

## Community Notice

# Wood Pole Replacement

Dear Resident,

October 3, 2019

I am writing you to let you know that Hydro One Networks Inc. (Hydro One) is proposing to refurbish approximately 19 structures along the existing 115 kilovolt (kV) transmission line (Circuit B1S). The project area is located along the transmission line from the City of Quinte West to the Township of North Frontenac, including the Township of Addington Highlands, the Municipality of Tweed and the Municipality of Centre Hastings. The maps provided show an overview of the entire project area and a local view of the structures to be replaced in your community.

This type of project is considered routine maintenance work with relatively minor effects, and is subject to the Class Environmental Assessment (EA) for Minor Transmission Facilities (Hydro One, 2016), in accordance with the Ontario *Environmental Assessment Act*. The Class EA is a streamlined planning process that has proven effective in ensuring minor transmission projects that have a predictable range of effects have feasible environmental mitigation and/or protection measures in place. The Class EA Process contains screening provisions that may apply to this project.

Contingent on the outcome of the Class EA, the replacement of wood poles may begin as early as January 2020 and be completed by the end of 2020. If you would like to provide feedback about this work, please contact us by November 1, 2019. If there are any updates to the project information provided, I will ensure you are promptly informed.

As per the request of the Minister of the Environment, Conservation and Parks, information regarding the *Freedom of Information and Protection of Privacy Act* is included below.
