

SAVE ENERGY & stay safe

7 TIPS TO MAKE YOUR HOLIDAYS COZY FROM HYDRO ONE

LIGHT UP THE NIGHT

Save energy outside with LED bulbs and an automatic timer. Choose grounded exterior lights for safety.

DECK THE HALLS

Indoors, plug your LEDs into a power bar with auto-timer. Test them first and replace any damaged ones.

TRIM THE TREE

A dry tree is a fire hazard. Choose a fresh tree, water it daily, and keep it away from heat sources.

SEAL IN THE WARMTH

Reduce heat loss with caulking, draft-proofing and insulation, and give your furnace a tune-up.

TURN IT DOWN

Set the temperature to 20°C and lower it when baking, cooking or entertaining. Consider a smart thermostat.

PAY ATTENTION TO PEAK TIMES

Be aware of time-of-use pricing. After 7 pm is a great time for holiday baking or watching the classics.

BE READY FOR ANYTHING

In case of a power outage, have an emergency kit ready. Sign up for outage alerts or call **1-800-434-1235** for updates.
