

HYDRO ONE / ENERGY INNOVATORS

Conservation in Hospitals

IMPROVE CARE BY CUTTING COSTS

Energy wasted is dollars down the drain

Ontario hospitals spend nearly a quarter of their total operating and maintenance costs on electricity, so any improvement to energy efficiency can free up funding for other priorities. We can help you upgrade with incentives for new systems, equipment and technologies.

WHY INVEST?

Five reasons to get started

- 1 Create a more comfortable environment for patients and staff
- 2 Incentives shorten payback and help secure capital funding
- 3 Reduce energy and operating costs
- 4 More reliable, longer-lasting equipment
- 5 Be seen as a leader in sustainability

Partners in Powerful Communities

Look to these technologies first

Get incentives up to 50%

LIGHTING

More savings, less maintenance

LEDs

LEDs last up to 50,000 hours, can improve visibility and are flicker-free. Don't overlook outdoor lots and pathways to enhance patient safety at night.

Controls

Add sensors in restrooms, hallways, staff rooms and maintenance rooms to reduce energy waste and cut lighting usage up to 25%.

SYSTEM-WIDE SAVINGS

Look closer for opportunities

Variable Frequency Drives (VFDs)

Add VFDs to pumps and fans in HVAC, water systems and more for savings up to 55%.

Chillers

Most hospital chillers operate below peak efficiency. Get incentives to analyze and optimize chillers.

Ventilation

Demand control ventilation adjusts fresh air intake based on room occupancy, which keeps air fresh, patients comfortable and energy costs down.

Combined Heat and Power Systems (CHP)

CHP generates heat and electricity with one system, which reduces energy waste. Incentives pay up to 100% of a detailed engineering study and up to 40% of capital costs.

CHOOSE THE PROGRAM THAT'S RIGHT FOR YOU

Incentives help projects get off the ground

Audit Funding

Start with an energy audit to uncover and prioritize projects. Incentives up to 50% of the audit cost.

Retrofit Program

Get up to 50% for upgrades to lighting, pumps, fans and more.

High Performance New Construction (HPNC)

Get paid to build efficiency into new construction and major renovations.
