REGULATORY ACCOUNTS

1 2

1. INTRODUCTION

4

3

5 The purpose of this Exhibit is to provide a description of Hydro One Distribution's 6 regulatory accounts.

7

All of the regulatory accounts reported by Hydro One Distribution have been established
consistent with the Ontario Energy Board's ("the Board") requirements as set out in the
Accounting Procedures Handbook, subsequent Board direction, or as per specific
requests initiated by Hydro One Distribution.

12

Hydro One Distribution's outstanding regulatory account balances are summarized in
Table 1. Hydro One Distribution has not made any adjustments to regulatory account
balances that were previously approved by the Board on a final basis.

16

17

 Table 1: Summary of Regulatory Accounts Balances Outstanding (\$ Millions)

Description	Balance as at Dec. 31, 2013	Balance as at Dec. 31, 2014	Balance as at Dec. 31, 2015	Balance as at Dec. 31, 2016	Forecast Balance as at Dec. 31, 2017
Total Regulatory Accounts	(46.8)*	19.2	83.2	97.2	92.0

18 19 *Differs from EB-2013-0416 due to exclusion of Cat Lake Operational Deferral Account balance of \$2.8 million.

The forecast interest for 2017 is calculated by applying simple interest on the actual audited December 31, 2016, year-end balance using the Board's prescribed 4th quarter interest rate of 1.1%, as per the Bankers' Acceptances three-month rate plus a spread of 25 basis points. This is consistent with the Board's methodology on prescribing interest rates for the approved regulatory accounts under the Uniform System of Accounts for natural gas utilities and electricity distributors (EB-2006-0117). Filed: 2017-03-31 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 2 of 24

Information on each regulatory account and its balance is further described in detail in
 Section 2.0 of this Exhibit; with a complete continuity schedule provided in Attachment 1
 and a schedule of account balances provided in Attachment 2 of this Exhibit. Further
 details on the regulatory accounts are provided in subsequent Exhibits:

5

• Exhibit F1, Tab 2, Schedule 1: Planned Disposition of Regulatory Accounts; and

• Exhibit F1, Tab 3, Schedule 1: Regulatory Accounts Requested.

Table 2: Regulatory Accounts (\$ Millions)

2 *Differs from EB-2013-0416 due to exclusion of Cat Lake Operational Deferral Account balance of \$2.8 million.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 4 of 24

A detailed description of each of these regulatory accounts is provided in the following sections. For each account discussed below, simple interest is applied to the monthly opening principal balance in this account according to the Board-prescribed interest rate. Each account is reported to the Board on an annual basis consistent with the Board's Reporting and Record Keeping Requirements.

6

The balance of each account is an actual audited amount at December 31, 2016, inclusive
of interest accrued. Interest improvement has then been forecast on the principal balance
to the end of December 31, 2017.

13

14

2.1.1 RETAIL SETTLEMENT VARIANCE ACCOUNTS ("RSVAs")

15

The RSVAs have been established pursuant to Article 490, which requires all distributors establish such accounts to record the differences between the amounts owed to the IESO / host distributors and the amount billed to customers and retailers.

19

The RSVAs were previously reviewed and approved by the Board in RP-2004-0117/0118, RP-2005-0020/EB-2005-0378, EB-2007-0681, EB-2009-0096 and EB-2012-0136. The Board approved the disposition of the 2013 audited RSVA balance over a three-year period in its EB-2013-0416 Decision respecting 2015 distribution rates. The balance of commodity accounts (1588 & 1589) has been filed with the Board on a quarterly basis, and the balance of the other RSVAs is filed with the Board annually per the Electricity Reporting and Record Keeping Requirements.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 5 of 24

- 1 The balance in Hydro One Distribution's Retail Settlement Variance Accounts is
- 2 summarized in Table 3.
- 3
- 4

Power-Sub-Account-Global Adjustment*	1589	(22.4)	9.2	62.2	116.6	117.9
Total RSVAs		(35.6)	7.1	111.7	147.0	148.6

* Due to a clarification of embedded generation submissions used in the calculation for the global adjustment that is 5 applicable to Hydro One Distribution from January 2005 through to August 2016, the IESO will refund \$121.8 million 6 that will be applied to the monthly IESO settlement for Hydro One Distribution from April through November 7 2017. The issue arose due to the wholesale meter injection channels' readings not being netted with the energy 8 withdrawn in the submission of embedded generation used in the calculation of the Global Adjustment for the period 9 10 noted. As the refund exceeds the 2016 audited balance of the account, Hydro One Distribution is no longer requesting 11 to recover this balance from customers. The IESO is funding this credit through a monthly charge during the same period in which the refund is being applied. Only a portion is applicable to Hydro One Distribution. While an estimate 12 can be made of Hydro One Distribution's allocation of the total charge, the exact net impact is unknown at this time. 13

In April 2015, as documented in the Board's letter entitled 'Accounting Guidance on Capacity Based Recovery', the IESO established a transitional initiative entitled Capacity Based Demand Response to recover the costs of the demand response market program through uplift charges under charge types 1350 and 1351. A breakdown of the balances related to wholesale market service charge is included in Table 4. Further details on the disposition of these balances are presented in Exhibit H1, Tab 3, Schedule 1. Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 6 of 24

Sub CBR Class B	1580	N/A	N/A	6.0	4.2	4.3
Other	1580	(72.1)	(88.7)	(57.5)	(89.3)	(90.3)
Wholesale Market Service Charge		(72.1)	(88.7)	(51.2)	(85.1)	(86.0)

2

1

Hydro One Distribution does not make a profit or loss on the commodity. Hydro One 3 Distribution matches the energy sales and the cost of power, with the difference between 4 the two values going to the variance accounts. However for USofA reporting, the higher 5 of energy sales or cost of power is reduced to match the other, with the difference going 6 to the variance account. The two methods result in the same variance account balance, 7 and the same energy sales net of cost of power. As per Section 2.9 of the OEB's Filing 8 Requirements for Electricity Distribution Rate Applications; a reconciliation of energy 9 sales and cost of power expense year-end balances for 2016 are provided in Table 5. 10

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 7 of 24

Furthermore, as required by Section 2.9.5.1 of the OEB's Filing Requirements for Electricity
Distribution Rate Applications, a distributor must also provide support of its Global
Adjustment ("GA") claims with a description of its settlement process with the IESO. These
requirements are addressed below.

5

6 Method of Global Adjustment Invoicing:

Hydro One Distribution uses the customer specific pre-defined Peak Demand Factor applied to the IESO invoiced Class A GA amount to invoice all Class A customers. Hydro One Distribution uses the first estimate of the GA rate published by the IESO to invoice all applicable Class B customers who pay the Hourly Ontario Energy Price (also referred to as Spot or Market Price) or customers who have signed a retail contract. Hydro One Distribution uses the actual GA rate published by the IESO to invoice all applicable Class B embedded distributors paying the Spot price.

14

15 Method of Settlement with the IESO:

The monthly IESO settlement is completed by the fourth business day after the month end. This entails settling two amounts associated with customers: (1) the difference between Regulated Price Plan ("RPP") pricing and Spot price for the actual invoices created during each fiscal month; and (2) the RPP Invoiced Consumption at actual GA rate. This is done for both 2-tiered rate and time-of-use rate customers. All settlement amounts are calculated automatically by the billing system which pairs the RPP customer consumption with the Spot price for each invoice.

23

Hydro One Distribution uses the second estimate of GA rate published by IESO to calculate RPP GA settlement amount associated with the RPP consumption during the current fiscal month. As the actual GA rate is not available until six business days after the IESO declaration, the true-up is then calculated by using the actual GA rate and declared to the IESO in the following month. Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 8 of 24

The monthly IESO settlements also include the embedded generation declaration for the
 difference between the rate paid to regulated and contracted generators and Spot price.

3

On a monthly basis, embedded distributors calculate their own RPP and generation settlement amounts and declare to the IESO through Hydro One Distribution. As a host distributor, Hydro One Distribution settles with the IESO on behalf of embedded distributors and treats it as pass through costs, in the monthly IESO settlement declaration.

9

10 Accounting Accrual Process:

The determination of customer invoicing is based on a systemic reading of meters 11 throughout the month for all customers. Hydro One Distribution has about 1.3 million 12 customers and provides services across the province. As such, there are many meter 13 reading schedules that do not coincide with the fiscal month end. At the end of each 14 month, the customer consumption since the date of the last meter reading is estimated 15 based on a standard SAP functionality. As a result, corresponding unbilled commodity 16 revenue and GA revenue are recorded for accounting accrual purposes. Estimates are 17 reversed in the following month and actual revenue is recorded based on the subsequent 18 meter readings. The IESO settlement amounts discussed above are also estimated based 19 on unbilled consumption for accounting accrual purposes. These accrual amounts are not 20 included in the monthly IESO declaration. Only the settlement amounts based on the 21 actual invoices are declared to the IESO. 22

23

24 Accounting Treatment for Global Adjustment:

Hydro One Distribution allocates the Class B GA charge on the IESO invoices into RPP and non-RPP portions and incorporates these portions into accounts 1588 and 1589 respectively, by using the GA charge reported on the RPP settlement with the IESO.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 9 of 24

1

2

2.1.2 RETAIL COST VARIANCE ACCOUNTS ("RCVAS")

- Providing retail services to customers, as a result of the deregulated electricity market, results in the distributor having a need to recover certain retail service costs. The rates and charges used in determining these costs are set by the Board, which recognizes that the actual costs may be different in practice. In accordance with Chapter 11 of the Distribution Rate Handbook, distributors are required to establish variance accounts, for future disposition, which record the differences in these costs and revenues.
- 9

Hydro One Distribution has established RCVAs to capture the differences between the revenues collected by the distributor, based on Board-approved rates, and the actual incremental costs of providing the related services. The methodology underlying the operation of these variance accounts is given in the Accounting Procedures Handbook – Article 490.

15

¹⁶ The balance in Hydro One Distribution's RCVAs is summarized in Table 6.

- 17
- 18

 Table 6: Retail Cost Variance Accounts (RCVAs) (\$ Millions)

Description	USofA Account Ref	Balance as at Dec 31, 2013	Balance as at Dec 31, 2014	Balance as at Dec. 31, 2015	Balance as at Dec. 31, 2016	Forecast Balance as at Dec. 31, 2017
RCVA Accounts	1518/1548	1.0	0.7	0.0	0.7	0.7

19

20 2.1.3 PENSION COST DIFFERENTIAL ACCOUNT

21

The Pension Cost Differential Account tracks the difference between the non-capital portion of pension cost estimates, based on actuarial assessments and other forecasts, upon which Hydro One's distribution rate application is based, and the actual pension contributions charged to OM&A. Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 10 of 24

This account was previously reviewed and approved by the Board for use in EB-2009-1 0096 and EB-2013-0416. The balance in Hydro One Distribution's Pension Cost 2

- Differential Account is summarized in Table 7. 3
- 4
- 5

 Table 7: 1508 - Other Regulatory Assets – Sub Account - Pension Cost Differential
 (\$ Millions) 6

7

8

2.1.4 TAX RATE CHANGES ACCOUNT

9

In the Board communiqué to distributors in December 2005, and the Board's April 12, 10 2006 Decision with Reasons (RP-2005-0020 / EB-2005-0378) regarding Hydro One's 11 12 2006 Distribution Rates, the Board authorized the creation of an account to capture the tax impact of the following differences between the tax assumptions included in revenue 13 requirement and actual results. This tax changes account was subsequently reviewed and 14 approved by the Board in EB-2009-0096, EB-2012-0136, and EB-2013-0416. This 15 account captures the following: 16

17

Those differences that result from a legislative or regulatory change to the tax rates or 18 rules; and 19

Those differences that result from a change in, or disclosure of, a new assessing or 20 administrative policy that is published in the public tax administration or 21 interpretation bulletins by relevant federal or provincial tax authorities. 22

Witness: Samir Chhelavda

Filed: 2017-03-31 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 11 of 24

This Tax Rate Changes Account was also used to capture the savings in Provincial Sales Tax ("PST") cost included in revenue requirement due to the introduction of flowthrough Harmonized Sales Tax ("HST") in July 2010.

4

The 2013 audited balance, which included amounts for both a change in the tax rate and 5 for the savings in PST, was disposed of as part of the EB-2013-0416 rate application. An 6 impact of \$4.4 million including interest, related to the savings in PST, is being put 7 forward for disposition in this Application. The amount was recorded in the account in 8 the 2014 rate year. Once this remaining PST savings amount has been disposed of, the 9 only amounts recorded in this Tax Rate Change account on a go-forward basis will be the 10 tax impact of the differences between the tax assumptions included in revenue 11 requirement and actual results, which are noted above. 12

13

The balance in Hydro One Distribution's Tax Rate Changes Account is summarized inTable 8.

2.1.5 OEB COST DIFFERENTIAL ACCOUNT

In a letter from the Board, dated February 9, 2016, entitled "Revisions to the Ontario Energy Board Cost Assessment Model"; the Board authorized the establishment of Account 1508 'Other Regulatory Assets', Sub-Account 'OEB Cost Assessment Variance'.

7

1

2

8 The Board authorized this account to record any material differences between the annual 9 OEB cost assessment currently approved in rates and the actual OEB cost assessment 10 amounts charged to Hydro One Distribution that will result from the application of the 11 new cost assessment model effective April 1, 2016.

12

The balance in Hydro One Distribution's OEB Cost Differential Account is summarizedin Table 9.

2.1.6 SMART METER ENTITY ("SME") CHARGE VARIANCE ACCOUNT

The SME Charge Variance Account was established consistent with Board direction included in the Decision issued March 28, 2013 for EB-2012-0100/EB-2012-0211. As a result of this Decision, effective May 1, 2013, the SME charge to be levied and collected by the licensed electricity distributors identified in the Board's annual Yearbook of

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 13 of 24

Electricity Distributors from Residential and General Service <50kW customers was
 \$0.79 per month, effective May 1, 2013 to October 31, 2018.

3

The account is used to track the difference between the monthly settlement invoice received from the IESO, including accruals, and the amount billed to the distributor's customers for the SME charge, including accruals.

7

The balance in Hydro One Distribution's Smart Meter Entity Charge Variance Account is
summarized in Table 10.

14

15 16

2.2.1 REVENUE OFFSET DIFFERENCE ACCOUNT – POLE ATTACHMENT CHARGE

17

The Revenue Offset Difference Account – Pole Attachment Charge was established consistent with Board direction in its Decision dated August 4, 2016, in EB-2015-0141. The pole attachment charge relates to the charge Hydro One Distribution collects from cable and telecommunications companies for connecting their overhead wires to Hydro One poles.

23

In its Accounting Order of September 28, 2016, the Board directed Hydro One Distribution to establish a variance account effective January 1, 2015 to record the Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 14 of 24

differences in the revenue offsets related to forecast pole attachment revenues included in rates in EB-2013-0416/EB-2015-0079 and revenue offsets based on the pole attachment charge approved by the Board in EB-2015-0141. The Board had approved distribution rate revenues based on a pole attachment charge of \$37.05 per pole per year. The final approved charge is \$41.28 per pole per year. This account is used to track this variance, including accrued interest charges based on the Board prescribed interest rates.

7

8 The balance in Hydro One Revenue Offset Difference Account – Pole Attachment
9 Charge is summarized in Table 11.

2.2.2 BILL IMPACT MITIGATION VARIANCE ACCOUNT

15

As a result of the rate class review accepted by the Board in its Decision EB-2013-0416, certain customers were expected to experience significant bill impacts in 2015. As part of EB-2013-0416, Hydro One Distribution requested to use the Bill Impact Mitigation Variance Account to mitigate the adverse total impacts for specific customers affected by the review.

21

As part of its Decision for EB-2013-0416, the Board determined that those rate classes which experienced a bill impact in excess of 10% would qualify for rate mitigation. The costs of mitigation and related implementation costs for these customers have been

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 15 of 24

tracked in this account. Once this remaining amount has been disposed of, this Bill 1 Impact Mitigation Variance Account will not be required to continue on a go-forward 2 basis. 3

4

The balance in the Hydro One Distribution's Bill Impact Mitigation Variance Account is 5 summarized in Table 12. 6

10

2.2.3 MICROFIT CONNECTION CHARGE VARIANCE ACCOUNT

11

The Board established the fixed charge for micro-generators account for Hydro One 12 Distribution in the Board's Decision of April 9, 2010 (EB-2009-0096) for 2010 and 2011 13 distribution rates. 14

15

This account was established province-wide, for all distributors, in EB-2009-0326 and 16 EB-2010-0219. The rate was subsequently updated to require the recording of the 17 collection of revenue from this monthly charge as per the Board's September 20, 2012 18 letter to all distributors entitled "Update to Fixed Monthly Charge for microFIT 19 Generator Service Classification Board File Numbers EB-2009-0326 and EB-2010-20 0219.". 21

22

This account records revenue collected from the new fixed meter charge that is applied to 23 micro-generator connections. The amounts are deferred for refunding to customers in a 24 future period. 25

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 16 of 24

The Board in its Decision on Hydro One's distribution rate application (EB-2013-0416) approved Hydro One's request for the discontinuance of this account commencing in 2015. As the disposition approved in that application was based on the 2013 principal balance and accrued interest, the 2014 balance of \$0.8 million including interest is being put forward for disposition in this Application.

6

The balance in Hydro One Distribution's Microfit Connection Charge Variance Account
is summarized in Table 13.

13

2.2.4 DISTRIBUTION GENERATION – HONI - VARIANCE ACCOUNT

14

The Board directed Hydro One Distribution to establish deferral accounts related to the Green Energy Plan in the Board's Decision of April 9, 2010 (EB-2009-0096) for 2010 and 2011 distribution rates.

18

Hydro One established the Distribution Generation – HONI - Variance Account,
 consisting of separate sub-accounts for Distribution Generation - Express Feeders and
 Distribution Generation – Other Costs to record the interim funding received in respect of
 the expenditures made for these programs.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 17 of 24

The Board in its Decision in Hydro One's distribution rate application (EB-2013-0416) approved Hydro One's request for the discontinuance of this account, including both subaccounts, commencing in 2015. However, there is a small balance that was accrued after 2013 remaining for disposition, as noted in the table below.

5

⁶ The balance in Hydro One's Distribution Generation – HONI - Variance Accounts is

- 7 summarized in Table 14.
- 8

2.2.5 SMART GRID VARIANCE ACCOUNT

12

11

The Board directed Hydro One Distribution to establish deferral accounts related to the Green Energy Plan in the Board's Decision of April 9, 2010 (EB-2009-0096) for 2010 and 2011 distribution rates.

16

Hydro One established the Smart Grid Variance Account to record the interim funding
received in respect of the expenditures made for this program.

19

In the Board's Decision of December 20, 2012 (EB-2012-0136), the Smart Grid Variance

21 Account was continued and a continuance of interim funding for Hydro One's Smart

²² Grid OM&A expenditures in 2013 was approved in 2013 rates.

23

Under the Board's Partial Decision (EB-2013-0141) on September 26, 2013, the Smart
 Grid Variance Account was again continued and interim funding was again approved in

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 18 of 24

2014 rates. The Board accepted Hydro One's proposal relating to Smart Grid as filed in
 Hydro One Distribution's Settlement Proposal dated September 17, 2013 that the
 expenditures recorded in Account 1536 will not be subject to a future prudency review.

4

The Board in its Decision in Hydro One's distribution rate application (EB-2013-0416) approved Hydro One's request for the discontinuance of this account commencing in 2015. However, significant activity in this account for 2014 has resulted in a balance for

- 8 disposition, including interest, of \$12.2 million.
- 9

The balance in Hydro One Distribution's Smart Grid Variance Account is summarized in
Table 15.

2.2.6 DISTRIBUTION SYSTEM CODE ("DSC") EXEMPTION DEFERRAL ACCOUNT

17

The Board ordered Hydro One Distribution to establish the Distribution System Code 18 Exemption Deferral Account in the Board's Decision of December 20, 2010 (EB-2010-19 0229). In the Decision, the Board recognized that costs to mitigate certain unforeseen 20 technical issues should not be visited upon generators who have already executed 21 Connection Costs Agreements, but should instead be eligible for recovery through Hydro 22 One's distribution rate base, subject to the Board's final review "in a future rate 23 proceeding". Specifically, the Board ruled that expenditures for the three specific 24 categories of expenditure included in that proceeding be recorded in sub-accounts of 25

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 19 of 24

1508, Other Regulatory Assets, subject to the Board's review at a future date. These three
 categories are:

- Sub-Account Category 1 Distance Limitation Capital and OM&A Expenses;
 Sub-Account Category 2 Delta-Y Transformers Capital and OM&A Expenses; and
 Sub-Account Category 3 Dual Secondary Winding Transformers Capital and
- 7 OM&A Expenses.
 8

⁹ The Board in its Decision in Hydro One's distribution rate application (EB-2013-0416) ¹⁰ approved Hydro One's request for the discontinuance of this account commencing in ¹¹ 2015. However, the principal accumulated in 2014, including interest, is being put ¹² forward for disposition as part of this Application.

13

The balance in Hydro One Distribution's Distribution System Code Exemption Deferral
 Account by sub-account is summarized in Table 16.

2

2.3.1 RRRP VARIANCE ACCOUNT

The treatment of the balance of the Rural or Remote Electricity Rate Protection 3 ("RRRP") Variance Account has not been within scope of Hydro One Distribution's past 4 rate applications. As a result of changes made in 2016 to the regulations relating to the 5 RRRP account, Hydro One Distribution is no longer required to maintain this account. 6 As of March 4, 2016, the IESO is responsible for distributing RRRP in accordance with 7 Ontario Regulation 52/16 (amending Ontario Regulation 442/01: Rural or Remote 8 Electricity Rate Protection). As such, Hydro One Distribution is seeking discontinuance 9 of this account. 10

11

16 17

2.3.2 DISTRIBUTION GENERATION – PROVINCIAL - VARIANCE ACCOUNT

18

Hydro One established the Distribution Generation – Provincial - Variance Account,
 consisting of separate Distribution Generation - Express Feeders and Distribution
 Generation – Other Costs accounts to record the interim funding received in respect of
 the expenditures made for these programs related to the provincially-funded portion of
 the investments.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 21 of 24

Hydro One received the Board's approval to discontinue the collection of revenue through the funding adder from the provincial rate payers on December 31, 2014. In light of the continuation of renewable distributed generation connection investments, Hydro One Distribution is not seeking disposition of the balance in this account at this time and will continue to record the costs eligible for direct benefit treatment according to Ontario Regulation 330/09.

7

8 The balance in Hydro One Distribution's Distribution Generation – Provincial – Variance
9 Account is summarized in Table 18.

2.3.3 REVENUE DIFFERENCE ACCOUNT-POLE ATTACHMENT CHARGE VARIANCE ACCOUNT

16

The Revenue Difference Account - Pole Attachment Charge Variance Account was 17 established consistent with Board direction in its Decision dated August 4, 2016, in EB-18 2015-0141. The pole attachment charge is the amount that Hydro One Distribution 19 collects from cable and telecommunications companies for connecting their overhead 20 wires to its power poles. This account was established to record the revenue difference 21 between the interim pole attachment charge and the final pole attachment charge 22 approved by the Board in its Decision. As per the decision, this account will be closed 23 after the allocated balances have been invoiced to the pole attachment customers and 24 therefore Hydro One Distribution is not seeking disposition of this account. 25

8

2.3.4 LONG TERM LOAD TRANSFER ("LTLT") RATE IMPACT MITIGATION DEFERRAL ACCOUNT

9

The LTLT Rate Impact Mitigation Deferral Account was established consistent with Board direction in its Decision on the joint application by Hydro One Networks Inc. and Hydro Ottawa Limited, dated August 18, 2016 in EB-2016-0167.

13

In the Decision, the Board approved the elimination of the load transfer arrangements between the two distributors consistent with the Board's LTLT policy as documented in the amended Distribution System Code ("DSC") of December 21, 2015. The Board also recognized that the affected Residential and General Service rate class customers moving from Hydro Ottawa to Hydro One shall receive a monthly bill credit to offset the increase in delivery charges, as prescribed in Section 6.5.4 of the DSC. Hydro One requested a deferral account to record lost revenue resulting from this rate impact mitigation plan.

In its Accounting Order of November 24, 2016, the Board directed Hydro One Distribution to establish the deferral account to record lost revenue resulting from the rate

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 23 of 24

impact mitigation plan as well as any costs involved in the set-up of such a plan effective

2.3.5 SMART GRID FUND ("SGF") PILOT DEFERRAL ACCOUNT

11

The SGF Pilot Deferral Account was established consistent with Board direction in the
 Decision issued September 23, 2016 for EB-2016-0201.

14

In the Decision, the Board approved the establishment of a deferral account for costs associated with extending the existing SGF Pilot. The Board limited the costs to those incurred to extend the pilot from October 1, 2016 to April 30, 2017 and to no more than \$1 million. In its Accounting Order of November 17, 2016, the Board directed Hydro One Distribution to establish the deferral account effective October 1, 2016.

20

In a subsequent Decision dated April 27, 2017, the Board approved Hydro One's request to extend the time period for the deferral account to July 31, 2017 to facilitate continuation of the pilot. Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 1 Schedule 1 Page 24 of 24

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 2 Schedule 1 Page 1 of 2

1	PLANNED DISPOSITION OF REGULATORY ACCOUNTS
2	
3	1. INTRODUCTION
4	
5	The purpose of this evidence is to outline the planned disposition of Hydro One
6	Distribution's Regulatory Accounts. For details on the regulatory accounts Hydro One
7	Distribution is not currently seeking recovery, refer to Section 2.3 of Exhibit F1, Tab 1,
8	Schedule 1.
9	
10	2. PLANNED DISPOSITION OF REGULATORY ACCOUNTS
11	
12	Hydro One Distribution is requesting disposition of its actual audited Regulatory Account
13	balances as at December 31, 2016, plus forecast interest for 2017 on the actual principal
14	balances as at December 31, 2016.
15	
16	It is expected that new distribution rates will be effective and implemented on January 1,
17	2018, and that the disposition of the accounts requested will commence on that date.
18	Hydro One Distribution's requested recovery of regulatory account balances totalling
19	\$30.9 million is detailed in Table 1.

Witness: Samir Chhelavda

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 2 Schedule 1 Page 2 of 2

Distribution System Code (DSC) Exemption Deferral Account	1508	9.7
Total Regulatory Accounts for Disposition		30.9

Table 1: Disposition of Re	gulatory Account	Balances (\$ Millions)
	Salatory liecount.	

2 3

1

* As documented in Exhibit F1, Tab 1, Schedule 1, page 5 the disposition of the Retail Settlement Variance Accounts excludes the RSVA – Power – Sub-Account – Global Adjustment.

4

5 With the setting of new distribution rates between 2018 to 2022, Hydro One Distribution 6 is requesting that the \$30.9 million balance be recovered in a straight-line pattern over 7 this Application's five test years, as per the schedule of annual recoveries documented in 8 Attachment 1 to this Exhibit. Requesting this balance recovery over five years aligns 9 customer needs for lower bills, the financial needs of the Company and rate impact. 10 Hydro One Distribution proposes that the balance be recovered through rate riders as 11 presented in Exhibit H1, Tab 3, Schedule 1.

1	REGULATORY ACCOUNTS REQUESTED
2	
3	1. INTRODUCTION
4	
5	This Exhibit documents Hydro One Distribution's request for the Board's approval to
6	continue existing or to establish new regulatory accounts and to discontinue certain
7	regulatory accounts.
8	
9	1.1 Requested Regulatory Accounts
10	Hydro One Distribution is seeking approval to continue or establish the following
11	accounts:
12	Pension Cost Differential Account
13	Tax Rate Changes Account
14	OEB Cost Differential Account
15	Smart Meter Entity ("SME") Charge Variance Account
16	Lost Revenue Adjustment Mechanism Variance Account ("LRAMVA")
17	Capital In-Service Additions ("ISA") Variance Account
18	Earnings Sharing Mechanism ("ESM") Deferral Account
19	Bill Impact Mitigation Variance Account
20	• Other Post-Employment Benefit ("OPEB") Cost Deferral Account
21	Long Term Load Transfer Rate Impact Mitigation Deferral Account
22	
23	The need for these accounts and the accounting and control process is described in further
24	detail in the remainder of this Exhibit.
25	

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 2 of 12

- 1.2 **Discontinued Regulatory Accounts** 1 Hydro One Distribution is not seeking continuance of the following accounts for the 2018 2 to 2022 rate setting period: 3 Rural or Remote Electricity Rate Protection ("RRRP") Variance Account; • 4 Bill Impact Mitigation Variance Account; 5 • • Revenue Offset Difference Account – Pole Attachment Charge; and 6 • Revenue Difference Account – Pole Attachment Charge. 7 8 2. DESCRIPTION OF REGULATORY ACCOUNTS REQUESTED 9 10 2.1 **Pension Cost Differential Account** 11 12 This account is a continuation of the account accepted in EB-2013-0416. 13 Hydro One Distribution proposes to continue to record differences between the OM&A 14 portion of actual pension costs recorded consistent with the actuarial assessment provided 15 by Hydro One Distribution's external actuary and the estimated pension costs approved 16 by the Board as part of this Application. The expected cause for such differences is a 17 variance in pension plan contributions driven by periodic actuarial valuations, which 18 must be performed at a minimum every three years. As such, it is not possible for Hydro 19 One Distribution to accurately predict its pension costs for the entire five-year rate setting 20 periods as it is likely that actuarial changes will occur. Such changes could be material. 21 Further details regarding this account are found in Section 2.1.3 of Exhibit F1, Tab 1, 22 Schedule 1. 23 24 2.2 **Tax Rate Changes Account** 25 This account is a continuation of the account accepted in EB-2013-0416.

26

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 3 of 12

Hydro One Distribution proposes to continue to track variances arising from legislative or
regulatory changes to tax rates or rules as compared to costs approved by the Board as
part of this Application. Further details regarding this account are found in Section 2.1.4
of Exhibit F1, Tab 1, Schedule 1.

5

6 2.3 OEB Cost Differential Account

This account is a continuation of the account that was re-established per the Board's letter
dated February 9, 2016, entitled "Revisions to the Ontario Energy Board Cost
Assessment Model".

10

Hydro One Distribution proposes to continue to track variances in annual Board
assessment costs approved in rates and the actual Board cost assessment amounts charged
to Hydro One Distribution. Further details regarding this account are found in Section
2.1.5 of Exhibit F1, Tab 1, Schedule 1.

- 15
- 16

2.4 SME Charge Variance Account

This account is a continuation of the account that was established consistent with the direction established in the Board's decision for proceeding EB-2012-0100/EB-2012-0211, dated March 28, 2013.

20

The account was established to record the variances between the monthly settlement invoice received from the IESO, including accruals, and the amount billed to the distributor's customers for the SME charge, including accruals. The effective date of the account is May 1, 2013, to October 31, 2018. Further details regarding this account are found in Section 2.1.6 of Exhibit F1, Tab 1, Schedule 1.

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 4 of 12

1 2.5 Lost Revenue Adjustment Mechanism Variance Account ("LRAMVA")

Hydro One Distribution proposes establishing Account 1568 - Lost Revenue Adjustment
Mechanism Variance Account ("LRAMVA") effective January 1, 2018, consistent with
the Board's Conservation and Demand Management ("CDM") Requirement Guidelines
for Electricity Distributors updated August 11, 2016, to reflect the LRAMVA Report
(EB-2016-0182).

7

Hydro One Distribution proposes to record the variance between the Board-approved 8 CDM adjustment to Hydro One Distribution's load forecast in relation to the 2015 to 9 2020 energy saving target and the IESO's actual verified CDM results. Since the IESO's 10 verified CDM results will be a consolidated total for Hydro One, including the CDM 11 results achieved by the Norfolk Power Distribution Inc., Haldimand County Hydro Inc., 12 and Woodstock Hydro Services Inc. ("Acquired Utilities"), Hydro One Distribution 13 proposes applying an adjustment to remove the CDM amounts of the Acquired Utilities 14 from the verified results provided for Hydro One until such time that these Acquired 15 Utilities are incorporated into Hydro One Distribution rates. 16

17

The variances recorded in this account will be put forward for disposition at the time of Hydro One Distribution's next rates rebasing application.

20

21 **2.6 Capital In-Service Additions ("ISA") Variance Account**

Hydro One Distribution proposes the establishment of a capital in-service additions variance account, effective January 1, 2018, to track the difference between the revenue requirement associated with the actual in-service capital additions and the revenue requirement associated with the Board-approved in-service capital additions.

26

Hydro One Distribution proposes to track the impact on revenue requirement of any capital in-service additions that are 98% of the Board-approved amount or less for each

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 5 of 12

year of the five-year term, on a cumulative basis. For cumulative in-service additions that are 98% of the Board-approved level or less, the associated revenue requirement impact will be computed and reported on an annual basis in the variance account. The revenue requirement associated with variances in in-service additions resulting from verifiable productivity gains will be excluded from the calculation.

6

At the end of the five-year term, Hydro One Distribution will seek disposition of the sum of the variances in each year for the benefit of customers. The variance account will be asymmetrical; should the cumulative in-service additions in any year of the five-year term exceed 98% of the cumulative Board-approved amount, no entry will be made in the variance account.

- 12
- 13

2.7 Earnings Sharing Mechanism ("ESM") Deferral Account

Hydro One Distribution proposes a new earnings sharing mechanism deferral account, effective January 1, 2018, to record any over-earnings realized during any year of the five-year term through Hydro One's distribution rates. Hydro One Distribution proposes to share with customers 50% of any earnings that exceed the regulatory return on equity reflected in the Application by more than 100 basis points in any year of the five-year term.

20

The customer share of the earnings will be adjusted for any tax impacts and will be credited to a new deferral account that will be put forward for disposition at the time of Hydro One Distribution's next rates rebasing application.

- 24
- 25

2.8 Bill Impact Mitigation Variance Account

As a result of integrating customers from the Acquired Utilities into Hydro One Distribution's existing rate classes in 2021, some customers may experience adverse total bill impacts in the test years 2021 and 2022. Hydro One Distribution proposes to mitigate Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 6 of 12

these bill impacts through the use of this account, as described in Exhibit H1, Tab 4, Schedule 1. The proposed use of this account to track mitigation costs is consistent with bill impact mitigation variance accounts, proposed and approved by the Board in proceedings EB-2007-0681, EB-2009-0096, and EB-2013-0416.

5

The costs of mitigation and related implementation costs will be tracked in this bill impact mitigation variance account. The required mitigation will commence in 2021, the year in which Hydro One Distribution proposes the integration of the Acquired Utilities, however mitigation will likely extend beyond the Application's five-year period.

10

11

2.9 Other Post-Employment Benefit ("OPEB") Cost Deferral Account

In March 2017, the Financial Accounting Standards Board ("FASB") issued an Accounting Standard's Update (ASU 2017-07) that affects the accounting for pensions and other post-employment benefits ("OPEBs") effective January 1, 2018.

15

As part of ASU 2017-07, Topic 715 – Compensation – Retirement Benefits of the US 16 GAAP Accounting Standards Codification has been amended. The amendments allow 17 only the service cost component of the net periodic pension cost and net periodic post-18 retirement benefit cost to be eligible for capitalization when applicable. For rate-setting 19 purposes, Hydro One Distribution accounts for its pension costs on a cash basis and 20 therefore this amendment is not anticipated to affect the amounts included in this 21 application. The changes to the accounting for OPEB, which Hydro One Distribution 22 accounts for on an accrual basis for rate-setting purposes, will affect this application. 23

24

The re-classification of these elements to OM&A would have an adverse impact on rates in a given year. Therefore Hydro One Distribution proposes to record the net periodic post-retirement benefit cost other than service cost that would have been classified as capital prior to the issuance of ASU 2017-07 in a deferral account effective January 1,

Updated: 2017-06-07 EB-2017-0049 Exhibit F1 Tab 3 Schedule 1 Page 7 of 12

2018. Alternatively, if the Board determines is more appropriate to recover these costs in
 2018, Hydro One requests to revise the OM&A forecast in this application.

4

2.10 Long Term Load Transfer Rate Impact Mitigation Deferral Account

This account is a continuation of the account that was established consistent with the direction in the Board's decision for proceeding EB-2016-0167, dated August 18, 2016.

7

8 The account was established to record lost revenue resulting from the rate impact 9 mitigation plan for Residential and General Service rate class customers affected by the 10 move from Hydro Ottawa to Hydro One as well as any costs involved in the set-up of 11 such a plan. These customers will receive a monthly bill credit to offset the increase in 12 delivery charges.

13

Hydro One Distribution proposes to continue to track lost revenues from the affected
customers. Further details regarding this account are found in Section 2.3.4 of Exhibit F1,
Tab 1, Schedule 1.

17

18

3.0 ACCOUNTING AND CONTROL PROCESS

19

The accounts requested above will be managed in the same manner as existing Hydro 20 One Distribution variance and deferral accounts. They will be updated monthly and 21 simple interest will be applied consistent with the Board-approved rate. Balances will be 22 reported to the Board as part of the annual reporting process. The outstanding balances, 23 whether in a debit or credit position, will be submitted for disposition approval by the 24 Board as part of a future Hydro One Distribution filing. Draft accounting orders for the 25 new accounts Hydro One Distribution is seeking to establish are presented in Appendix A 26 to this Exhibit. 27

Distribution Accounting Order – Capital ISA Variance Account

2

1

Hydro One Distribution proposes the establishment of a new "Capital In-Service Additions ("ISA") Variance Account" to record the differences between the revenue requirement associated with the actual in-service capital additions and the revenue requirement associated with the Board-approved in-service capital additions, as documented in Section 2.6 above.

8

⁹ The account will be established as Account 1508, Other Regulatory Assets – Sub-¹⁰ Account "Capital ISA Variance Account" effective January 1, 2018. Hydro One ¹¹ Distribution will record interest on any balance in the sub-account using the interest rates ¹² set by the Board. Simple interest will be calculated on the opening monthly balance of the ¹³ account until the balance is fully disposed.

14

¹⁵ The following outlines the proposed accounting entries for this variance account.

16

17

<u>USofA #</u> <u>Account Description</u>

DR/CR 1508 Other Regulatory Assets – Sub-Account "Capital ISA Variance
 Account"

20 CR/DR 4080 Distribution Services Revenue

Initial entry to record the differences between the revenue requirement associated with the actual in-service capital additions during a rate year and the revenue requirement associated with the Board-approved in-service capital additions for that year.

24

25 DR/CR 6035 Other Interest Expense

26 CR/DR 1508 Other Regulatory Assets – Sub-Account "Capital ISA Variance
 27 Account"

28 To record interest improvement on principal balance of Capital ISA variance account.
