p>	<ul style="list-style-type: none"> Hydro One can offer Ontario's fragmented distribution sector significant synergies Peterborough, Orillia, Woodstock, Haldimand and Norfolk are anticipated or have realized OM&A savings over 50%
<p>Addressable Market</p>	<ul style="list-style-type: none"> 57 LDCs¹ in Ontario Total rate base of approximately \$12B¹, of which the largest 5 LDCs account for approximately \$9B¹
<p>Consolidation Strategy</p>	<ul style="list-style-type: none"> Hydro One is focused on engaging communities, municipalities and LDCs as partners in a number of ways Hydro One will likely realize greater synergies than other potential acquirers especially if a target is contiguous to Hydro One's existing service territory

- Infrastructure-as-a-Service (IaaS)

Operations

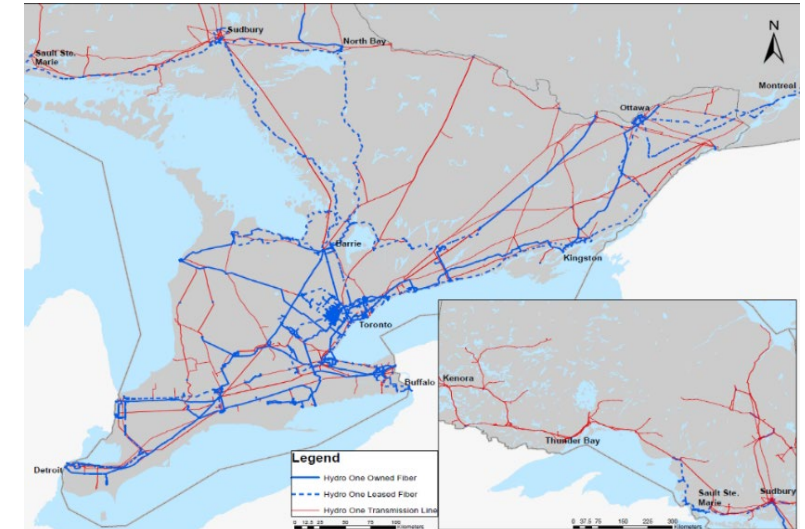

Outsourced operational services that leverage highly specific expertise, resources and manpower to simplify operations and reduce operating expenses

- Network Operations-as-a-Service (NOS)
- Field Operations-as-a-Service (FOS)
- Equipment Spares Management and Network Planning

Voice & Collaboration

VoIP infrastructure and advanced telephony and collaboration solutions

- SIP Trunking
- Unified Communications as a Service

The market

- Core connectivity revenues declining; a shift towards cloud connectivity, managed services & security-based services with increasing bandwidth demand
- Canadian telecom market is approx. \$53B (2020) – Enterprise and Wholesale segments represent nearly \$22B of the addressable market with Ontario 43% of the national total

Sustainability at Hydro One

At Hydro One, we are committed to operating safely in an environmentally and socially responsible manner in partnership with our customers and community stakeholders to build a brighter future for all.

ESG Performance Scorecard

In 2021, we made good progress on advancing our performance in our priority areas of People, Planet and Community. We know we have work to do, and we are committed to reporting transparently on our progress toward achieving our goals. To demonstrate our strong commitment to our ESG goals, we amended our syndicated lines of credit to include a pricing adjustment which can increase or decrease our cost of funding based on our performance in these three priority areas.

People Diversity, Equity and Inclusion 	Planet Climate Change Mitigation and Adaptation 	Community Indigenous and Community Partnerships 
<p>Goals</p> <p>Hydro One signed the BlackNorth Initiative Pledge and is committed to achieving 3.5% Black executives and Board directors, and 5% Black student hires by 2025.</p> <p>As a signatory to the Catalyst Accord, Hydro One is committed to achieving at least 30% female executives and Board members.</p>	<p>Goals</p> <p>Hydro One is committed to achieving net-zero GHG emissions by 2050. We have established a target to achieve a 30% GHG reduction by 2030.¹</p> <p>We plan to convert 50% of our fleet of sedans and SUVs to electric vehicles or hybrids by 2025 and 100% by 2030.</p> <p><small>1 Measured against the 2018 baseline</small></p>	<p>Goals</p> <p>Hydro One is committed to increasing our Indigenous procurement spend to 5% of the company's purchases of materials and services by 2026.</p> <p>As part of our community investment program, we are committed to ensuring that 20% of our corporate donations and sponsorships support Indigenous communities.</p>
<p>2021 Performance</p> <ul style="list-style-type: none"> By year-end, we had 9% Black students and no Black executives or Board directors in our ranks. Our 2021 annual average of executives and Board members identifying as female was 31% of executives and 50% of independent Board directors. 	<p>2021 Performance</p> <ul style="list-style-type: none"> In 2021, we reduced our GHG emissions by 9% compared to our 2018 baseline. We converted approximately 14% of our fleet of sedans and SUVs to electric or hybrid vehicles, a slower pace than anticipated due to ongoing supply chain disruptions, including a global shortage of vehicle computer chips. 	<p>2021 Performance</p> <ul style="list-style-type: none"> We surpassed our Indigenous procurement target for 2021, spending \$58.3 million – or 3.4% of our total sourceable spend – with Indigenous businesses, our highest to date. We allocated 25% of our community investment donations and sponsorships to support Indigenous communities, beyond our original impact goal of 20%.

Sustainability at Hydro One

At Hydro One, we are committed to operating safely in an environmentally and socially responsible manner and to partnering with our customers, community stakeholders to build a brighter future for all.

A Sustainable Future for All

- 45% Board of Directors are women, 9% Indigenous, and 9% have a disability (Full board). ~31% Executives are women, 23.7% are Black and People of Colour (BPOC) and 2.6% have a disability.
- ~\$2.1 billion in capital investments to expand electricity grid and renew and modernize existing infrastructure
- We created the Hydro One Business Grant, in partnership with the Canadian Council for Aboriginal Business, to provide direct financial support to 28 Indigenous-owned businesses.
- Hydro One transmits and distributes electricity that is approximately 94%¹ carbon emission-free² and our GHG emissions are estimated to account for 0.21% of Ontario's total GHG emissions.³
- Hydro One avoided approximately 4,273 tCO₂e of emissions as a result of renewable energy technology, conservation programs, the expansion of the Ivy network and the increase of customers choosing the e-billing option on their bill
- These avoided emissions are equivalent to a year's exhaust from approximately 1,309 passenger vehicles⁴
- Designated as a Sustainable Electricity Company by Electricity Canada (formerly the Canadian Electricity Association)
- ~\$58.3 million total procurement spending with Indigenous businesses – our highest ever spend
- Residential and small business customer satisfaction scores were the highest in ten years at 89%, and transmission customer satisfaction increased to 92%
- ~\$3.3 million in sponsorships and donations
- Hydro One recognized as one of the Best 50 Corporate Citizens in Canada by Corporate Knights

1. The Canadian Energy Regulator has been used historically as the data source for this indicator. Going forward, Hydro One will report on this metric using data provided directly from the IESO for Ontario.

2. The average Ontario system grid emissions five-year average is 26.4 gCO₂e/kWh (2016–20). Source of data: Canada's National Inventory Report, 1990–2020.

3. All data is from the Environment and Climate Change Canada's National Inventory Report 1990–2020: Greenhouse Gas Sources and Sinks in Canada, Part 3. Hydro One's emissions are those that directly relate to the electricity sector. 24 Scope 1 - Direct emissions from sources owned or controlled by Hydro One.

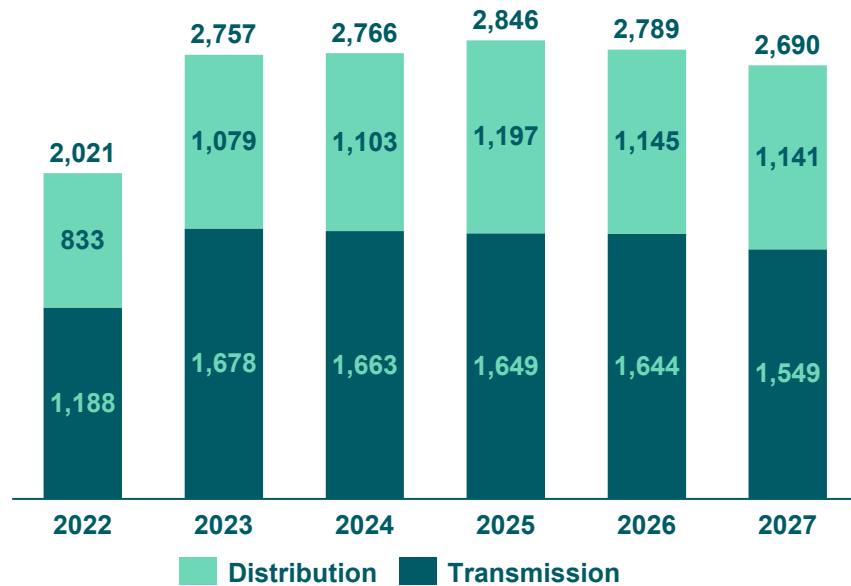

4. Calculated from <https://oee.nrcan.gc.ca/corporate/statistics/neud/dpa/calculator/ghg-calculator.cfm>.

Capital investment driving rate base growth

Consistent and predictable organic growth profile underpinned by required replacement of aging infrastructure

Projected Regulated Capital Investments* (\$M)

Historical and Projected Rate Base Growth* (\$M)

* Subject to change upon OEB approval of Joint Rate Application for 2023 -2027.
 * Figures include investments in certain development projects of Hydro One Networks not included in the investment plan filed with the JRAP.
 * 2025-2027 years contain Chatham to Lakeshore Transmission Line based on Section 92 estimates and subject to OEB approval. 2025 estimate is a proportionate estimate based on anticipated in-service date.

Comments

- Organic growth underpinned by continued rate base expansion to both renew and modernize the grid
- Material amounts of deteriorated, end-of-service life infrastructure must be upgraded or replaced
- Customers supportive of replacing aging infrastructure that is in poor condition
- Equity issuance not anticipated for planned capital investment program which is self-funded

Affirmed 2022 guidance

- Company estimates subject to change and include amounts from 2018-2022 Approved Distribution Rate Order, and 2020-2022 Approved Transmission Rate Order.
- The forward-looking information in this presentation is based on a variety of factors and assumptions, as described in the 2021 Year End and 2022 Second Quarter financial statements and management's discussion and analysis. Actual results may differ materially from those predicted by such forward-looking information.

Capital investment driving rate base growth

Chatham to Lakeshore Transmission Line¹

Estimated Total Project Cost: \$268 million

Capital Cost To Date: \$19 million

Anticipated In-Service Date: 2025

The Chatham to Lakeshore Transmission Line consists of the construction of a new double-circuit 230 kilovolt line between Chatham and Lakeshore and associated transmission stations and connections.

Lennox Transmission Station Circuit Breaker Replacement³

Estimated Total Project Cost: \$152 million

Capital Cost To Date: \$109 million

Anticipated In-Service Date: 2026

Lennox Transmission Station is based in Napanee, Southeastern Ontario. The circuit breaker project is a station sustainment initiative scheduled for completion in 2026.

East-West Tie Station Expansion²

Estimated Total Project Cost: \$181 million

Capital Cost to Date: \$180 million

Anticipated In-Service Date: 2023

The East-West Tie transmission project is a 450 km double-circuit 230 kV transmission line connecting the Lakehead Transfer Station in the Municipality of Shuniah near the city of Thunder Bay to the Wawa Transfer Station located east of the Municipality of Wawa.

¹ Chatham to Lakeshore Transmission Line projects were previously included as part of the Leamington Area Transmission Reinforcement Project. The Chatham to Lakeshore Transmission Line project includes the line and associated facilities.

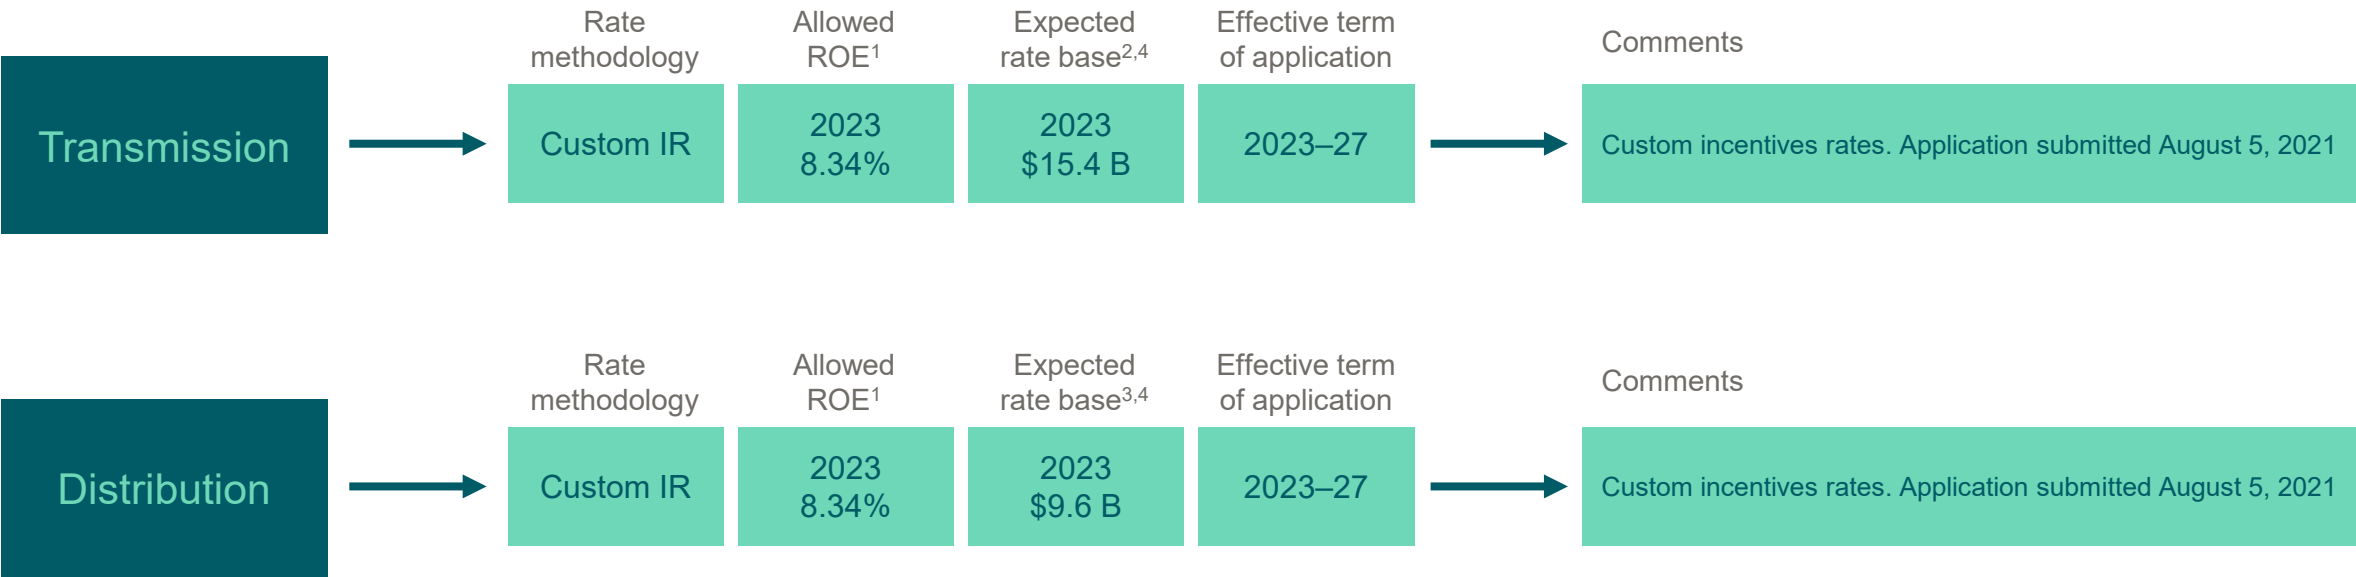

² Due to a revised timeline of project activities, the East-West Tie Station Expansion project is being placed in-service in phases, with the first phase placed in-service in 2021. Hydro One expects that a significant portion of the project will be placed in-service in 2022, with final project in-service expected in 2023.

³ Image below represents a generic circuit breaker, not the particular Lennox Transmission Station project.

Constructive rate regulator (OEB)

Ontario Energy Board (OEB) is a consistent, independent regulator with a transparent rate-setting process

- Transmission and Distribution businesses rate-regulated by the OEB
- Deemed debt / equity ratio of 60% / 40% for both transmission and distribution segments
- Reduced regulatory lag through forward-looking test years, revenue decoupling and adjustment mechanisms
- Joint Rate Application (JRAP) submitted August 5, 2021 for transmission and distribution under the OEB’s Custom Incentive Rate Making model for 2023 – 2027 (5-year term)
- Evidence updated on March 31, 2022 to reflect current market conditions.

1. Allowed ROE for 2023 for Transmission and Distribution is a placeholder as submitted in the Application until Q4 of 2022 when the OEB will release the final ROE.
 2. Transmission rate base includes 100% of B2M LP, Niagara Reinforcement Limited Partnership and Hydro One Sault Ste. Marie Limited Partnership.
 3. Distribution Rate Base includes LDC acquisitions (Peterborough Distribution Inc., Orillia Power Distribution Corporation) and Hydro One Remote Communities
 4. Reflects updated inflationary assumptions for JRAP filed with the OEB on March 31, 2022.

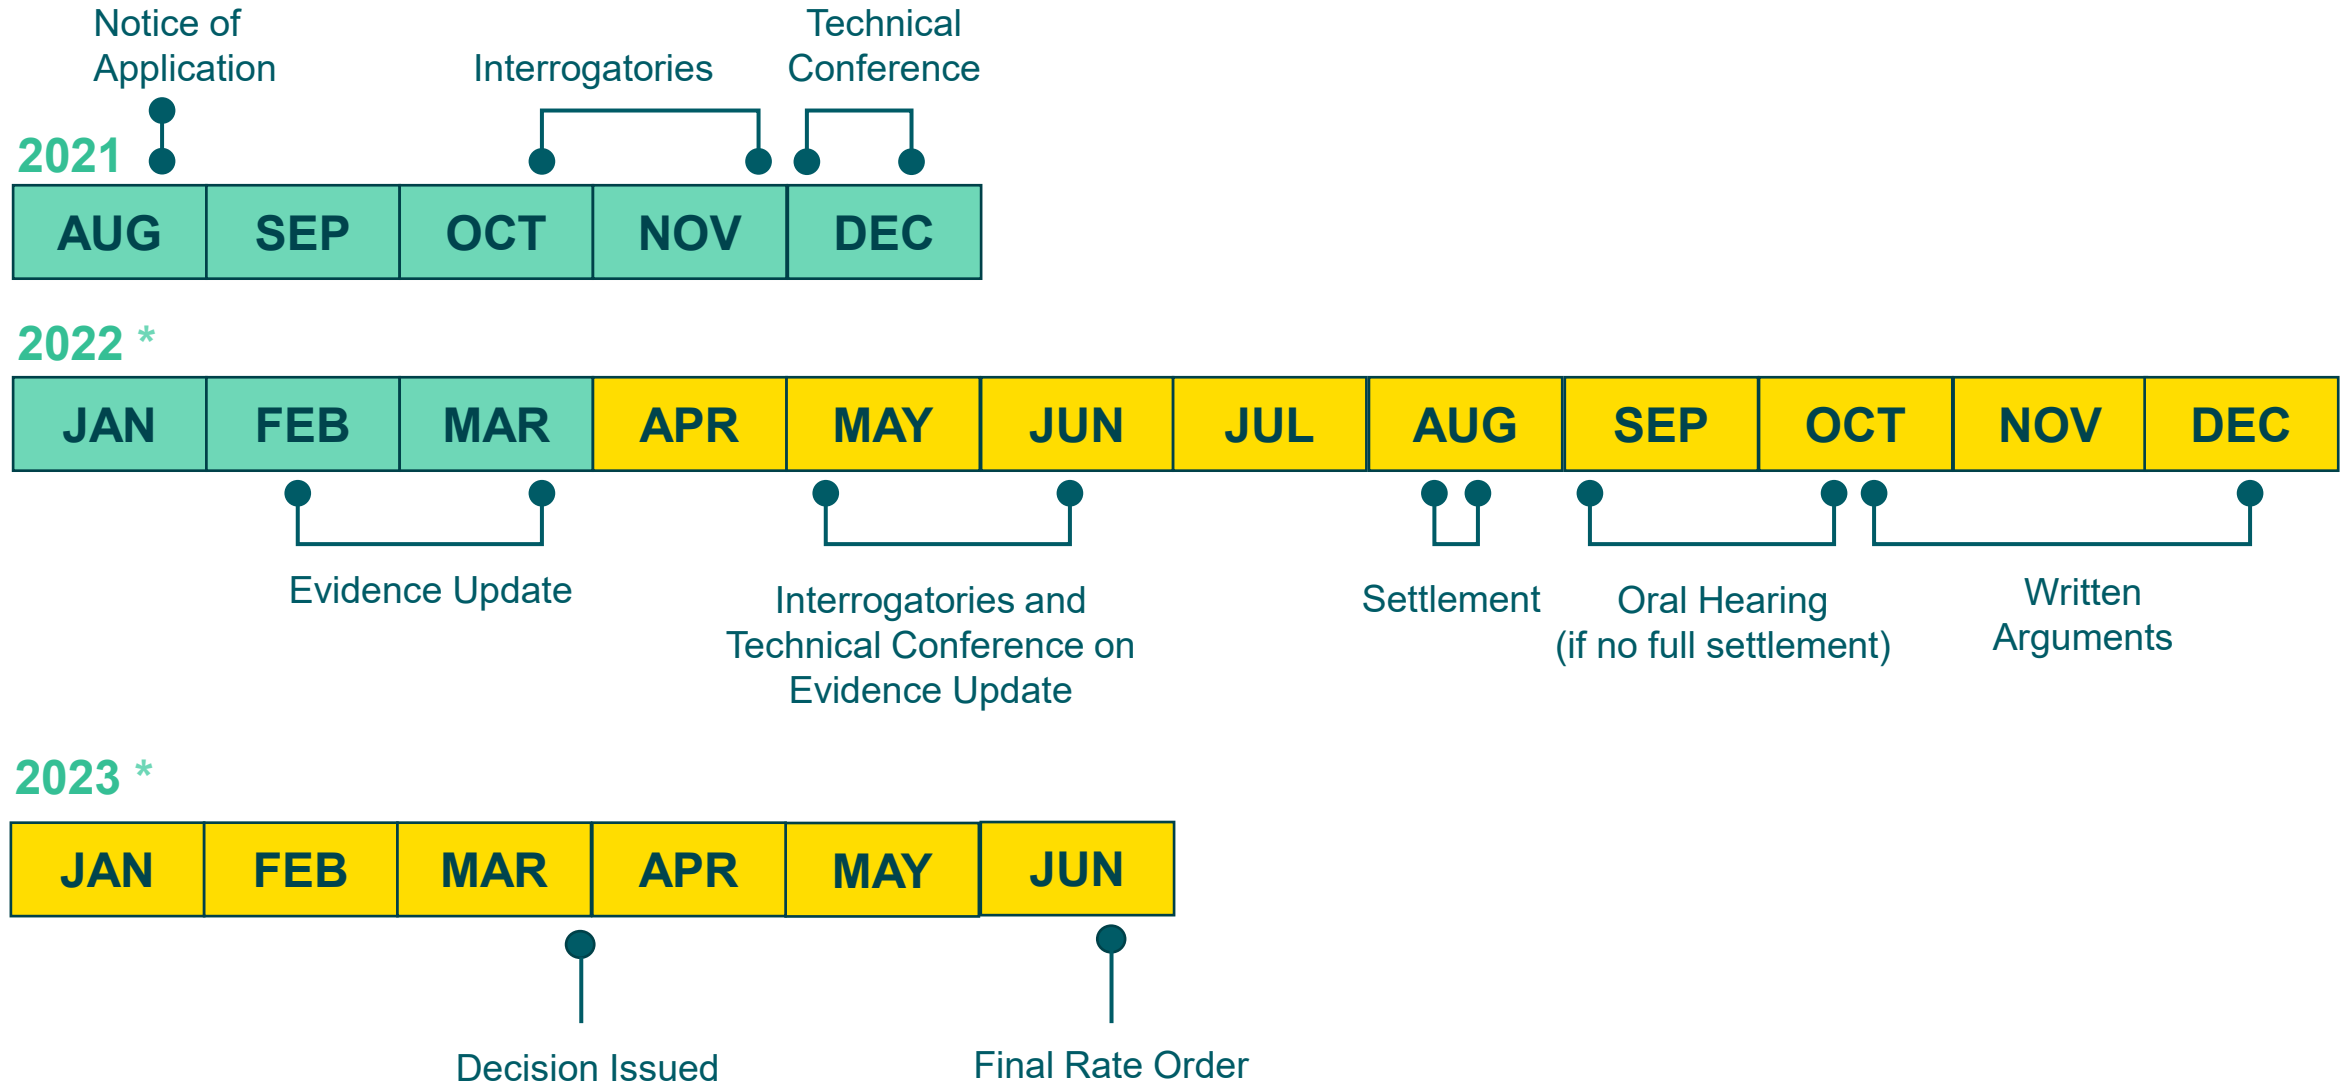

JRAP – Segmented incentive regulatory construct

The transition from cost of service to incentive based regulatory model coincident with transformation of business will create value for both customers and shareholders

	Hydro One Ltd. (HOL)	Hydro One Inc. (HOI)
S&P	BBB+ / n/a / stable	A- / A-1 (low) / stable
DBRS	A / n/a / stable	A (high) / R-1 (low) / stable
Moody's	n/a	A3 / Prime-2 / stable

Shelf registrations

HOL Universal shelf ² \$2.0B
HOI Medium term note shelf ³ \$4.0B

Debt maturity schedule (\$M)

Weighted-average coupon rate of long-term debt: 3.8%
 Weighted-average term of long-term debt (years): 15.0
 Debt to Capitalization⁵: 56.4%
 FFO to Debt⁶: 15.2%

1. In January 2022, Hydro One successfully amended its Operating Credit Facilities to add Sustainability Linked Pricing to incorporate environmental, social and governance (ESG) targets.
 2. In August 2020, HOL filed a universal short form base shelf prospectus (Universal Base Shelf Prospectus) with securities regulatory authorities in Canada, which allows it to offer, from time to time in one or more public offerings, up to \$2.0 billion of debt, equity or other securities, or any combination thereof, and expires in September 2022. At June 30, 2022, \$1.575 billion remained available for issuance under the Universal Base Shelf Prospectus. A new Universal Base Shelf Prospectus is expected to be filed in the third quarter of 2022.
 3. In June 2022, HOI filed a short form base shelf prospectus in connection with its Medium Term Note (MTN) Program, which has a maximum authorized principal amount of notes issuable of \$4.0 billion, and expires in July 2024.
 4. Includes long-term debt of Hydro One Sault Ste. Marie LP, a subsidiary of Hydro One Inc., in the principal amount of \$133 million due in 2023.
 5. Debt to capitalization is a non-GAAP ratio. Non-GAAP ratios do not have a standardized meaning under US GAAP used to prepare the Company's financial statements and might not be comparable to similar financial measures presented by other entities. Debt to capitalization ratio has been calculated as total debt (including total long-term debt and short-term borrowings, net of cash and cash equivalents) divided by total debt plus total shareholders' equity, but excluding any amounts related to noncontrolling interest. Management believes that the debt to capitalization ratio is helpful as a measure of the proportion of debt in the Company's capital structure. See the section titled "Non-GAAP Measures" in the Annual MD&A and in the Interim MD&A for a discussion of this non-GAAP ratio and its component elements.
 6. FFO to Debt is a non-GAAP ratio. Non-GAAP ratios do not have a standardized meaning under US GAAP used to prepare the Company's financial statements and might not be comparable to similar financial measures presented by other entities. FFO to Debt has been calculated as: FFO for the last twelve months ending June 30, 2022 divided by total debt (including total long-term debt, and short-term borrowings, net of cash and cash equivalents). Management believes that FFO is helpful as a supplemental measure of the Company's operating cash flows as it excludes timing-related fluctuations in non-cash operating working capital and cash flows not attributable to common shareholders. As such, management believes that FFO provides a consistent measure of the cash generating performance of the Company's assets. See the section titled "Non-GAAP Measures" in the Annual MD&A and in the Interim MD&A for a discussion of these component elements.

 3. All dividend declarations and related dates are subject to Board approval.
 4. Denotes annual cash dividends paid.
 5. The first common share dividend declared by Hydro One Limited following the November 5, 2015 initial public offering of its common stock included 13 cents for the post IPO fourth quarter period of November 5 through December 31 2015.

Appendix

JRAP - Investments: Transmission

Maintaining the System

- Reinvesting in existing infrastructure to maintain the health of the system, sustain performance and address safety and environmental risk.

~\$3.6B¹ to address **station assets**, including those which link major generation resources to major load centers and those that serve electric Local Distribution Companies (LDCs) and large industrial facilities

~\$2.0B¹ to address **lines assets**, which serve smaller towns, First Nations communities and businesses, pipeline compressor stations, and large load facilities such as mines and paper mills

1. Reflects updated inflationary assumptions (Exhibit O-1-2) filed with the OEB on March 31, 2022. The original values were ~\$3.5B and ~\$1.9B respectively based on evidence filed in the JRAP Transmission System Plan (dated Aug 5, 2021).

JRAP - Investments: Distribution

New Infrastructure:

Modernize infrastructure to detect, repair & restore power quicker (**improving reliability by ~25%** by 2027).

Significant investments to **accommodate increase in regional load demand** (e.g. **\$170 million in the Leamington area** to support the growth of the greenhouse sector, in addition to over \$200 million invested through 2022).

Maintaining the System:

Over \$590 million to address poor condition wood poles to **maintain overall health** of system, reduce likelihood of extended outages and **enable broadband**.

Mass meter and network replacement is planned over a **5-year period** beginning in 2023

Note: Reflects updated inflationary assumptions filed with the OEB on March 31, 2022.

JRAP - Cost of plan¹

Hydro One's plan will see the typical customer's bill increase by

less than expected inflation.

A typical residential customer's monthly bill will increase by an average of

\$1.68

each year over the five-year period.

1. As filed in the Joint Rate Application. In its March 31, 2022 update, Hydro One proposed to defer recovery of the incremental revenue requirement associated with updated inflation assumptions and the incremental revenue requirement equal to the revenue deficiency arising from the update to Hydro One's load forecasts. As a result of the proposed revenue deferral, the rate impacts for customers are not expected to materially change relative to what was filed in the JRAP.

Current Rate Periods - Constructive rate regulator (OEB)

Consistent, independent regulator with a transparent rate-setting process

- Transmission and Distribution businesses rate-regulated by the OEB
- Deemed debt / equity ratio of 60% / 40% for both transmission and distribution segments
- Reduced regulatory lag through forward-looking test years, revenue decoupling and adjustment mechanisms
- Received a decision for distribution rates under the OEB's Custom Incentive Rate Making model on March 7, 2019 for 2018 – 2022 (5-year term)
- Received a decision on transmission revenue requirement under the OEB's Custom Incentive Rate Making model on April 23, 2020, for 2020 – 2022 (3-year term)

	Current rate methodology	Allowed ROE	Expected rate base ¹	Effective term of application	Comments
Transmission	Custom IR	2022 8.52%	2022 \$14.5 B	2020–22	Custom incentives rates. Decision for 2020-2022 transmission revenue requirement received. 2021 annual update approved in Q4 of 2020 to reflect the latest inflation assumptions.
Distribution	Custom IR	2022 9.00%	2022 \$9.2 B	2018–22	Custom incentive rates. Decision for 2018-2022 distribution rates received. 2021 annual update approved in Q4 of 2020 to reflect the latest inflation assumptions.

1. Transmission rate base includes 100% of B2M LP, Niagara Reinforcement Limited Partnership and Hydro One Sault Ste. Marie Limited Partnership.
 2. Distribution rate base includes recent LDC acquisitions (Peterborough Distribution Inc., Orillia Power Distribution Corporation) and Hydro One Remote Communities.

Current - Segmented incentive regulatory construct

The transition from cost of service to incentive based regulatory model coincident with transformation of business will create value for both customers and shareholders

	Distribution OEB Approved 2018-2022					Transmission OEB Approved 2020-2022

(1) William Sheffield is the Interim President and CEO and an Executive Board Member

Forward Looking Information

This presentation contains “forward-looking information” within the meaning of applicable Canadian securities laws that is based on current expectations, estimates, forecasts and projections about Hydro One’s business and the industry in which Hydro One operates and includes beliefs of and assumptions made by management of Hydro One. Such information includes, but is not limited to: statements related to Hydro One’s transmission and distribution regulatory applications, related decisions, and expected impacts and timing; expectations regarding regulatory recovery; expectations related to regulatory models; Hydro One’s projected rate base, cash flows and EPS; statements regarding Hydro One’s organic growth profile and expected rate base CAGR; expectations regarding future equity issuances; expectations to modernize infrastructure and to invest in the health of the distribution system, including through mass meter and network replacements over a five year period beginning in 2023; statements regarding Hydro One’s projected capital investments, and related plans, funding and expectations; statements related to Hydro One’s ongoing and planned projects, including estimated cost and anticipated in-service dates of capital projects; statements related to the expected transition from a cost of service to an incentive based regulatory model including expectations regarding the cost of Hydro One’s plans; statements relating to Hydro One’s strategy, expectations regarding growth opportunities for the telecom business; statements about Hydro One’s ongoing and planned sustainability priorities and commitments, including target dates, as they relate to diversity, equity and inclusion, climate change mitigation and adaption, Indigenous and community partnerships and other initiatives and related plans; Hydro One’s commitment to achieving 30% female executives and female board members; Hydro One’s commitment to achieving 3.5% Black executives and board directors and 5% Black student hires by 2025; Hydro One’s commitment to achieving a target of 30% reduction of GHG emissions by 2030 and net-zero GHG emissions by 2050; Hydro One’s commitment to increasing Indigenous procurement spend to 5% of total procurement spend by 2026; Hydro One’s commitment to ensure 20% of corporate donations and sponsorships support Indigenous communities; plans to convert 50% of Hydro One’s fleet of sedans and SUVs to electric or hybrid EVs by 2025 and 100% by 2030; expectations regarding Hydro One’s maturing debt and standby credit facilities; statements related to dividends, dividend growth, Hydro One Limited’s targeted payout ratio of 70-80%; statements and guidance relating to EPS growth over 2019 to 2022; and statements related to credit ratings.

Words such as “aim”, “could”, “would”, “expect”, “anticipate”, “intend”, “attempt”, “may”, “plan”, “will”, “believe”, “seek”, “estimate”, “goal”, “target” and variations of such words and similar expression are intended to identify such forward-looking information. These statements are not guarantees of future performance and involve assumptions and risks and uncertainties that are difficult to predict. In particular, the forward-looking information contained in this presentation is based on a variety of factors and assumptions including, but not limited to: the scope of the COVID-19 pandemic and duration thereof as well as the effect and severity of corporate and other mitigation measures on Hydro One’s operations, supply chain or employees; no unforeseen changes in the legislative and operating framework for Ontario’s electricity market or for Hydro One specifically; favourable decisions from the Ontario Energy Board and other regulatory bodies concerning outstanding and future rate and other applications; no unexpected delays in obtaining required approvals; no unforeseen changes in rate orders or rate setting methodologies for Hydro One’s distribution and transmission businesses; the continued use and availability of U.S. GAAP; no unfavourable changes in environmental regulation; a stable regulatory environment; no significant changes to Hydro One’s current credit ratings; no unforeseen impacts of new accounting pronouncements; no changes to expectations regarding electricity consumption; no unforeseen changes to economic and market conditions; recoverability of costs and expenses related to the COVID-19 pandemic, including the costs of customer defaults resulting from the pandemic; completion of operating and capital projects that have been deferred; and no significant event occurring outside the ordinary course of business. These assumptions are based on information currently available to Hydro One including information obtained by Hydro One from third-party sources. Actual results may differ materially from those predicted by such forward-looking information. While Hydro One does not know what impact any of these differences may have, Hydro One’s business, results of operations, financial condition and credit stability may be materially adversely affected if any such differences occur. Factors that could cause actual results or outcomes to differ materially from the results expressed or implied by forward-looking information are discussed in more detail in the sections entitled “Forward-Looking Information” and “Risk Factors” in Hydro One Limited’s most recent annual information form, the sections entitled “Risk Management and Risk Factors” and “Forward-Looking Statements and Information” in the Annual MD&A and the section entitled “Forward-Looking Statements and Information” in the Interim MD&A. Hydro One does not intend, and it disclaims any obligation to update any forward-looking information, except as required by law.

In this presentation, Hydro One presents information about future rate base growth and potential future capital investments and guidance in respect of 2022 basic earnings per share. The purpose of providing information about future rate base growth, potential future capital investments and financial guidance is to give context to the nature of some of Hydro One’s future plans and may not be appropriate for other purposes. Information about future rate base growth, potential future capital investments and financial guidance, including the various assumptions underlying it, should be read in conjunction with “Forward-Looking Information” above and as may be found in Hydro One’s filings with the securities regulatory authorities in Canada, which are available under its profile on SEDAR at www.sedar.com. Hydro One does not intend to update the information about future rate base growth or future capital investments or guidance about 2022 EPS except as required by applicable securities laws.
