

HYDRO ONE / ENERGY INNOVATORS

Incentives at-a-glance

Harness savings on the farm

Reduce energy use, boost production with these programs

Audit Funding

Start with an energy audit. Find out where your farm can save.

Retrofit Program

Get up to 50% back to upgrade your equipment.

Small Business Lighting

Up to \$2,000 in free lighting.

High Performance New Construction

It pays to build new.

Partners in Powerful Communities

ROOTED IN YOUR SUCCESS

From barn lighting to field irrigation, farms across Ontario are using Hydro One programs to boost their energy efficiency. We've gathered everything you need to know about these popular solutions here, so you can enhance your operation and slash costs in no time at all.

AUDIT FUNDING

Find out where you can save

With the help of a professional energy auditor, you can better understand where your farm currently uses the most energy and identify the greatest potential for savings. We'll pay up to 50% of the cost of an energy audit to get you on your way to savings.

SMALL BUSINESS LIGHTING

Includes FREE assessment

Thanks to a short payback period and simple installation, LED lighting upgrades are one of the best investments a farm can make. We offer up to \$2,000 in free lighting incentives, so switching to LED lighting has never been easier. Why go LED? They use up to 75% less energy and last up to 50,000 hours, so you'll spend less time on maintenance and replacement.

Get started today: HydroOne.com/SBL

RETROFIT PROGRAM

Top farm, bottom line

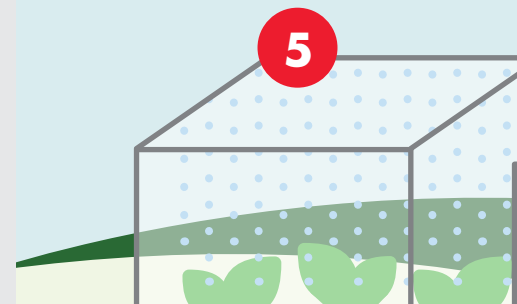

Did you know that aging equipment actually costs *more* to run? A newer model energy-efficient fan, for example, can cut electricity costs by as much as half, and the payback can be as little as a few years. Our incentives help you cover out-of-pocket expenses for a broad range of upgrades. You'll receive \$0.05/kWh for lighting upgrades and \$0.10/kWh for all other upgrades.

HIGH PERFORMANCE NEW CONSTRUCTION

It pays to build new

Whether you're building new or making major renovations, Hydro One offers incentives and technical expertise to help you offset the cost of going high efficiency. Lower your future operating costs by integrating high-efficiency equipment into your new builds or major renovations.

Spot Your Savings

1 ACTION PLAN

Up to 50%

Of the cost of an energy audit.

2 LED LIGHTING

Up to 75% less electricity

LEDs drastically reduce energy use and with 50,000 hours of bulb life you'll also save on replacements.

SUCCESS STORY HIGH PERFORMANCE NEW CONSTRUCTION

3 LOW-WATTAGE WATERERS

\$300 per unit

New model waterers use less energy and ensure animals are never dehydrated.

4 HIGH EFFICIENCY FANS

Save up to 33% per year

Get \$187 per 18–20 foot fan. Keep livestock cool and costs down.

5 VFD IRRIGATION PUMPS

20% per pump

Adding VFDs to irrigation pumps can cut your costs by up to 20%.

6 HEAT CONTROLLER

\$200 per controller

Temperature controllers reduce heat energy use in animal housing.

7 HEAT PADS

\$118 per unit

Heat pads outperform heat lamps when it comes to energy savings for crates, comfort stall creep areas and farrowing environments. And they don't burn out like lamps do, risking a no-heat event.

INSTRUCTION

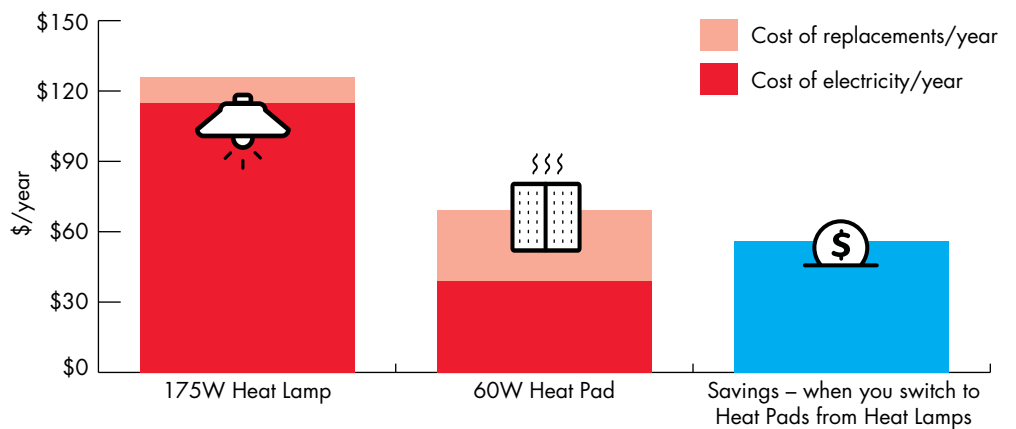

"We're very pleased with both the fans and the incentive."

ERICA KIESTRA, OWNER
Kie Farms
St. Mary's, ON

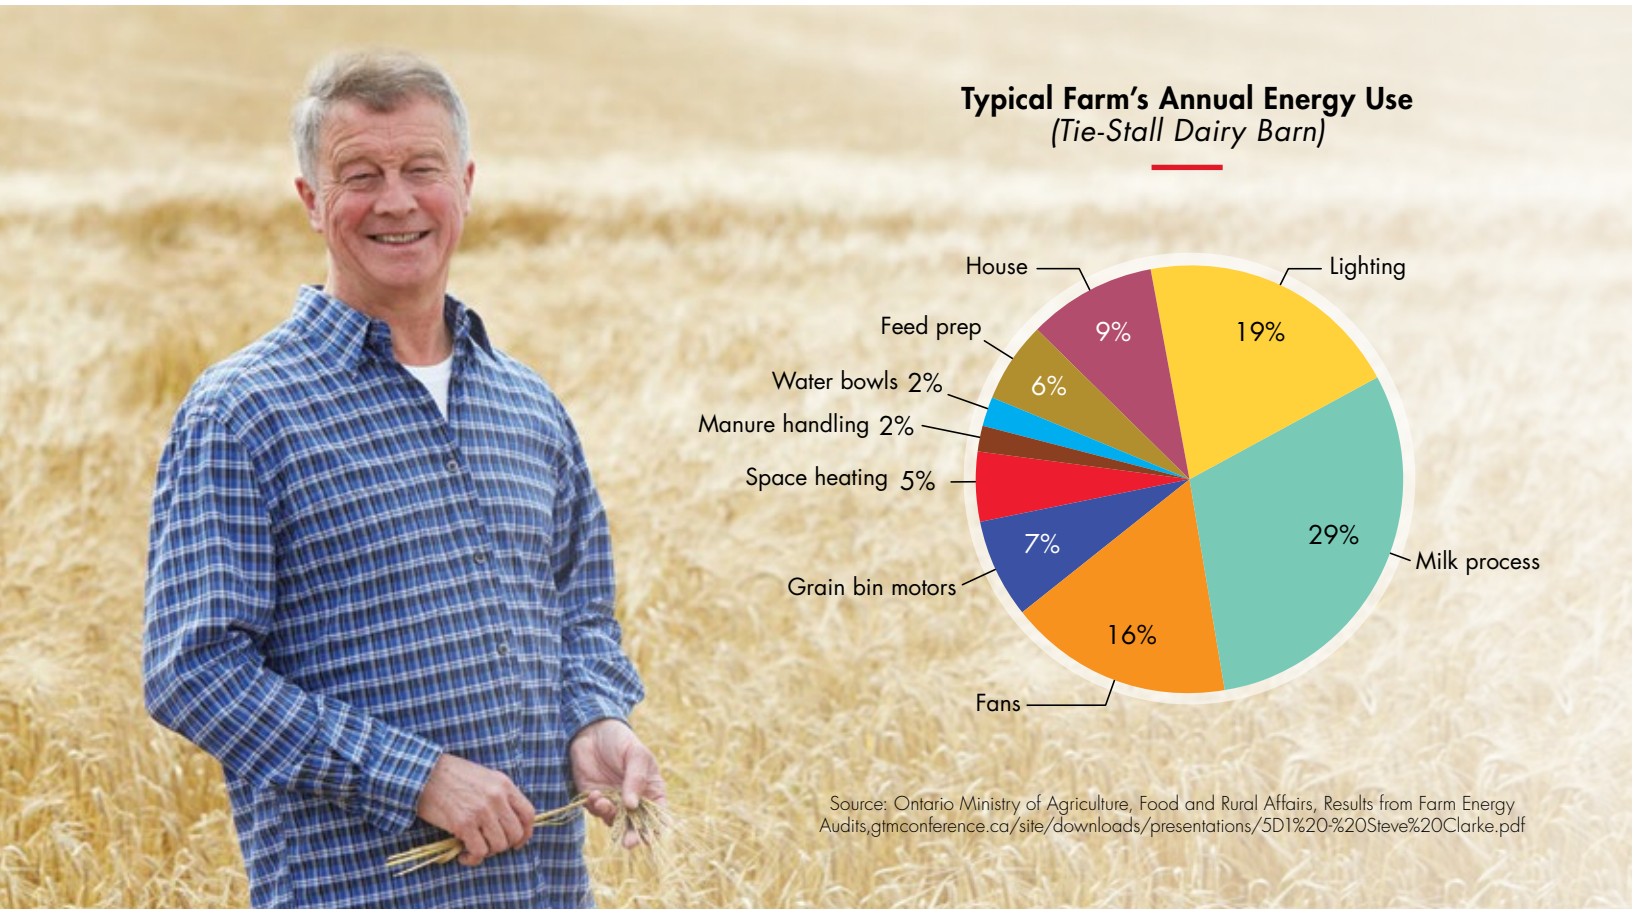

Kie Farms received \$21,101 for taking the high-efficiency route when installing new fans in their dairy barn.

Cost Comparison

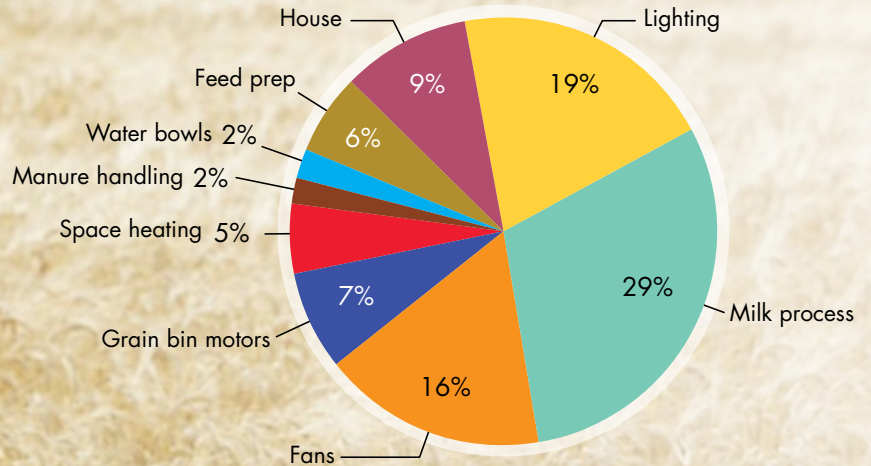

Switching from Heat Lamps to Heat Pads will save on electricity all year
