What's best for where?

Here's a Quick Swap guide to efficient farm lighting.

Barns: Retire inefficient screw-in incandescents and CFLs and upgrade to LEDs

Shops, sheds and stalls: Swap metal halide high bays for T5HO fixtures or LED high bays

If you previously participated in programs such as **Power Savings Blitz** or the **Small Business Lighting** program, you are still eligible.

NO OBLIGATION:
The assessment
is free, the
decision is yours

You make the call. We make it happen.

A qualified energy auditor will visit your farm to:

- Evaluate your lighting needs
- Create a customized plan to upgrade
- Provide a detailed estimate
- Calculate your incentive amount

If you approve, we'll take care of the application and installation process, from beginning to end.

Get the best lighting on the market

Make your farm more efficient with ENERGY STAR® certified LEDs.

- Use up to 75% less energy
- Bright, durable and versatile
- Last up to 50,000 hours
- An LED for every application

Big incentives for small efforts.

Your farm may qualify for incentives up to \$2,000 if it has an average annual demand of less than 100 kW.

Not sure? If your Hydro One bill is measured in kWh (not kW or kVA), your farm likely qualifies.
