Subject: Distribution System Construction Services – Pre-Qualified Contractors

Hydro One is pleased to share that we have completed our prequalification process for Distribution System Construction Services contractors. Hydro One has pre-qualified contractors to support the delivery of our planned distribution work program as well as support delivery of broadband expansion projects in the Province of Ontario

Hydro One’s pre-qualified suppliers have demonstrated experience and capability to deliver projects for both Distribution Overhead Lines & Fibre Installation work. Our prequalification process and alignment of contractor capability in both areas, allows Hydro One to support a One-Touch Make Ready (“OTMR”) model, where possible, which enables improved collaboration and work execution efficiency for broadband projects.

Below are Hydro One’s seven pre-qualified contractors for Distribution Overhead Lines & Fibre Installation work packages:
