

Cool upgrades may include

Motor replacement

An Electronically Commutated Motor (ECM) can help your system gain up to 60% in direct energy savings.

Insulating curtains

Reduce cooling load by preventing warm air from entering busy walk-ins.

Anti-sweat controls

Reducing condensation doesn't mean sacrificing efficiency. Program your heaters to operate only when necessary, not 24/7.

Condenser coil cleaning

Talk about clean energy! Optimize your system by clearing away dust and debris.

What do I need to qualify?

- A General Service Account (residential accounts aren't eligible)
- Commercial-grade refrigeration to cool products
- An average peak electricity demand of less than 250 kW annually
- Own or lease the facility (if you lease space, you must have the written permission of the owner)
- You haven't participated in a previous business refrigeration program

Cool your costs

The Business Refrigeration Incentive is ideal for restaurants and pubs, grocery and convenience stores, bakeries, florists, retail stores, catering, pharmacies, nursing homes, schools, banquet halls, gas stations, pet stores and more!
