

# YOU'RE INVITED TO A COMMUNITY INFORMATION CENTRE

## Proposed Transmission Line Refurbishment between Des Joachims Transformer Station (TS) and Pembroke TS

In February 2019, Hydro One initiated a Class Environmental Assessment (EA) for a proposed project to refurbish approximately 90 kilometres of an existing 115 kilovolt (kV) transmission line and replace approximately 400 wood pole structures between Des Joachims Transformer Station (TS) and Pembroke TS. The transmission line, which stretches across the towns of Laurentian Hills, Deep River, Petawawa, and the Township of Laurentian Valley in the County of Renfrew, has reached its end-of-life and is required to ensure a safe and reliable electricity supply in the future.

To provide you with information about the project, Hydro One is hosting a Community Information Centre (CIC). The CIC is an opportunity for you to meet Hydro One's project team and ask questions about the Class EA and proposed construction work. Details of the meeting are as follows:

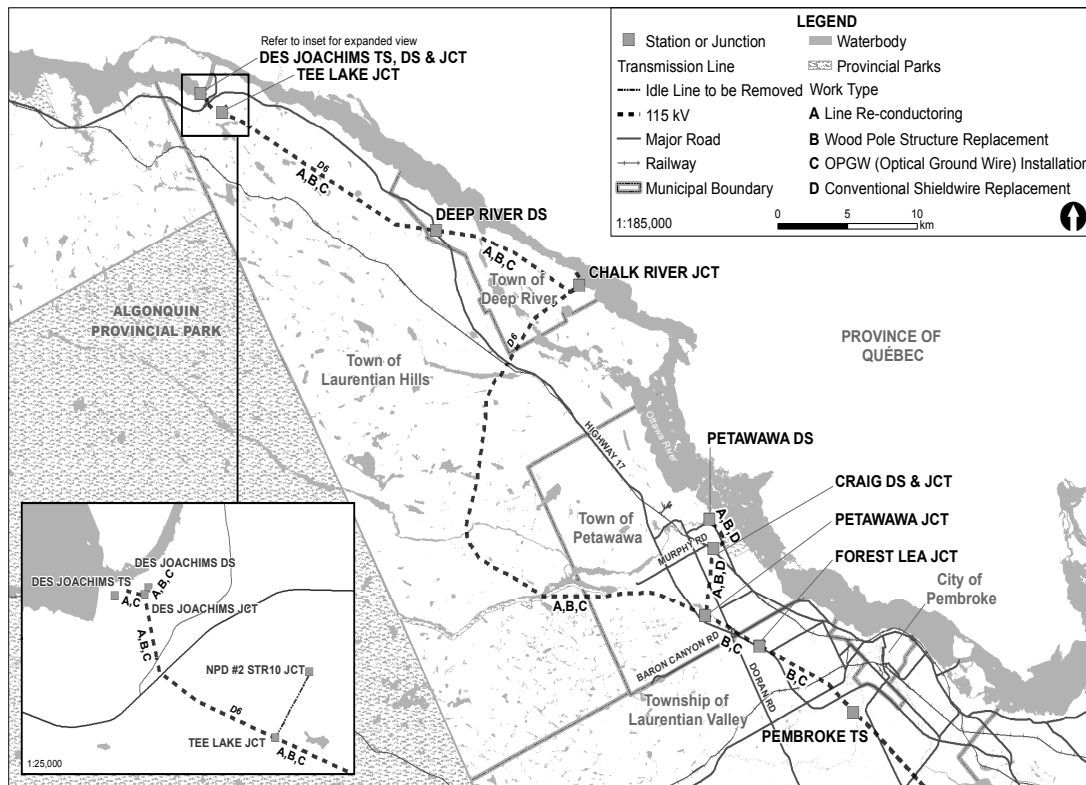

**March 27, 2019**  
**6:00 – 8:00 p.m.**

Royal Canadian Legion, Branch 517  
3583 Petawawa Blvd.  
Petawawa, Ontario

### Project Planning and Public Involvement

This project is subject to the Class EA for Minor Transmission Facilities (Hydro One, 2016), in accordance with the Ontario *Environmental Assessment Act*. The Class EA is a streamlined process to ensure that transmission projects that have a predictable range of effects have feasible environmental mitigation and/or protection measures in place. The Class EA process contains screening provisions that may apply to this project. Subject to the outcome of the Class EA, construction may begin as early as summer 2019 and be complete before the end of 2021.

The Class EA process provides opportunities for First Nations and Métis, public and stakeholder consultation. Your feedback is important to us and would be appreciated by April 5, 2019.
